Editorial Comment.

The San Francisco Chronicle in the
issue of December 29th has an editorial
of some length on the fact that the
Pacific Gas and Electric Company has
succeeded in selling 20 million dollars
worth of bonds to J. P. Morgan and
Company and sarcastically comments
that some people will be pained to learn
that money secured from such a source
will be expended in California. It
further goes on to state that these
bonds will in all probability be resold
to the insurance companies at a profit
and that the poor people of the country
will own them. That is all very true.
But who controls the insurance com-
panies and invests their funds but the
same J. P. Morgan and Company. It
may be that J. P. Morgan and Company
are the very wisest men that could
control the finances of this country. It
is equally certain that they do. But
considering the astonishing rate that
they have piled up private fortunes it
seems equally probable that the people
are paying to these lords of finance a
tribute compared to which the wealth
of Croesus were but a beggar's patri-
mony.

And furthermore the question that a
California corporation has been able to
finance a proposition in Wall street has
more to do with the question of
right or wrong of the financial control
of this country than if they had got
the money from Leopold of Belgium;
than if it was the price of head money
of South African savages; or whether
it has been accumulated in traffic in
slaves or by smuggling opium into
San Francisco.

In fact under present conditions it
is very hard to finance any great en-
terprise without going to J. P. Morgan
and Company as some of his friends.
In fact the recent reports show that
what prevented the great heat merger
was a failure to get the New York
bankers to furnish the necessary
amount of ready money. As Tom
Lawson long ago pointed out it is
absolutely necessary for these money
barons to control the supply. As a
consequence they control the life in-
surance companies to whom everybody
is paying his monthly portion, and the
savings banks and the great pro-
ductive industries. These things may
be all right and the best thing for the
republic, but the question that the
Pacific Gas & Electric Company has
been able to market its bonds in Wall
street has nothing whatever to do with
the case.

The Public Utilities Act, or as it is
known as the Theban Eshelman Rail-
road Commission Act, is perhaps as
important a measure as has ever been
passed by the California legislature.

It puts California in the front rank of
states that have adopted Progressive
Legislation in matters pertaining to the
regulation and control of all kinds of
public utilities. It is, in brief, an ap-
plication to all public-service corpora-
tions of the principle of State regula-
tion of railroads, and enlargement of
the powers of the State Railroad Com-
mission so as to include these new
responsibilities.

It is the intention to carry out the
purpose of the amendment adopted by
the people at the constitutional elec-
tion last October in order that the
Commission may be equal to the new
responsibilities and perform the duties
imposed upon the body by the addi-
tion of these new powers the number
has been increased from three to five.
The two new members are to be ap-
pointed by the Governor who will also
appoint their successors.

When this important Act goes into
effect it will extend the regulative
powers of the State Railroad Com-
mission to all common carriers, such as
railroads, street-car lines, express com-
panies, refrigerator and other car-
liners, steamboats and other vessels;
pipe lines, water, gas, electric, tele-
phone, telegraph, warehouse and other
public-service corporations or com-
panies.

Practically all public utilities are
embraced in the scope of the bill.

Among other provisions is one that
reverts to the Supreme Court the
right to hear appeals. It also con-
fines to that body the determination
of questions of law leaving to the
Commission the decision as to ques-
tions of fact.

The measure does not, however, vest
in the Commission the control of any
public utility whose control is vested
in any chartered city unless the people
by a majority vote so determine.
Thus the control of the Geary street
railroad will be vested in the people
of San Francisco unless the people by
a majority vote transfer it to the
Commission.

Auditor Boyle has signed the de-
mand for the money to pay for the Ham
Hall property in Cherry creek for the
completion of acquiring the rights to
the Hotel-Helby project. This act is
another step in binding the city to this
source of supply and the federal govern-
ment can hardly refuse to grant
any necessary permits to the city to
secure whatever is necessary to get
this great supply. Like a good many
other things this price of \$652,000 paid
for these properties is a good deal in
the nature of a holdup. But there
seems to be no help for it and the time
has passed for further delay.

If the incoming administration can
put this project through it will have
done an inestimable good for the city
and future generations.

Reinforced Concrete Construction From A Permanency, Cost and Fireproof Standpoint.

The use of reinforced concrete as a material for building construction is of comparatively recent origin. It has only been made possible by the great strides in the methods of manufacture of cement and steel and the development of structural engineering as a science. The greatest progress has been made during the last two centuries. Up to 1860 cast iron and timber were principally used. From 1860-1890 wrought iron took precedence only to be replaced by steel, which in turn is being superseded in many instances by the most recent material, namely, "Reinforced concrete."

The compressive strength of concrete is about 10 times its strength in tension; while steel is just as strong in tension as in compression. For equal volumes, however, steel costs about 50 times as much as concrete; its compressive strength is 30 times as great as concrete and in tension it will carry 300 times as much load. For equal loads, then, concrete would cost 6-10 as much as steel for compression and six times as much for tension. Thus it is seen that the combination of the two materials forms a new one more economical than either taken separately, i. e., the compression is taken by the concrete and the tension by the steel.

The materials of which concrete is made are always easily obtainable. Sand and stone are found in all localities and large supplies of cement and steel bars are always kept in stock, so that there are no delays depending on the rolling and fabrication of special structural shapes and details, manufacture of special shapes of ornamental terra cotta, or cutting of stone or timber to required sizes, all of which results in the more rapid construction of concrete buildings. Two prominent examples of rapid construction are the factory of the Pierce Arrow Motor Car Company in Buffalo, and the Ingalls office building in Cincinnati.

The Pierce Arrow factory, four stories high and having a floor space of 107,500 square feet, was started in October, 1909, and was ready for occupancy in ten weeks. The ground plan was 308x62 feet, with a wing 105x51 feet. It was built according to the mushroom system with columns spaced 20 feet 6 inches, carrying a load of 150, and having brick curtain walls.

The Ingalls' building represents the modern type of office buildings and is the highest concrete building that has yet been erected for this purpose, there being 16 floors. It was completed in August, 1903, 198 days after work was started. The building covers a ground area of 1068.50 1/2 feet and is 210 feet high. The loads are as follows: Ground floor 200 lbs., second floor 80 lbs., and upper floors 60 lbs. per square foot, starting 50 inches above ground. Half of this was assumed to go to the interior vents and the other half to the end walls.

The following method of construction

was adopted. After the forms for each story were built, the columns were poured one day, and the floors were placed on the day following, the time of erecting forms and pouring concrete being 10 days per story. As three tiers of forms were used, each tier was left on 20 days.

Another feature of concrete that is of importance is the fact that it gains strength with age. This property has been taken advantage of in the construction of buildings; and then after a year or two adding another story. Taking an example, suppose a four-story building is erected and is designed as such, then at the end of say, two years, the concrete will have gained sufficient strength to permit the addition of a fifth story without increasing the size of the columns. The economy of this feature is easily apparent.

Concrete has also successfully withstood fires as shown in the Baltimore and San Francisco fires. In the Baltimore fire two buildings that stand as prominent examples are the U. S. Fidelity and Guaranty Company, and the Commercial and Farmers' National Bank building. In the former, the columns and floors were of reinforced concrete and walls of brick. After the fire the concrete frame stood out as a skeleton, the brick walls for a large part having given way.

The Bank building is especially interesting, due to the fact that only the first story, including the floor of ceiling was of reinforced concrete. Above this were four floors of timber, with plaster partitions. During the fire the upper part of the building collapsed and the debris fell onto this reinforced concrete floor. Attached to the underside was ornamental plastering studded with glass globes containing lights. After the crash it was found that this plastering was not only not cracked, but none of the glass globes were broken, and after the investigation the report on this building stated that no other repairs were needed outside of cleaning.

In San Francisco at the time of the fire there was only one reinforced concrete building and that was in the course of construction. There were, however, some others in the earthquake region and several steel frame buildings fire proofed with concrete. These buildings withstood the test so well that four years after the fire there were in San Francisco alone 128 completed reinforced concrete buildings, among them the Southern Pacific Railroad Hospital costing \$550,000. To show the strong hold which concrete obtained as a result of the earthquake, where there was one concrete bridge before, there were fifty, four years after.

The report of the committee of the American Society of Civil Engineers which investigated the results of the earthquake and fire contains the following:

For columns the fire proofing that will stand up best is red brick set in

Portland cement mortar. Equal to this is a casing of solid concrete at least 4 inches thick with a mesh of reinforcing metal. The remaining examples of column failures must be laid to the failure of terra cotta tile. The writers believe, however, that it (terra cotta) is the least valuable of all materials commonly used for fire proofing. For floor construction some form of reinforced concrete is preferable to tile.

It is sometimes stated that failure is due principally to the action of a stream of cold water applied to the heated surfaces. However, two very interesting fires occurred in which water was not used, the fires being left to burn themselves out. These were the factory of the National Fireproofing Company near Washington, D. C., October 20, 1908, and the fire at Winthrop Beach, Mass., October 2, 1908, in which a number of frame buildings surrounding a partly finished concrete cottage were burned.

In the case of the Washington fire the nearest hydrant was half a mile away so that no water could be used. The whole factory was destroyed. The walls were built of terra cotta, and in practically every case, even where walls were left standing, the faces of a large percentage of the tiles were split off. An interesting feature was the fact that, in one place, a terra cotta wall had a concrete foundation. In this place the terra cotta was entirely demolished, but the concrete wall came through the fire practically unharmed.

At Winthrop Beach, Mass., two large frame hotels and several frame houses were destroyed. Eight feet away from one of these hotels there was a concrete cottage in the course of construction. The walls were 1.316 monolithic concrete and the interior of timber, of which the joints and floor boarding were in place. The doors and windows had not been closed in and the frames for them were stored in the cellar, making excellent fuel.

It is interesting to note that the fire department left these frame buildings and the concrete cottage to take care of themselves while they devoted their attention to saving adjacent frame houses. After the fire the only repairs necessary outside of replacing the timber work was the replastering of the outside of the wall next to the hotel. Otherwise the concrete was not injured. As evidence of the heat the granite curbstones on the opposite side of the street spalled off and crumbled so that they had to be replaced.

The above tests of the behaviour of concrete in actual fires should be sufficient evidence of its value as a fireproofing material.

It has been the impression among a large number of persons that reinforced concrete was much higher in cost than other materials. This, however, is not always the case, for there have been instances where concrete buildings have been built at the same

or less cost than the same building would have cost if built of brick and timber. One instance of this is in the case of the two schools at Chatham and Madison, N. J. Both are built on the same floor plan and in the Chatham school, built of brick and wood, the cornices were of wood, flashings of tin and ceilings of stamped metal to keep the cost down, but in spite of this the reinforced concrete school at Madison cost no more than that paid for the inferior structure.

Mr. E. G. Perot gives the following cost per cubic foot for reinforced concrete buildings, omitting power, heat, light, elevators and decorations.

Warehouses and Factories... 11c. to 11c.
Stores and Loft Buildings... 11c. to 17c.
Schools, Hospitals, Etc.... 15c. to 20c.

However, the first cost is not the only thing to be considered. The real cost consists of the first cost plus the cost of maintenance.

The relative costs of the three types of buildings are:

Mill Construction..... 100 - 130

Reinforced Concrete..... 128 - 143

Structural Steel..... 140 - 154

These values were obtained from 44 architects, engineers and contractors for the best of each class and show that in some cases reinforced concrete will be lower than mill construction and in practically all cases is less than steel.

Taking up the various items under maintenance separately we can get a general idea of the yearly expenses:

(1) Interest: This item varies directly with the initial cost.

(2) Taxes: Varies directly with initial cost.

(3) Insurance on building: Reinforced concrete and fire proof steel receive about the same rates. Mill buildings run from equal rates to two or three times the rate on reinforced concrete. The equal rates apply only where the rate on mill buildings is so low that no lower rate can be given. A canvass of 255 owners showed that 26.6 per cent carried no insurance, while a great many more only carried it on account of mortgages requiring it.

(4) Insurance on contents: Generally varies with the character of the building, except in some particular lines of industry that are especially hazardous.

(5) Depreciation: On account of the recent development of structural steel and reinforced concrete, values of depreciation are difficult to obtain. There is no doubt, however, that there is some depreciation in steel buildings. Most of the cost of depreciation of reinforced concrete buildings is in the roofing, doors, and other parts not of concrete; and while there is no knowledge other than the increase in the strength of concrete, it may be said that the depreciation would amount to $\frac{1}{4}$ per cent.

Kidder's Handbook gives the depreciation for Mill Construction at 1 to 1.5 per cent. Matheson's "Depreciation of Factories" puts it at 1.2 per cent.

(6) Results of Vibration: This applies only to factories and buildings where machinery is used but it is apparent from the very nature of the material that a reinforced concrete building in a reinforced concrete building.

Vibration causes "walking" of the machinery resulting in a loss of alignment of shafting and increased wear on the journal blocks and moving

parts. This increases the power necessary to operate the machines.

The savings by eliminating vibration would amount to at least \$150 a day or an annual saving of \$150. In the case of the average manufacturer it must be remembered that this does not take into account the increased efficiency of the machines which would probably equal or exceed this amount.

The experience of a button manufacturing company illustrates the desirability of concrete construction in reducing vibration. This company gives their experience as follows:

"We are running our machinery here at a high speed as we were ever able to in other buildings, and in general at higher speeds and with less waste time for adjustments and consequent repairs. I have no scientific data to furnish on this speed. It is perfectly obvious that if one can get 5 or 10 per cent more out of machinery concrete buildings have a big advantage over others."

The chief engineer of the same company writes:

"In the matter of our experience with vibration in our reinforced concrete building as compared with the vibration of the same equipment in a building of the ordinary mill construction would say:

First, the type of vibration that concerns us most is that due to very slight lack of balance in parts rotating at high speed, in distinction from the vibration that might be evident from machinery of a heavier type, due possibly to reciprocation as in heavy printing presses, or from shock as in punch press work and the like, or vibration of a machine tool due to chatter or like cause.

In our experience previous to this building we had difficulty in anchoring our machinery so that the high frequency vibration would not in a short time loosen the fastening as we call cause loss of adjustment in the machines themselves. We find this difficulty almost wholly overcome in our present concrete buildings, and further, machines standing rather high from the floor which are subject to more or less horizontal shock, we were never able in a mill construction building, even by bolting through the floor, to prevent those machines from loosening. On our present concrete floors we have no record of any one of these machines requiring even to be tightened to the floor after being installed.

As to building vibration, we never had experience with any building as free from jar, trembling, etc., as our present one, the results in all cases being a surprise to us in the elimination of these undesirable features."

(7) Light and Sanitary Qualities: An increase in the amount of light, increases the efficiency of employees. The window area in a reinforced concrete building can be made from 40 per cent to 150 per cent greater than for mill buildings. The percentage of window area for mill buildings averages from 30 to 40 per cent of the wall area; for reinforced concrete 70 to 80 per cent.

The waterproofing qualities of concrete permit frequent washing of floors and makes dampness and rotting impossible where wet processes are used. Its low conductivity results in only small variation in temperature and its homogeneity prevents drafts.

This should result in a saving of at

least 1 per cent.

(8) Vermin Losses: In the case of loss from vermin a paper goods manufacturer states that reinforced concrete saves him \$10,000 per year. In a concrete building there is no place in which rodents can live. A saving of \$100 per year is exceedingly low for any business large enough to require a concrete building.

(9) Fire Protection Value: Although a large building and its contents may be fully insured, the owner or occupant suffers by loss of reputation from his failure to fill orders, loss in efficiency of his organization due to his operatives accepting other positions during shut down and loss of new business due to inability to fill contracts.

On the other hand a fire proof building increases the confidence of employees and incidentally adds to the peace of mind of the owner. Use and occupancy insurance can be obtained at a cost of about 5 per cent on building and contents. It covers estimated profits, and other sources of income based on the legitimate use and occupancy of the building. Reinforced concrete should therefore result in a saving of at least $\frac{1}{2}$ per cent per year.

Assume a mill building costing \$100,000 and concrete 10 per cent more or \$110,000. The yearly charges are based on the above estimates.

This shows an annual saving of \$2,550 in favor of reinforced concrete which if capitalized at 6 per cent would represent a capital of \$42,500. In other words a concrete building even though it cost 10 per cent more to build would save over 2 per cent per year on all fixed charges.

Putting it differently, a concrete building can cost 50 per cent more than a mill construction building and still save money.

Before deciding on any particular type of building the above facts should be carefully considered and comparative estimates made in order to ascertain which form of construction will best fulfill the purpose for which the building is intended.

Average Cost of Insurance on Reinforced Concrete Buildings and Contents, with Sprinkler Equipment.

Agricultural Implement Factories	\$0.06
Automobile Factories045
Bakeries07
Clothing Factories06
Lithographing and Printing Establishments055
Machine Shops04
Metal Working Plants, without Sprinklers06

Risks not ordinarily open to competitive rates unless of superior construction:

Rubber Factories055
Shoe Factories05
Textile Mills05
Tobacco Factories06
Wood Working Plants07

Under this type of construction the insurance may be accepted, not only at a lower rate, but under a considerably lower valuation, probably resulting as a whole in reducing the cost of insurance from 40 to 50 per cent over the ordinary type of factory and warehouse buildings.

FOREIGN TRADE OPPORTUNITIES.

(From the Consular Reports.)

(Inquiries in which addresses are omitted are on file at Bureau of Manufactures, Washington, D. C. In applying for addresses refer to file number.)

No. 7753. Electric Clocks.—An American consular officer in a Latin-American country reports that a proposal to call for tenders for the provision and maintenance of 100 electric clocks, to be placed at various points throughout a certain city, has been remitted to a committee of the municipal council for a report. The cost is estimated at about \$21,000.

No. 7754. Chemicals and Mirrors.—A report from an American consul in the near East states that a local firm of prominent importers desires to correspond with American manufacturers and exporters with the intention of purchasing for the local market the following articles: Trichromate of potash and dihydrate of aniline, of which more than \$10,000 worth is sold annually, and alizarine, more than \$100,000 worth of which is consumed per annum, all being used in the local dyeing establishments; caustic soda, which is employed for soap manufacture to the extent of exceeding \$25,000 a year; mirrors of all kinds and sizes, the annual importation of which is estimated at \$15,000. All of these goods are at present imported from European countries, where the output is controlled by syndicates. The prices have been considerably advanced in recent years and it is presumed that American products can compete. Samples are requested, with quotations and discounts c. i. f. certain city. Correspondence should be in French or Italian.

No. 7755. Match Machinery and Supplies.—An American manufacturing firm writes to the Bureau of Manufactures that it is in receipt of a communication from one of its correspondents in South America asking to be placed in touch with American manufacturers of paper cartons and machinery and materials necessary for the manufacture of matches, in both wax and wood. Printed matter and correspondence in Spanish or French, preferably Spanish, desired.

No. 7756. Machine Shop and Engine House.—An American consul in a Latin-American country has forwarded a copy of plans and specifications covering the construction of a machine shop and engine house at certain navy yards in his district, for which bids are to be opened May 4, 1912.

No. 7759. Iron-ore Beds.—A report from an American consul states that about 700,000,000 tons of iron ore are in beds in his district and that several thousand tons are being taken out annually for German and other consumption. He writes that if the American steel trade has not made a survey and analysis of these ores he would be glad to secure samples and statements of analyses with a view to the possibility of marketing the American supply.

No. 7760. Iron Pipe and Other Materials.—An American consular officer in the Far East reports that an American has secured a very large and valuable oil and coal concession in northern China. He is prepared to proceed with the work of developing these properties and will require large quantities of iron pipe and other materials, in all

representing about \$3,000,000. He may be addressed in care of an American consular officer.

No. 7761. Insurance Agency.—A resident of a Latin-American city informs an American consul that he would like to obtain the agency for some life insurance company, and also for a fire insurance company. Correspondence may be addressed direct to the person in question.

No. 7764. Box-making Machinery.—An American consul in a European country reports that a number of fruit and nut exporters of his district are seriously considering the establishment of a plant for making wooden boxes, trays and cases needed to supply their wants for shipping purposes. The projected plant will require a complete equipment of machinery required to produce finished boxes from sawed boards. Box-making machinery also will be purchased. Catalogues and price lists are desired from American manufacturers. Correspondence in English.

No. 7765. Mineral Colors.—A manufacturer and exporter of ground and washed mineral colors, dealing chiefly in red oxide of iron and yellow ochre, informs an American consul in Spain that he desires to enter into communication with American importers of these materials. Correspondence with this merchant may be in English.

No. 7766. Tenders for Lighthouse Construction.—The Consul General of Uruguay writes to the Bureau of Manufactures that the Government of Uruguay is calling for tenders for the construction of a lighthouse in the Banco Ingles, off the coast of Uruguay, and he would like to hear from firms in the United States interested in this matter.

No. 7767. Machinery for Extraction of Crude Oil from Corn.—An American consul in a Latin-American country reports that a company in his district would like complete plans specifications and prices for machinery for extraction of crude oil from corn.

No. 7768. Water-clarification Plant.—Referring to foreign trade opportunity No. 7618 published in Daily Consular and Trade Reports for November 18, 1911, an American consular officer has forwarded supplementary information regarding the project to establish a water-clarification plant. Two business men of ample means are negotiating with the municipality in question for the water supply, and they have requested the consular officer to obtain full information relative to the most modern and efficient machinery and appliances for a water-clarifying installation capable of clarifying 5,000,000 gallons daily. Copy of the report, giving further details, can be obtained from the Bureau of Manufactures.

No. 7790. Steel Office Furniture.—A foreign business man informs an American consul that he desires to receive catalogues of steel office furniture. Prices should be quoted c. i. f. certain city.

SPECIFICATIONS FOR ELECTRICAL WIRING.

A universal specification which can be used for all classes of electrical equipment is a subject that has long been before the architects of the United States, but has never yet been solved, says Harvey E. Bloomer, elec-

trical inspector of the Milwaukee Board of Fire Underwriters, in a paper read at a recent meeting of the Milwaukee Architects' Club. The Western Association of Electrical Inspectors appointed a committee to prepare specifications—one of which could be adopted for all classes of dwellings, one for store and office buildings, and another for factories—but when submitted to the association it was decided that although great care and considerable thought had evidently been given the matter, the specifications did not meet the requirements, and it was finally decided impossible to construct a universal specification.

Inasmuch as the Western Association composed of men of ability in electrical engineering, have come to the above conclusion, I am inclined to believe that the most advisable method to adopt in making specifications is to state the number and location of lights; the kind and location of switches, the location of cutouts, the place where the service is to enter, where the meter or meters are to be located, and the kind of wiring, whether knob and tube, rigid or flexible steel conduit or moulding. State that the wiring must be neat and in a workmanlike manner and in conformity with the rules of the Board of Fire Underwriters. It would also be well to add that before the first installment is paid a letter of approval must be secured by the contractor from the Board of Fire Underwriters.

I have observed in many specifications obsolete and irrelevant terms, indicating that a general specification such as those printed in book form had been selected and filled in to suit the installation that it was intended to cover. As a consequence the specifications were lengthy, contradictory and misleading. It is this embarrassment, I am informed, that the architects are endeavoring to avoid, and consequently I suggest that the specifications be brief, explicit and free of any statements as to how the equipment should be installed excepting that it must be done in a neat and workmanlike manner, etc. By adding that the material and workmanship must meet the approval of the underwriters and conform to their rules in every respect and detail, it covers everything that you might mention and saves you considerable time and possible errors. As the underwriters' rules only take care of the capacity of wires and not the drop in voltage, it would be advisable to specify the installation of the maximum percentage of drop be specified.

Specifications are important and necessary in connection with electrical construction, yet there are numerous other very vital features which should receive close and careful attention. One is the time when the electrician is permitted to perform his work. Too often has the electrical work been installed at the same time as the plumbing and heating and frequently with the result that the electrical installation which was possibly first class and worthy of praise, has become extremely menacing, occasionally resulting in a fire, owing to having been disturbed and crossed with pipes and other objects. I would advise that the electrician be prevented from working until all other mechanics are through and the house ready for lathing. Then, after the equipment has been inspected,

you will know positively that it has not been disturbed. I would also advise that the fathoms be permitted to work only after you are assured that the equipment has been inspected and accepted. The suggestion, however, refers only to concealed knob and tube construction, as rigid steel and flexible steel conduits are not subject to the same misuses.

The underwriters' rules permit 660 watts, or twelve candle power lamps, to a circuit which the electrician takes advantage of. Frequently after the equipment is completed it is decided when fixtures are being purchased that more lights are desired in some of the rooms than originally intended and consequently the circuits become overloaded. To avoid this it might be well to specify eight lamps to the circuit as is being done in other towns, and then there will be ample capacity to add more lamps, fans, curling irons, etc. To facilitate the work of the electrician and avoid errors and disputes it would be well to furnish him a blue print upon which the location of the fixtures and switches and various devices should be designated. The symbols most favored and most prominently used in designating the kind and location of switches, brackets and fixtures and the number of lights on each are those adopted by the National Contractors' Association, which, I believe, will be pleased to furnish them on request.

With the advance of electricity for domestic purposes, the architect finds that he has new problems to solve and an ever-increasing responsibility. It is but very recently that a new appliance has been introduced that is destined to become more prominently used as the time advances, and that is the vacuum cleaner. The installation of apparatus, also flat irons and all heating appliances, should receive special attention, and an individual circuit should be installed for each, the size of wire depending upon the capacity of device.—American Contractor.

BUILDING A REPUTATION.

In building up a reputation for doing satisfactory work the contractor should see to it that he lays a good foundation in all directions. It is no stretch of the truth to say that many of those who conceive the idea that it is important to have a name and reputation to help in securing business, operate on the theory that this reputation is to come very largely from the appearance of the work when it has been completed. Occasionally when this idea is followed to its conclusion, there is a strong temptation and a giving way to the idea of doing things more for appearance sake than for any inherent quality which they may possess, in the end results in deceiving no one so much as the building contractor himself. A reputation worth having must be built on quality of work through and through and not merely on surface appearances.

Again, there is another side of the question of reputation—a side that is, perhaps, far more important, that of obtaining a reputation for doing good honest work—and that is to secure a good rating with the building material men and others from whom it may be necessary to purchase supplies. This is what is commonly termed "building up one's credit." Really, however, credit

is nothing much more than reputation, because the former is founded on the latter. If a man has collateral or security for everything that he may purchase, or has sufficient money or property to make it good, it is not so much then a matter of credit, it is simply a matter of possessing security. Real credit is founded upon a man's being trusted with materials or supplies based upon his reputation for honesty and integrity.

To secure a reputation for honesty and integrity a man must be open and aboveboard with those from whom he purchases, taking them into his confidence to the extent of explaining what he is doing, when he expects to have his money from each job and when he will make his payments. He then makes it a point to meet all bills at the times specified. If something unforeseen occurs to delay the promised payments, the builder, as soon as he is aware of the fact, should notify creditors, and by following the right path he can, in the course of time, build up a reputation among the supply dealers which will be of fully as much benefit to him as a reputation for doing good honest work.—Building Age.

CANADA'S POSTAL SERVICE.

The report for the fiscal year 1910-11 of the Postmaster-General of Canada gives data indicative of the development of the Dominion. For instance, at the end of the official year 1910 there were in operation 9534 post-offices; at the close of 1911 the number was 13,321. In ten years the addition was 3787, or more than one for every working day.

The gross revenue of the service in 1910-11 was \$12,212,952, the net revenue, \$9,146,999, which latter figure exceeded the departmental expenditure of \$7,954,270 by \$1,192,729. This is the largest apparent surplus in the record of the department, being more than double the surplus of 1909-10. The year's work included the carriage of 504,235,000 ordinary letters, nearly 50,000,000 post cards, 11,581,000 registered letters, 16,582,000 free letters, 10,648,000 second class \$5,165,000 third class and 7,612,000 fourth class packets, and 150,000 closed parcels for the United Kingdom. The increase over 1909-10 in the number of letters carried was estimated at 48,000,000.

The Postoffice in Canada, as in other countries, has gone somewhat extensively into the banker's business. The savings bank department goes back to 1868, when there were eighty-one offices authorized to receive deposits. Now there are 1151. For many years there was a fairly steady increase in the number of depositors and in deposits. The record in deposits was reached in 1908, when \$12,292,544 was received, there being then 165,691 accounts open. Last year the deposits received amounted to \$9,957,016, the number of accounts open being 147,178.

Since 1902 the withdrawals have exceeded the deposits. As a result, although the amount of interest credited to depositors has for the last four years exceeded \$1,250,000, the total amount of deposits has declined from \$47,564,000 in 1906 to \$15,350,000 in 1911.

This change is not due to any fault of the postal service. Though the rate of interest allowed has been reduced first from 4 to 3½ and then to 3 per cent, the last-named rate is the same

as the chartered banks generally allow to their small depositors. The chartered banks, however, have of late been more active in seeking deposits and in the matter of withdrawals they do their business more expeditiously than the Postoffice, they are gathering apparently much of the business that would otherwise go to swell the total of the postal bank. To meet the situation thus created an order in council was passed in February 1911, increasing the amount receivable from a depositor in one year from \$1000 in earlier years it was \$300 to \$500, and the maximum of one account from \$5000 to \$5000.

The other branch of banking activity, the remission of money by postal order and note, showed unusually large figures. Though the express companies as well as the banks are active competitors for the business, the Postoffice in this connection has for the fiscal year 1910-11 received \$17,280,000, which was rather more than double the figure of 1905. The postal note has been found handy for the transmission of small sums, as is indicated by the fact that last year 3,131,667 of them were issued, the lowest being for 20 cents and the highest for \$10. Money orders were issued to the number of 4,346,896, for \$76,611,862, and were paid to the number of 3,564,140, for \$54,297,518. In the case of the United States and Canada trade conditions help to make the transactions large. The orders issued in Canada and payable in the States amounted to \$8,112,000, while those from the United States in the Dominion aggregate \$6,617,000.—Montreal Gazette.

TO EDUCATE THE PEOPLE ON INDUSTRIAL ACCIDENT LAW.

SACRAMENTO, December 29.—A. J. Pillsbury and Willis D. Morrison, members of the State Industrial Accident Board, appointed some months ago by Governor Johnson to put into operation the industrial accident law, were in the city Wednesday consulting with the members of the State Board of Control on the matter of the expenditure of the \$15,000 fund which becomes available out of the \$50,000 appropriation made by the last Legislature, in regular session. The Board wants to use the fund for the purpose of conducting an educational campaign throughout the State upon the subject of industrial accidents and the provisions of the law protecting the men and women who labor.

RAILROAD SOLD AT AUCTION.

PLACERVILLE, Dec. 29.—The Union Trust company of San Francisco bought at public auction Wednesday the Placerville and Lake Tahoe railroad, running from Placerville to Camino, for \$527,144.58. The trust company held a mortgage on the property.

Charles F. Blandin of San Francisco, representing the minority depositors of the defunct California Safe Deposit company, made a bid of \$15,000 but it was not accepted owing to the fact that Blandin did not have enough money with him to close the deal.

With the sale of the Placerville and Lake Tahoe road, a way is opened by which the Camino, Placerville and Lake Tahoe Railroad company can purchase the road just sold. The auction sale clears the title to the road.

Firms desiring news on special classes of buildings such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

San Francisco—Apartment house, 5 story and base, reinforced concrete, \$40,000. Architect, Frank Van Trees, Lick Bldg., S. F. Owner, Frank Young. The building, while outside of the fire district, will be of reinforced concrete construction. There will be in the neighborhood of forty small two and three room apartments with connecting baths. There will be steam heat, wall beds and other conveniences. The exterior of the building will be faced with white glazed pressed brick. The plans are complete and the architect is taking figures on the work.

San Francisco—Apartment houses, 4, 3 story and base, frame, \$10,000 each. Architect, none. Owners, J. H. Berg-hausen and Metropolis Investment Co., 353 Bush St., S. F. The buildings will each contain six apartments of four and five rooms each and baths. There will be steam heat. The interior trim will be of pine with hardwood floors. The exteriors of the buildings will be covered with shiplap. The plans are in the hands of the owners and the work will be done by Day Labor.

San Francisco—Apartment house, 3 story and base, frame, \$35,000. Architects, Henry Geilfus & Son, 46 Kearny St., S. F. Owner's name withheld. The building will contain a number of well-lighted and well-arranged apartments of three and four rooms each and connecting baths. There will be pine trim and oak floors. The building will have a central heating system and all other modern conveniences. The exterior will be covered with brick veneer. The further details of the construction and the owner's name are withheld for the present. The architects are preparing the plans.

San Francisco—Apartment house, 3 story and base, frame, \$45,000. Architects, Henry Geilfus & Son, 46 Kearny St., S. F. Owner's name withheld. The building will be erected in the residence district, and will be arranged for apartments of two, three and four rooms each with baths connecting. There will be steam heat, wall beds and other conveniences. The exterior of the building will be covered with brick veneer and shiplap. The plans will be ready for figures early in the month.

San Francisco—Apartment house, 6 story and base, brick and stone, \$85,000. Architects, Henry Geilfus & Son, 46 Kearny St., S. F. Owner's name withheld. The building will contain about 24 apartments of two, three and four rooms each with connecting baths. There will be steam heat, elevator service, hot and cold running water in all rooms, vacuum cleaning system and wall beds. The interior trim will be of pine and hardwoods with oak floors. The exterior of the building will be faced with pressed brick. The working drawings are complete and figures will be taken within a week.

San Francisco—Apartment house, 3 frame, \$45,000. Architects, Henry Geilfus & Son, 46 Kearny St., S. F. Owner's name withheld. The building will contain 24 apartments and will be

erected in the residence district. There will be steam heat and wall beds. The interior trim will be of pine with some oak floors. The apartments will be arranged in suites of two, three and four rooms each with connecting baths. The working drawings are complete and figures will be taken at once.

Los Angeles, Cal.—Apartment house, 3 story and base, frame. Cost not stated. Architect, C. C. Rittenhouse, Wilcox Bldg., L. A. Owner, W. A. Hewish. The building will be 32x64 feet, and will contain 15 apartments of two and three rooms each and baths. There will be wall beds, water heaters and gas water grates. The trim will be of pine. The exterior of the building will be covered with rustic. The plans are complete and figures are being taken.

Los Angeles, Cal.—Apartment house, 4 story and base, brick and steel. Cost not stated. Architect, Robert H. Walker, Coulter Bldg., L. A. Owner, Edward Schuh. The building will be 45x128 feet, and will contain 100 rooms. The apartments will be arranged in suites of two and three rooms each with baths. There will be wall beds, steam heat, elevator service and vacuum cleaning system. The exterior of the building will be faced with pressed brick. The plans are being prepared, and when complete the work will be done by Day Labor.

Pasadena, Los Angeles Co., Cal.—Apartment house, 2 story and base, brick. Cost not stated. Architect, Alfred F. Priest, Fay Bldg., L. A. Owner, J. M. Gregory. The building will be 57½x80 feet, and will be arranged for stores on the first floor and apartments above. The second floor will contain thirteen two room apartments and five baths. There will be steam heat. The exterior of the building will be faced with pressed brick. The plans are being prepared and will go out for figures at once.

Los Angeles, Cal.—Apartment house, 3 story and base, brick. Cost not stated. Architects, Noonan & Kysor, Wright and Callender Bldg., L. A. Owner, Mrs. H. W. Little. The building will contain 55 rooms, divided into two and three room apartments with connecting baths. There will be wall beds and steam heat. The exterior of the building will be faced with pressed brick. The plans are being prepared.

San Francisco—Apartment house, 6 story and base, brick and steel, \$70,000. Architects, Welsh and Carey, Metropolis Bank Bldg., S. F. Owners, Sheely Estate. This building has been mentioned here before when the plans were first started. The working drawings are now complete and show a building containing 80 apartments of two and three rooms each with baths. There will be steam heat, wall beds and vacuum cleaning plant. The exterior of the building will be faced with pressed brick. The plans will be out for figures shortly.

Los Angeles, Cal.—Apartment house, 3 story and base, frame. Cost not stated. Architect, Fred Biren, Broadway Central Bldg., L. A. Owner, Miss Sophia Hemmingson. The building will be 32x88 and will contain one

four-room apartment, four two-room apartments and 24 single rooms. There will be steam heat. The exterior of the building will be covered with rustic. The plans are complete and figures are being taken.

Los Angeles, Cal.—Apartment house, 7 story and base. Class A construction, \$200,000. Architects, Austin and Pennell, Wright and Callender Bldg., L. A. Owners, Brainerd Co. The building will be erected at the corner of 5th St. and Grand Ave. The architects have just been commissioned to prepare the plans and the details of the construction have not been fully decided upon. The building will contain in the neighborhood of 175 rooms, and will be Class A in all points of its construction. The arrangements for the financing of the enterprise have been completed and the architects are preparing the plans.

Seattle, Wash.—Apartment house, 3 story and base, brick, \$45,000. Architect, C. Alfred Brietung, Walker Bldg., Seattle. Owner's name withheld. The building will contain in the neighborhood of 32 apartments arranged in suites of two and three rooms each and bath. There will be steam heat and wall beds. The exterior of the building will be faced with pressed brick. The plans are complete and the architect is taking figures on the construction.

Portland, Ore.—Apartment house, 3 story and base, frame, \$22,000. Architect, W. A. Carpenter, Portland. Owner, same. The building will be 44x64 feet, and will contain 54 rooms, divided into two, three and four room suites. There will be steam heat, wall beds and connecting baths. The exterior of the building will be covered with veneer pressed brick. The plans are complete and the work will be done by Day Labor.

Contracts Awarded.

Los Angeles, Cal.—Apartment house, 4 story and base, brick and steel. Cost not stated. Architects, Finch & Vogel, 234 Aliso St., L. A. Owners, Allen Finch. Contractors, United Contracting Co., 234 Aliso St., L. A. Contract price not stated.

Portland, Ore.—Apartment house, 4 story and base, brick, \$45,000. Architect, none. Owners, R. F. Wassell & Co., Seattle. Contractors, R. F. Wassell & Co., Seattle. Contract price, \$45,000.

BRIDGES AND DAMS.

Auburn, Wash.—Bridge, steel span. Cost not stated. Engineer, County Surveyor, Auburn, Wash. Owners, Kings County. This work has been mentioned here before when the Surveyor was first commissioned to prepare the plans. The working drawings have been accepted by the County Commissioners and bids for the work will be opened on January 16th. The bridge will be 240 feet long. Plans and specifications are in the hands of the County Clerk, Otto A. Case, Auburn, Wash.

Portland, Ore.—Bridge, reinforced concrete, \$77,000. Engineer, City Engineer Hurlbutt, Portland. Owners, City of Portland. The bridge will be 740 feet long including the approaches, 318 feet between the abutments. It will be 60 feet wide with a 40-foot roadway. The plans have been completed and bids will be called for shortly.

Seattle, Wash.—Bridge, reinforced

concrete, \$50,000. City Engineer Dimmock, Seattle. Owners, City of Seattle. The bridge will be 400 feet long, 32 feet above the roadway and 80 feet wide. The entire structure will be of reinforced concrete. The plans are complete and have been approved. Bids will probably be called for at once.

CHUROHES

Venice, Los Angeles Co., Cal.—Church, frame construction. Cost not stated. Architect, H. H. Patterson, O. T. Johnson Bldg., L. A. Owners, First Church of Christ Scientist. The building will be 99x62 feet. The interior will be finished in Oregon pine. There will be a warm air furnace. The exterior of the building will be covered with shingles. The plans are complete and figures are being taken.

Los Angeles, Cal.—Church, 3 story and base. Class A construction, \$500,000. Architects, Fitzmaurice & Kruecker, L. A. Owners, Trinity M. E. Church, South, L. A. This work has been mentioned here before when the architects were first commissioned to prepare the plans. The edifice is to be a novel structure, designed for an institutional church, with auditorium and three galleries seating 2500 people. Sunday school rooms, etc., besides a modern hotel on the upper floors for the young men of the congregation. The scheme is an innovation and the architectural problem a difficult one. The working drawings will be complete before the end of the month and figures will be taken on the construction.

Seattle, Wash.—Church, 2 story and base, brick and steel, \$50,000. Architects Thompson and Thompson, Maynard Bldg., Seattle. Owners, Seattle Jewish Synagogue. The building was started in 1908 and the foundation work completed. The work was stopped at that time and has now been taken up again. The structure will be 71x128 feet. The exterior will be faced with pressed brick and terra cotta. The interior will be handsomely decorated. The working drawings are complete and figures are being taken.

Contracts Awarded.

Monrovia, Los Angeles Co., Cal.—Church, frame and brick construction, \$25,000. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, First Baptist Church of Monrovia. Contractors, Perkins and Holcomb, Watts. Contract price, \$21,240. Note: This contract does not include the art glass, heating or furniture.

GARAGES.

Los Angeles, Cal.—Garage, 2 story and base, brick. Cost not stated. Architects, Train and Williams, Exchange Bldg., L. A. Owner, Judge W. R. Hervey. The building will be a private garage, and will have accommodations for several machines on the first floor and living quarters above. The exterior will be faced with cement plaster. The plans are complete and the work will be started at once.

Portland, Ore.—Garage, 1 story and base, brick, \$10,000. Architects, Roberts and Roberts, Portland. Owner, Mr. Matheson. The building will be 87x95 feet, and will contain a machine shop, salesrooms and storage space for the machines. There will be a large gasoline tank. The exterior of the building will be faced with pressed

brick. The plans are complete and the work will be done by Day Labor.

FACTORIES & WAREHOUSES.

Steger, Contra Costa Co., Cal.—Factory, nine 1-story frame buildings. Cost not stated. Architect, none. Owner, Steger Cap Works, Steger, Cal. The buildings will comprise a complete factory for this firm which engage in the manufacture of caps for all kinds of explosives. The work has been planned by the engineering department, and the work will be done under their direction.

Ravenswood, Cal.—Factory, 3 story and base, frame. Cost not stated. Architect, none. Owners, Reed's Ink Co., Head Bldg., S. F. The plans for a large three-story building for this company are complete and figures will be taken through the manager's office in this city at once. The exterior of the building will be covered with rustic or corrugated iron. The work is the first part of a new plant which is to be erected at this site.

San Francisco—Warehouse, 2 story and base, reinforced concrete, \$12,000. Architects Frye and Schasty, Monadnock Bldg., S. F. Owners, American Paint and Dry Color Co. The building will be erected near the S. P. Co.'s tracks, and has been designed for a fire proof storage house as well as the shipping headquarters for the company. There will be a freight elevator. The exterior of the building will be faced with cement plaster. The plans are complete and the architects are taking figures for the construction.

Los Angeles, Cal.—Warehouse, 5 or 6 story and base, reinforced concrete. Cost not stated. Architect, W. J. Saunders, Wright and Callender Bldg., L. A. Owner, P. W. Braun. The building will be 100x200 feet and of extra heavy construction. There will be cantilever floor construction, spiral chutes, sprinkler system and elevators. The figures will be taken at once, and both the five and six story building will be figured.

Los Angeles, Cal.—Laundry additions, 2 story and base, brick and concrete, \$20,000. Architect, W. J. Saunders, Wright and Callender Bldg., L. A. Owners, Troy Laundry Co. The work will consist of the alteration of the present building and the construction of a one and two story addition. The addition will contain the engine and boiler rooms and a stable. The new construction will be of concrete. The plans are complete and figures are being taken.

Wilmington, Los Angeles Co., Cal.—Factory building, frame and brick construction. Cost not stated. Architects, Austin and Pennell, Wright and Callender Bldg., L. A. Owners, Wilmington Brick Co. This work was mentioned here in a recent edition. The work will consist of a group of modern buildings, which are to be occupied by the Wade Art Tile and Pottery Co. The plans for this work are complete and figures will be asked for shortly.

Portland, Ore.—Warehouse and salesrooms, 7 story and base, reinforced concrete, \$600,000. Architects, Claussen and Claussen, Portland. Owners, Manufacturers Building Co., represented by W. P. Keady and W. W. Robinson, Portland. The building will cover an entire city block, and will be designed as salesrooms and storage space for

machinery manufactures. The floor loads will range from 300 to 350 pounds. The construction throughout will be fire proof. There will be track-ice facilities, large freight and passenger elevators, sprinkler system and steam heat. The exterior of the building will be faced with cement plaster and tile ornamentation. The architects are completing the working drawings and construction will be started in the early spring.

Contracts Awarded.

Seattle, Wash.—Warehouse, 3 story and base, reinforced concrete, \$40,000. Architects, Bebb and Mendel, Denny Bldg., Seattle. Owners, C. H. Lilly Co. Contractor, F. S. Misho, Globe Block, Seattle. Contract price, \$40,000.

FIRE HOUSES.

Contracts Awarded.

Portland, Ore.—Fire station, 2 story and base, brick, \$16,000. Architects, Knill Schacht and Son, Portland. Owners, City of Portland. Contractor, A. C. Meyer, Portland. Contract price, \$16,000.

FLATS.

San Francisco—Flats, 3 story and base, frame, \$5500. Architect, none. Owner, Charles W. Higgins, 1206 Shafter St., S. F. The building will contain four flats of five and six rooms each with baths. The interior trim will be of pine. There will be gas grates. The exterior of the building will be covered with shiplap. The plans are complete and the work will be done by Day Labor.

HALLS & SOCIETY BLDGS.

Sacramento, Cal.—Armory, 2 story and base, reinforced concrete, \$100,000. Architect, State Architect Diggs, Sacramento. Owners, State of California. The working drawings for the construction of this building, which has been mentioned here before, are now complete and figures will be called for at once. The construction, as stated before, will be of reinforced concrete throughout. The exterior of the building will be faced with cement plaster. Bids will be taken through the State Engineering Department.

Contracts Awarded.

Gross Valley, Nevada Co., Cal.—Lodge hall, 3 story and base, brick, \$25,000. Architect, William Mosser, Nevada Bank Bldg., S. F. Owners, Gross Valley Elks' Hall Association. Contractor, Turner, Sacramento. Contract price not stated.

Everett, Wash.—Lodge hall, 2 story and base, brick, \$25,000. Architect, W. W. Hastings, Commerce Bldg., Everett. Owners, Odd Fellows Hall Association. Contractor, Harry Graff, 4163 Rucker St., Everett. Contract price, \$22,250.

HOSPITALS.

Portland, Ore.—Hospital, 5 story and base. Class A construction, \$200,000. Architect, Robert F. Tegea, Portland. Owners, Sisters of Charity. The building will be built in the form of a cross and will cover an area of 50x200 feet. The design has been worked out in the Italian Renaissance style, the exterior to be faced with Denny-Renton paving brick and trimmed with terra cotta. There will be accommodations

for about two patients besides the nurses' quarters, chapel and operating rooms. There will be a steam heating plant. The plans will be completed about the 1st of February, and bids will be taken.

Fullerton, Orange Co., Cal.—Hospital addition, 2 story and base, reinforced concrete. Cost not stated. Architect, Charles E. Shattuck, Mason Bldg., L. A. Owners, Fullerton Hospital. The building will contain furnace room, storage space in the basement, patients' rooms on the first floor and a large operating room on the second floor. The exterior of the building will be faced with cement plaster. Plans are being prepared.

Long Beach, Los Angeles Co., Cal.—Hospital, 2 story and base, frame. Cost not stated. Architect, A. Burnside Sturges, Story Bldg., L. A. Owners, Seaside Hospital Association. The building has been mentioned in these columns before. There will be several wards, private rooms and an operating room. The exterior of the building will be covered with rustic. The plans are complete and figures are being taken.

Contracts Awarded.

Vancouver, B. C.—Hospital, 4 story and base, Class A construction, \$400,000. Architect, Robert E. Tegen, Portland. Owners, Sisters of Charity Contractors, Norton-Griffiths Steel Construction Co., London, England. Contract price, \$400,000. Note: This contract was taken on a percentage basis, and the contract price given is the amount named as the maximum cost.

HOTELS.

San Francisco—Hotel and store, 3 story and base, reinforced concrete, \$50,000. Architects, Frye and Shasty, Monadnock Bldg., S. F. Owner's name withheld. This building was mentioned here last week when the plans were being prepared. The working drawings are complete and figures are being taken. There will be one large store on the first floor and about 30 rooms and 5 baths above. The exterior of the building will be faced with cement plaster. Bids will be opened for the construction next week.

Los Angeles, Cal.—Hotel, 2 story and base, brick. Cost not stated. Architects, Dennis and Farwell, Fay Bldg., L. A. Owner, W. S. Collins. The building will be 102x120 feet. The work was mentioned here last week. The working drawings are now complete and figures are being taken. The exterior of the building will be faced with pressed brick.

Pomona, Los Angeles Co., Cal.—Hotel, 5 story and base, reinforced concrete. Cost not stated. Architect, J. F. Legg, Pomona. Owner, W. M. Avis. The architect has just been commissioned to prepare plans for this work, and other than preliminary details of the construction, little can be said at this time. The building will cover a large area and will be absolutely fireproof in construction. There will be a steam heating plant, elevators and a vacuum cleaning system. The exterior of the building will probably be faced with cement plaster. Plans will be ready for figures in the course of a month.

Los Angeles, Cal.—Hotel, 11 story and base, reinforced concrete and steel, \$150,000. Architect, Harrison Albright, Laughlin Bldg., L. A. Owner, E. P.

Clark, Consolidated Realty Bldg., L. A. The building will cover an area of 165x150 feet. A large portion of the first three stories will be used as an annex by the Broadway Department Store. The remaining space on the first floor will be devoted to the entrance and lobby of the hotel. The upper floors will be divided in 585 rooms and 200 baths. There will be steam heat, electric elevators and other conveniences. The construction throughout will be of reinforced concrete. The hotel has been leased to P. D. Lowell, who has also leased the six-story hotel building at San Diego recently erected by John D. Spreckels.

Los Angeles, Cal.—Hotel and stores, 2 story and base, brick. Cost not stated. Architect Frank M. Tyler, Union Trust Bldg., L. A. Owner, John Favella. The building will be 40x50, and will contain two stores and three rooms on the first floor and 11 rooms above. The exterior of the building will be faced with red pressed brick. The architect has completed the plans.

Bellingham, Wash.—Hotel, 7 story and base, brick and steel. Cost not stated. Architect, C. Alfred Breiting, Walker Bldg., Seattle. Owner, Leopold Schmidt. The building was started at the time when the prohibitionists secured control of the town, but work was stopped. The first floor joists have been laid. The plans for the remaining six stories are now being completed and the work will be rushed to completion. The architect states that bids will be taken at once.

LIBRARIES.

Contracts Awarded.

Salem, Ore.—Library, 2 story and base, brick and steel, \$30,000. Architect, George M. Post, Salem. Owners, City of Salem. Contractors, J. S. Winters & Co., Seattle. Contract price, \$30,000.

POST OFFICES.

Santa Barbara, Santa Barbara Co., Cal.—Postoffice, 2 story and base, brick and steel. Cost not stated. Architect, James Knox Taylor, Washington, D. C. Owners, U. S. Government. The building will cover an area of approximately 6,656 square feet, and will be of fireproof construction with the exception of the roof. The exterior will be faced with stucco, terra cotta and stone. A general contract will be let, including the heating, plumbing, electric wiring, gas piping and lighting fixtures. The plans are out for figures and bids will be opened on January 29th.

RAILROAD CONST. STATIONS AND EQUIPMENT.

Oak Park, Sacramento Co., Cal.—Freight shed, 1 story and base, frame. Cost not stated. Architect, none. Owners, Central California Traction Co., Sacramento. The plans for a large frame freight shed have been completed and the company is now receiving figures for the construction of the same. Plans and specifications can be had from the company's headquarters at Sacramento.

Seattle, Wash.—Railroad construction, \$300,000. Engineering Dept. Oregon-Washington Railroad and Navigation Co., Seattle. Owners, Oregon-Washington Railroad and Navigation

Co. The contract for wrecking the wooden bridges in certain sections of the city of Seattle has been awarded, and the announcement has been made by the company that \$500,000 will be expended during the coming summer by them in improvements in and about the city of Seattle. The exact nature of this work cannot be learned at this time.

Contracts Awarded.

Calwa, Fresno Co., Cal.—Roundhouse, 1 story, reinforced concrete, \$40,000. Engineering Dept. Santa Fe R. R. Co., L. A. Owners, Santa Fe Railroad Co. Contractor, C. A. Fellows, Central Bldg., L. A. Contract price, \$40,000.

RESIDENCES.

San Francisco—Residence, 3 story and base, brick, \$12,000. Architects, Willis Polk & Co., Merchants' Exchange Bldg., S. F. Owners, A. S. and C. S. Griffiths. The dwelling will be erected in the Marine View district and will contain about ten rooms and three baths. The interior trim will be of pine and hardwood with oak floors throughout. There will be furnace heat and open fire places. The manta's will be of tile and brick. There will be considerable tile used in the baths. The exterior of the dwelling will be faced with pressed brick. Plans are being figured.

San Francisco—Residence, 2 story, attic and base, brick, \$25,000. Architects, Frye and Shasty, Monadnock Bldg., S. F. Owner, Mr. Liebes. The dwelling has been designed for a 14-room house with several baths. The interior trim will be largely of pine and mahogany. There will be furnace heat and open fire places. The mantels will be of brick. The baths will be finished in tile. The exterior of the dwelling will be faced with pressed brick. Plans for this work are being prepared and figures will be called for before the end of this month.

San Francisco—Residence alterations and additions, \$6,000. Architect, H. H. Meyers, Kohl Bldg., S. F. Owner, Mrs. J. L. Nickel. The work will consist of the addition of a 2½ story part to the present frame dwelling and the complete alteration of the present house. There will be new interior trim, plumbing, electric work, plastering and painting. The exterior of the building will be covered with shiplap. The plans are complete and figures are being taken.

San Francisco—Residence, 2 story and base, frame, \$4,000. Architect, none. Owner, Thomas Scoble, 363 14th Ave., S. F. The dwelling will contain eight rooms and baths. The interior trim will be of pine with hardwood floors throughout. There will be furnace heat and open fire places. The mantels will be of brick or tile. The exterior of the dwelling will be covered with cement plaster on metal bath. The plans are complete and in the hands of the owner and the work will be done by Day Labor.

San Francisco—Residence, 2 story and base, frame, \$9,000. Architect, Joseph A. Leonard, Phelan Bldg., S. F. Owners, Urban Realty Co. The building will contain ten rooms and baths. There will be pine, mahogany and cedar trim, open fire places with tile and brick mantels, furnace heat and other conveniences. The floors will be of oak. The exterior of the dwelling will be covered with klinker brick ve-

neer and cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Residence, 2 story and base, frame, \$2,550. Architect, none. Owner, R. A. McWilliams, 191 Moss Ave., Oakland. The dwelling will contain seven rooms and bath. The trim will be of pine throughout. There will be open fire places with tile or brick mantels. The floors in the living room and dining room will be of oak. The exterior of the dwelling will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Bungalow, 1 story and base, frame, \$3,000. Architect, none. Owner, R. Bell, Oakland. The dwelling will contain six rooms and bath. The interior trim will be of pine with oak floors throughout. There will be furnace heat and open fire places. There will be some tile used in the bath. The exterior of the bungalow will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Residence, 2 story and base, frame, \$7,000. Architect, none. Owner, F. E. Allen, 460 34th St., Oakland. The dwelling will contain 11 rooms and several baths. The trim will be of pine with some hardwood floors. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the baths and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Pomona, Los Angeles Co., Cal.—Residences, eight, 2 story and base, frame. Cost not stated. Architect, C. E. Wolfe, Pomona. Owner, Charles Crette. The architect is completing the working drawings for a number of these handsome dwellings, which are to be erected for sale. The construction will be of cement blocks. The interior trim will be of pine and hardwoods with oak floors. The roofs will be of tin. There will be standard plumbing goods used throughout. Plans will be completed at once and the work will probably be done by Day Labor.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, \$3,000. Architect, A. H. Herrmann, 2345 Grove St., Berkeley. Owner, C. H. Rodgers. The dwelling will contain eight rooms and bath. The interior trim will be of pine and mahogany with some cedar. There will be furnace heat and open fire places. The mantels will be of brick or tile. There will be tile wainscoting in the bath. The exterior of the dwelling will be covered with shingles. The plans are complete and figures are being taken.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, \$5,000. Architect, Frank M. May, 2145 Center St., Berkeley. Owners Sinnock and Harvey. The dwelling has been mentioned here before. The plans are complete and show an attractive dwelling containing eight rooms and baths. The trim will be of pine and hardwood with oak floors throughout. There will be furnace heat and open fire places. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are being figured.

Oakland, Cal.—Residence, 2 story and base, frame, \$5,000. Architect,

none. Owner, E. K. Collins, 825 55th St., Oakland. The dwelling will contain eight rooms and two baths. The interior trim will be of pine and oak. The floors throughout the first story will be of hardwood. There will be furnace heat and open fire places. The mantels will be of brick. There will be tile in the baths. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are being prepared and when complete the work will be done by Day Labor.

Oakland, Cal.—Bungalow, 1½ story and base, frame, \$2,500. Architect, none. Owner, Walter Gray, 379 E. 11th St., Oakland. The dwelling has been designed for a six room house. The interior trim will be of pine with oak floors. There will be coal grates and brick mantels. The exterior of the dwelling will be covered with shingles. The plans are complete and the owner is taking figures.

Berkeley, Alameda Co., Cal.—Bungalow, 1 story and base, frame, \$10,000. Architect, J. R. Hamilton, Kohl Bldg., S. F. Owners, Alpha Beta Sorority. The plans for this building, which has been mentioned here before, are now complete and have been put out for figures. There will be a number of living rooms, baths and social hall in the building. The structure will be heated by a furnace. The exterior will be covered with shingles.

Oakland, Cal.—Residence, 2 story and base, frame, \$10,000. Architect, A. Merrill Bowser, 1002½ Broadway, Oakland. Owner, George Samuels. The dwelling has been designed for a ten room house with all modern conveniences. There will be furnace heat, pine and mahogany trim and open fire places. The mantels will be of brick. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Fresno, Fresno Co., Cal.—Residence, 1½ story and base, frame, \$6,000. Architect, Henry F. Starbuck, Fresno. Owner, Mrs. Maude I. Pettus. The dwelling will follow the Craftsman style and will be handsomely finished in hardwoods and pine. There will be furnace heat and open fire places. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and figures will be called for shortly.

Fresno, Fresno Co., Cal.—Residence, 2 story and base, frame, \$5,000. Architects, A. C. Swartz & Son, Fresno. Owner, B. A. Harvey. The dwelling will contain 10 rooms and 3 baths. The trim will be of pine and hardwoods with oak floors throughout. There will be open fire places and brick mantels. The baths will be wainscotted with tile. The exterior of the dwelling will be covered with shiplap. The plans are nearly ready for the contractors.

Los Angeles, Cal.—Residence, 2 story and base, frame. Cost not stated. Architect, J. Martyn Haenke, Central Bldg., L. A. Owner, C. Tuft. The dwelling has been designed for a fifteen room house with several baths. The interior trim will be of hardwoods. There will be furnace heat and open fire places. The baths will be tiled. The mantels will be of brick or tile. The exterior of the dwelling will be covered with cement plaster. The plans are being prepared.

Los Angeles, Cal.—Residence, 2 story and base, frame, \$12,000. Architect, Frank M. Tyler, Union Trust Bldg., L. A. Owner, J. B. Althouse. The dwell-

ing will follow the Colonial style and will contain ten rooms and three bath rooms. There will be oak and mahogany trim, oak floors, tile in the baths and tile mantels. The dwelling will be heated by a warm air furnace. The exterior will be covered with cement plaster and shingles. The plans are complete and the work will be done by Day Labor.

—SCHOOLS—

San Diego, Cal.—School, 1 and 2 story and base, brick, \$200,000. Architects, Quayle Bros. and Cressey, Granger Bldg., San Diego. Owners, City of San Diego. There will be three buildings, one 2-story and two 1-story structures. These buildings will be faced with granite and trimmed with art stone. There will be maple doors throughout. The heating system will be steam. The plans are complete and figures will be called for on January 12th.

Santa Ana, Orange Co., Cal.—School, group of brick and concrete buildings, \$225,000. Architect, A. Burnside Sturges, Story Bldg., L. A. Owners, Santa Ana School District. The architect has just been selected to prepare the plans for the group of buildings for the new Polytechnic High School. The bonds for the work have just been voted. Details of the construction of these buildings will be given later.

Montesano, Wash.—School, 2 story and base, brick, \$50,000. Architect, Watson Vernon, Aberdeen. Owners, Montesano School District. The architect has just been commissioned to prepare the plans for a new high school building, and will complete the working drawings in the course of the next three weeks. The building will contain eight class rooms, auditorium and principal's office. There will be a steam heating system. The exterior of the building will be faced with pressed brick.

Cannondale, Wash.—School, 2 story and base, brick and steel, \$80,000. Architect, Robert C. Swett, Walla Walla. Owners, Cannondale School District. The building will be designed for a high school, and will contain 14 class rooms, auditorium and teachers' rooms and a modern science department. There will be steam heat and a ventilating system. The exterior of the building will be faced with pressed brick and terra cotta. The working drawings are being prepared.

SEWERS, STREET WORK AND WATER SYSTEMS

Pasadena, Los Angeles Co., Cal.—Garbage incinerator, \$40,000. Engineer, City Engineer Pasadena. Owners, City of Pasadena. A special bond election has been called for February 7th, at which time \$40,000 worth of bonds will be voted for the construction of a modern incineration plant.

Contracts Awarded.

Paton, San Bernardino Co., Cal.—Power plant, reinforced concrete, \$12,000. State Engineering Dept., Sacramento. Owners, State of California. Contractor, F. M. Walton, 434 Estrella Ave., Hollywood. Contract price, \$11,445.

Seattle, Wash.—Water tank, reinforced concrete and steel. Engineer, Condon, University of Washington. Owners, University of Washington. Contractors, Chicago Bridge and Iron Works, care of the Puget Sound Bridge

and Dredging Co., Central Bldg., Seattle. Contract price, \$8,950.

North Yakima, Wash.—Sewers, storm water system, \$50,000. City Engineer of North Yakima. Owners, City of North Yakima. Contractor, International Contracting Co., Central Bldg., Seattle. Contract price, \$42,556.

Ellensburg, Wash.—Water system, \$150,000. Engineer, City Engineer of Ellensburg. Owners, City of Ellensburg. Contractors, International Contracting Co., Central Bldg., Seattle. Contract price, \$150,000.

STORE.

San Francisco—Stores and lofts, 3 story and base, reinforced concrete, \$30,000. Architect, Sylvain Schnaitacher, First National Bank Bldg., S. F. Owners, Union Trust Co. The building has been designed for two stores on the first floor and large light lofts above. The exterior of the building will be faced with cement plaster. The plans are complete and figures are being taken.

San Francisco—Stores and lofts, 2 story and base, brick and steel, \$25,000. Architect, Benj. G. McDougall, Sheldon Bldg., S. F. Owner, E. A. Cutter. The building has been mentioned in these columns before. There will be a large retail store on the first floor and lofts above. There will be elevator service. The exterior will be faced with pressed brick. The plans are complete and figures are being taken.

San Francisco—Stores and lofts, 6 story and base, masonry construction, \$75,000. Architects, Henry Geiffuss and Son, 46 Kearny St., S. F. Owner's name withheld. The building will be erected in the Down Town District, and will be equipped with elevator service, automatic sprinklers, sidewalk lifts and all other modern appliances found in structures of this nature. The architects have just been commissioned to prepare plans for this work, and further details of the construction will be given as the plans progress.

San Francisco—Stores and lofts, 6 story and base, steel and brick, \$75,000. Architects, MacDonald and Applegarth, Call Bldg., S. F. Owner, Charles Holbrook. The building will be erected near the present wholesale district. There will be a complete steel frame with walls of concrete, faced with terra cotta. The mechanical equipment will include steam heat and elevators. The plans are being prepared and construction will be started as soon as the drawings can be completed.

Los Angeles, Cal.—Stores and lofts, 5 story and base. Class A construction. Cost not stated. Architect Anton Rief, Higgins Bldg., L. A. Owners, Schumacher Estate. The building will be 26x141, and will contain stores on the first floor and lofts above. There will be a complete steel frame, with concrete walls and pressed brick facing. The plans are being prepared, and when complete the building will be erected by Day Labor. Kenneth E. Preuss, Exchange Bldg., Will have charge of the construction.

San Diego, Cal.—Stores, offices and rooms, two, 6-story and base, reinforced concrete buildings. Cost not stated. Architect, Harrison Albright, Laughlin Bldg., L. A. Owner, John D. Spreckels. The plans for these two buildings are being rapidly completed and figures will be taken before the end of this month. The construction

will be of reinforced concrete throughout, with the exteriors faced with cement plaster. There will be passenger, freight and sidewalk elevators.

Los Angeles, Cal.—Store alterations, \$50,000. Architects, Eisen and Son, Wilcox Bldg., L. A. Owner, John Brink. The work will include the alteration of the first and second floors of a brick building into a modern cafe. There will be mahogany fixtures, marble and tile floors, electric work, art glass and plumbing. The plans are being prepared.

SEALED PROPOSALS.

CONSTRUCTING BUILDING.

(Bids close Jan. 15.)

SEALED proposals will be received at the Indian Office until January 15, 1912, for furnishing materials and labor for the erection of an addition to a stone dormitory at the Fort Hall Indian School, Idaho, in strict accordance with the plans, specifications and instructions to bidders, which may be examined at the Indian Office, Washington D. C., the office of the Supervisor of Construction, Denver, Colo., and at the school. For further information apply to the Superintendent of the Fort Hall Indian School, Rossfork, Idaho.

PROPOSALS FOR VACUUM CLEANERS.

(Bids close Jan. 10.)

OFFICE of the Board of Public Works of the City and County of San Francisco.—Sealed proposals will be received at the office of the said Board of Public Works, tenth floor, David Hewes Building, 995 Market street, between the hours of 2 o'clock p. m. and 2 o'clock p. m. on Wednesday, the 10th day of January, 1912, for doing the following work, to wit:

The installation of a vacuum cleaning system in the Girls' High School Building.

PROPOSALS FOR HARDWARE.

(Bids close Jan. 12.)

OFFICE of the Board of Public Works of the City and County of San Francisco.—Sealed proposals will be received at the office of the said Board of Public Works, tenth floor, David Hewes Building, 995 Market street, between the hours of 10 o'clock a. m. and 11 o'clock a. m. on Friday, the 12th day of January, 1912, for furnishing and delivering to the City and County of San Francisco, the following materials, to wit:

The necessary hardware for the City and County Jail Building, located on Washington street, between Montgomery and Kearny streets.

PROPOSALS FOR ELECTRIC WORK.

(Bids close Jan. 10.)

OFFICE of the Board of Public Works of the City and County of San Francisco.—Sealed proposals will be received at the office of the said Board of Public Works, tenth floor, David Hewes Building, 995 Market street, between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 10th day of January, 1912, for doing the following work, to wit:

The electric work of the Girls' High School Building.

CONSTRUCTING BUILDING.

(Bids close Jan. 29.)

BUILDING, ETC.—Treasury Depart-

ment, Office of the Supervising Architect, Washington, D. C.—Sealed proposals will be received in this office until 3 o'clock p. m. on the 29th day of January, 1912, and then opened for the construction, including plumbing, gas piping, heating apparatus, electric conduits and wiring and lighting fixtures, of a two story and basement building of approximately 6,565 square feet of ground area, stucco, faced with stone and terra cotta trimming and fire proof construction, except the roof, for the United States Postoffice at Santa Barbara, California, in accordance with the drawings and specifications, copies of which may be obtained from the custodian of the site at Santa Barbara, Cal., or at this office, at the discretion of the Supervising Architect, JAMES KNOX TAYLOR, Supervising Architect.

PROPOSALS FOR PLUMBING.

(Bids close Jan. 2.)

PLUMBING—Quartermaster's Office, U. S. Army, Fort George Wright, Wash.—Sealed proposals, in triplicate, subject to the usual conditions, will be received at this office until 11 o'clock a. m. Tuesday, January 2, 1912, and then opened in the presence of attending bidders, for completing the installation of the plumbing system in the annex to hospital building No. 32, at Fort George Wright, Wash., including all items pertaining to and necessary in the entire completion of the work as specified in the plans and specifications and not heretofore installed. The principal items of the work to be performed consist of furnishing and installing all the flooring and wainscoting in the dormitory lavatory and the sergeants' lavatory, second floor, and all plumbing fixtures, marble partitions, the doors and wainscoting in the dormitory lavatory, attic floor, including all necessary alterations in the present arrangement of unfinished work and all unfinished items pertaining to the plumbing system necessary for the proper completion of same. Bidders should observe the provision of paragraph 8 of the general specifications for plumbing buildings and state in proposal the name of manufacturer of the plumbing fixtures on which proposal is based. Proposal must be accompanied by guaranty in accordance with paragraphs 20, 21, 22 and 23 of the general instructions to bidders. Instructions to bidders, blank proposals, plans and specifications and full information in regard to the work required will be furnished on application at this office. The Government reserves the right to reject any or all proposals or any part thereof. Proposals should be inclosed in sealed envelope indorsed "Proposals for Plumbing Hospital Annex" and addressed to the undersigned. DONALD D HAY, first lieutenant, 25th infantry, quartermaster.

CONSTRUCTING STEEL DREDGE.

(Bids close Feb. 29.)

STEEL DREDGE—U. S. Engineer Office, 802 Couch Building, Portland, Ore.—Sealed proposals for constructing steel snagging suction dredge Colonel P. S. Miens will be received here until 12 m. February 29, 1912, and then publicly opened. Information on application. JAY J. MORROW, major, engineers.

FURNISHING CANAL SUPPLIES.

(Bids close Jan. 10.)

CANAL. CIRCULAR 668-B.—Proposals for Cresented and Untreated Piles.—Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washington, D. C., until 2:30 p. m. January 10, 1912, at which time they will be opened in public, for furnishing the above-mentioned articles. Blanks and general information relating to this circular (No. 668-B) may be obtained from this office or the office of the assistant purchasing agent, 1086 North Point street, San Francisco, Cal. F. C. BOGGS, Major, corps of engineers, U. S. army, general purchasing officer.

FURNISHING HOISTS AND DERRICKS.

(Bids close Jan. 10.)

HOISTS AND DERRICKS.—Department of the Interior, United States Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service, Boise, Idaho, until 2 o'clock p. m. January 10, 1912, for furnishing four electric derrick hoists and four stiff leg derricks for the Boise project, Idaho. For particulars address the U. S. Reclamation Service, Boise, Idaho, or Washington, D. C. F. H. NEWELL, director.

HIGH PRESSURE STEAM LINES.

(Bids close Jan. 15.)

NOTICE is hereby given that sealed bids will be received by the Board of Supervisors of the County of Los Angeles, State of California, up to 2 o'clock p. m. of January 15, 1912, for furnishing and installing a high pressure steam line and return line connecting the Los Angeles County Hospital with the Juvenile Detention Home, in the City of Los Angeles, in accordance with specifications on file in the office of the Board of Supervisors and open to the inspection of bidders. Copies of said specifications may be obtained at the office of the said Board of Supervisors. H. J. LELANDE, County Clerk.

CONSTRUCTING BRIDGES.

(Bids close Jan. 8.)

NOTICE is hereby given that sealed bids will be received by the Board of Supervisors of the County of Los Angeles, State of California, up to 2 o'clock p. m. of January 8, 1912, for furnishing all labor and materials necessary for the construction of a concrete bridge across Sawpit Wash on Wild Rose avenue in the Duarte Road District, in said county and State.

Said work is to be done in accordance with plans and specifications on file in the office of the Board of Supervisors, of said county, and bidders are referred to said plans and specifications for further information. H. J. LELANDE, County Clerk.

VACUUM CLEANING SYSTEM.

(Bids close Jan. 15.)

NOTICE is hereby given that sealed bids will be received by the Board of Supervisors of the County of Los Angeles, State of California, up to 2 o'clock p. m. of January 15, 1912, for furnishing and installing a vacuum cleaning system in the Los Angeles County Hospital on Mission Road, in

the City of Los Angeles, in accordance with plans and specifications on file in the office of the Board of Supervisors and open to the inspection of bidders. Copies of said plans and specifications may be obtained at the office of the said Board of Supervisors. H. J. LELANDE, County Clerk.

PROPOSALS FOR GAS PLANT.

(Bids close Jan. 18, 1912.)

The building will contain about 60 apartments of two, three and four rooms each with connecting baths. There will be steam heat, elevator service, hot and cold running water in all rooms, vacuum cleaning system and wall beds. The interior trim will be of pine and hardwoods with oak floors. The exterior of the building will be faced with pressed brick. The working drawings are complete and figures will be taken within a week.

Apartment House—2 story and base, frame, \$45,000. San Francisco. Architects, Henry Gellfuss & Son, 46 Kearny St., S. F. Owner's name withheld. The building will contain 24 apartments and will be erected in the residence

district. There will be steam heat and wall beds. The interior trim will be of pine with some oak floors. The apartments will be arranged in suites of two, three and four rooms each with connecting baths. The working drawings are complete and figures will be taken at once.

Factory—3 story and base, frame. Cost not stated. Ravenswood, Cal. Architect, none. Owners, Red's Ink Co., Head Bldg., S. F. The plans for a large three-story building for this company are complete and figures will be taken through the manager's office in this city at once. The exterior of the building will be covered with rustic or corrugated iron. The work is the first part of a new plant which is to be erected at this site.

Warehouse—2 story and base, reinforced concrete, \$75,000. San Francisco. Architects, Frye and Schasty, Monadnock Bldg., S. F. Owners, American Paint and Dry Color Co. The building will be erected near the S. P. Co.'s tracks, and has been designed for a fireproof storage house as well as the shipping headquarters of the company. There will be a freight elevator. The exterior of the building will be faced with cement plaster. The plans are complete and the architects are taking figures for the construction.

Apartment House—6 story and base, brick and steel, \$70,000. San Francisco. Architects, Welsh and Carey, Metropolis Bank Bldg., S. F. Owners, Shely Estate. This building has been mentioned here before when the plans were first started. The working drawings are now complete and show a building containing 80 apartments of two and three rooms each with baths. There will be steam heat, wall beds and vacuum cleaning plant. The exterior of the building will be faced with pressed brick. The plans will be out for figures shortly.

Flats—3 story and base, frame, \$5,500. San Francisco. Architect, none. Owner, Charles W. Higgins, 1306 Shafter St., S. F. The building will contain four flats of five and six rooms each with baths. The interior trim will be of pine. There will be gas grates. The exterior of the building will be covered with shiplap. The plans are complete and the work will be done by Day Labor.

Hotel and Store—2 story and base, reinforced concrete, \$30,000. San Francisco. Architects, Frye and Schasty, Monadnock Bldg., S. F. Owner's name withheld. This building was mentioned here last week when the plans were being prepared. The working drawings are complete and figures are being taken. There will be one large store on the first floor and about thirty rooms and five baths above. The exterior of the building will be faced with cement plaster. Bids will be opened for the construction next week.

Residence—3 story and base, brick, \$12,000. San Francisco. Architects, Willis Polk & Co., Merchants' Exchange Bldg., S. F. Owners, A. S. and C. S. Griffiths. The dwelling will be erected in the Marine View District, and will contain about ten rooms and three baths. The interior trim will be of pine and hardwood with oak floors throughout. There will be furnace heat and open fireplaces. The mantels will be of tile and brick. There will be considerable tile used in the baths. The exterior of the dwelling will be faced with pressed brick. Plans are being prepared.

Residence—2 story and base, brick, \$25,000. San Francisco. Architects, Frye and Schasty, Monadnock Bldg., S. F. Owner, Mr. Liebes. The dwelling has been designed for a 14-room house with several baths. The interior trim will be largely of pine and mahogany. There will be furnace heat and open fireplaces. The mantels will be of brick. The baths will be finished in tile. The exterior of the dwelling will be faced with pressed brick. Plans for this work are being prepared and figures will be called for before the end of this month.

Residence Alterations and Additions—\$5,000. San Francisco. Architect, H. H. Meyers, Kohl Bldg., S. F. Owner, Mrs. J. L. Nickel. The work will consist of the addition of a 2½ story part to the present frame building and the complete alteration of the present house. There will be new interior trim, plumbing, electric work, plastering and painting. The exterior of the building will be covered with shiplap. The plans are complete and figures are being taken.

Residence—2 story and base, frame, \$1,000. San Francisco. Architect, none. Owner, Thomas Scoble, 363 14th Ave., S. F. The dwelling will contain eight rooms and baths. The interior trim will be of pine with hardwood floors throughout. There will be furnace heat and open fireplaces. The mantels will be of brick or tile. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and in the hands of the owner and the work will be done by Day Labor.

Residence—2 story and base, frame, \$9,000. San Francisco. Architect, Joseph A. Leonard, Phelan Bldg., S. F. Owners, Urban Realty Co. The building will contain ten rooms and baths. There will be pine, mahogany and cedar trim, open fire places with tile and brick mantels, furnace heat and other conveniences. The floors will be of oak. The exterior of the dwelling will be covered with klinker brick veneer and cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Stores and Lofts—3 story and base, reinforced concrete, \$30,000. San Francisco. Architect, Sylvain Schnitzler, First National Bank Bldg., S. F. Owners, Union Trust Co. The building has been designed for two stores on the first floor and large light lofts above. The exterior of the building will be faced with cement plaster. The plans are complete and figures are being taken.

Stores and Lofts—2 story and base, brick and steel, \$25,000. San Francisco. Architect, Benj. G. McDougall, Sheldon Bldg., S. F. Owner, E. A. Cutter. The building has been mentioned in these columns before. There will be a large retail store on the first floor and lofts above. There will be elevator service. The exterior will be faced with pressed brick. The plans are complete and figures are being taken.

Stores and Lofts—2 story and base, mill construction, \$75,000. San Francisco. Architects, Henry Gelfand and Son, 46 Kearny St., S. F. Owner's name withheld. The building will be erected in the Down Town District and will be equipped with elevator service, automatic sprinklers, side-walk lifts and all other modern appliances found in structures of this nature. The architects have just been commissioned to

prepare plans for this work, and further details of the construction will be given as the plans progress.

Stores and Lofts—6 story and base, steel and brick, \$15,000. San Francisco. Architects, MacDonald and Applegate, Call Bldg., S. F. Owner, Charles Holbrook. The building will be erected near the present wholesale district. There will be a complete steel frame with walls of concrete faced with terra cotta. The mechanical equipment will include steam heat and elevators. The plans are being prepared and construction will be started as soon as the drawings can be completed.

OAKLAND AND ALAMEDA

Residence—2 story and base, frame, \$2250. Oakland, Cal. Architect, none. Owner, R A McWilliams, 191 Mass Ave., Oakland. The dwelling will contain seven rooms and bath. The trim will be of pine throughout. There will be open fire places with tile or brick mantels. The floors in the living room and dining room will be of oak. The exterior of the dwelling will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Hungalov—1 story and base, frame, \$3,000. Oakland, Cal. Architect, none. Owner, R Bell, Oakland. The dwelling will contain six rooms and bath. The interior trim will be of pine with oak floors throughout. There will be furnace heat and open fire places. There will be some tile used in the baths. The exterior of the hungalov will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Hungalov—1 story and base, frame, \$19,000. Berkeley, Alameda Co., Cal. Architect, J. R. Hamilton, Kohl Bldg., S. F. Owners, Alpha Beta Sorority. The plans for this building, which has been mentioned here before, are now complete and have been put out in figures. There will be a number of living rooms, baths and social hall in the building. The structure will be heated by a furnace. The exterior will be covered with shingles.

Residence—2 story and base, frame, \$10,000. Oakland, Cal. Architect, A. Merrill Bowser, 1002 1/2 Broadway, Oakland. Owner, George Samuels. The dwelling has been designed for a ten-room house with all modern conveniences. There will be furnace heat, pine and mahogany trim and open fire places. The mantels will be of brick. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Residence—2 story and base, frame, \$3,000. Oakland, Cal. Architect, none. Owner, E. K. Collins, 255 5th St., Oakland. The dwelling will contain eight rooms and two baths. The interior trim will be of pine and oak. The floors throughout the first story will be of hardwood. There will be furnace heat and open fire places. The mantels will be of brick. There will be tile in the baths. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are being prepared and when complete the work will be done by Day Labor.

Bungalow—1½ story and base, frame, \$2,500. Oakland, Cal. Architect, none. Owner, Walter Grey, 370 E. 14th St. Oakland. The dwelling has been designed for a six room house. The interior trim will be of pine with oak floors. There will be coal grates and brick mantels. The exterior of the dwelling will be covered with shingles. The plans are complete and the owner is taking figures.

Residence—2 story and base, frame, \$3,000. Berkeley, Alameda Co., Cal. Architect, A. H. Herrmann, 2245 Grove St., Berkeley. Owner, C. H. Rodgers. The dwelling will contain eight rooms and bath. The interior trim will be of pine and mahogany with some cedar. The floors will be of oak. There will be furnace heat and open fire places. The mantels will be of brick or tile. There will be tile wainscoting in the bath. The exterior of the dwelling will be covered with shingles. The plans are complete and figures are being taken.

Residence—2 story and base, frame, \$5,000. Berkeley, Alameda Co., Cal. Architect, Frank M. May, 2145 Center St., Berkeley. Owners, Sinner and Harvey. The dwelling has been mentioned here before. The plans are complete and show an attractive dwelling containing eight rooms and baths. The trim will be of pine and hardwood with oak floors throughout. There will be furnace heat and open fire places. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are being figured.

Residence—2 story and base, frame, \$7,500. Oakland, Cal. Architect, none. Owner, F. E. Allen, 460 34th St., Oakland. The dwelling will contain eleven rooms and several baths. The trim will be of pine with some hardwood floors. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the baths and in the kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

MARIN, CONTRA COSTA AND SONOMA COUNTIES.

Factory—Nine 1-story frame buildings. Cost not stated. Stege, Contra Costa Co., Cal. Architect, none. Owner, Stege Cap Works, Stege, Cal. The buildings will compose a complete new factory for this firm which engage in the manufacture of caps or all kinds of explosives. The work has been planned by the engineering department, and the work will be done under their direction.

LIABILITY LAW AMENDED.

SACRAMENTO. December 19.—The Roseberry employers' liability bill, providing for the extension of the powers of the State Industrial Accident Board, and requiring the submission of reports of all accidents to employees to the Board within thirty days after their occurrence, caused a sharp debate in the Assembly.

An amendment introduced by Assemblyman George H. Harlan of Sausalito exempting farmers, dairymen, agriculturists, horticulturists, poultrymen and domestic laborers, was adopted. Assemblymen Joel and Telfer, who introduced the Roseberry bills, vigorously opposed the amendment on the ground that its enactment would constitute class legislation and would be unconstitutional. The vote was 37 to 34.

LOS ANGELES AND SOUTHERN CALIFORNIA.

Apartment House—3 story and base, frame. Cost not stated. Los Angeles, Cal. Architect, C. C. Littlehouse, Wilcox Bldg., L. A. Owner, W. A. Hewish. The building will be 32x84 feet, and will contain 15 apartments of two and three rooms each and baths. There will be wall beds, water heaters and gas water grates. The trim will be of pine. The exterior of the building will be covered with rustic. The plans are complete and figures are being taken.

Apartment House—1 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architect, Robert H. Walker, Coulter Bldg., L. A. Owner, Edward Schuh. The building will be 45x128 feet, and will contain 100 rooms. The apartments will be arranged in suites of two and three rooms each with baths. There will be wall beds, steam heat, elevator service and vacuum cleaning system. The exterior of the building will be faced with pressed brick. The plans are being prepared, and when complete the work will be done by Day Labor.

Apartment House—2 story and base, brick. Cost not stated. Placentia, Los Angeles Co., Cal. Architect, A. Fred P. Priest, Fay Bldg., L. A. Owner, J. M. Gregory. The building will be 57x128 80 feet, and will be arranged for stores on the first floor and apartments above. The second floor will contain 13 two-room apartments and five baths. There will be steam heat. The exterior of the building will be faced with pressed brick. The plans are being prepared and will go out for figures at once.

Apartment House—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Nounan and Kysor, Wright and Callender Bldg., L. A. Owner, Mrs. H. W. Little. The building will contain 55 rooms divided into two and three room apartments with connecting baths. There will be wall beds and steam heat. The exterior of the building will be faced with pressed brick. The plans are being prepared.

Postoffice—2 story and base, brick and steel. Cost not stated. Santa Barbara, Santa Barbara Co., Cal. Architect, James Knox Taylor, Washington, D. C. Owners, U. S. Government. The building will cover an area approximately 6,656 square feet, and will be of fireproof construction with the exception of the roof. The exterior will be faced with stucco, terra cotta and stone. A general contract will be let, including the heating, plumbing, electric wiring, gas piping and lighting fixtures. The plans are out for figures and bids will be opened on January 29.

Church—Frame construction. Cost not stated. Venice, Los Angeles Co., Cal. Architect, H. H. Patterson, O. T. Johnson Bldg., L. A. Owners, First Church of Christ Scientist. The building will be 99x62 feet. The interior will be finished in Oregon pine. There will be a warm air furnace. The exterior of the building will be covered with shingles. The plans are complete and figures are being taken.

Church—8 story and base. Class A construction, \$500,000. Los Angeles, Cal. Architects, Fitzhugh & Krueker, L. A. Owners, Trinity M. E. Church, South, L. A. This work has been mentioned here before when the architects were first commissioned to pre-

pare the plans. The building will be erected at the corner of 5th St. and Grand Ave. The architects have just been commissioned to prepare the plans. The edifice is to be a novel structure designed for an institutional church, with auditorium and three galleries seating 2500 people, Sunday school rooms, etc. Besides a modern hotel on the upper floors for the young men of the congregation. The scheme is an innovation, and the architectural problem a difficult one. The working drawings will be complete before the end of the month, and figures will be taken on the construction.

Warehouse—5 or 6 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architect, W. J. Saunders, Wright and Callender Bldg., L. A. Owner, P. W. Braun. The building will be 100x200 feet, and of extra heavy construction. There will be cantilever floor construction, spiral box chutes, sprinkler system and elevators. The figures will be taken at once, and both the five and six story building will be figured.

Hotel—2 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Dennis and Farwell, Fay Bldg., L. A. Owner, W. S. Collins. The building will be 102x120 feet. The work was mentioned here last week. The working drawings are now complete and figures are being taken. The exterior of the building will be faced with pressed brick.

Hotel—5 story and base, reinforced concrete. Cost not stated. Pomona, Los Angeles Co., Cal. Architect, J. P. Leeg, Pomona, Cal. Owner, W. M. Avis. The architect has just been commissioned to prepare plans for this work, and other than preliminary details of the construction little can be said at this time. The building will cover a large area and will be absolutely fireproof in construction. There will be a steam heating plant, elevator and vacuum cleaning system. The exterior of the building will probably be faced with cement plaster. Plans will be ready for figures in the course of a month.

Residences—5, 2 story and base frame. Cost not stated. Pomona, Los Angeles Co., Cal. Architect, C. E. Wolfe, Pomona, Cal. Owner, Charles Carrette. The architect is completing the working drawings for a number of these handsome dwellings, which are to be erected for sale. The construction will be of cement blocks. The interior trim will be of pine and hardwoods with oak floors. The roofs will be of tin. There will be standard plumbing goods used throughout. Plans will be completed at once and the work will probably be done by Day Labor.

Apartment House—2 story and base, frame. Cost not stated. Los Angeles, Cal. Architect, Fred Hiren, Broadway Central Bldg., L. A. Owner, Miss Sophia Hummingbird. The building will be 32x88, and will contain one four-room apartment, four two-room apartments and 24 single rooms. There will be steam heat. The exterior of the building will be covered with rustic. The plans are complete and figures are being taken.

HUNN & CO. 361 Broadway, New York
Branch Office, 35 F. St., Washington, D. C.

Apartment House—1 story and base. Class A construction, \$200,000. Los Angeles, Cal. The plans and the details of the construction have not been fully developed upon. The building will contain in the neighborhood of 125 rooms and will be class A in all points of construction. The arrangements for the financing of this enterprise have been completed and the architects are preparing the plans.

Laundry Additions—2 story and base, brick and concrete, \$20,000. Los Angeles, Cal. Architect, W. J. Saunders, Wright and Callender Bldg., L. A. Owners, Truitt Laundry Co. The work will consist of the alteration of the present building and the construction of a one and two-story addition. The addition will contain the engine and boiler rooms and a stable. The new construction will be of concrete. The plans are complete and figures are being taken.

Factory Building—Frame and brick construction. Cost not stated. Wilmington, Los Angeles Co., Cal. Architects, Austin and Pennell, Wright and Callender Bldg., L. A. Owners, Wilmington Dock Co. This work was mentioned here in a recent edition. The work will consist of a group of modern buildings, which are to be occupied by the Wade Art Tile and Pottery Co. The plans for this work are complete and figures will be asked for shortly.

Garage—2 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Train and Williams, Exchange Bldg., L. A. Owner, Judge W. R. Hervey. The building will be a private garage, and will have accommodations for several machines on the first floor and living quarters above. The exterior will be faced with cement plaster. The plans are complete and the work will be started at once.

Hotel—11 story and base, reinforced concrete and steel, \$750,000. Los Angeles, Cal. Architect, Harrison Albright, Loughlin Bldg., L. A. Owner, E. P. Clark, Consolidated Realty Bldg., L. A. The building will cover an area of 166x180 feet. A large portion of the first three stories will be used as an annex by the Broadway Department Store. The remaining space on the first floor will be devoted to the entrance and lobby of the hotel. The upper floors will be divided into 555 rooms and 200 baths. There will be steam heat, electric elevators and other conveniences.

The construction throughout will be of reinforced concrete. The hotel has been leased to P. D. Lowell, who has also leased the six-story hotel building at San Diego recently erected by John D. Spreckels.

Hotel and Stores—2 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, Frank M. Tyler, Union Trust Bldg., L. A. Owner, John Favella. The building will be 40x50, and will contain two stores and three rooms on the first floor and eleven rooms above. The exterior of the building will be faced with red pressed brick. The architect has completed the plans.

Hospital Addition—2 story and base, reinforced concrete. Cost not stated. Fullerton, Orange Co., Cal. Architect, Charles E. Shattuck, Mason Bldg., L. A. Owners, Fullerton Hospital. The building will contain furnace room, storage space in the basement, patients' rooms on the first floor and a large operating room on the second floor. The exterior of the building will be faced with cement plaster. Plans are being prepared.

Hospital—2 story and base, frame. Cost not stated. Long Beach, Los Angeles Co., Cal. Architect, A. Burnside Sturges, Story Bldg., L. A. Owners, Seaside Hospital Association. The building has been mentioned in these columns before. There will be several wards, private rooms and an operating room. The exterior of the building will be covered with rustic. The plans are complete and figures are being taken.

Residence—2 story and base, frame. Cost not stated. Los Angeles, Cal. Architect, J. Martyn Haenke, Central Bldg., L. A. Owner, C. Tuft. The dwelling has been designed for a fifteen-room house with several baths. The interior trim will be of hardwoods. There will be furnace heat and open air plants. The baths will be tiled. The exterior of the dwelling will be covered with cement plaster. The plans are being prepared.

Residence—2 story and base, frame, \$12,000. Los Angeles, Cal. Architect, Frank M. Tyler, Union Trust Bldg., L. A. Owner, J. B. Althouse. The dwelling will follow the colonial style and will contain ten rooms and three bath rooms. There will be oak and mahogany trim, oak floors, tile in the baths and tile mantels. The dwelling will be heated by a warm air furnace. The exterior will be covered with cement plaster and shingles. The plans are complete and the work will be done by Day Labor.

School—1 and 2 story and base, brick, \$200,000. San Diego, Cal. Architects, Quayle Bros. and Cressey, Granger Bldg., San Diego. Owners, City of San Diego. There will be three buildings, one, two-story and two, one-story structures. These buildings will be faced with granite and trimmed with art stone. There will be maple floors throughout. The heating system will be steam. The plans are complete and figures will be called for on January 13th.

School—Group of brick and concrete buildings, \$225,000. Santa Ana, Orange Co., Cal. Architect, A. Burnside Sturges, Story Bldg., L. A. Owners, Santa Ana School District. The architect has just been selected to prepare the plans for the group of buildings for the new Polytechnic High School. The bonds for the work have just been voted. Details of the construction of these

buildings will be given later.

Garbage Incinerator—\$40,000. Pasadena, Los Angeles Co., Cal. Engineer, City Engineer of Pasadena. Owners, City of Pasadena. A special bond election has been called for February 7th, at which time \$40,000 worth of bonds will be voted for the construction of a modern incineration plant.

Stores and Lofts—5 story and base. Class A construction. Cost not stated. Los Angeles, Cal. Architect, Anton Rief, Higgins Bldg., L. A. Owners, Schumacher Estate. The building will be 26x141, and will contain stores on the first floor and lofts above. There will be a complete steel frame, with concrete walls and pressed brick facing. The plans are being prepared, and when complete the building will be erected by Day Labor. Kenneth E. Parsons, Exchange Bldg., L. A., will have charge of the construction.

Stores, Offices and Rooms—Two, 6 story and base, reinforced concrete buildings. Cost not stated. San Diego, Cal. Architect, Harrison Albright, Laughlin Bldg., L. A. Owner, John D. Spreckels. The plans for these two buildings are being rapidly completed and figures will be taken before the end of this month. The construction will be of reinforced concrete throughout with the exteriors faced with cement plaster. There will be passenger, freight and side-walk elevators.

Store Alterations—\$50,000. Los Angeles, Cal. Architects, Eisen and Son, Wilcox Bldg., L. A. Owner, John Brink. The work will include the alteration of the first and second floors of a brick building into a modern cafe. There will be mahogany fixtures, marble and tile floors, electric work, art glass and plumbing. The plans are being prepared.

Contracts Awarded.

Apartment House—4 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architects, Finch and Vogel, 234 Aliso St., L. A. Owner, Allen Finch. Contractors, United Contracting Co., 234 Aliso St., L. A. Contract price not stated.

Church—Frame and brick construction, \$25,000. Monrovia, Los Angeles Co., Cal. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, First Baptist Church of Monrovia. Contractors, Perkins and Holcomb, Watts. Contract price, \$21,240. Note: This contract does not include the art glass, heating or furniture.

Power Plant—Reinforced concrete, \$12,000. Patton, San Bernardino Co., Cal. State Engineering Dept., Sacramento. Owners, State of California. Contractor, F. M. Walton, 434 Estella Ave., Hollywood. Contract price, \$11,445.

SEATTLE AND WASHINGTON.

Apartment House—3 story and base, brick, \$45,000. Seattle, Wash. Architect, C. Alfred Breitung, Walker Bldg., Seattle. Owner's name withheld. The building will contain in the neighborhood of 32 apartments, arranged in suites of two and three rooms each and bath. There will be steam heat and wall beds. The exterior of the building will be faced with pressed brick. The plans are complete and the architect is taking figures on the construction.

Bridge—Steel span. Cost not stated. Auburn, Wash. Engineer, County Surveyor, Auburn, Wash. Owners, Kings

County. This work has been mentioned here before when the Surveyor was first commissioned to prepare the plans. The working drawings have been accepted by the County Commissioners and bids for the work will be opened on January 16th. The bridge will be 240 feet long. Plans and specifications are in the hands of the County Clerk, Otto A. Case, Auburn, Wash.

Bridge—Reinforced concrete, \$50,000. Seattle, Wash. City Engineer Dimock, Seattle. Owners, City of Seattle. The bridge will be 400 feet long, 32 feet above the roadway and 80 feet wide. The entire structure will be of reinforced concrete. The plans are complete and have been approved. Bids will probably be called for at once.

Church—2 story and base, brick and steel, \$50,000. Seattle, Wash. Architects Thompson and Thompson, Maynard Bldg., Seattle. Owners, Seattle Jewish Synagogue. The building was started in 1908 and the foundation work completed. The work was stopped at that time and has now been taken up again. The structure will be 74x128 feet. The exterior will be faced with pressed brick and terra cotta. The interior will be handsomely decorated. The working drawings are complete and figures are being taken.

Hotel—7 story and base, brick and steel. Cost not stated. Bellingham, Wash. Architect, C. Alfred Breitung, Walker Bldg., Seattle. Owner, Leopold Schmidt. The building was started at the time when the Prohibitionists secured control of the town, but work was stopped. The first floor joists have been laid. The plans for the remaining six stories are now complete and the work will be rushed to completion. The architect states that the bids will be taken at once.

Railroad Construction—\$500,000. Seattle, Wash. Engineering Dept. Oregon-Washington Railroad and Navigation Co., Seattle. Owners, Oregon-Washington Railroad and Navigation Co. The contract for wrecking the wooden bridges in certain sections of the city of Seattle has been awarded, and the announcement has been made by the company that \$500,000 will be expended during the coming summer by them in improvements in and about the city of Seattle. The exact nature of this work cannot be learned at this time.

School—2 story and base, brick, \$50,000. Montesano, Wash. Architect, Watson Vernon, Aberdeen. Owners, Montesano School District. The architect has just been commissioned to prepare the plans for a new high school building, and will complete the working drawings in the course of the next three weeks. The building will contain eight class rooms, auditorium and principal's office. There will be a steam heating system. The exterior of the building will be faced with pressed brick.

School—2 story and base, brick and steel, \$80,000. Cannadale, Wash. Architect, Robert C. Sweatt, Walla Walla. Owners, Cannadale School District. The building will be designed for a high school and will contain fourteen class rooms, auditorium and teachers' rooms and a modern science department. There will be steam heat and a ventilating system. The exterior of the building will be faced with pressed brick and terra cotta. The working drawings are being prepared.

Contract Awarded.

Warehouse—2 story and base, reinforced concrete, \$40,000. Seattle, Wash. Architects, Rebb and Mendel, Denny Bldg., Seattle. Owners, C. H. Lilly Co. Contractor, F. S. Misho, Globe Bldg., Seattle. Contract price, \$40,000.

Hospital—1 story and base. Class A construction, \$400,000. Vancouver, B. C. Architect, Robert F. Tegen, Portland. Owners, Sisters of Charity, Contractors, Norton-Griffiths Steel Construction Co., London, England. Contract price, \$400,000. Note: This contract was taken on a percentage basis and the contract price given is the amount named as the maximum cost.

Lodge Hall—2 story and base, brick, \$25,000. Everett, Wash. Architect, W. W. Hastings, Commerce Bldg., Everett. Owners, Odd Fellows Hall Association. Contractor, Harry Graff, 4103 Rucker St., Everett. Contract price, \$22,250.

Water Tank—Reinforced concrete and steel. Seattle, Wash. Engineer, Condens, University of Washington. Owners, University of Washington. Contractors, Chicago Bridge and Iron Works, care of the Puget Sound Bridge and Dredging Co., Central Bldg., Seattle. Contract price, \$5,950.

Sewers—Storm water system, \$50,000. North Yakima, Wash. City Engineer of North Yakima. Owners, City of North Yakima. Contractor, International Contracting Co., Central Bldg., Seattle. Contract price, \$42,550.

Water System—\$150,000. Ellensburg, Wash. Engineer, City Engineer of Ellensburg. Owners, City of Ellensburg. Contractors, International Contracting Co., Central Bldg., Seattle. Contract price, \$150,000.

PORTLAND AND OREGON.

Apartment House—3 story and base, frame, \$22,000. Portland, Ore. Architect, W. A. Carpenter, Portland. Owner, same. The building will be 44x84 feet, and will contain 54 rooms, divided into two, three and four room suites. There will be steam heat, wall beds and connecting baths. The exterior of the building will be covered with veneered pressed brick. The plans are complete and the work will be done by Day Labor.

Bridge—Reinforced concrete, \$77,000. Portland, Ore. Engineer, City Engineer Hurlburt, Portland. Owners, City of Portland. The bridge will be in the form of a viaduct, and will be 740 feet long including the approaches, 318 feet between the abutments. It will be 60 feet wide with a 40-foot roadway. The plans have been completed and bids will be called for shortly.

Warehouse and Salesrooms—7 story and base, reinforced concrete, \$60,000. Portland, Ore. Architects Claussen and Claussen, Portland. Owners, Manufacturers Building Co., represented by W. F. Keady and W. W. Robinson, Portland. The building will cover an entire city block, and will be designed as salesrooms and storage space for machinery manufacturers. The floor loads will range from 300 to 350 pounds. The construction throughout will be fire proof. There will be trackage facilities, large freight and passenger elevators, sprinkler system and steam heat. The exterior of the building will be faced with cement plaster and tile ornamentation. The architects are completing the working drawings and construction will be started in the spring.

Garage—1 story and base, brick, \$10,000. Portland, Ore. Architects, Roberts and Roberts, Portland. Owner, Mr. Mathieson. The building will be 8x95 feet, and will contain a machine shop, salesrooms and storage space for the machines. There will be a large gasoline tank. The exterior of the building will be faced with pressed brick. The plans are complete and the work will be done by Day Labor.

Hospital—5 story and base. Class A construction, \$200,000. Portland, Ore. Architect, Robert F. Tegen, Portland. Owners, Sisters of Charity. The building will be built in the form of a cross and will cover an area of 56x260 feet. The design has been worked out in the Italian Renaissance style, the exterior to be faced with Deumy-Renton paving brick and trimmed with terra cotta. There will be accommodations for about 100 patients besides the nurses' quarters, chapel and operating rooms. There will be a steam heating plant. The plans will be complete about the 1st of February and bids will be taken.

Contract Awarded.

Apartment House—1 story and base, brick, \$45,000. Portland, Ore. Architect, none. Owners, R. F. Wassell & Co., Seattle. Contractors, R. F. Wassell & Co., Seattle. Contract price, \$45,000.

Fire Station—2 story and base, brick, \$16,000. Portland, Ore. Architects, Emil Schacht and Son, Portland. Owners, City of Portland. Contractor, A. C. Meyer, Portland. Contract price, \$16,000.

Library—2 story and base, brick and steel, \$30,000. Salem, Ore. Architect, George M. Post, Salem. Owners, City of Salem. Contractors, J. S. Winters & Co., Seattle. Contract price, \$30,000.

ARCHITECTURAL & STRUCTURAL STEEL DRAFTSMAN (MALE).

January 17-18, 1912.

The United States Civil Service Commission announces an examination on January 17-18, 1912, at the usual places mentioned, to secure eligibles from which to make certification to fill a vacancy in the position of draftsman, architectural and structural steel, at a maximum salary of \$1,500 per annum, the position to continue for a period of one year, in the Lighthouse Service, San Francisco, Cal., office of the Inspector of the Eighteenth Lighthouse District, and vacancies requiring similar qualifications as they may occur, unless it is found to be in the interest of the service to fill the vacancy by reinstatement, transfer, or promotion.

The examination will consist of the subjects mentioned below, weighted as indicated.

Subjects	Weights
1. Mathematics pure and applied	20
2. Topographical and hydrographical surveying	15
3. General building and steel construction and drawing	40
4. Training, experience, and fitness	25
Total	100

Two days will be required for this examination. Subjects 1 and 2 will be given on the first day and Subject 3 on the second day.

Competitors will be furnished with drawing paper and tracing vellum, but must supply themselves with drawing

board not less than 18 inches square, scale, squares, ink, pens, and such other instruments as they may deem necessary.

Five years' experience in engineering work or drafting is a prerequisite to eligibility for appointment from this examination; of these five years, a technical school training will be considered equivalent to three years.

All statements relating to training, experience, and fitness are subjects to verification.

Age limit, 22 years or over on the date of the examination.

This examination is open to all citizens of the United States who comply with the requirements.

This announcement contains all information which is communicated to applicants regarding the scope of the examination, the vacancy or vacancies to be filled, and the qualifications required.

Applicants should at once apply either to the United States Civil Service Commission, Washington, D. C., or to the secretary of the local board of examiners for application and examination Form 1312. No application will be accepted unless properly executed and filed with the Commission at Washington. In applying for this examination the exact title as given at the head of this announcement should be used in the application.

As examination papers are shipped direct from the Commission to the places of examination, it is necessary that applications be received in ample time to arrange for the examination desired at the place indicated by the applicant. The Commission will therefore arrange to examine any applicant whose application is received in time to permit the shipment of the necessary papers.

REPAIRMAN ON MOTOR BOATS.
January 10, 1912.

The United States Civil Service Commission announces an examination on January 10, 1912, to secure eligibles from which to make certification to fill a vacancy in the position of repairman of motor boats in the Life-Saving Service, at \$100 a month and actual necessary traveling expenses, and vacancies requiring similar qualifications as they may occur in any branch of the service, unless it is found to be in the interest of the service to fill vacancy by reinstatement, transfer, or promotion.

The examination will consist of the subjects mentioned below, weighted as indicated:

1. Spelling (twenty simple words in ordinary use).....	8
2. Arithmetic (simple tests in addition, subtraction, multiplication, and division of whole numbers, and of United States money)	8
3. Letter writing (a letter of not less than 100 words on some subject of general interest. Competitors may select either of two subjects given).....	8
4. Penmanship (the handwriting of the competitor in the subject of copying from plain copy will be considered with special reference to the elements of legibility, rapidity, neatness, general appearance, etc.)	8
5. Copying from plain copy (a simple test in copying accurately a few printed lines, in the com-

petitor's handwriting.) 8
 6. Experience in the construction and repair of gasoline motor boats 60

Total 100

Applicants should state fully, in answer to Question 16 of application and examination Form 1800 (edition of July, 1916) all the experience they have had in the construction and repair of gasoline motor boats and in the installation of gasoline engines.

All statements relating to training, experience, and fitness are subjects to verification.

Age limit, 20 years or over on the date of the examination.

Persons named in the applications as references will be communicated with. Unless answers are received from these persons within three weeks from the date of sending the communication, the application will not be accepted for the particular vacancy for which this examination is to be held, but if received within six weeks it will be considered for any vacancy which may arise in the future requiring similar qualifications. The applications of those persons whose references fail to answer within six weeks will be canceled.

This examination is open to all citizens of the United States who comply with the requirements.

This announcement contains all information which is communicated to applicants regarding the scope of the examination, the vacancy or vacancies to be filled, and the qualifications required.

Applicants should at once apply either to the United States Civil Service Commission, Washington, D. C. or to the Secretary of the local board of examiners, for application and examination Form 1800. No application will be accepted unless properly executed (including the medical certificate) and filed in complete form with the Commission at Washington. In applying for this examination the exact title as given at the head of this announcement should be used in the application.

As examination papers are shipped direct from the Commission to the places of examination, it is necessary that applications be received in ample time to arrange for the examination desired at the place indicated by the applicant. The Commission will therefore arrange to examine any applicant whose application is received in time to permit the shipment of the necessary papers.

EXPERIMENTS WITH COAL FOR GAS PRODUCTION.

WASHINGTON, Dec. 21.—With the

idea of finding coals throughout the United States available for the manufacture of illuminating gas in order that they may be substituted for the higher priced and rapidly vanishing Pennsylvania gas coals, the Federal Bureau of Mines sometime ago completed a series of investigations which have just been embodied in a bulletin entitled, "Coals available for the manufacture of illuminating gas."

The authors are A. H. White and Perry Barker. In a statement of the investigations prepared by Herbert M. Wilson, engineer-in-charge of the Pittsburgh Experiment station of the Bureau, the following is said: "In a consideration of the various means whereby more economical and more efficient use may be made of the fuels of the United States, the possibility of obtaining other and cheaper fuels than the Pennsylvania coals for the production of illuminating gas demands attention. For the government, as well as for private corporations and the household, there can be no more economical and efficient way of using coals than through the medium of illuminating gas. In the stove, gas reduces the labor cost of heat production and lessens the drudgery of the kitchen, burned in the welsbach mantle, it is an excellent and cheap illuminant. In addition, the coke that remains after the gas has been recovered furnishes a smokeless fuel that has about the same heating value as anthracite coal. Hence any investigations that will indicate how local coals through proper treatment may be substituted for the higher priced Pennsylvania gas coals will bring about lower prices for both gas and coke and will also aid to conserve for use in metallurgical processes the coking coals of Pennsylvania and other states.

"The annual drain on the gas-coal resources of this country and the importance of the gas and coke industries are indicated by the fact that 8,399,129 tons of coal were carbonized in retorts in the United States in 1909. The resulting salable products from by-product ovens were 13,791,226,000 cubic feet of coal gas, 6,254,644 tons of coke, and 69,126,000 gallons of tar. The total value of all by-products was about \$28,508,637.

"There are few well-developed coal fields in this country that furnish coal satisfying all the requirements of illuminating gas manufacture. Most of the coal used hitherto has come from western Pennsylvania, the quantity supplied by other fields being relatively small. The introduction of gas coals from new or little-known districts has been difficult because of the lack of necessary testing stations and of scientific study of the complex process of gas manufacture.

"The investigations were so directed as to permit the testing of coals from different parts of the United States. The results show that certain coals from which good yields of gas had been expected cannot be considered as available for illuminating gas manufacture, whereas other coals give promise and should be investigated further."

Detailed tests of the coals from various parts of the country are given in the bulletin which may be obtained free of charge by applying to the Director of the Bureau of Mines, Washington, D. C.

TAHOE TIMBER TO BE SOLD.

The United States Forest Service announces that within a short time a large body of timber on the eastern side of the Tahoe national forest will be offered for sale, and that a ten-year period will be allowed for the cutting of the timber. The stumpage rates will be revised at the end of the first five years. This revision will be the first upon any rise that may take place in the selling price of lumber.

The Tahoe sale will call for the construction of twenty miles of railroad. The benefit to be derived by the locality in which the timber is situated through the construction of the railroad is one of the considerations to be taken into account in deciding whether long-term sales shall be made.

The sale will include about 75,000,000 board feet of saw timber.

Of this quantity, 52,000,000 consists of valuable yellow pine which is marketed in California under the name of white pine. Bids for the timber will be advertised for at least thirty days.

A minimum price of \$2.50 per 1000 feet of all yellow and sugar pine, and \$1 for all other kinds will be exacted.

Sales of national forest timber are increasing rapidly. In the year ended June 30, 1911, there was sold a total of more than 820,000,000 feet, as against 575,000,000 feet in preceding years.

IRON AND STEEL WORKS IN INDIA

Rapid progress is being made with the construction of the Tata iron and steel works at Sakchi, a village of Singhbhum in Chota Nagpur, Bengal, India, and in a few months the first blast furnace is to be "blown in," the steel furnaces and the rolling mills beginning to work a little later.

One leading idea followed in the design of the works has been to avoid as far as possible the use of manual labor. By dint of labor-saving machinery this factor is reduced to its lowest proportion. Only 2500 laborers will be required, and as over 8000 have been employed in the construction of the works, it is anticipated that little difficulty will be experienced in securing a quarter of that number, especially as the works are situated in a labor recruiting district. Of labor-saving devices the coke ovens and the coal-crushing plant furnish a fine example. The coal is carried mechanically into the crushers, and after being pulverized the proportion equaling the size of a pea is less than 1 per cent, it is shot up into an elevator, from which it is discharged into wagons for conveyance to the coke ovens. Seventy tons of coal can thus be handled and crushed in an hour. The ovens can turn out 500 tons of coke in twenty-four hours. The rams which drive the coal into the

ovens, the levelers by which the coal is spread inside the ovens, and the pushers by which the coke is ejected from the ovens are all electrically driven, and the coal is scarcely touched by human hands from the moment of its arrival from the Jherria coal fields to the time when it is shunted to the blast furnaces yard.

The two blast furnaces have a capacity of 200 tons per twenty-four hours, and the iron from them can be run direct into hot-metal ladles and taken to the steel works, or can be brought into the casthouse, which lies between the two furnaces, there to be made into pigs. The iron ore, of satisfactory quality, comes from the company's own deposits in the Mourbians State of Orissa. There are to be four basic open-hearth furnaces of forty-ton capacity, a size which is moderate in comparison with some American furnaces. The equipment further includes a spacious steel-making house, the rolling mills, the power-house, machine shop and other accessories, and the company has its own supplies of all raw materials, iron ore, dolomite, limestone and magnesite, and a plant for construction and repairs, which will render the works self-contained amid the wilds of Chota Nagpur.—London Times.

ASSISTANT TO SUPERINTENDENT OF CONSTRUCTION OF LIFEBOATS, APPARATUS, ETC.

January 10, 1912.

The United States Civil Service Commission announces an examination on January 10, 1912, to secure eligibles from which to make certification to fill a vacancy in the position of assistant superintendent of construction of lifeboats, apparatus, etc., in the Life-Saving Service, at \$100 a month and actual necessary traveling expenses, and vacancies requiring similar qualifications as they may occur in any branch of the service, unless it is found to be in the interest of the service to fill the vacancy by reinstatement, transfer, or promotion.

Men only will be admitted to this examination.

The examination will consist of the subjects mentioned below, weighted as indicated:

Subjects.	Weights.
1. Spelling (twenty simple words in ordinary use)	8
2. Arithmetic (simple test in addition, subtraction, multiplication, and division of whole numbers and of United States money)....	8
3. Letter writing (a letter of not less than 100 words on some subject of general interest. Competitors may select either of two subjects given)	8
4. Penmanship (the handwriting of the competitor in the subject of copying from plain copy will be considered with special reference to the elements of legibility, rapidity, neatness, general appearance, etc.)	8
5. Copying from plain copy (a simple test in copying accurately a few printed lines in the competitor's handwriting)	8
6. Training and experience.....	60
Total	100

At least five years' experience in the

construction and repair of row, sail, or motor boats is a prerequisite for appointment to this position. Applicants should state in their applications the experience they have had in reading marine drawings.

Applicants should give names of not less than two and not more than five persons competent to certify to the applicant's qualifications.

All statements relating to training and experience are subject to verification.

Age limit, 20 years or over on the date of the examination.

This examination is open to all citizens of the United States who comply with the requirements.

This announcement contains all information which is communicated to applicants regarding the scope of the examination, the vacancy or vacancies to be filled, and the qualifications required.

Applicants should at once apply either to the United States Civil Service Commission, Washington, D. C., or to the secretary of the local board of examiners, for application and examination Form 1800. No application will be accepted unless properly executed (including the medical certificate) and filed in complete form with the Commission at Washington. In applying for this examination the exact title as given at the head of this announcement should be used in the application.

As examination papers are shipped direct from the Commission to the places of examination, it is necessary that applications be received in ample time to arrange for the examination desired at the place indicated by the applicant. The Commission will therefore arrange to examine any applicant whose application is received in time to permit the shipment of the necessary papers.

ASKS ARCHITECTS AND BONDING COMPANIES TO FURNISH CORRECT BOND.

California Building Law Association Sends Letter To Architects and Surety Companies of the City.

The California Building Laws Association has sent a circular letter to the architects of the city insisting that they see that their clients when they demand a bond get one in accordance with the provisions of the lien law and one that will furnish them protection. Complaint has been made that the old form of completion bond has been furnished in some instances. A simple form of commercial guarantee attached to the contract is all that is needed. If the 50 per cent bond provided for in Section 1133 is required it should be drawn in strict accordance with the section. Both of these forms drawn by Mr. Ellis, who drafted the law, can be had at the office of The Daily Pacific Builder for a nominal price. The following are copies of the letters sent out by the California Building Law Association:

CIRCULAR LETTER SENT TO ARCHITECTS.

San Francisco, Cal.:

Dear Sir:—The form of indemnity bond furnished by the Empire State Surety Co. on the E. B. Cantrell job, situate on the east side of Larkin

street on foot south of Pine street, has prompted this Association to investigate the bonds which are being furnished by the surety companies under the new lien law. On the job in question a 50% bond has been issued, and we presume the owner feels that he is fully protected by same, under the provisions of the new law. This bond, however, does not comply with the provisions of the new lien law, as it is the old style completion bond and fails to inure to the benefit of persons furnishing labor and materials on the job.

Notwithstanding the fact that our organization has notified all of the bonding companies to the effect that we will only sanction the issuance of a bond complying strictly with the requirements of the new lien law, several companies have seen fit to disregard the same and are still issuing the old form of bond.

From an investigation of the records we find that the Empire State Surety Co. has issued five of the old form of bonds since the new law went into effect and upon taking the matter up with their representative he informed us "that it does not protect material men and other claimants, it being simply a guarantee to the owner that the contract will be fulfilled." By insisting upon the issuance of the new bond to the owner, you not only protect your client but avoid unnecessary litigation. We are compiling a list of bonding companies who issue bonds complying with the provisions of the new law, and we would be very pleased to submit the list of the companies we have upon your request.

This law has been tried in a number of the Pacific Coast States and territories and has proven very satisfactory and we feel sure that if its provisions are faithfully carried out it will not alone prove satisfactory, but will become very popular with everyone in this State and will put the building business on an honest basis.

We respectfully request you to use care in selecting contractors and also to insist upon the bond being given as required by the law, which will certainly avoid a great deal of litigation and loss and assist the building industry of this State, and put it upon a good, sound, substantial and honest basis.

Yours respectfully,
W. S. SCOTT, Secretary.

CIRCULAR LETTER TO BONDING COMPANIES.

San Francisco, Cal.,

Gentlemen:—Enclosed please find a copy of a letter we have just mailed to the Architects of this City regarding the form of indemnity bonds furnished to owners by some bonding companies.

This Association went to a lot of trouble and expense to have the new lien law passed, for the purpose of placing the building business on a substantial and honest basis, and we will appreciate the co-operation of the bonding companies if they will assist us to maintain the law by issuing only bonds which comply with the law, and only to reliable contractors.

The Empire State Surety Company have in several instances issued a bond which they admit does not comply with the law and absolutely fails

Editorial Comment.

If American users of steel could have bought their material at the price it was offered to foreigners for last year they could have saved 60 million dollars.

This interesting estimate by the American Magazine is based on evidence collected by the Stanley committee that has been investigating the steel trust. Information before the committee showed that the trust was quoting prices to foreigners from \$5 to \$8 a ton lower than it was asking in the United States.

Its low prices were not on a few surplus lots of superfluous goods, "dumped" on the foreign market, but on a regular and growing export trade that reached more than 1,200,000 tons last year.

This 60 million dollars a year is the profit on steel that the American Magazine figures is permitted by the prohibitive duties. Without it the promoters of the steel corporation would probably have hesitated about paying Mr. Carnegie that extra 200 million dollars that he charged them for his steel plants above the price he was willing to sell for the previous year.—Kansas City Star.

San Francisco looks forward with interest to the completion of the Panama Canal. It is well thought to be one of the landmarks in the life of the city and of the nation. Accordingly with the close of the year a review of the work done is appropriate and a forecast of the future indicates when the great undertaking will be completed.

The report of Col. George W. Goethals, chairman and chief engineer, shows that progress during the past year has been eminently satisfactory. The original estimated date for the completion of the great work was January 1, 1915.

The work has advanced so rapidly that it has become apparent that the canal can be used at least a year earlier than this date. In order to determine the approximate time when shipping could pass through, a board was convened during the past year, composed of those charged with the work in progress and contemplated. Announcement was made that concreting of the locks at Gatun would be finished by June 1st, 1912, and the locks on the Pacific side four months later. Assuming that the gates were completed by June 1st, 1912, the contract time, the locks would be ready on that date, if the operating machinery were installed. The Gatun dam, it was estimated, would be finished by the close of the dry season 1912-1913, and if no more material, due to slides,

had to be removed than was estimated at the time the board met, it was decided that the Culobra cut would be completed by July 1st, 1913. The exterior channels leading to the canal from the two oceans, it was found, would be sufficiently advanced to pass such shipping that would use the canal, by this same date, July 1st, 1913.

When one considers the difficulties that have been encountered in the furtherance of this work, it is certainly a splendid tribute to the engineering skill and the organizing genius of Colonel Goethals. The canal zone has been made inhabitable and cooperatively free from disease. The slides of the Culobra cut have been removed and even with the additional work that this treacherous ground has imposed the work bids fair to be finished a year and a half before the original date scheduled.

Millions of tons of concrete have been used in the construction. Railroads and constructing camps which are virtually moving cities have been built. A hydro-electric plant has been constructed for furnishing power for the enterprise and for the operation of the locks. Another year will practically mark the completion of the great enterprise. If the Exposition to commemorate the consummation of the work is completed with half the expedition that the work itself has been done we will be able to congratulate ourselves on a great achievement.

Congress seems to be lumbering along taking up a good deal of time in preparing an amendment to the Constitution providing for the election of United States Senators by a direct vote of the people. The need of this kind of legislation has been apparent for a generation. Ever since the election of Hayes in 1876 the fact was demonstrated that the interposition of the electoral college was an outworn form which stood between the people and the result of their ballots. The election of Senators by the legislatures in the several states has been the most prolific source of corruption that has ever existed in American politics. Scores of cases of the most flagrant bribing and corruption have been made public but still we continue on in the same old way.

The constitutional amendment providing for a direct vote for Senators has been amended by Senator Bristow of Kansas and has now been adopted by the Senate. This amended resolution has gone back to the House of Representatives and has been referred to a committee. It is to be hoped that it will emerge in some satisfactory form, be adopted by both houses and go to the states for ratification. The time is ripe for its adoption. If the National Congress could take some lessons from the California legislature in the matter of reform legislation a great deal more could be accomplished.

From the rarity of Roman bridges in Great Britain we learn that wood was the material used in early historic times. Do we possess even three or four Roman bridges with an authentic record? Here and there local traditions attribute a bridge to the Romans, but how many do you know having the support of distinguished antiquaries? A good many along the Roman roads have Romanesque traits, but I should like to find a true example of Roman craftsmanship.

Along the old Roman tracks in Lancashire there are many single arch bridges having a Roman character, but without a stalwart air of authentic dignity. The one near Clitheroe looks genuine, while the others speak to me of Roman tradition enfeebled in much later days by a different spirit in craftsmanship.

III. Medieval.

To encourage the making or the upkeep of bridges was counted as an act of piety in medieval days, "a blessed business," a charitable duty, essential to the safety of pilgrims and wayfarers; so bishops and abbots, to bring this matter home to lay minds, granted remissions of penance to those (and they were many) who forgot that the King's highways had to be kept in order by every landlord who owned property in the neighborhood.

By way of example I give the famous Llangollen Bridge, with its four unequal arches, and its look of bluff vigor in old age. It comes down to us—a little widened, thirty-three years ago—from John Trevor, Bishop of St. Asaph, who died in 1557, and whose workmen did not care a rap for uniformity of design. What they liked was a secure foundation for each of their piers, and it saved time and expense to sound the river bed and to build from the flattest places in slippery rock. The widest arch would have a span of 28 feet, and the two smaller ones would occupy the central position. But the main point, after all, was to do such work as would withstand the fury of a gathering flood. In this one matter the craftsmanship was a complete success. But there is no ambition, no imagination, in the design of Llangollen Bridge. It conquers the dangerous waters, but in a stubborn, dull fashion. It has the look of a hedge in armor, heavy and dogged, dauntless and unimaging. And this applies to many a British bridge having a long history. The one over the Nith at Dumfries, which was long considered the finest after Old London Bridge, is a damaged exception, dating from the Thirteenth century. Formerly it had thirteen arches—an unlucky number, perhaps, for only seven are now in use. There used to be real aspiration in the design, and a certain high triumph over difficulties and perils, and for this quality we have reason to be grateful.

Old England used to speak with delight about a certain beauty described as "faerie," a certain grace that aspired with an air of heroic life, as if it came into the common world from that enchanted time when King Arthur ruled. It is just this faerie magic that old English bridges lack. They are good pedestrian prose, often enough, but the great poetry of Gothic art, its easy triumph in upward flight, is absent as a rule. Here and there we come upon a half exception, like the ever famous Twisel Bridge, Northumber-

land, which has changed but little since Lord Surrey threw his army across it to reach Flodden Field, turning the flank of the Scottish hosts.

It is a graceful piece of architecture, alert and wide-awake; it has one strong arch, with a touch of the Thirteenth century in its semi-circular span, which measures 90 feet 7 inches from abutment to abutment. The parapet from its center shelves downwards at each side, its greatest height from the waters of the Till being 46 feet 2 inches. I note, too, that the arch is groined and ribbed, quite a common trait in mediaeval bridge building, above all, in Poitou and in England. Viollet-le-Duc mentions this kind of arch, and says that the groins, separated from the bed of the road by a space filled with loose flagging, were poses en rainure dans les piles en conservant une parait élastique. All rain water that found its way through the road passed with ease between the joints of the flagging, without leaving a deposit of salt-petre on the haunches of the arch; and, as the work was lighter than in other arches, there was less pressure on the piers. Moreover, this system of arch building, which dates from the end of the Twelfth century, or from the beginning of the Thirteenth, was more economical than any other, employing one-third less of keyed materials. The spandrels above those groined arches were of ashlar, and it was easy to repair them without interrupting the traffic. Another distinguishing characteristic of mediaeval bridges is what the French call the *dos d'âne*, the shelving parapet and roadway on either side from a point just above the keystone of the central arch. It is often supposed that this trait is European, yet it is found also in Chinese bridges, which are very graceful at their best pure and strong in design, and having fine arches in which the semicircle is prolonged without forming a true horseshoe. I have chosen a Chinese bridge as an illustration, and set it side by side with two Spanish examples, the Puente de San Juan de las Abadesas at Gerona, and the Puente Mayor over the Mino at Orense, Galicia, which, to my mind, is the most stately of all shelving bridges. The Moors left in Spain a peculiar grace of style which native architects often united to their own qualities, giving a happy distinction and a lofty ambition. Consider the immense nave in the Gerona Cathedral, a glorious pointed vault measuring not less than 73 feet from side to side, almost double the width of Westminster nave. It belongs to the Fifteenth century, yet in the magic of its youthfulness, hope it proves that its architect, Guillemo Boffi, was a child of the Thirteenth. And the great central arch of the Gerona bridge has in it some of the soaring courage that transcends all expectation in the cathedral nave.

This bridge, with its look of battered antiquity, is certainly very fine, but less majestic than the masterpiece at Orense, a stone bridge of the Thirteenth century, with seven elastic arches, all ably dignified, and with a total length of 1,300 feet. The great central arch is 156 feet wide between the piers, and its keystone is 135 feet wide above the river bed. "The Mino rises rapidly and to a great height," says Walter Wood, in "A Corner of Spain"; and it was the object of safeguarding the bridge against the sud-

den inundations that the arch was made so high."

And this brings us to the origin of those bridges that shelve down at each side from a point in the center of their parapets and footway. Two useful purposes were served by making the central arch wider and higher than the others, since there was greater space for navigation as well as for waters in flood; but when a bridge had only one arch, its up-and-down roadway was usually inconvenient, because the incline was not long and gradual, but short and steep. Take the Pont-y-Prydd, near Cardiff, built in the Eighteenth century, and having a pathway so abrupt in its slope that laths of wood used to be stretched across as a foothold for horses. In frosty weather a shelving bridge was often a breakneck place, and there is evidence that architects at an early date told each other that their departure from the Roman tradition of level bridges was unadvised. It was a tradition not without exceptions, since the *dos d'âne* was used at times by Roman bridge builders; but a level causeway was more typical of Roman craftsmanship, and it influenced mediaeval architects and engineers. Among my illustrations is a good example, Le Pont de Consols over the Tarn at Montauban. It is a bridge entirely of brick, 250 metres 50 centimetres in length. The bricks are excellent in quality, and measure 5 centimetres in thickness, 40 centimetres in length and 28 centimetres in width. The roadway is perfectly level, and its height above the level of the Tarn is 18 metres. There are seven pointed arches, having an average span, or chord, of 22 metres; and the six great piers with beaked buttresses are 5 metres 55 centimetres in thickness, and they are pierced with high arched bays to facilitate the passage of water during floods. The defensive towers have gone, but the strongest one of all was built at the end facing the town. It was square in shape, and its summit was a platform with crenelles and machicolations. The other end tower was a weak version of this one, while the central defense, built over the middle buttress on the side looking down the river, was triangular, and there was room enough in it for a chapel. A flight of winding steps went down to a postern pierced through the buttress at the water level, and on the other side of the pier, just below the arched bay, hung a sort of see-saw that carried an iron cage in which blasphemers were put to be ducked in the river.

IV. In the Middle Ages.

Mediaeval England was a forestal country, and in woods along many roads and byways footpads and bandits lay in wait, as ready to cut a throat as to broach a tun of wine. Rivers were feared then by pilgrims and horsemen, not only because fords were very common, but because thieves knew that an ambush near a ford was particularly unpleasant to any one who had to make his way through it. Till the Fourteenth century, and even later, fords were in vogue at and near many towns of the lesser sort.

And the life and limb tax claimed by rivers was not the only trouble. The keepers of a ford knew no pity, but got their toll in relentless ways, taking bread from the beggar's wallet, "a hood or a girdle" from the pore penyles. Pretty often, again,

great woods encircled little riverside towns and manors, so that outlaws after dark could steal up close to the houses and the bridge; it was then that pilgrims and wayfarers welcomed with the greatest relief the crescent-lights that glimmered from some friendly building on the bridge—a church, a defensive gateway, a small bickering windmill, or a good house buttressed up against a pier and rising above the parapet.

Some defensive bridges in Old England had an important look as late as the reign of George III. Thus the Welsh Bridge at Shrewsbury has quite a noble air in engravings of that period. At the present time our gateway and towering bridges are plain specimens of this mediæval tradition. One at Workworth, Northumberland, belongs to the Fourteenth century. It has a squat tower with a gallery of stonework above the gateway, but the gateway itself is so low that a gipsy's caravan cannot pass through it. As to the bridge, its simple dogged architecture has points worth noting. There is the roadway, which has a pleasant line dipping towards the gateway, and having a triangular recess for the convenience of travellers in the great central pier. The gateway is at some distance from the abutment, and the wall that unites them has a curve that repeats in two places, but in a modified manner, the line of parapet formed by the recess. Although the pier mid-stream is triangular, an attempt has been made to mask the false principle involved in this type of cut-water; that is to say, the mason tried to thrust into the oncoming river a larger bulk of masonry than was usual in sharp-banked piers and buttresses. It is odd, but mediæval bridge builders very often believed that a pier, however substantial in bulk, ought to cut water like a knife instead of presenting a bold surface to the river, and hence a surface having weight and resistance, as in those occasional piers in French bridges of the Limousin, whose sectional form is similar in shape to a Gothic drop arch, or else to an arch which is formed on an equilateral triangle. It is clear that a section of this kind has a greater surface than that of a triangle, and consequently greater power and opposition.

As a fair type of the defensive bridge in Great Britain, I have chosen for illustration the Monnow Bridge at Monmouth. The bluff old tower has rounded ends facing the river, and a narrow hole can be seen in my photograph. There are machicolations above the gateway, flanked by arrow-slits, and just below the roof in another aperture through which stones could be hurled or molten lead poured. Horatius Coclès would have been glad of a tower like this on the Pons Sublucius. It was not till much later times that the Romans, by building triumphal arches on the roadway of important bridges, created a tradition that passed through the Middle Ages onward to our own time and to contemporary work. The arches on the Monnow Bridge are round, and not that they are arcs doubles, as the French describe those vaults in which at certain intervals a concentric arch is superimposed, or the vault itself at certain places is of double or greater thickness than at others, so that bold ribs project from the belly of the arches. Arcs doubles are common in old English

bridges, and some of the most interesting are Elizabethan, notably in the beautiful Wilton Bridge across the Wyre, near Ross, in Herefordshire, built of reddish sandstone in 1539. In the Wilton Bridge the voussoirs are notched or joggled into each other in accord with that Norman fashion which left a history of itself in such work as the fireplaces in Fontaine Abbey. Many students of the evolution of bridges give insufficient care to the ring of arch stones. In the Monnow Bridge at Monmouth a slight tentative effect has been made to give the arch stones some freedom from the oscillation sent through the spandrels when a great weight passes over an arch. A slight tentative effect, I repeat, because the voussoirs have not been made independent from the spandrels. To find any of this effect of this sort in the noble Valentre Bridge at Cahors, dating from the Thirteenth century. Five acute-angled piers rise from the water to a high parapet, forming crenelated recesses on each side of the roadway; and the voussoirs of the six principal arches, gracefully pointed, are, as Viollet-le-Duc says, extradoses, like the round arches in the best Roman bridges. This makes the ring of each arch independent from the construction of the spandrels, so that they keep their elasticity, and can bear pass on through the rest of the bridge any tremor sent down from the roadway into the spandrels. On the other hand, when arch stones are unequal, thicker in their haunches than in their crown, oscillating movements go along the full length of a bridge, causing undue fatigue to the piers, and sometimes a very noticeable trembling as in the bridge by Inigo Jones at Llanrwst. Perronet, the great French engineer of the Eighteenth century, forgot this effect of repercussion when he designed and built Le Pont Louis XV. at Paris; and in the hope of remedying his mistake he clamped his arch stones together with iron along the soffit, as if metal fastened into stone could never in the course of time become a destructive agent.

The architect of Valentre Bridge was wiser than Perronet, every arch in his work being an elastic bow that is able to move between two piers without conveying its oscillation beyond those supports. To our modern eyes, no doubt, there are too many arches across the River Lot at Cahors, but this was necessary in the Middle Ages, and for two reasons. One was necessity of defence, because narrow arches were easier than broad ones to protect from the roadway if an enemy wished to assemble boats under a bridge; and since in the frequent wars of those days a bridge had often to be cut as a final resource against defeat, it was essential that the destruction of one arch should not upset its neighboring piers by the withdrawal of a counterbalancing thrust from one side of the piers. Many piers of a large size were essential, above all, when the greater lateral thrust of round arches had to be considered in its relation to a bridge cut in a single place. Further, bridges in the Middle Ages were built very slowly, bit by bit, their construction lasting from ten to twenty years; and as war at any moment might stop the masons, there was a great need that every arch should have for its support such strong piers as would be equal to the stress and

strain of all eventualities. From this standpoint, then, as well as from the militant strategy of bridge building, many powerful piers were necessary, and a bridge gained very much in value when its pointed arches had in their voussoirs the characteristic which all authorities praise in the Valentre Bridge at Cahors.

But it is time now to say a few words about bridges with chapels. These became common in the Fourteenth century, and in most cases they were built up against their bridges from the water level so as to be like extra piers in times of flood. We are fortunate enough to possess four examples at the present time, despite the vandalism which followed the suppression of monastic houses by Henry VIII. The chantry on Wakefield Bridge suffered greatly in those days, and its desecration continued until the year 1847, when its beautiful architecture, dating from the time of Edward III, was restored at a cost exceeding 2,000 pounds. Some authorities believe that the style belongs to Edward II's time, but the endowment was certainly made by Edward III, in a charter written at Wakefield, he settled 10 pounds per annum on William Kaye and William Bull and their successors for ever to perform divine service in a chapel of St. Mary newly built upon Wakefield at Wakefield." There has been much controversy over this bridge chapel, so I refer you to C. A. Buckler's "Remarks upon Walsayle Chapels," and to N. Scatcherd's "The Chapel of Edward III. on Wakefield Bridge." Perhaps the precise date of the charter of the endowment may have been 1362, a jubilee year, in honor of the fiftieth birthday of our third Edward. This king did much to protect the wool trade, and Wakefield was dependent upon woolen handicrafts, and an ancient tradition says that the lord of the castle of Wakefield was built by the inhabitants of Wakefield. Another endowment seems to have been made by the fourth Edward, in memory of his father, Richard, Duke of York, killed at the battle of Wakefield in 1360. It is certain, I believe, that the chantry was much visited by local pilgrims who came to do honor to a statue of the Virgin.

Yorkshire owns another chapelled bridge, the one at Rotherham, first built in 1443, but it has less charm than that which belongs to the little dove-cot chantry on the picturesque bridge at Bradford-on-Avon, Wiltshire.

Do we possess a bridge buttressed by a watermill? Bridge and mill are often close together, but not so near as they are in some French examples. In the Middle Ages they often formed but one construction, built entirely of wood. A good example survived at Meux, in Erie, till 1835, having weathered storms since the Fifteenth century.

A SUGGESTED SITE FOR THE NEW CITY HALL.

Among the many ideas and suggestions for a City Hall Site, Architect Cuthbertson, calls attention to the property at Market, Church, Dolores and Herman streets, the larger portion of which is a part of the Spring Valley properties, which the City will certainly buy.

The above sketch gives an idea of what the City Hall would look like if

placed upon that property when looking from the down town section.

Here are the reasons why Mr. Cuthbertson believes the City Hall should be so located:

1. The population center of the city; therefore a site for all time.

2. Set upon a hill; all municipal buildings should be so set to be seen by all.

3. On the highest point of Market street; a proper antiphon to the ferry tower at its lowest point; and with Twin Peaks as a back ground.

4. The Site is composed of rock; certainly a desideratum.

5. The whole Site belongs to one owner therefore simplicity of purchase negotiations.

6. Accessibility.—To the lower part of the City by Market street, to the Western Addition and Richmond District by Fillmore, to the Mission by Dolores street, and to the South West part of the City by upper Market street and Twin Peak's tunnel.

In the matter of size it has at least 1/4 more area than the old Hall Site.

As its well known throughout the world, San Francisco is noted for unique things and its reputation will be certainly still more enlarged by having its City Hall upon the lot in question.

When its tower is built in the center of Market street forming (to take a term from music) the Antiphon of the Ferry Building Tower, with the back ground of Twin Peaks, to be seen from the Bay and every part of the Eastern half of the City; it will form one of the most beautiful sights of the world.

From the proposed Reception Gallery built across Market street in which will be received all distinguished guests visiting our City—a view will be obtained unsurpassed of its kind in the world.

The Approaches will also be quite notable and the tunnel for carrying the traffic. These need not be included in the expense of the City Hall proper, but will be paid by the property owners of an assessment District.

It is needless at this time to go into any other details of the buildings that could be put upon this site; the arches over the streets that would connect the several parts of the group, the elevators that run from the low level to the upper level and so on, and the triumphal arch and tower across Market street.

APARTMENT HOUSES.

San Francisco—Apartment house, 7 story and base, steel and concrete, \$125,000. Architects, O'Brien & Werner, Foxcroft Bldg., S. F. Owner, Jessie W. Bryan. The building will be erected at the southeast corner of Geary and Hyde streets, and will cover a full Fifth Vara lot. There will be in the neighborhood of 200 rooms, arranged in two, three and four room suites with private baths. There will be steam heat, elevator service, dumb waiters, wall beds and a vacuum cleaning system. The exterior of the building will be faced with cement plaster. The working drawings are complete and figures are being taken.

San Francisco—Apartment house, 3 story and base, frame, \$25,000. Architect, none. Owner, W. W. Yager, 129 Powell St., S. F. The building will contain 23 apartments, arranged in suites of from two to four rooms each.

Firms dealing news on special classes of buildings such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

There will be private baths, steam heat and wall beds. The exterior of the building will be covered with shiplap and rustic. The plans are complete and in the hands of the owner, and the work will be started within the next ten days under the Day Labor system.

Oakland, Cal.—Apartment house, 2 story, attic and base, frame, \$20,000. Architect, Houghton Sawyer, Shreve Bldg., S. F. Owners Buckingham Corp. The building will contain a number of large apartments with private baths. There will be steam heat and wall beds. The interior trim will be of pine and hardwood. The exterior of the building will be covered with shiplap and cement plaster. The plans are complete and figures are now being taken.

San Francisco—Apartment house, 3 story and base, frame, \$10,000. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owner's name withheld. This will be the first of several buildings of the terrace order which are to be erected on Russian Hill by a syndicate of realty operators. The buildings will embrace all of the modern conveniences and a number of special features. The total expenditures contemplated by the syndicate will approach \$200,000 for construction alone. The plans for the first of these structures will be complete shortly and construction will follow at once.

Los Angeles, Cal.—Apartment house, 4 story and base, brick and steel. Cost not stated. Architect, Francis X. Lourdo, 1125 Angelina St., L. A. Owners, Mr. and Mrs. Leon F. Fighel. The building will be 48x145 feet, and will contain 100 rooms, divided into two and three room apartments. There will be steam heat, passenger and freight elevators, wall beds and vacuum cleaning system. The exterior of the building will be faced with pressed brick and stone. The plans are complete and figures are being taken.

San Francisco—Apartment house, 3 story and base, frame, \$30,000. Architect, none. Owner, Louis Lee, 12 Le Roy Place. The building has been designed to contain 24 apartments of 3 and 4 room each with baths. There will be steam heat and wall beds. The exterior of the building will be covered with brick veneer and shiplap. The plans are in the hands of the owner and the work will be done by Day Labor.

Los Angeles, Cal.—Apartment house, 7 story and base. Class A construction. Cost not stated. Architects, Eisen & Son, Wilcox Bldg., L. A. Owner, James V. Baldwin. The building, which has been mentioned here before, will be 92x131, and will contain 231 rooms, arranged in 75 suites with baths. There will be steam heat, elevator service, vacuum cleaning system, wall beds and a refrigerating plant. The exterior will be faced with white glazed terra cotta and red pressed brick. The plans are ready for figures.

Seattle, Wash.—Apartment house, 4 story and base, reinforced concrete, \$60,000. Architects, Qnandt & Creutzner, Haight Bldg., Seattle. Owner, Charles Sche'l. The building will be

60x120 feet, and will contain 21 apartments of two, three and four rooms each with private baths. There will be a hot water heating system, wall beds and electric elevators. The exterior of the building will be faced with pressed brick. The plans will be completed and put out for figures about February 15th.

Contracts Awarded.

Los Angeles, Cal.—Apartment houses, 2, 3 story and base, frame. Cost not stated. Architect, none. Owner, Mrs. Boyle and Pacific States Investment Co. Contractors, Phoenix Home Builders, Citizens' National Bank Bldg., L. A. Contract price not stated. One structure will be 120x114 feet, and will contain 100 rooms, while the other will contain 32 rooms. Sub-bids are being taken on all work except carpentry.

—BANKS—

San Pedro, Los Angeles Co., Cal.—Bank and offices, 4 story and base, reinforced concrete. Cost not stated. Architects, Edleman & Barnett, Blanchard Bldg., L. A. Owners State Bank of San Pedro. This work was mentioned here when the plans were first put out for figures. The architects have been instructed to call in the plans and ask for new figures for completing the offices on the third and fourth floors.

BRIDGES AND DAMS.

Seattle, Wash.—Wharf addition, concrete and steel, \$70,000. Engineering Dept. Union Steamship Co., Seattle. Owners, Union Steamship Co. Contractors British North American Construction Co., Bank of Ottawa Bldg., Seattle. Contract price, \$70,000.

Contracts Awarded.

Oakland, Cal.—Quay wall, reinforced concrete, \$250,000. City Engineer, Oakland. Owners, City of Oakland. Contractors, Healy-Thibbitts Co., San Francisco. Contract price not given. Note: This is the work recently abandoned by Hensbrough Bros., and the contract calls for the completion of 2,005 feet of wall.

COURT HOUSES.

Independence, Inyo Co., Cal.—Hall of Records, 1 story, reinforced concrete, \$12,000. Architect, G. C. Clements, Bishop. Owners Inyo County. The architect has recently been commissioned to prepare plans for a one-story building which is to replace the present vault used by the County Recorder. The new building will contain the office of the Recorder and a large fire proof vault with fittings. The exterior of the building will be faced with cement plaster. The plans are being prepared and will be ready for figures about April 1st.

Contracts Awarded.

Pasco, Franklin Co., Wash.—Court house, 2 story and base. Class A construction, \$150,000. Architects, C. Lewis Wilson & Co., Empire Bldg., Seattle. Owners, Franklin County. Contract-

ters, Misho & Grant, Globe Bldg., Seattle. Contract price, \$81,419. The general contract includes the plumbing, heating and ventilating and electric wiring.

CHURCHES.

Bishop, Inyo Co., Cal.—Church, 1 story and base, frame, \$10,000. Architect G. C. Clements, Bishop. Owners, First Christian Church of Bishop. The structure has been designed in the Class style, and will contain a main auditorium, seating 250 people, and Sunday school rooms. The exterior of the building will be covered with cement plaster on metal lath. The architect is preparing the plans and when these are complete the work will be done by Day Labor.

Portland, Ore.—Church, 2 story had base, brick, \$20,000. Architect, H. M. Fancher, Portland. Owners, Methodist Episcopal Church (African.) The building will be 51x66 feet with a seating capacity of 300 in the main auditorium. There will be steam heat. The auditorium will be connected with the Sunday school room by flexible partitions. There will be a banquet room in the basement. The exterior of the building will be faced with pressed brick. The plans are complete and figures are being taken.

Contracts Awarded.

Seattle, Wash.—Church, 1 story and base, brick, \$10,000. Architect, A'phens Dudley, Cray' Bldg., Seattle. Owners, African Methodist Episcopal Church. Contractor, R. M. Strank, care of the architect, Seattle. Contract price, \$10,000.

Fowler, Fresno Co., Cal.—Church, 1 story and base, brick and concrete, \$20,000. Architect, A. B. Benton, 114 N. Spring St., L. A. Owners, United Presbyterian Church of Fowler. Contractors, Johnson and Johnson, Kingsburg. Contract price, \$20,000.

Ontario, Los Angeles Co., Cal.—Church, 2 story and base, frame, \$35,000. Architects, Walker and Vawter, Wright and Callender Bldg., L. A. Owners, First Methodist Church of Ontario. Contractor, C. G. Wopschall, Pasadena. General construction, \$28,950. The plumbing was awarded to the Dederich Hardware Company of Ontario, at \$608, and heating to the Machinery and Electrical Company, 321 North Main street, Los Angeles. The contracts for the wiring, painting, decorating and art glass have not been awarded.

FACTORIES & WAREHOUSES.

Los Angeles, Cal.—Warehouse, 5 story and base, reinforced concrete, \$35,000. Architect, A. C. Martin, Higgin's Bldg., L. A. Owners, Peck-Hills Co. The building will cover a large area and will be fire proof in construction. There will be metal covered sash and doors, large freight elevators and hollow tile partitions. The exterior of the building will be faced with cement plaster. The working drawings are nearly complete and figures will be called for in the course of two weeks.

Contracts Awarded.

Los Angeles, Cal.—Warehouse and sales rooms, 2 story and base, brick, \$20,000. Architect, T. Beverley Keim & Co., Wright and Callender Bldg., L. A. Owners, Diamond Rubber Co. Contractor, G. A. Roman, Union League Bldg., L. A. Contract price, \$15,000.

FLATS.

Oakland, Cal.—Flats, 3 story and base, frame, \$14,000. Architect, C. N. Burdick, Central Bank Bldg., Oakland. Owner, George Haly. The building has been designed for 12 flats of five and six rooms each. The interior trim will be of pine with some hardwood floors. There will be coal grates and tile or brick mantels. The exterior of the building will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

FIRE HOUSES.

Contracts Awarded.

Selma, Fresno Co., Cal.—Jail, 1 story frame, \$2,000. Architect, none. Owners, City of Selma. Contractor, James Martin, Selma. Contract price not given.

GARAGES.

San Francisco.—Garage, 1 story and base, brick. Cost not stated. Architect, Oliver Dymal, First National Bank Bldg., Oakland. Owner's name withheld. The building will be erected at the corner of 2nd and Tehama streets, and will cover an area 20x80 feet. The floor will be of cement. There will be large gasoline storage tanks. The exterior of the building will be faced with pressed brick. The plans are complete and figures are being taken.

—HALLS & SOCIETY BLDGS.—

Martinez, Contra Costa Co., Cal.—Town hall, 2 story and base, brick, \$12,000. Architect, William Wilde, Albany Block, Oakland. Owners, Town of Martinez. The plans for a two-story building have been approved by the Town Trustees, and bids will be called for as soon as the working drawings can be completed. The building will house all of the city offices. The exterior will be faced with pressed brick. Working drawings are being prepared.

Los Angeles, Cal.—Lodge hall, 2 story and base, brick, \$10,000. Architects, Train & Williams, Exchange Bldg., L. A. Owners, Westlake Lodge, F. and A. M. The architects are revising the plans for this building which was mentioned here some time ago. The original plans exceeded the amount available for construction and certain minor changes are now being made. The new plans will be ready for figures shortly.

Seattle, Wash.—Association building, 6 story and base, reinforced concrete, \$15,000. Architects, Gould & Champney, American Bank Bldg., Seattle. Owners, Young Women's Christian Association. The Building Committee has just announced the selection of the above-named architects. The new building will be fire proof. The first floor will contain the general lobby and business offices, parlors and reception rooms and a large auditorium with gallery extending through the second floor. The upper floors will be arranged for the educational departments, social rooms, tea rooms, cafeteria, library and gymnasium. There will be a swimming tank in the basement. The exterior treatment of the building has not been decided upon. Construction will be started in the spring.

Los Angeles, Cal.—Association building, 3 story and base, brick. Cost not stated. Architect, A. L. Benton, 114

North Spring St., L. A. Owners, Young Men's Christian Association. The building has been designed for the use of the elected members of the association. The architect has presented the sketches to the committee for approval, and details of the construction cannot be given until the working drawings are prepared.

Portland, Ore.—Club house, 6 story and base, reinforced concrete, \$160,000. Architects, Whitcomb & Pondhax, Portland. Owners, Portland Women's Union. The building will cover an area of 100 feet square. The first floor will be arranged for reception rooms, offices, reading rooms, etc. A large and completely equipped gymnasium will be located in the basement. The upper floors will be arranged for about 200 rooms with baths and toilets. There will be steam heat and elevator service. The exterior will be faced with pressed brick and terra cotta. The architects' preliminary drawings have been approved and working drawings are being prepared.

Contracts Awarded.

Salem, Ore.—Lodge hall, 6 story and base, brick and steel, \$125,000. Architect, Ellis F. Lawrence, Chamber of Commerce Bldg., Portland. Owners, Salem Masonic Temple Co. Contractors, Bartlett, Roth & Co., Portland. Contract price, \$105,000.

HOSPITALS.

North Anklam, Wash.—Hospital, 5 story and base, steel and brick, \$200,000. Architect, Robert D. Tegen, Swetland Bldg., Portland. Owners, Sisters of Charity. This work was mentioned here some time ago when the architect was first commissioned to prepare the plans. The working drawings are now well advanced, and figures will be called for by the 1st of February. The building will be arranged in the form of a cross and will cover a considerable area. The exterior will be faced with paving brick.

San Mateo, San Mateo Co., Cal.—Hospital, 5 story and base, reinforced concrete, \$100,000. Architect, Lewis P. Hubart, Crocker Bldg., S. F. Owners, Red Cross Association. The plans for this building have been on the boards for some time, but money was not available for the construction. There will be a number of private wards and rooms, steam heat and nurses' quarters. The exterior of the building will be faced with cement plaster. Plans will be ready for figures in a couple of months.

Oakland, Cal.—Orphanage, 2 story and base, reinforced concrete. Cost not stated. Architect, H. H. Meyers, Kohl Bldg., S. F. Owners, Fred Finch Orphanage. The building will be arranged for a large number of rooms, baths, kitchen and dining room. There will be a hospital ward. There will be steam heat. The exterior of the building will be faced with cement plaster. The plans are complete and the architect is taking figures on the construction.

HOTELS.

Los Angeles, Cal.—Hotel, 6 story and base, reinforced concrete, \$150,000. Architects, Neher & Skillings, Pacific Electric Bldg., L. A. Owners, Otto H. Neher and Thomas L. Woolwine. The building will occupy a site 120x160 feet. The details of the construction

Seattle, Wash.—Theatre alterations, \$30,000. Architects, Wilson & Lovelless, Arcade Bldg., Seattle. Owner, William Block. The work will include the installation of reinforced concrete floors on the main floor and two balconies. The building was recently gutted by fire and complete interior trim will be necessary besides considerable exterior work. The working drawings will be ready for figures within two weeks.

Los Angeles, Cal.—Theatre and offices, 11 story and base. Class A construction, \$400,000. Architects, Morgan Walls & Morgan, Story Bldg., L. A. Owner, William Gartland. This work was mentioned in a recent issue, when the plans were being prepared, and was fully described at that time. The working drawings have been completed and the work is now being taken. The structure will be one of the finest equipped theatres buildings on the Pacific Coast. Bids will be opened for the general construction within three weeks.

SEALED PROPOSALS.

CONSTRUCTING BUILDING.

(Bids close Jan. 10.)

OFFICE of the Board of Public Works of the City and County of San Francisco.—Sealed proposals will be received at the office of the said Board of Public Works, tenth floor, David Hewes Building, 995 Market street, between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 10th day of January, 1912, for doing the following work, to wit:

The general construction of the annex to the Everett School, located on Sanchez street, between Sixteenth and Seventeenth streets.

CONSTRUCTING BUILDING.

(Bids close Jan. 16.)

SEALED proposals are invited for furnishing to the Department of Public Service of the City of Los Angeles, California, all labor and material necessary to complete the general work, including masonry, wood work, brickwork, glazing, roofing, marble and tile work and painting, and all work other than structural steel work, electric wiring, plumbing, heating, elevator work and ornamental iron work necessary for the construction and completion of a six-story and basement office building, to be erected at the southwest corner of Fifth and Olive streets in said city, in accordance with specifications therefore designated "General" on file in the office of the Board of Public Service Commissioners of said city, to which reference is made for full details and description of said general work.

All proposals must be filed with said Board at or before 2 o'clock p. m. of January 16, 1912.

Note: Bids will also be opened on January 16th for the plumbing, steam heating, ornamental iron, structural iron, electric wiring and passenger elevators to be installed in the above building. Separate contracts will be let on all of the above mentioned work.

CONSTRUCTING BRIDGE.

(Bids close Jan. 15.)

NOTICE is hereby given that sealed bids will be received by the Board of Supervisors of the County of Los Angeles, State of California, up to 2 o'clock p. m. of January 15, 1912, for furnishing all labor and materials nec-

cessary for the construction of a 75-foot pile trestle bridge on Sherman Way, near Tejuna Avenue, in Lankershim Road District, in said county and State.

Said work is to be done in accordance with plans and specifications on file in the office of the Board of Supervisors of said county, and bidders are referred to said plans and specifications for further information.

By order of the Board of Supervisors of the County of Los Angeles, State of California, made December 26, 1911.

H. J. LELANDE, County Clerk.

CONSTRUCTING BUILDING.

(Bids close Jan. 13.)

SEALED proposals will be received by the Board of School Trustees of the St. Helena Union High School District at their office in St. Helena, Napa Co., Cal. until the 13th day of January, 1912, for the construction of a reinforced concrete and stone school building in accordance with the plans and specifications of Architect Frederick Soderberg, Union Savings Bank Building, Oakland. Plans and specifications can be obtained from either the architect or from W. D. Mooney, Clerk of the Board of Trustees, St. Helena.

The Board reserves the right to reject any or all bids.

SAN FRANCISCO.

Apartment House—7 story and base, steel and concrete, \$125,000. San Francisco. Architects O'Brien and Werner, Foxcroft Bldg., S. F. Owner, Jesse W. Bryan. The building will be erected at the southeast corner of Geary and Hyde streets, and will cover a full Fifty Vara lot. There will be in the neighborhood of 200 rooms, arranged in two, three and four room suites with private baths. There will be steam heat, elevator service, dumb waiters, wall beds and a vacuum cleaning system. The exterior of the building will be faced with cement plaster. The working drawings are complete and figures are being taken.

Apartment House—3 story and base, frame, \$25,000. San Francisco. Architect, none. Owner, W. W. Yager, 129 Powell st., S. F. The building will contain 23 apartments, arranged in suites of from two to four rooms each. There will be private baths, steam heat and wall beds. The exterior of the building will be covered with shiplap and rustic. The plans are complete and in the hands of the owner, and the work will be started within the next ten days under the Day Labor system.

Residences—2, 2 story and base, frame, \$8,000 each. San Francisco. Architect, Joseph A. Leonard, Phelan Bldg., S. F. Owner, Urban Realty Co. The dwellings have each been designed for ten room houses with two bath rooms. The interior trim will be of redwood and inlaid hardwoods. There will be furnace heat and open fire places. The mantels will be of brick on tile. There will be considerable masonry and terrazzo used and hardwood floors throughout. The exteriors of the buildings will be covered with shiplap. The plans are complete and the work

will be done by Day Labor.

Apartment House—3 story and base, frame, \$40,000. San Francisco. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owner's name withheld. This will be the first of several buildings of the terrace order which are to be erected on Russian Hill by a syndicate of realty operators. The buildings will embrace all of the modern conveniences and a number of special features. The total expenditure contemplated by the syndicate will approach \$200,000 for construction alone. The plans for the first of these structures will be completed shortly and construction will follow at once.

Residence—2 story and base, frame, \$1,000. San Francisco. Architect, Joseph A. Leonard, Phelan Bldg., S. F. Owners, Urban Realty Co. The dwelling will contain six rooms and will be handsomely finished in oak and mahogany. There will be furnace heat, open fire places and hardwood floors. The exterior of the dwelling will be covered with shingles. The plans are complete and the work will be done by Day Labor.

Garage—1 story and base, brick. Cost not stated. San Francisco. Architect, Oliver Duval, First National Bank Bldg., Oakland. Owner's name withheld. The building will be erected at the corner of Third and Tehama streets, and will cover an area of 30x80 feet. The floor will be of cement. There will be large gasoline storage tanks. The exterior of the building will be faced with pressed brick. The plans are complete and figures are being taken.

Apartment House—3 story and base, frame, \$30,000. San Francisco. Architect, none. Owner, Louis Lee, 12 Le Roy Place. The building has been designed to contain 24 apartments of 3 and 4 rooms each with baths. There will be steam heat and wall beds. The exterior of the building will be covered with brick veneer and shiplap. The plans are in the hands of the owner and the work will be done by Day Labor.

School Electric Wiring and Vacuum Cleaning System—Cost not stated. San Francisco. City Architect, Alfred J. Coffey, 1201 David Hewes Bldg., S. F. Owners, City and County of San Francisco. The plans for the electric work and the installation of a vacuum cleaning system in the Girls' High School have been completed and placed in the hands of the Board of Public Works for figures. Bids will be opened for this work on January 10th. On the same date figures will be opened for the construction of a two-story frame annex to the Everett School, located on Sanchez street, between 16th and 17th streets. The later work has been estimated to cost \$10,000.

Stores and Lofts—3 story and base, reinforced concrete, \$30,000. San Francisco. Architect, C. A. Meussdorffer, Humboldt Bank Bldg., S. F. Owner, Fred Bess. The building will be \$32,685. There will be offices of the owner on the first floor and composing rooms and press rooms above. The exterior of the building will be faced with cement plaster. Plans are being prepared.

Contract Awarded.

Stores and Hall—2 story and base, brick, \$18,000. San Francisco. Architects, Reid Bros., 411 Bldg., S. F. Owner, Mrs. Emma G. Butler. Contractors, Stockholm and Allen, Monadnock Bldg. Contract price, \$43,000.

Building Contracts Awarded.

Recorded Amount
Dec. 29, 1911—½ of Lot 6 G and H 22nd and 33rd Sts., Sacramento. Emigh Hardware Co. \$75.11; Scott Lyman & Stack, \$712; George L. Herndon, \$706 vs Mrs Mary Wise

LOS ANGELES AND SOUTH-EASTERN CALIFORNIA.

Residence—2 story and base, frame. Cost not stated. Pomona, Los Angeles Co., Cal. Architect, C. E. Wolfe. Pomona. Owner, S. H. Bowman. The dwelling will be designed for a handsome city residence. There will be a warm air system of heating and open fire places with attractive mantels. The interior trim will be of pine. There will be hardwood floors. The plans are being prepared.

Warehouse—5 story and base, reinforced concrete, \$35,000. Los Angeles, Cal. Architect, A. C. Martin, Higgins Bldg., L. A. Owners, Peck-Hills Co. The building will cover a large area and will be fire proof in construction. There will be metal covered sash and doors, large freight elevators and hollow tile partitions. The exterior of the building will be faced with cement plaster. The working drawings are nearly complete and figures will be called for in the course of two weeks.

School—2 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architect, Robert M. Taylor, Douglas Bldg., L. A. Owners, City of Los Angeles. The architect has been commissioned to prepare plans for the construction of a two-story building to contain twelve class rooms and a one-story brick annex for gymnasium purposes. The interior partitions will be of hollow tile, reinforced concrete floors and metal ceilings. There will be a plasma blast system of heating. The exterior of the building will be faced with tapestry brick. Plans will be complete within one month.

Apartment House—1 story and base, Theatre and Offices—11 story and base. Class A construction, \$400,000. Los Angeles, Cal. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owner, William Gartland. This work was mentioned in a recent issue, when the plans were being prepared and was fully described at that time. The working drawings have been completed and figures are now being taken. The structure will be one of the finest equipped theatre buildings on the Pacific Coast. Bids will be opened for the general construction within three weeks brick and steel. Cost not stated. Los Angeles, Cal. Architect, Francis X. Lounoun, 1125 Angelina St., L. A. Owners, Mr. and Mrs. Leon Figliera. The building will be 48x145 feet, and will contain 100 rooms, divided in two and three room apartments. There will be steam heat, passenger and freight elevators, wall beds and vacuum cleaning system. The exterior of the building will be faced with pressed brick and stone. The plans are complete and figures are being taken.

Apartment House—7 story and base,

Class A construction. Cost not stated. Los Angeles, Cal. Architects, Elsen & Son, Wilcox Bldg., L. A. Owner, James V. Baldwin. The building, which has been mentioned here before, will be 92x131, and will contain 231 rooms arranged in 75 suites with baths. There will be steam heat, elevator service, vacuum cleaning system, wall beds and a refrigerating plant. The exterior will be faced with glazed terra cotta and red pressed brick. The plans are ready for figures.

Residence—2 story and base, frame. Cost not stated. Los Angeles, Cal. Architect, Frank M. Tyler, Union Trust Bldg., L. A. Owner, C. S. Haskins. The dwelling will contain eleven rooms and three baths. The interior trim will be of pine, oak and Spanish cedar. There will be furnace heat and open fire places. Tile will be used on the floors of two of the bath rooms and oak in all of the first floor rooms. The exterior of the dwelling will be covered with veneer artificial stone and cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Bank and Offices—1 story and base, reinforced concrete. Cost not stated. San Pedro, Los Angeles Co., Cal. Architects, Edelman & Barnett, Blanchard Bldg., L. A. Owners, State Bank of San Pedro. This work was mentioned here when the plans were first put out for figures. The architects have been instructed to call in the plans and ask for new figures for completing the offices on the third and fourth floors.

Hotel—6 story and base reinforced concrete, \$150,000. Los Angeles, Cal. Architects, Neher & Skillings, Pacific Electric Bldg., L. A. Owners, Otto H. Neher and Thomas L. Woolwine. The building will occupy a site 120x160 feet. The details of the construction have not been entirely settled upon and will be given at a later date in the columns.

Lodge Hall—2 story and base, brick, \$29,000. Los Angeles, Cal. Architects, Train & Williams, Exchange Bldg., L. A. Owners, Westlake Lodge F, and A. M. The architects are revising the plans for this building, which was mentioned here sometime ago. The original plan exceeded the amount available for construction, and certain minor changes are now being made. The new plans will be ready for figures shortly.

Association Building—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, A. B. Benton, 114 North Spring St., L. A. Owners, Young Men's Christian Association. The building has been designed for the use of the colored members of the association. The architect has presented sketches to the committee for approval, and details of the construction cannot be given until the working drawings are prepared.

Residence—2 story and base, frame. Cost not stated. Los Angeles, Cal. Architect, Parker O. Wright, Security Bldg., L. A. Owner, Mrs. Jeanette G. Donovan. The dwelling has been designed for a sixteen room house with four bath rooms. The interior trim will be of oak, mahogany, pine and white enamel. There will be oak and cork tile floors. The dwelling will be heated by hot water and there will be four tile mantels. There will be a vacuum cleaning system and two Raud heaters. The exterior of the dwelling will be covered with shiplap. The plans are complete.

Residence—2 story and base, frame. Cost not stated. Los Angeles, Cal. Architect, Frank M. Tyler, Union Trust Bldg., 14 A. Owner, S. W. Belden. The dwelling will contain twelve rooms and three baths. The interior trim will be of oak, pine and mahogany with oak floors throughout. Two baths will be finished in tile. There will be furnace heat and open fire places. The exterior of the dwelling will be covered with blue brick veneer and cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

School—1 story and base, reinforced concrete, \$29,000. Whittier, Los Angeles Co., Cal. Architect, A. C. Smith, 307 South Broadway, L. A. Owners, Whittier School District. The building will be 76x121, and will contain six Class rooms on the first floor, library and office and two lunch rooms, two play rooms, toilets and furnace room in the basement. There will be furnace heat. The exterior of the building will be faced with cement plaster. The plans are complete and bids will be called for shortly.

Stores—1 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owner, Monroe Bernheim. The building will be 50 feet square. There will be three stores and living apartments. The exterior of the building will be faced with pressed brick. The plans are being prepared.

Ice Tank—2 story and base, reinforced concrete, \$65,000. Los Angeles, Cal. Architects, Newman & Kyser, Wright and Callender Bldg., L. A. Owners, Pacific Ice Rink Co. The plans for a large ice rink, which is to be erected at Luna Park, are being prepared and will shortly go out for figures. The building will cover an area of 110x250 feet. There will be one of the largest ice plants on the Pacific Coast installed.

School—2 story and base, brick and steel. Cost not stated. Santa Ana, Orange Co., Cal. Architect, A. Burnside Sturges, Story Bldg., L. A. Owners, Santa Ana School District. The architect has just been commissioned to prepare plans for a new grammar school building, and as no plans have been completed the details cannot be given at this time. This work is entirely separate from the Polytechnic High School buildings for which the same architect is preparing plans.

Theatre—2 story and base, brick, \$25,000. Monrovia, Los Angeles Co., Cal. Architect, H. Alban Reeves, Chamber of Commerce Bldg., L. A. Owner, Consolidated Amusement Co., Delta Bldg., L. A. The building will be 50x150 and will have a seating capacity of about 800 people. There will be steam heat and a modern system of ventilation. The exterior of the building will be faced with artificial stone. The plans are being prepared.

Contract Awarded.

Apartment House—2, 3 story and base, frame. Cost not stated. Los Angeles, Cal. Architect, none. Owners, Mrs. Bayle and Pacific States Investment Co. Contractors, Phoenix Home Builders, Citizens' National Bank Bldg., L. A. Contract price not stated. One structure will be 126x114 feet, and will contain 100 rooms, while the other will contain 32 rooms. Sub-bids are being taken on all work except the carpentry.

Church—2 story and base, frame,

\$35,000. Ontario, Los Angeles Co., Cal. Architects, Walker and Vawter, Wright and Callender Bldg., L. A. Owners, First Methodist Church of Ontario. Contractor, C. G. Wopschall, Pasadena, general construction, \$28,950. The plumbing was awarded to the Dederich Hardware Company of Ontario, at \$668, and heating to the Machinery and Electrical Company, 331 North Main street, Los Angeles. The contracts for the wiring, painting, decorating and art glass have not been awarded.

Warehouse and Sales Rooms—2 story and base, brick, \$20,000. Los Angeles, Cal. Architects, T. Beverley Kelm & Co., Wright and Callender Bldg., L. A. Owners, Diamond Rubber Co. Contractor, G. A. Boman, Union League Bldg., L. A. Contract price, \$15,000.

CONTRACT AWARD

School Shop Buildings—2, 1 story and base, brick, \$20,000. Los Angeles, Cal. Architect, C. A. Falthoff, 2164 3rd Ave., L. A. Owners, City of Los Angeles. Contractors, Mulholland, Harshig-Higins Bldg., L. A. Contract price, \$13,900.

Stores and Offices—2 story and base, brick, \$25,000. Glendora, Los Angeles Co., Cal. Architect, none. Owner, Frank Chance. Contractors, Tifal Building and Investment Co., Security Bldg., L. A. Contract price, \$25,000.

PORTLAND AND OREGON.

Church—2 story and base, brick, \$20,000. Portland, Ore. Architect, H. M. Fancher, Portland. Owners, Methodist Episcopal Church (African). The building will be 51x86 feet with a seating capacity of 300 in the main auditorium. There will be steam heat. The auditorium will be connected with the Sunday school rooms by flexible partitions. There will be a banquet room in the basement. The exterior of the building will be faced with pressed brick. The plans are complete and figures are being taken.

Hotel—5 story and base, concrete and mill construction, \$50,000. Portland, Ore. Architects, Jacobberger & Smith, Portland. Owners, Callahan Estate. The building will be 50x60 feet. There will be several stores besides the main hotel office and lobby on the first floor and 44 rooms and 4 baths on each of the upper floors. There will be steam heat and elevator service. The exterior of the building will be faced with pressed brick and terra cotta. The plans will be ready for figures about February 1st.

Club House—6 story and base, reinforced concrete, \$160,000. Portland, Ore. Architects, Whitehouse & Foulhoux, Portland. Owners, Portland Women's Union. The building will cover an area of 100 feet square. The first floor will be arranged for reception rooms, offices, reading rooms, etc. A large and completely equipped gymnasium will be located in the basement. The upper floors will be arranged for about 200 rooms with baths and toilets. There will be steam heat and elevator service. The exterior will be faced with pressed brick and terra cotta. The architects' preliminary drawings have been approved and working drawings are being prepared.

Contracts Awarded.

Lodge Hall—6 story and base, brick and steel, \$125,000. Salem, Ore. Architect, Ellis F. Lawrence, Chamber of Commerce Bldg., Portland. Owners, Salem Masonic Temple Co. Contrac-

tors Bartlett, Roth & Co., Portland. Contract price, \$105,000.

SEATTLE AND WASHINGTON.

Hospital—5 story and base, steel and brick, \$200,000. North Yakima, Wash. Architect, Robert B. Tegen, Swetland Bldg., Portland. Owners, Sisters of Charity. This work was mentioned here some time ago when the architect was first commissioned to prepare the plans. The working drawings are now well advanced and figures will be called for by the 1st of February. The building will be arranged in the form of a cross, and will cover a considerable area. The exterior will be faced with paying brick.

Apartment House—4 story and base, reinforced concrete, \$60,000. Seattle, Wash. Architects, Quandt & Creutzer, Halght Bldg., Seattle. Owner, Charles Schell. The building will be 60x120 feet, and will contain 21 apartments of two, three and four rooms each with private baths. There will be a hot water heating system, wall beds and electric elevators. The exterior of the building will be faced with pressed brick. The plans will be complete and put out for figures about February 15th.

Association Building—6 story and base, reinforced concrete, \$100,000. Seattle, Wash. Architects, Gould & Champney, American Bank Bldg., Seattle. Owners, Young Women's Christian Association. The Building Committee has just announced the selection of the above-named architects. The new building will be fire proof. The first floor will contain the general lobby and business offices, parlors and reception rooms and a large auditorium with gallery extending through the second floor. The upper floors will be arranged for the educational departments, social rooms, tea rooms, cafeteria, library and gymnasium. There will be a swimming tank in the basement. The exterior treatment of the building has not been decided upon. Construction will be started in the spring.

Residence—2½ story and base, frame, \$10,000. Seattle, Wash. Architect, Elmer E. Green, Central Bldg., Seattle. Owner, J. S. Erickson. The dwelling will be finished in oak and pine with hardwood floors throughout. There will be eight rooms and two baths. There will be steam heat. The exterior of the dwelling will be faced with pressed brick veneer. The plans are complete and the work will be done by Day Labor.

Theatre Alterations—\$30,000. Seattle, Wash. Architects, Wilson & Lovelless, Archibald Bldg., Seattle. Owner, William Block. The work will include the installation of reinforced concrete floors on the main floor and the two balconies. The building was recently gutted by fire and complete interior trim will be necessary besides considerable exterior work. The working drawings will be ready for figures within two weeks.

Contracts Awarded.

Wharf Addition—Concrete and steel, \$70,000. Seattle, Wash. Engineering Dept., Union Steamship Co., Seattle. Owners, Union Steamship Co. Contractors, British North American Construction Co., Bank of Ottawa Bldg., Seattle. Contract price, \$70,000.

Church—1 story and base, brick, \$10,000. Seattle, Wash. Architect, Al-

Contractors, Misho & Grant, Globe Bldg., Seattle. Contract price, \$90,049. The general contract includes the plumbing, heating and ventilating and electric wiring.

NO WONDER WE DIE.

In the midst of life we are in death. A man in San Francisco the other day, when presented with a bill of \$7.85 for three sandwiches and three pints of beer, in a tandoori cafe, fell over dead. A woman in New York yesterday heard a joke so funny that she literally died laughing. A man in Pennsylvania fell dead on receiving an unexpected visit from his son. One man scratched himself with a pin and died; another ate sausage with the same result. A boy smoked a cigarette and then fell nineteen stories into a cigar stand and died, presumably of the tobacco. Many years ago a visitor to Fresno, on a hot day drank whiskey all day, and then at night drank a large glass of ice water and died. The corner's jury said it was the water. And add to these examples the fact that most people die in bed. So neither sleeping or waking, eating, drinking or smoking, in joy or in sorrow, are we safe. Anything may be fatal, and we court death all the time. Yet we continue to live—until we die, and after that we don't care. No wonder mankind tends to fatalism.—Fresno Republican.

CURIOSITIES OF DICTIONARIES.

The appearance of one of the new abridged dictionaries invites the thoughtful to the contemplation of this puzzling fact: Why is it that the usual abridged dictionary, intended chiefly for the relief of uncertain spellers and persons who wish to be certain of the meaning of current phrases, is always certain to contain such words as "cat," "dog," "horse," "cow" and others whose spelling and meaning may be assumed to be within the reach of very ordinary intellects, while no help is offered on such phrases as the Brazilian "valorization" plan, "hangar" and such?

It is recognized that not all abridgements offend to the same degree and in the same details. But the phenomenon is common and inexplicable. The mental processes of the abridgment makers deserve the attention of the society for psychical research.

MADELINE PLAINS READY FOR PLOW.

MADELINE (Lassen Co.), January 3. The big irrigation and colonization project that has been under course of development in this vicinity for two years by the Madeline Meadows Land & Irrigation Company is practically completed, and some of the tracts have already been settled upon. It is stated that about 10,000 acres will be ready for cultivation this year and that 20,000 acres have been sold out of the 30,000 acres that are under the ditch system.

The company has spent about \$400,000 on the project, and has built twenty-six miles of main canals and fifty-five miles of lateral ditches. The water is taken from Tule Lake through a tunnel 2,000 feet long that pierces a ridge separating the lake from the Madeline Plains. The ditches run along the foot of the hills around the lands that are to be cultivated, and the laterals convey the water to the various ranches.

A big part of the project and one that involves considerable expense is the clearing of the land, which is covered with sagebrush. This is being done in a systematic manner, and when the brush is cleared the land is in first-class condition for tilling, the soil being loose and easily plowed.

It is claimed that the land will produce good crops of alfalfa, beets, potatoes and all sorts of root crops, and many acres will be planted in the Spring.

The firm of Sloan & Robson, of San Francisco, was employed by the company to build the tunnel and canal system.

PROGRESS OF THE POSTAL SAVINGS BANKS.

WASHINGTON, Jan. 4.—Theodore L. Wood, chief clerk of the postoffice, has been appointed director of the postal savings system at \$5,000 a year. The office is a new one, made necessary by the extraordinary development of the postal savings system, which is receiving deposits aggregating a million dollars a week.

Postmaster General Hitchcock predicted today that before the end of the current fiscal year the postal savings deposits would exceed fifty million dollars, and that the system not only would be self-sustaining, but a source of profit to the government. Already the deposits exceed \$15,000,000.

Of the four important offices that opened for business August 1, Chicago, November 30, led with deposits of \$57,845; New York was second with \$41,763; Boston third with \$183,464, and St. Louis fourth with \$119,606.

The system has proved so notable a

success that preparations are being made to establish it in about 40,000 fourth class postoffices that do a money order business.

NATIONAL BANK RECORDS.

WASHINGTON, Jan. 4.—Theodore L. tion of national banks, shown by the treasury call of December 3, indicated a considerable shrinkage in business as compared with September 1. All national banks showed losses in loans aggregating \$4,801,245; in cash, \$32,681,210, but a gain in deposits of \$48,047,269.

The situation in the eastern states was puzzling to treasury officials. The banks in that section lost a total in loans of \$39,914,742, in cash, \$37,216,121 and in deposits \$73,720,533. Country banks in the east showed gains in all three items, but they were not sufficient to counteract losses in reserve cities. The returns indicate that New York city lost \$46,556,259 in loans; \$37,907,764 in cash and \$73,606,937 in deposits. Losses in all three items also were sustained in the middle western states.

Gains, however, prevailed in the New England, southern and western and Pacific coast states.

IN THE BANKRUPTCY COURT.

Creditors of Frank Marty, a dairyman of this city, applied to the United States district court Wednesday to have him declared an involuntary bankrupt, claiming that he owes \$12,000. The petitioners and the amounts they say are due them are the John Stumpf Company, \$388.60; Charles Herold, \$1,032; D. E. Bessecker, \$845.57.

A petition in insolvency was filed Wednesday by A. Feigenbaum, a clothier of this city, who owes \$7,160.71 and has \$360 assets.

LAST CONTRACT LEFT FOR NATRON CUT-OFF.

KLAMATH FALLS (Ore.), January 4. The Natron-Klamath Falls Cut-off will be completed this year. The last end of the big contract has been let to the Utah Construction Company. Ericson & Peterson, who have constructed a large part of road will not be the contractors.

All the local engineers who have been in Klamath Falls for several years will go to Natron headquarters and push matters at that end, as that is where the heavy work is.

The gap from Natron to Klamath Falls was 192 miles, of which 119 miles have been constructed, leaving seventy-three to complete. All the work is to be done this year.

PLAN PERSIAN RAILWAY.

LONDON, Jan. 4.—British, French and Russian bankers are to hold a meeting in Paris during the coming week to organize a syndicate with a capital of \$500,000 to carry out a survey of a proposed transpersian railroad.

Great Britain and Russia have approved of the scheme, although the precise route to be taken by the railroad remains to be decided.

The proposal contemplates the construction of a line touching the seaport of Baku, in Russian Transcaucasia; Astara, on the Caspian sea; Teheran, the capital of Persia, and Gwatar, on the Arabian sea. It will continue through Baluchistan and connect with the Indian railroads going to Kur-

rahee.

No difficulty is anticipated in raising the capital or in obtaining the necessary concessions in Persia.

LUMBER PLANTS MERGED.

EUREKA (Humboldt Co.), January 1.—Announcement is made here that the Hammond Lumber Company has consolidated all the properties known as the "Hammond Interests" into one great lumber manufacturing concern controlling the output of four big mills and a chain of twenty-nine yards in the leading cities of California, Nevada, Oregon, Arizona, and elsewhere. It is understood that the steamship line of the Hammond Company also will be included in the merger.

The companies affected are The Vance Redwood Lumber Company owning a plant at Samoa with an output of 400,000 feet daily; Curtis Lumber Company of Mill City, Ore.; the Hammond Lumber Company of Watsonville; the National Lumber Company, a selling and finishing concern with twenty-nine yards in the West and the Hammond Lumber Company plant at Astoria.

It is understood that a large increase in capital stock of the company is contemplated.

ALASKA MINERAL OUTPUT.

JANUARY 2.—Mining activities in Alaska, with the exception of coal, are showing a great advance, according to estimates by the United States geological survey, which gives the total of the territory's mineral production for 1911 as \$20,370,000. Of this amount \$17,150,000 was gold, as against a gold production last year of \$16,153,749. This year Alaska produced 22,900,000 pounds of copper, more than five times the output in 1910. The coal, silver, tin, marble and gypsum mined during the year was valued at only \$390,000.

Of the total value of Alaska's mineral production since 1880, when mining began, the total being \$206,000,000, the gold production was \$195,950,000. Since copper mining in Alaska began 10 years ago, 56,700,000 pounds have been taken out, 40 per cent of this being this year.

PORTLAND (Or.), January 1.—California is now a bigger consumer of Oregon lumber than any other state or country. In coastwise shipping, the year closed with an usually good record. The total shipments amounted to 129,767,138 feet, as against 110,742,000 feet in 1910. This is a gain of approximately 12,000,000 feet for the year. Two years ago the total coastwise shipments were 95,549,700 feet. The increase in this trade, therefore, in twenty-four months amounted to about 27,000,000 feet. In the year just closed San Francisco and Los Angeles were the cities whose purchases were heaviest.

APPROVES CONTRACT FOR ELECTRIC POWER.

FALLON (Nev.), January 1.—Director Newell of Washington is wired to Engineer Cole of the Truckee-Carson Project that the Department of the Interior has authorized a contract between the Government and the City of Fallon for electric power from Lahontan Dam, and that now the work

of installing the services will commence.

In a short time the town of Fallon will have electric lights and power.

NATURAL CEMENT VERSUS PORTLAND CEMENT.

The rise and fall of the natural cement industry in the United States is shown by Ernest F. Burchard, of the United States Geological Survey, in "The Cement Industry in 1910," recently issued by the Survey as an advance chapter of "Mineral Resources for 1910." A dozen years ago the production of natural cement was nearly 10,000,000 barrels; last year it was but 1,133,239 barrels. It seems that it is a case of the survival of the fittest and Portland cement has largely displaced natural cement. The following table tells the story:

Production of Portland and natural cement in the United States, 1899-1910 (in barrels).

Year	Portland cement.	Natural cement.
1899	5,652,266	9,863,179
1901	12,711,223	7,084,823
1903	22,342,973	7,030,271
1905	35,246,812	4,472,409
1907	48,785,390	2,887,700
1909	64,991,431	1,537,638
1910	76,549,951	1,239,239

Natural cements differ from Portland cements in the following important particulars:

Natural cements are not made from carefully prepared and finely ground artificial mixtures, but from natural limestone rock.

Natural cements are burned at a lower temperature than Portland, the mass in the kiln never being heated high enough even to approach the fusing or clinkering point.

Natural cements, after burning and grinding, are usually yellow to brown in color and light in weight, having a specific gravity of 2.7 to 3.1—that is, the cements weigh from 2.7 to 3.1 times the weight of water. Portland cement is commonly blue to gray in color and heavier, its specific gravity ranging from 3 to 3.2.

Natural cements set more rapidly than Portland cement, but do not attain so high tensile strength.

Portland cement is a definite product, its percentages of lime, silica, alumina, and iron oxide varying only between narrow limits, while brands of natural cements vary greatly in composition.

The future of the natural-cement industry, according to Mr. Burchard, seems to depend on means of improvement in the manufacture of the cement, chemically or by better mechanical devices, whereby it may be brought nearer to the specifications for high-grade Portland cement. The decline in the use of natural cement has been due principally to the greater tensile strength of Portland cement. At long periods, as shown by many records, the two cements in sand mortars show practically equal results. Natural cement has hydraulic properties—that is, if properly prepared it will set under water.

A copy of Mr. Burchard's report can be obtained on application to the Director, U. S. Geological Survey, Washington, D. C.

CONTRACTING PLASTERERS' ASSOCIATION ELECTS NEW OFFICERS.

Annual Meeting of the Organization Plans Work for the New Year.

The Contracting Plasterers' Association held its regular annual meeting in the assembly room of the Builders' Exchange Tuesday afternoon and elected the following officers for the ensuing year:

President, W. F. Clute; vice president, J. E. Steere; secretary, W. S. Scott; treasurer, Frank Coghlan; sergeant at arms, Joe Kaiser.

The members of the Executive Committee are: R. D. Felt, Gust Johnson, and D. Ross Clarke.

The meeting passed a unanimous resolution extending a vote of thanks to Mr. Alex. Mennie, the retiring president, for the work he had done during the past year and the Secretary was instructed to write a letter conveying the appreciation of the members of the work he had done for the organization.

During the past year the Association has worked hard for the uplift of the business, to better conditions, and to insure a better grade of work to be done all along the line. To this end the organization has worked for fair conditions for all members, to prevent peddling of bids and to raise the tone of the business generally.

The annual get-together banquet of the organization will be held at the Tchau Tavern on January 16th and a general good time is expected.

NORTHERN ELECTRIC INDEBTED TO BUTTERS ESTATE.

The appraisement of the estate of Henry A. Butters, the real estate and mining operator of Oakland, who died in October, 1908, was filed last Tuesday, showing a valuation of \$483,217.27. The principal items follow: Due the estate on open accounts of the Northern Electric Company, \$344,988.26; promissory notes of the Northern Electric, \$118,403.68; cash, \$118,862.03; miscellaneous bonds, \$76,360; miscellaneous stocks, \$66,384. All of this was held as community property by the wife, Mrs. Lucie B. Butters, who died since the will was filed. The appraisers were George E. Springer and William King.

ELECTRIC LINE FOR KLAMATH FALLS.

KLAMATH FALLS (Ore.), January 3.—With the success of the Horsey Irrigation Project practically assured, there is a story current that an electric line will be constructed from this city to Lakeview. According to what neager details are obtainable the work on the enterprise will be begun in the Spring, and work will not be complete until more than a year following.

It is expected to have the line come via Bly, through Bonanza and Poe Valley. The distance to take in Bly is about 110 miles and traverses some of the best farming districts in Oregon. It is believed that the introduction of such a line would mean a wonderful building up of the agricultural regions between the terminal of the route and result in a rich harvest for the promoters.

EDITORIAL

The Public Utilities measure which has passed the legislature is a comprehensive act designed to regulate the corporations engaged in public service. It not only is intended to regulate the prices charged to the public for the service rendered but also proposes to regulate the issue of securities and prevent the watering of stock of the corporations and the uttering of fictitious securities.

In purposing the measure the committee had the profit of the experience of Senator La Follette, who has spent a quarter of a century in the struggle in his own state in Illinois. Not only that but they have incorporated into the act what they believed to be the best parts of similar acts in other states. Before the measure was submitted to a vote in the legislature the commission gave every opportunity to the representatives of the corporations affected by it to discuss its provisions and make whatever objections they had to it. It was submitted in absolute fairness and it should go to the people as a measure that has been framed in their interest without prejudice to anyone.

This is control of public service corporations by regulation. There are other vast industrial corporations that so absolutely control some of the necessities of life that they also should be regulated and on this ground there is difference of opinion. Shall the trusts be dissolved and the old system of competition be restored or shall the government regulate the administration and prices charged by such combinations?

President Taft evidently believes in competition and the judgment of courts to effect the desired end.

Briefly, the President's solution of the trust problem seems to be this:

Corporations should not be interfered with by the government so long as they do not try to suppress trade by unjust practices, such as underselling at ruinous prices in order to put competitors out of business, making exclusive contracts with customers, and so on. "Mere size is no sin against the law." This qualification, however, is to be made. When the "necessary effect" of a huge combination is "the stifling of competition, actual and potential, and the enhancing of prices and establishing a monopoly," then the statute is violated. In order to make the way clearer, federal incorporation should be offered to corporations, which would then come under the supervision of a commission of the Department of Commerce and Labor. This would insure publicity for their acts, and it might advise them against policies that would be in violation of the law.

In other words, Mr. Taft relies on maintaining competition through penalties of the law in order to prevent monopolistic abuses.

This is a comprehensible theory, whatever may be thought of its merits. It stands in contrast to the other theory that the abuses of monopoly should be avoided through the regulation of the big corporations, and not

through attempts to preserve competitive conditions.

These two theories are now before the country. They both seek the same end so far as their proponents profess and they should be considered with an open mind. The competitive system means an increase in cost of production and the penalties that are supposed to keep open competition are a matter of the adjudication of courts. On the other hand government regulation means increasing power of the governmental functions and is an ever-increasing tendency toward socialism.

The architects who have been called upon to submit plans for a civic center have rightly objected that the time is all too short to work out any detailed scheme on the data that has been furnished them. To begin with the time limit has been placed at two months, or March 1, 1912, and there seems to be no definite idea of the site to be chosen, the amount of ground to be used, or the amount of money that will be available for the purpose. One thing Mayor Ralph seems to be determined upon and that is that the City Hall shall be completed by 1915. In the plans submitted the Civic Center has been variously located at the old City Hall site, at Market and Van Ness and the Market Street reservoir site, but as immediate action is required only the present City Hall site is available. The property in other places in all probability could only be acquired at exorbitant prices or by condemnation proceedings. And with these delays staring us in the face it is doubtful whether there would be a start made in the actual building by 1915. Realizing this most of the architects have chosen the present City Hall site with supplementary grounds as a basis for their plans. It is sufficiently centrally located for the basis of a civic center and while it may not fulfill the ideal condition for the city beautiful as a matter of expediency it is available and would perhaps entail less expense. With what the city has ahead of it already it is time to look somewhat to the expense of these projects with which we are saddling future generations.

Press dispatches state that Dr. Sun Yet Sen has been chosen President of the Chinese republic that has been formed. Certainly the world does move. Four hundred million people in the heart of Asia have declared for free government. And this a people that had progressed for in civilization long before the ruling nations of the present day were ever thought of. It may not be possible to maintain a republic in Manchuria or Thibet. It is possible elsewhere in China and if Russia and the powers let the new government alone it will work out its own salvation.

A republic in form and substance in China is the greatest thing that could possibly happen there. It means the modernizing of Asia and the freedom of untold millions of people. The Chinese mind is alert and active. Once endow the chinaman with modern ideas and ideals of government and in a generation the country will be able to take care of itself and such governments as Russia will be in the defensive instead of encroaching upon the territory of China and confiscating her property.

In a paper published in the report of the Smithsonian Institute for 1910, R. H. Newell, director of the Reclamation Service, gives a detailed account of the government reclamation projects in the different states and shows what great things have been done by the government during the last nine years in the matter of irrigation. Summarizing the statements of the work done in the different states and territories he shows that water has been provided for one million acres of land that was before arid or semi-arid and that over one-half of it is now in use.

The increase in the natural wealth of the land by thus conserving the water and directing it to agricultural purposes is enormous. A recent bulletin of the census bureau shows the value of farms in the arid and semi-arid regions of the Western States to be more than ten billions of dollars. This is an increase of over 300 per cent since 1900 so that the addition of water to the limited areas where it has been applied is responsible for the added wealth and value.

The arid regions of the United States comprise a vast area. Irrigation is but in its infancy. The vast plains contain their virgin store of chemical products that sustain and develop plant life to its fullest measure and it awaits only the life giving water to transmit into verdant fields and blooming orchards.

Seedless fruits and eyeless potatoes are past products of the brain of Luther Burbank. He has justly won his title of Wizard in the world of horticulture. Now he comes forward with the statement that the spineless cactus that he has succeeded in breeding is the most versatile of all the plants that he has given to the world.

According to his statement made at the gathering of the horticulturists the leaf is edible for man and beast. One leaf is said to contain more nutriment than a beefsteak and in addition to this it contains a sort of mucilage which can be used as a base for shoe-wash and is absolutely waterproof. He now states that this mucilage is one of the best substances for making waterproof paint. One leaf will make ten gallons of paint. Aside from this the fiber can be used for paper pulp and in various other manufactures.

If this new plant is all that Mr. Burbank thinks it is it will really be the wonder of the age. The most barren soils and sterile deserts produce the cactus. Its habitat is the rainless stretches of the desert where only the most hardy of the plant and animal life can exist. If this wizard of Santa Rosa has produced a plant which outclasses all the other plants in the variety and usefulness of its products and one that will grow where others fail he will have added to the material wealth of the world more than any other man has done.

According to a report just published by the United States Geological Survey the value of crude magnesite mined in the United States during 1910 amounted to \$74,653 or almost twice that of the production of 1909.

While the production of the crude ore has materially increased, the rapid rise in value is due to the constantly growing demand for the calcined product. No crude ore is offered for sale,

but after being calcined the output is used mainly in manufacturing paper from wood pulp; it is also used in making artificial stone, fireproof flooring and tiling, and in brick or plaster form for lining furnaces and covering steam pipes. The entire front of one large building in this city was recently constructed of molded calcined magnesite in blocks and ornaments. The material was first calcined and then ground to a fine powder and was then made into a plastic cement and molded in the desired forms. The fine waste of the crude ore mined is now being utilized at California chicken ranches as a substitute for oyster shells and other substances fed to fowls for hardening the eggshells.

The only deposits of magnesite in the United States which have been commercially utilized are those situated in the valley and coast counties of California, and the entire output is consumed on the Pacific Coast, the cost of transportation to points east of the Rocky Mountains being prohibitive. It is for this reason that large quantities of raw and calcined magnesite continue to be imported from Greece, Hungary, and other countries, the imports increasing each year.

While the magnesite mines of this coast are daily becoming more useful and the value of the products more valuable there can be no question that the opening of the Panama canal will bring a wider market for the product and enable it to compete successfully in the cities of the East with the imported mineral.

According to the figures of the Survey the imports of magnesite and magnesite, both calcined and crude, for 1910, amounted to 356,512,243 pounds, valued at \$1,578,683, an increase of 121,072,377 pounds, with a value of \$387,265 over the amount imported for 1909.

This is no inconsiderable amount and with its increasing use the industry ought to develop with rapid strides.

W. B. Nash, the former cashier of the Market Street Bank, has been convicted of falsifying the reports of the institution to the Bank Commission. Three years have elapsed since the indictment was brought and although justice has been lagged in getting the case to trial yet when it was brought to trial the action was speedy. The reason of the delay was that the section of the penal code under which the indictment was brought had to go to the Appellate Court for decision to see whether or not it covered the offence charged. It was decided in the affirmative and the trial and conviction was the result.

Nash was one of the original organizers of the Market Street Bank and its cashier for a number of years. No money to speak of was paid into the institution at the time of its organization the stock being paid for by commercial notes. Some of these notes were subsequently paid and a good many were never paid but manipulated around through the books and finally landed in one huge loan. Nash himself never drew any salary as cashier. And when the bank failed there was a long list of bad loans dating from the inception of the bank that had been accumulated and dumped on to property that had been acquired down at Burlingame, San Mateo County.

The Market Street Bank had a great number of small depositors. Starting with nothing in 1903 it had more than a million on deposit when it failed. The Receiver, Mr. Louis H. Moore, appointed by the court made the best of the situation, sold the assets and paid the depositors 50 cents on the dollar.

But before the receiver was appointed the Market Street Securities Company, a corporation organized by A. F. Meigs and Arthur Crane were permitted to go into the bank with a plan for reorganization. They issued bonds which were exchanged for the books of the depositors. They thus got a standing in court and succeeded in getting a good deal of what the depositors had left. If the Directors of the Market Street Bank had been frenzied financiers, the men behind the Market Street Securities Company were certainly the last thing in the grab-and-get-away-with-it business.

The many depositors who had their savings cut in half or lost them altogether are scattered to the four winds.

W. B. Nash stands convicted, A. F. Martel is indicted and will be tried on the same charge. The chief reason of the loss of the people in this institution, as in the California Safe Deposit, was the failure of the bank commission to do its duty. In the first place the law did not provide adequate help and in the second place the appointees were political henchmen instead of competent men. The law has since been changed and the supervision is now done by the Superintendent of Banks. So far it seems to be more effective. There is of course some excuse for the failure of the Commission to know the exact state of affairs of the Market Street Bank. There can be none for their permission of the Market Street Securities Company to go into the bank and get control of the depositors' books and so tie up the assets that many of the depositors never got what was rightfully theirs.

Abraham Ruef, the paragon of prisoners and patriot enlisted in the social uplift has fallen from his high estate is now only a second class prisoner within the walls of San Quentin. His offence has been in trying to bring some milk chocolate and some newspaper clippings into his cell against the rules of the prison. To do this he had to virtually bribe the guard who has now lost his job. How often this has been done is not known but the Warden says it is not the first offence.

It would seem that the leopard can not change its spots. When the newspapers of San Francisco are giving up space telling how repentant Ruef is, how thoroughly he has reformed and is engaged in the betterment of prison conditions he seems to have been following his natural bent of trying to take an unfair advantage of his fellows and get the best things by violation of law.

Certainly the loud talk of some of the advocates of a pardon for him seems to have a weak foundation. While the offence is small it shows the natural bent of the man to bribe officials when at the very time he is making the greatest of grand stand plays of penitence and reform.

But Ruef may be paroled or pardoned but the chances are that he would be back on the job within a year, using

the same old methods in some way or other. True he has been shorn of his political power but for all that it is highly improbable that he would ever be a law abiding citizen, doing his part and taking his equal chance with everyone else.

There seems to be a disposition on the part of the legislators and those interested in the cause of women suffrage to convey to the women all the benefits of the ballot without any of the burdens. To begin with she does not tell her age; neither is she subject to poll tax or jury duty. Inasmuch as she is not subject to military duty and is not called upon by law to support the family it would seem that she is getting all the best of it.

The Chronicle seems to think that the provision allowing women to not disclose their age in registering a bad one as impaling the safety of the ballot. In this regard it says:

"The declared age of the voter is the strongest element there is in the precautions against impersonation in voting. The watcher, with the precinct register in his hand, can at once detect any disparity in age in a person offering his vote between the appearance of the would be voter and his recorded age."

Whether the danger from this source is great or not remains to be seen but there is no good reason why such a distinction should be made. If a woman votes there is no reason why she should not disclose her age or pay poll tax just the same as a man.

In the official advertisement by the Board of Public Works now running in the papers, asking for bids for the construction of the Everett School Annex the following note is appended: "The work hereinbefore referred to is to be paid for out of the proceeds of the sale of School Bonds of the issue of 1904, and contract will not be made or entered into until the awardee shall have purchased, or caused to be purchased, bonds to the amount of the contract, together with the estimated incidental expenses."

This, we are informed, applies only to this particular school. These improvements were contemplated in the bond issue of 1904 and are to be paid for out of this issue. Inasmuch as these bonds bear only 3½ per cent interest the banks and bond houses do not consider them worth par and as they can not be sold for less the contractor must figure the difference between the rate of interest and the amount at which the banks will take them amounting, it is said, to about ½ of one per cent for the time to run, which is three years or thereabouts.

Asbestos whiskers seems to have reduced the number of fatalities among the Santa Claus actors at the annual Christmas festivals. Either that or the substitution of electric lights for candles on the Christmas trees has prevented the incineration of a good many who usually play this role. The toy pistol on the Fourth of July and the inflammable whiskers at Christmas has been the source of a good deal of sadness at the holiday season. A Santa Claus properly fireproofed will be one of the improvements of construction in succeeding years.

THE CORBIN UNIT LOCK-SET

comes with all parts attached just as it will appear on your door. It is as secure and smooth in action as a Safe Lock. IT is found on the finest Office Buildings and Residences in the City. Why not on yours?

Have you considered the Corbin Unit Lock in connection with your new Building or Residence? Look into it. It will pay you

Editorial Comment.

The encroachments of capital upon the rights of the people and in the control of governmental functions are usually covered and insidious. In that they differ from labor whose demands are usually patent to every one and whose acts and purposes are uncovered. As a case in point there is a bill before the present congress to reduce the postage rate on merchandise to one cent on each two ounces. This cuts the present rate in half and looks to the establishment of a cheap parcels post such as exists in other countries.

There has arisen an active opposition to this measure which centers in an organization known as the National Federation of Retail Merchants. This organization is promoted and abetted by the Express companies who have instituted a campaign to arouse and call out the selfish objections from retailers by exciting apprehension that local business might be hurt through competition of mail order houses in the large cities.

Investigations made by the Parcels Post League show that this fear is entirely unwarranted and that as a matter of fact the mail order houses are not particularly interested in the measure. The latest move of the opponents to the measure is to call for a nonpartisan commission to investigate the subject of the carriage of parcels by post and to report back before congress takes any action in the matter. This is certainly the Hetch-Hetchy business "over and over again." It requires no ghost to come from the grave to tell congress that the rates on parcels are unreasonably high or to demonstrate that what is being done in other countries can be done here also. It is simply a subterfuge for delay. As John Wainmaker said when he was Postmaster General, "there are just five objections to the establishment of a parcels post" and he named the five leading express companies.

Railroads like other things and it necessary to keep up continual improvement to keep abreast of the times. To do this entails a policy of reconstruction of the roadways and improvement in engines and rolling stock. Most of the leading railroads of the country have entered upon a policy of reconstruction in a most extensive scale which includes "easing of grades, shortening of track, eliminating bridges, and in general making for more permanent construction and shorter time." The double tracking of the Union Pacific line for its entire distance is a case in point. Another is the recent construction of a cut-off by the Larkawanna Railroad in

New York to shorten the time of its passenger trains between New York and Buffalo. On this proposition the Company has spent eleven million dollars in order to save twenty minutes time in the schedule of its fast trains. Time of course is not the only thing saved. As the distance is shortened by eleven miles and the maximum grade from 60.2 feet per mile to 50.04 feet, and 150 degrees of curvature are eliminated.

The new line, which extends from Lake Hopatcong on the east to the Delaware Water Gap through the Blue Ridge Mountains, is said to be unquestionably the most expensive stretch of trunk line railroad in the world. It is carried boldly, at a practically level grade, through mountain and valley, and the construction is of an absolutely permanent character. Between the Pocono Valley has been built the largest railroad fill in existence—195 feet in height and over three miles in length. In the twenty-two mile of new line there are 73 bridges and viaducts of reinforced concrete, among which are included a concrete bridge 1100 feet in length, and the handsome structure that carries the line across the Delaware, which has an over-all length of 1450 feet and includes five arches each of 150 feet span.

In these constructive works are illustrated the high efficiency to which modern railroad building has been raised. By these improved methods time has some of these constructions been made possible. And not only this but the cost of road building has been materially cheapened. Had this work been done under old methods the cost would no doubt have been double the amount paid.

The officials of the Panama Exposition have received a telegram from the architectural firm of McKim, Mead & White, Henry Bacon and Thomas Hastings, the eastern architects who were recently selected by the exposition trustees to assist in designing the fair building and lay out the plan of the exposition. These names include some of the best known artists in the country, men whose reputation is world wide and have been identified with the building of expositions and noted buildings all over the country. L. C. Aldrich and George W. Kelham are the two local members of the advisory board and these together with the three men now on the board will form the architectural commission.

The meeting of this board is scheduled to take place early in February. The earliest possible action is greatly to be desired. There is now no cause for delay in any case, the time is ripe for action and the sooner definite plans are made and work started the better for all concerned.

Uses and Misuses Of Concrete and Reinforced Concrete.

A Paper Read Before the Indianapolis Architects Association.

BY DEWITT V. MOORE, MEM. AM. SOC.
ENG. CONTR., INDIANAPOLIS, IND.

Misuse implies abuse, misapplication and waste, whereas use, in its full sense, means the full utilization or application in actual use without waste; in other words, use in the sense of an intelligent, proper adaptation. If there is any other building material which is misused as often as concrete, when viewed from this standpoint, it does not occur to the writer. Many times a use of concrete is a misuse or abuse, and on the other hand, many times an abuse of concrete is in the end a practical use of same.

I suppose most of you present have given the subject of the peculiarities of concrete considerable thought, for really it is a very extraordinary material in construction.

In the first place, a material which can be poured into molds when of the consistency of soup, and yet solidify and become the same as stone, is certainly an adaptable type of construction and one which prompts the designer and the contractor to abuses.

While from the strict use of the English language we should speak of use and misuse, still to carry out the idea we have in mind it seems more proper to say use and abuse.

The architect who lacks enthusiasm with regard to the use of concrete, and therefore does not follow the full working capacity that he should, is abusing this material.

We next consider a direct abuse by the overcautious, who expect more from this material than is reasonable or based upon good practice. A designer of this class will overstress his concrete and understress his steel, or overstress both. This is direct abuse of the material. Somewhere between these extremes lies a proper use of concrete and reinforced concrete.

I am not presenting for your consideration a technical paper for the purpose of promoting any special ideas as to design, formulas, percentages of reinforcement, special types of reinforcement, or allocating any stresses to come on either material.

As a matter of common sense, let us consider that with the extreme case of a lean mixture of concrete we have nothing but a pile of gravel and sand, possessing no compressive strength whatever as concrete, and forming no bond with the reinforcement therein. On the other hand, to go to the other extreme, we could mix a batch of neat cement which would possess great strength, but the most of this mixture would be prohibitive.

A mixture of gravel or stone, sand and cement, which provides a solid, homogeneous mass, may be safely relied upon, when given the proper working stress according to proportions, rather than to abuse the material by the addition of more cement on the theory that the corresponding increase in strength will justify the cost.

With this idea in mind, what is the necessity of specifying a 1:2:4 mixture of concrete for heavy masonry walls, footings or foundations for bridges, walks and ground floors?

This thought leads us at once to a consideration of alternate designs, viz.: Where the architect, being perhaps favorable to wood or steel only, allows the concrete construction to compete under the same loading conditions as for the other materials. We design for strength, but with a proper regard for stiffness. Using the ordinary tables for steel and wood, the concrete, if properly placed, will have three or four times the stiffness, and, in addition, will only fail, and that gradually, under a load two or three times as great as will cause disaster in the other materials. Under these conditions, should not the specified load be less for the concrete, resulting in a competition on a fair basis?

A concrete wall need not necessarily be of an extremely rich mixture, if it is for a heavy bearing wall, and therefore an excess of strength and resulting cost due to the specification of a rich mixture is an abuse.

A specification for a reinforced concrete structure under the same conditions, where, through force of habit and experience, the proper working stress is placed on the steel reinforcement, but at the same time where the working stresses on the concrete are reduced to less than their real values, is an abuse, and it must be recalled that such an abuse in the end, means increase of cost or waste.

The foregoing may be termed indirect abuse, inasmuch as the material is capable of doing more for designer than he will allow or permit; in other words, it is an abuse due to ignorance or lack of confidence.

This brings to mind that a large number of contractors have in mind that a 1:2:4 mixture means 1:6, or that 1:2:6 mixture means 1:9. Nothing could be more erroneous.

Referring to Taylor & Thompson's "Concrete, Plain and Reinforced," page 232 we find the quantities for material for one cubic yard of concrete based on a barrel of cement of four cubic feet. This table, which is well accepted, gives for a 1:2:4 mixture, using average gravel, 114 barrels of cement, while the 1:6 mixture only requires 1.22 barrels. A 1:3:6 mixture by the same table, requires 1.01 barrels, while the 1:9 mixture only requires 0.75 barrel.

Take either of these cases, there is approximately a difference of a quarter of a barrel of cement, which, at \$1.20 per barrel, amounts to 30 cents per cubic yard increased cost for material alone.

Since the same conditions apply to any mixture specified, is it any wonder that on an ordinary size job of two or three thousand yards of concrete, some contractor bids \$600 to \$1,000 low?

There has been, and is still, considerable discussion as to how many cubic feet shall constitute a barrel of cement, but I believe at this time the majority of opinions favors four cubic feet, or one bag of cement equals one cubic foot. Naturally, if the contents of the barrel are taken as 3.5 cubic feet,

the cost per yard of concrete is much increased. This illustrates the necessity of definitely stating in the specifications what shall constitute a barrel. It is an abuse to adopt these lower capacities.

This difference of specifications as to the number of cubic feet in a barrel of cement would amount to a difference of approximately 0.17 barrel per cubic yard of concrete, a difference approximately of 20 cents. This is direct waste.

The above calculations are based upon average material; if, in addition, a specification is made requiring screened material of a uniform size for 1:2:4 mixture, on a basis of 3.5 cubic feet of cement per barrel, the amount of cement is again increased by .33 barrel per cubic yard of concrete. Let us make this point clear. Suppose, unthoughtfully, the designer specifies a barrel of cement as 3½ cubic feet and that all material shall be screened and proportioned 1:2:4. In addition, suppose the contractor is not an engineer and bases his estimate upon what has been his usual practice in the quantity of materials for a yard of concrete. We have at once one of the peculiarities of concrete construction, and one of the inconsistencies. First, strictly according to the designer's specifications, there are required 1.77 barrels of cement per cubic yard of concrete; the contractor figures on the 1:6 mixture, but overlooks the cubic feet per barrel, and estimates 1.22 barrels of cement per cubic yard of concrete, a difference for material of 66 cents per cubic yard, which, with additional handling and a profit, would certainly amount to not less than 75 cents per cubic yard.

Now, if the use to which the concrete is to be applied does not require so rich a mixture and so strenuous a specification, then the designer is wrong and the contractor is really right in his assumption as to what is really correct, and he may be justified in trying to hoodwink the inspector. On the other hand, granting the purpose for which the concrete is to be used in such that it should be of such proportion and so mixed, then the contractor has underestimated the material from a cost standpoint. In the first place, the designer causes by the cement specification an extra cost of no real value, but instead a waste, while in the second case the contractor either robs the structure or himself suffers the loss. In either case, not only the owner, but also the community, suffers an economic loss.

As an example of cost data, suppose we assume a few different mixtures or proportions of concrete and work out the cost per cubic yard.

1. Suppose the specifications call for a 1:2:4 mixture to a barrel of cement, to be 3.5 cubic feet, and broken stone screened to uniform size. We estimate as follows:

Stone92	@ \$1.50	\$1.38
Sand46	@ 1.00	.46
Cement	1.77	@ 1.20	2.12

Labor	2.00
Water10
Forms	\$16 3.00 2.15
Gen. charges51

	\$9.03
Profit, 10 per cent....	.90

Total cost per cubic yard \$9.93

2. Let us now assume a fair specification for the same work, using a 1:2½:5 mixture, with a barrel taken as 4 cubic feet, and using gravel obtained under usual conditions:

Gravel87@ \$1.00	\$.87
Sand44@ 1.00	.44
Cement	1.15@ 1.20	1.42
Labor		2.00
Water10
Forms81@ 30.00	2.43
Gen. Charges54

	\$7.80
Profit, 10 per cent....	.78

Total cost per cubic yard, \$8.58

We have here a difference in bid price of \$1.35 per cubic yard, or approximately \$1,000 on an ordinary size job.

Suppose the contractor estimates on a basis of past experience, with no particular regard for the exactness of the specifications. We have about the following results:

Gravel and sand98@ \$1.00	\$.98
Cement82@ 1.20	1.00
Labor		2.00
Water10
Forms81@ 30.00	2.43
Gen. charge54

	\$7.05
Profit, 10 per cent....	.70

Total cost per cubic yard, \$7.75

We have here a difference of \$2.18 per cubic yard, or \$6,500 on the ordinary job. Again, suppose that the contractor simply guesses at the cost on a basis of different character of work—say heavy work, when the cost of forms is low per cubic yard. He will say \$5.50 for concrete, assuming the same profit of 10 per cent. The difference then is \$13,000. These are conditions which actually exist, and the result is a direct abuse, since after the contract is awarded, he, realizing his error, immediately proceeds by the "first law of nature" and protects his pocketbook at the expense of the work.

We appreciate the fact that all building materials suffer abuse to the extent of substitution of inferior grades or inferior workmanship, but concrete is peculiar in that a very slight change in the wording of the specifications may make a great difference in the grade of work, without same being in any way perceptible to the eye after the forms are removed.

It is now quite a fact to require a time limit, with a penalty clause, and in some cases a bonus. Such contracts are an abuse of concrete construction for a great many reasons. Concrete should not be hurried, but carefully mixed and placed. The enforced hurry due to a penalty clause results in many a careless manipulation, sacrificing quality for speed. Night work is uncertain, but is often required. This abuse is by the owner, and is an indication of American business methods, where the immediate dollar outweighs the ultimate value. We constantly build for the present, and our impatient dispositions will not await

palms-taking work. As concrete work is a permanent construction, or as near as we can obtain same, it is the least of foolishness to sacrifice quality which will exist for years, for speed, which can only gain a few days.

We have approached this subject from the question of the abuse of this material by the contractor. The abuses by the contractor and the contractor's organization are many and various, and are perhaps more vital than the points before mentioned.

It is easy to sit quietly down at a desk, and after given proper study of the proposition, formulate a specification as to what material's shall be used, and as to how they shall be proportioned. It is also comparatively easy for the contractor to arrive at the cost of any specified mixture, at least so far as materials are concerned, but where the contractor attempts the construction of the building, is encountered difficulties innumerable in his attempts to watch materials and men.

If he is experienced he may abuse the material by a 'benches which occurs from "familiarity breeds contempt." If not experienced, he may abuse the construction from ignorance. In either case, no matter what is the turn of mind, he must employ a large force of men, whose actions and conduct, while nominally under the supervision of the contractor, still are, to a certain extent, dependent upon their own ability and honesty.

Here is a further abuse of the material, which may cover any one or all of the following suggestions:

The quality of the stone, gravel or cement may be an abuse of concrete, regardless of cement and workmanship. Poor material may even cause serious trouble. Walter H. Sawyer, in Engineering Record for November 1, claims the failure of the Austin, Tex., dam was caused by 'altitude. In the placing of wet concrete different gravel will develop more or less of a tendency in this direction, which is indicated by a slimy, light-gray, muddy substance which rises to the top of the mass and which must be thoroughly chined away before new concrete can bond with the old. This "altitude" has little strength, and many times its existence and lack of cleaning have caused criticism of the concrete.

In order to construct of concrete within the limits of commercial competition, it is impossible to avoid exact and mathematically determined proportions for each batch. In order to concrete in cost, concrete must be handled expeditiously, which means by wheelbarrows, carts, buckets, etc., loaded by individual laborers in the concrete gang. Some, anxious to please their employer, overload, and thereby injure him by their over-anxiety to please. Others shrink their work and load as little as possible. In either case speed and cost demand inspection on the run and an estimate by the eye.

Cement being next to labor, the largest cost, it is often the case that the concrete is abused by a stealing from each batch of a portion of the required amount. This practice is largely the result of experience in the past, when most concrete consisted of heavy monolithic work, where the nature of the work was such that no bad results followed such a practice.

These are certainly direct abuses of the materials for concrete.

Modern practice demands wet con-

crete and this is more and more using the term "placing of concrete" rather than the word "placing." Improper pouring of concrete takes into consideration the nature of the work, the amount of work which can be accomplished within working hours, and the design of the structure. There is a general catchword, with reference to this line of thought, evidenced by a disposition to simply get the work done and fill up the boxes or forms, without regard for the connection of the various members and their bond together. This is a direct abuse, inasmuch as it affects the strength of the resulting construction.

In order that we may have finished surfaces we can only adopt a method of manipulation designated as "spading." This is a very simple process, and one which can be handled readily by an ordinary laborer, but lack of intelligent instruction or inspection oftentimes leads to defects in the surface after the forms are removed, which causes criticism when the construction is otherwise good. We too often judge by appearances, but nevertheless this is an abuse of the material, inasmuch as by careful handling there is no occasion for any such results.

While we speak of monolithic work, both in concrete and reinforced concrete, there is really no such thing, inasmuch as we must stop at intervals. The place where these stops are to be made should be planned in advance, and made in an intelligent manner.

In wall work, or work of like character, stops should be made on horizontal and vertical lines, if necessary, with separate joints to engage the new work. Regardless of instructions or inspection, how many times we find the concrete flowing on an incline down through the forms, leaving an irregular line of demarcation between the old and new work. This is an abuse which is absolutely unnecessary if it were not for the carelessness of the workmen, and affects not only the appearance, but also the strength.

The amount of reinforcement in reinforced concrete work is oftentimes misused, due to the disregard or ignorance of the workmen. There seems to be an idea that just so long as the steel reinforcement is covered up or buried in the concrete, all is well. The reinforcement should be placed where indicated by the drawing, and where means that when the concrete is being placed and the steel covered, it should not be violently raised in order that the concrete may flow underneath, for by so doing the reinforcement may be left in a position some little distance above that contemplated by the design. Suppose we have a floor with the reinforcement 6 inches below the top surface. Should this reinforcement be raised carelessly, in order that the concrete may flow under the same, we may have a position only 5 inches below the top surface. We have a resulting construction which is only 70 per cent as strong and only a little over 50 per cent as efficient in stiffness. On the other hand, a bar which is entirely exposed cannot be expected to be bonded with the concrete.

Modern design in nearly every case, for structures of any importance, contemplates the use of top reinforcement, or, speaking more technically, reverse flexure bars, over the points of sup-

port. If the question of placing of the main reinforcement is important, the subject of this top reinforcement is often more important. Improper placing of these bars may result in 50 per cent reduction in the safety factor.

It is a very common construction to introduce a cement finish for a wearing surface on floors of plain concrete, on the ground floor, and on reinforced concrete floors. To say nothing of the care in the preparation of this mixture and the manner in which it is handled, we have a problem on our hands to place this finish in a proper manner. In the first place, the cement finish is not considered a part of the structural concrete.

If it is placed at the same time as the mixture used for the structural portion, it must also be wet, which introduces an element of uncertainty as to the satisfactory results obtained by the cement finishers. On the other hand if it is placed at a subsequent period, after the structural concrete has hardened, we are uncertain in our results as to the bonding of the new with the old work. Carelessness in cleaning surface is so common that the material is abraded by this lack of attention to detail.

We have no material which will better serve the purpose of exterior finish, if properly handled. It is a mistake to mask a concrete structure by using a facing of brick, stone or terra cotta, but the designer and the contractor must be educated to the viewpoint that perfectly finished surfaces cannot be obtained at the price of ordinary concrete work, and yet can be obtained at a low cost when the facing is of other material. The cheap jobs we ordinarily observe are not due to defects in the material, but to prices which are too low and to workmen not sufficiently adept in this line of work.

This clause of cement construction should be corrected, and can be by the harmonious co-operation given by your organization. This subject is deserving of a special prominent treatment in your specifications, instead of being oftentimes an obscure item. The contractor should not be required for results which are obtained under cheap competition and rush work.

The forms and centers for concrete work, under ordinary conditions, are left entirely to the contractor. It is a question whether the same should not form a part of the architect's drawings and specifications, in order that all contractors should figure alike as to requirements. The requirements of tongue and groove lumber, etc., add to the cost without in any sense adding to the durability of the work. There is a wide variation in the present specification for forms, but throughout there is a general vagueness and uncertainty which leaves the contractor to design his own work. The result is, some forms are constructed intelligently and others far from it. Inasmuch as this cost, under ordinary circumstances, will run from 25 to 33 per cent of the entire cost of the work, it would seem that the subject is deserving of a more intelligent study and determination.

In a general way, from a contractors standpoint, there is no class of construction where carelessness, accumulation of dirt, rubbish, etc., are more detrimental than in concrete. The material is continually abused by a lack of respect on the part of the workmen

from the time the raw material is on the piles until it is in the finished work. It is a continual fight to exclude improper material, rubbish and effluvia.

If it were not for the safety that exists in concrete construction, in addition to the factor allowed, many points of weakness would develop which at the present time are concealed within the mass.

INADEQUATE SPECIFICATIONS.

The following sentence is copied from a set of specifications covering many different classes of work, the job for which they were used having a large amount of concrete construction:

"Concrete shall be mixed in the manner prescribed by the engineer, and of such proportions as the engineer may direct."

It is needless to say that nothing could be more indefinite than this clause, yet even by following it injustices can be inflicted. It would seem that when specifications are so indefinite, that it would be better not to have any specifications to govern the work. But few would agree with this statement owing to the fact that although some classes of work might be poorly covered, yet others may be described in great detail. In considering this clause we must first look into its origin.

No doubt such a clause was inserted in the specifications when concrete was little used and the amount of that class of work was always insignificant. In those days there were few, if any, mechanical mixers on the market, so that nearly all concrete was mixed by hand. Thus the contractor was to consult the engineer as to the method of mixing, that is, was sand and cement to be first mixed then water added, or was the concrete to be mixed dry, and then made wet, and how much water was to be used.

But with the introduction of many makes of mixers such questions were forgotten and the interpretation of the clause changed. The question to be decided was whether or not the concrete was to be mixed by hand or by machine, and if by the latter, what style of machine would be permitted. Here is where an injustice can be done the contractor. Under the specifications the engineer could prevent a mixer being used, compelling the contractor to mix all the concrete by hand, or if a mixer is allowed, the engineer could refuse to have on the job certain makes and styles of machines. These are not suppositions, but the editors of this journal have known of actual cases of this kind, and contractors have been compelled to use methods and machines that made his work much more expensive. This shows the necessary cutting out of specifications where the clauses have outlived their usefulness.

The second part of the provision quoted relates to the proportion of materials to be incorporated in the concrete. Nothing affects the cost of concrete more than when the ingredients vary, and it is an easy matter to set forth the various proportions to be used when by the kind of structure to be built is not known. It is still possible to make the specifications definite. When it is not done, the contractor is very apt to suffer. If he bids on a 1:2:5 mixture, it may be changed to a 1:2:2:5 or even 1:2:4, and the cost

will be increased. On the other hand the owner may be made to pay an excessive amount for the work, owing to this element of doubt.

A method in this connection, that is to be commended, is the dividing of the concrete work into classes, as Class A, Class B, and so on. Thus the specifications can be definite as to each class, although on some work there may not be used concrete of certain classes, while if there is work to be done the specifications are explicit and the contractor has named a price for the work.

Some specifications go a step farther by providing for the different classes of concrete and obtaining a price on each class with forms and without forms. This is done to obtain more economical construction, and should be welcomed by contractors.

From these remarks, it is evident that there should be no need of writing specifications as indefinite as those from which we have quoted.—The Contractor.

FOREIGN TRADE OPPORTUNITIES.

(From the Consular Reports.)
(Inquiries in which addresses are omitted are on file at Bureau of Manufactures, Washington, D. C. In replying for addresses refer to file number.)

No. 7798. Telephone Appliances, Electric Bells and Petroleum Lamps.—An American consul in the near East reports that a leading importer of his district desires to be put in touch with American manufacturers of telephone appliances, electric bells and accessories, desiring also instructions for the installation thereof, and kerosene burning gas lamps. Correspondence with the inquirer should be in French.

No. 7799. Supplies for Foreign Army.—Supplementing a previous report, which was published as foreign trade opportunity No. 7770, an American consular officer writes that the same inquirer desires in addition to the information already requested, details of hospital equipment, carts, engineers' carts, etc., of the internal arrangements of the same and the contents. All particulars regarding these, as well as any other type of wheeled vehicle adopted by the United States Army, will be much appreciated by the inquirer.

No. 7800. Office Appliances.—A report from an American consular officer in Canada states that a business man from Australasia called at his office recently and advised him that he would like to get in touch with American manufacturers of typewriters, office appliances and steel filing cabinets, with a view of obtaining agencies for the sale of these products in Australasia. The person is now on his way to that region and would be glad to hear from firms interested in this proposition.

No. 7790. Steel Office Furniture.—A foreign business man informs an American consul that he desires to receive catalogues of steel office furniture. Prices should be quoted c. i. f. certain city.

No. 7801. Water Clarification Plant.—Referring to foreign trade opportunity No. 7618, published in Daily Consular and Trade Reports for November 18, 1911, an American consular officer has forwarded supplementary information regarding the project to estab-

lish a water clarification plant. Two business men of ample means are negotiating with the municipality in question for the water supply, and they have requested the consular officer to obtain full information relative to the most modern and efficient machinery and appliances for a water clarification installation capable of clarifying 5,000,000 gallons daily. Copy of the report, giving further details, can be obtained from the bureau of manufactures.

No. 7755. Tenders for Lighthouse Construction.—The consular general of Uruguay writes to the bureau of manufactures that the government of Uruguay is calling for tenders for the construction of a lighthouse in the Banco Ingles, off the coast of Uruguay, and he would like to hear from firms in the United States interested in this matter.

No. 7767. Steel and Iron Bathtubs.—An American consul in a Latin-American country reports that a merchant in his district desires to establish connections with American exporters of steel and iron bathtubs.

No. 7760. Iron Pipe and Other Materials.—An American consular officer in the Far East reports that an American has secured a very large and valuable oil and coal concession in northern China. He is prepared to proceed with the work of developing these properties and will require large quantities of pipe and other materials. In all representing about \$2,000,000. He may be addressed in care of an American consular officer.

No. 7758. Machine Shop and Engine House.—An American consul in a Latin-American country has forwarded a copy of plans and specifications covering the construction of a machine shop and engine house at certain navy yards in his district, for which bids are to be opened May 4, 1912.

No. 7753. Electric Clocks.—An American consular office in a Latin-American country reports that a proposal to call for tenders for the provision and maintenance of 100 electric clocks, to be placed at various points throughout a certain city, has been remitted to a committee of the municipal council for report. The cost is estimated at about \$21,000.

CONSTRUCTION WORK ABROAD.

MEXICO.

From Consul Luther T. Ellsworth, Ciudad Porfirio Diaz.

A prominent landowner in that part of the Ciudad Porfirio Diaz consular district that borders on the Rio Grande and is opposite Valverde County and the town of Del Rio, Tex., recently held a conference with the right-of-way commissioners of the Kansas City, Mexico & Orient Railway, during which it was stated that the Mexican International Railway was ready to build a branch from Allende to Las Vacas, Coahuila, Mexico, as soon as its managers were positive that the Kansas City, Mexico & Orient Railway was ready to finish its track from San Angelo to Del Rio, Tex. At that point a connection can be made with the Mexican International Railway by an international bridge across the Rio Grande.

It was stated that of the 170 miles between San Angelo and Del Rio, all but about 60 miles had been graded

and that the work of grading the remainder was being rapidly finished. It was then announced that the work on the Mexican International Railway branch referred to would be commenced very soon and pushed to completion.

Value of Harbor Works.

From Consul Alphonse J. Lespinasse.

The contract with the American Dredging Co. for opening the Frontera bar to a depth of 20 feet will provide direct intercourse with the United States and Europe. The contract also covers the removal of several mud flats in the Grifalva River, which will enable sea-going vessels to reach San Juan Bautista, the capital of the State of Tabasco, and will benefit the entire region.

VENEZUELA.

From Consul Thomas W. Voetter, La Guaira.

New Ice Plant.—Senior Miguel Lelchibaza, of La Guaira, states that he will probably soon install an ice plant at Caracas, with three to four tons daily capacity. He is the owner of the ice plant at La Guaira mentioned in the Public Consular and Trade Reports for November 3. Senior Lelchibaza states that the American plant he has here is working very satisfactorily.

Rebuilding of Hospitals.—It is desired to place in good order two hospitals in Ciudad Bolivar. The work of putting Hospital Ruiz in good order has commenced, and the supply of beds, tables, surgical instruments, etc., has already been ordered from Europe; it will accommodate 70 patients. Efforts are also being made to collect funds to place in good order the Hospital de las Mercedes, which is now in poor condition. Additional land is to be purchased and more buildings erected. This hospital is for women and children. For the support of the two hospitals the authorities have set aside the rent of the market stalls and a small tax on hides. La Botica Vargas is the drug store supplying the pharmaceutical needs of the two hospitals.

URUGUAY.

From Charge d'Affaires G. Cornell Taylor, American Legation, Montevideo. Proposed Power Plant.

A proposition has been presented to the Ministry of Public Works for utilizing the rapids of the Salto Grande Falls in the Uruguay River, some 15 miles above the city of Salto, to generate electrical energy for transmission to towns on both banks of the river and ultimately to Buenos Aires and Montevideo. The project also includes the construction of navigable channels through the rapids and a plan for irrigation. The operations are to be commenced with a proposed capitalization of \$12,000,000, and a concession for a term of 50 years is asked. In return for which the Government is to receive 5 per cent of the gross receipts and a given amount of electrical energy at half the current rates.

As fuel is scarce and has to be imported at great cost, the realization of this project will ultimately prove of great importance in developing the country's mineral and other resources.

SOUTH AFRICA.

From Consul E. A. Wakefield, Port Elizabeth.

New Drainage System.

At a recent municipal election the

voters of Port Elizabeth by an overwhelming majority decided to install a complete drainage system. For this purpose the Union Parliament will be asked to authorize the loan of 500,000 pounds (£125,000). It will probably be 10 or 12 months at the earliest before work can be commenced. Details will be furnished later and, if let by contract, specifications will be supplied.

SCRAP IRON OF THE CANAL.

Contractors Find Important Business in the Junk Heaps of the Great Work.

One of the sights of the Canal Zone is the discarded locomotives, cars, dredges, barges, boilers, and miscellaneous junk which border the right of the canal. Boatmen from the wreck of the French efforts. A considerable part of this abandoned machinery has been renovated and put in use by the Americans. From January 1, 1911, 58,820,269 pounds of it had been shipped as scrap to buyers in the States, the value of this and the machinery put in use by the Americans aggregates \$2,112,663.

On September 5, 1911, bids were opened in Washington for the purchase of all the French scrap remaining on the Isthmus and not taken up on the property papers of the commission and credited to the French scrap account. It was stipulated that three years should be allowed in which to remove all the material and that the Panama Railroad should charge a flat rate of 2.25 a ton for hauling to seaports, hauling to be done by the contractor. The successful bidder was the Chicago Waste Wrecking Company, which offered \$215,000.

This firm has begun the work of removal and is employing on the Isthmus about 50 laborers under the direction of four white Americans. The work at present is preliminary, consisting of cleaning up the yard back of dock 14 at Cristobal and in clearing the way to outlying collections of scrap along the line of the Panama Railroad. Some of it is at considerable distance from the main line of the railroad, but in no case is it thought that the cost of removal will exceed the value.

A large amount of scrap has been dumped in the yard at dock 14, where workmen are engaged in breaking it up and sorting it in piles close to the wharf, according to the grade of metal. Dealers in scrap recognize about 200 classifications of iron and steel. The representative of the Chicago Waste Wrecking Company says that practically every grade is to be found in the scrap which his men are sorting.

Within a short time the firm will have in use at dock 14 two 20-ton locomotive cranes, one with a 50-foot boom, equipped with electric magnets capable of lifting three tons. It will have in addition a pair of power shears, capable of cutting through a bar of steel 6 inches square in cross section. A great part of the metal will be cut into lengths of 3 feet, for convenience in melting. At present the machinery is broken in pieces by cutting the rivets with sledge and "cold cut." Broken up and piled the material will occupy about 1-25th of the space taken up by the original machinery. It will be shipped direct to the foundries which buy it from the contractor.

Firms desiring news on special classes of buildings such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

San Francisco.—Apartment house alterations to four frame buildings. Cost not stated. Architect, Earl B. Scott, Humboldt Bank Bldg., S. F. Owner, Mrs. Proff. The work will consist of the alteration of four large frame dwellings into a modern apartment house, containing sixteen apartments of two and three rooms each and bath. There will be new plastering, electric work, plumbing and painting. There will also be considerable exterior work. The plans are complete and figures are being taken.

Oakland, Cal.—Apartment house, 4 story and base. Cost not stated. Architect, Alfred Legault, 3599 West St., Oakland. Owner, Mrs. Remillard. The building will cover a large area and will contain in the neighborhood of 120 rooms and baths, which will be arranged in suites of two, three and four rooms each. There will be steam heat. The exterior of the building will be covered with shiplap. The plans are complete and figures are being taken.

San Francisco.—Apartment house, 3 story and base, frame, \$7,000. Architect, none. Owner, Charles Mitchell, 1248 17th Ave., S. F. The building will be arranged for five small apartments fitted with every modern convenience. The trim will be of pine with some hardwood floors. There will be wall wall beds. The exterior of the building will be covered with brick veneer and cement plaster. The plans are in the hands of the owner and the work will be done by Day Labor.

San Francisco.—Apartment house, 3 story and base, frame, \$20,000. Architect, none. Owner, J. V. Campbell, 1040 Bryant St., S. F. The building will contain twelve apartments arranged in suites of three and four rooms each. The trim will be of pine. There will be steam heat and wall beds. The exterior of the building will be covered with brick veneer and shingles. The plans are in the hands of the owner and he will take sub-figures next week.

Los Angeles, Cal.—Apartment house, 3 story and base, frame. Cost not stated. Architect, Clyde Cheney, Story Bldg., L. A. Owners, Mr. and Mrs. O'Keefe. The building will be 46x108, and will contain 42 rooms, arranged in 18 apartments, all with connecting baths. There will be steam heat and wall beds and electric cooking apparatus. The exterior of the building will be covered with cement plaster. Plans are being prepared.

San Bernardino, San Bernardino Co., Cal.—Apartment house, 2 story and base, frame. Cost not stated. Architects, Jeffery & Van Trees, Citizens' National Bank Bldg., L. A. Owner, J. W. Barton. The building will contain 12 rooms arranged in four three-room suites and baths. There will be wall beds and gas water heater. The exterior of the building will be covered with shingles. The plans are being prepared.

Los Angeles, Cal.—Apartment house, 3 story and base, brick. Cost not stated. Architect, Robert M. Cassidy, L. A. Owner, Mrs. Flora M. Cassidy, 914 West 11th St., L. A. The building will

contain in the neighborhood of forty rooms arranged in two, three and four room suites with connecting baths. There will be steam heat, elevators and wall beds. The exterior of the building will probably be faced with pressed brick. The plans are only in a preliminary stage.

Los Angeles, Cal.—Apartment house, 4 story and base, brick. Cost not stated. Architect, Ferdinand Parmentier, Byrne Bldg., L. A. Owner, J. E. Murray. The building will cover an area of 60x90 feet and will contain ninety rooms divided into two and three room apartments. There will be connecting baths, steam heat, wall beds, elevators and a vacuum cleaning system. The exterior of the building will be faced with pressed brick. The plans are being prepared.

Los Angeles, Cal.—Apartment house, 2 story and base, frame. Cost not stated. Architect, Franklin Power, Higgins Bldg., L. A. Owner, Thomas F. Keating. The building will contain one eight-room and three three-room apartments. There will be furnace heat and wall beds. The exterior of the building will be covered with shingles. The plans are complete and the work will be done by Day Labor.

Los Angeles, Cal.—Apartment house, 3 story and base, frame, \$25,000. Architect, Lawrence B. Burck, 142 South Spring St., L. A. Owner, same. The building will be 50x125, and will contain 75 rooms arranged in suites of two, three and four rooms each with baths. There will be wall beds, steam heat and a vacuum cleaning system. The exterior of the building will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Seattle, Wash.—Apartment house alterations, \$15,000. Architect, Clayton D. Wilton, Arcade Annex Bldg., Seattle. Owner, John Irvine. The work will include the installation of a complete new steaming system, electric wiring, plumbing and plastering. There will also be exterior alterations and additions. The plans are complete and work will be started at once.

Contracts Awarded.

Los Angeles, Cal.—Apartment house, 1 story and base, reinforced concrete, \$200,000. Architects' name not given. Owner, F. O. Engstrom, Contractors, F. O. Engstrom Co., 5th and Seaton Sts., L. A. Contract price, \$200,000.

BANKS.

Auburn, Placer Co., Cal.—Bank, 2 story and base, reinforced concrete, \$25,000. Architect, Charles S. Kaiser, Mechanics' Institute Bldg., S. F. Owners, Placer County Bank. The architect has just received the commission to prepare the plans for a two-story and basement monumental bank building containing the offices of the institution, president's and public room on the first floor, coin and safe deposit vaults in the basement and offices on the second floor. There will be steam heat. The exterior treatment has not been fully decided upon as yet, but the building will probably be faced with

either pressed brick or terra cotta. The working drawings are being prepared and a contract will be let as soon as possible.

BRIDGES, DAMS AND HARBOR WORK.

Richmond, Contra Costa Co., Cal.—Harbor work. Cost not stated. Engineers, Haviland & Tibbitts, Alaska Commercial Bldg., S. F. Owners, City of Richmond. The engineers have been authorized to proceed with the preliminary surveys and with the securing of the necessary data for the laying out of an extensive harbor. Bonds for the development are to be voted within the next few months and work will be started as soon as the funds become available.

Bremerton, Wash.—Wharf, wood and concrete, \$15,000. Engineer not selected. Owners, City of Bremerton, C. E. Ross Chairman of the Building Committee. The committee are now securing plans for the construction of a municipal wharf. Bids will be received as soon as plans can be prepared.

Seattle, Wash.—Harbor improvements, \$5,000,000. Engineers not selected. Owners, Bush Terminal Co., Brooklyn, N. Y. The Bush Company have secured the Harbor Island property in Elliott Bay and will expend \$5,000,000 in improvements before 1915. The company intend to erect a large number of warehouses besides several wharves. The construction will be of reinforced concrete throughout. No details of the construction are obtainable as yet.

Contracts Awarded.

Oakland, Cal.—Quay wall, reinforced concrete and stone, \$250,000. City Engineer, Oakland. Owners, City of Oakland. Contractors, Healy & Tibbitts Co., S. F. Note: This is the work abandoned some time ago by the Hansbrough Bros.

San Francisco.—Wharf construction, reinforced concrete, \$250,000. Engineer, Assistant State Engineer Saph, Ferry Bldg., S. F. Owners, State of California. The following bids were opened for the construction of the Union Street wharf:

1. Healy-Tibbitts Co. (a) \$267,400; (b) \$233,400; (c) \$263,400; (d) \$229,000.
2. Thompson Bridge Co. (a) \$312,452; (b) \$282,286; (c) \$306,397; (d) \$276,563.
3. San Francisco Bridge Co. (a) \$288,600; (b) \$256,600; (c) \$285,300; (d) \$253,300.
4. Caldwell Co. (a) \$298,798; (b) \$264,272; (c) \$294,495; (d) \$259,594.
5. Ross Construction Co. (a) \$268,862; (b) \$233,533; (c) \$267,000; (d) \$229,000.
6. Grant Fee (a) \$290,000; (b) \$251,000; (c) \$282,000; (d) \$243,000.
7. Mercer-Fraser Co. (a) \$317,233; (b) \$282,882; (c) \$312,000; (d) \$278,650.

All bids for furnishing the State Board with cement were rejected and will be readvertised. The contract for furnishing oil was awarded to the Associated Oil and the Standard Oil, their two bids being the same.

No contract was let for the construction of the Union Street Pier and figures were taken under advisement until the next meeting of the Board. A contract will probably be let for the work next Tuesday.

CHURCHES.

Los Angeles, Cal.—Church, 1 story and base, frame. Cost not stated. Architect, C. C. Rittenhouse, Wilcox Bldg., L. A. Owners, Knox Presbyterian Church. The building will be 62x48, and will contain a main auditorium, sixteen class rooms, social rooms and furnace room. The exterior of the building will be covered with artificial stone veneer. The plans are being prepared.

Santa Barbara, Santa Barbara Co., Cal.—Church, 2 story and base, brick, \$40,000. Architects, Frohman & Martin, Slavin Bldg., Pasadena. Owners, Trinity Church of Santa Barbara. The revised plans for this work have been completed and will go out for figures next week. There will be a central heating system. The cost does not include the art glass windows. The exterior of the building will be faced with cement plaster. The roof will be of clay tile.

Los Angeles, Cal.—Church, 2 story and base, frame, \$35,000. Architect, E. E. Melnardus, Higgins Bldg., L. A. Owners, Lutheran Evangelical Congregation. This work has been mentioned here several times before. The committee has now decided to reduce the cost of the structure to \$35,000, which will necessitate the change of the construction from brick to frame. The new plans are being prepared.

Oregon City, Ore.—Church and rectory, 2 story and base, stone. Cost not stated. Architects, Whitehouse & Foulhoux, Portland. Owners, St. Paul's Episcopal Church. The architects have just been commissioned to prepare plans for this work and details cannot be given at this time. Work has been started on a large stone retaining wall, and when this is completed the construction on the church edifice will be started.

Seattle, Wash.—Incinerator additions, \$12,000. Architect, John Graham, Lyon Bldg., Seattle. Owners, E. R. Butterworth & Sons. The work includes the construction of a reception room, receiving tombs, receptacle for urns, etc. The interior will be entirely finished in terra cotta and marble. The plans are complete and figures are being taken.

Contracts Awarded.

San Dimas, Los Angeles Co., Cal.—Church, 1 story and base, frame, \$25,000. Architect's name not given. Owners, Christian Congregational Church of San Dimas. Contractor, George Ford, San Dimas. Contract price, \$25,000.

COURT HOUSES.

Olympia, Wash.—Temple of Justice, 2 story and base. Class A construction, \$350,000. Architects, Wilder & White, New York. (C. H. Bebb, Denny Bldg., Seattle, Adviser.) The plans for the Temple of Justice have been completed and forwarded to Seattle for figures. The bids will be opened at Olympia on February 24th.

Contracts Awarded.

Pineville, El Dorado Co., Cal.—Court house fixtures and furniture. Cost not stated. Architects, Cuff & Diggs, Sacramento. Owners, El Dorado County. Contractors, Fowler-Mallett Co., 353 Sutter St., S. F. Lighting fixtures. Contract price not stated. Note: The bids for the wooden and metal

furniture for this building were all rejected and new figures will be called for shortly.

FACTORIES & WAREHOUSES.

Oakland, Cal.—Factory and warehouse, 2 story and base, brick. Cost not stated. Architect, C. W. Dickey, Oakland. Owner, E. Lehnhardt. This building has been mentioned here before when the architect was first commissioned to prepare the plans. The working drawings have been completed and figures are now being taken on the work. The building has been designed for a candy factory and warehouse. The exterior will be faced with pressed brick. There will be sidewalk doors and lifts.

Los Angeles, Cal.—Warehouse, 5 or 6 story and base, reinforced concrete. Cost not stated. Architect, W. J. Saunders, Wright and Callender Bldg., L. A. Owner, F. W. Braun. The building will cover an area of approximately 100x200 feet, and will be entirely of reinforced construction. There will be the cantilever system of floor construction. There will be two large elevators, sidewalk elevators, two box chutes, metal trim and a sprinkler system. The exterior will be faced with cement plaster. The plans are complete and bids are being taken for both the five and six story building.

Los Angeles, Cal.—Warehouse, 5 story and base, reinforced concrete, \$35,000. Architect, A. C. Martin, Higgins Bldg., L. A. Owners, Peck & Hills. This work has been mentioned here before when the drawings were being prepared. Bids are now being taken on the work and a general contract will be let at once.

Seattle, Wash.—Factory additions, 2 story and base, brick, \$50,000. Architects, Blackwell & Baker, Northern Bank Bldg., Seattle. Owners, Washington Shoe Manufacturing Co. The addition will be made to the present four-story building, and will be 110x120 feet. There will be five elevators. The plans are complete and the architects are taking figures on the work.

Aberdeen, Wash.—Warehouse, 2 story and base, reinforced concrete. Cost not stated. Architects MacNaughton & Raymond, Portland. Owners, Fidelity Investment Co. The building will be 100x120 feet. The exterior walls will be of reinforced concrete faced with cement plaster. The balance of the building will be of mill construction. The plans are complete and figures will be opened for the construction on February 5th.

Douglas, Ariz.—Smelter plant, steel and concrete, \$350,000. Engineer not given. Owners, Calumet and Arizona Mining Co., Douglas, Ariz. Contractors, Kansas City Structural Steel Co., Kansas City, Mo. Contract price, \$350,000. The architect does not include the installation of the machinery, bids for which are now being taken.

Los Angeles, Cal.—Factory, 1 story and base, reinforced concrete. Cost not stated. Architect, none. Owner, H. M. Binford. Contractor, V. P. Gilbert, Douglas Bldg., L. A. Contract price not given. Note: Building will be 80x140.

Contracts Awarded.

San Francisco—Warehouse, 2 story and base, mill construction. Cost not stated. Architect, G. Albert Lansburgh, M. A. Gunst Bldg., S. F. Owner, H. Levi & Co. Contractors, C. P. Moore

Building Co., Monadnock Bldg., S. F. Contract price not stated.

FLATS.

San Francisco—Flats, 3 story and base, frame, \$1,000. Architect, Henry Shumard, 1115 Idge. S. F. Owners' name withheld. The building will contain three small apartment flats. The trim will be of pine with hardwood floors. There will be open fire places. The exterior will be covered with cement plaster. The architect is preparing the plans.

San Francisco—Flats, 2 story and base, frame, \$15,000. Architect, John Davis Hatch, Humboldt Bank Bldg., S. F. Owner, D. H. Walzen. The building will be arranged for five stores on the first floor and a number of offices and flats above. The building will be 75x75 feet. The trim will be of pine. There will be plate glass store fronts. The exterior of the building will be covered with cement plaster on metal lath. The plans are complete and contracts for part of the work have been let. The balance of the work is now being figured.

Oakland, Cal.—Flats, 2 story and base, frame, \$4,000. Architect, Charles Men, Macdonough Bldg., Oakland. Owner, M. Jones. The building has been arranged for two flats of five and six rooms each and baths. The trim will be of pine. There will be gas grates. The dining rooms and living rooms will have oak floors. The exterior of the building will be covered with rustic. The plans are complete and figures are being taken.

San Francisco—Flats, 2 story and base, frame, \$4,500. Architect, none. Owner, A. Petry, 336 Pierce St., S. F. The building has been arranged for three flats of five and six rooms each with baths. The interior trim will be of pine with some oak floors. There will be gas grates. The exterior of the building will be covered with shingle and brick veneer. The plans are in the hands of the owner and the work will be done by Day Labor.

Oakland, Cal.—Flats, 2 story and base, frame, \$3,000. Architect, none. Owner, Realty Syndicate, 1218 Broadway, Oakland. The building will contain two modern flats of five and six rooms each with baths. There will be coal grates and tile mantels. The trim will be of pine. The exterior of the building will be covered with rustic. The plans are complete and the work will be done by Day Labor.

FIRE HOUSES AND JAILS.

Portland, Ore.—Fire house, 2 story and base, brick, \$15,000. Architects, Tobey & Mills, Portland. Owners, City of Portland. The building will be 34x50 feet, and will contain accommodations for two fire companies. The exterior of the building will be faced with pressed brick. There will be special electric apparatus. The plans are being revised and new figures will be taken shortly.

GARAGES.

Stanton, Los Angeles Co., Cal.—Garage, 1 story and base, frame. Cost not stated. Architects, Gentry & Schultz, Byrne Bldg., L. A. Owners, Stanton Improvement Co. The building will be 40x60. The exterior will be covered with cement plaster on metal lath.

The plans are complete and the work will be done by Day Labor.

Los Angeles, Cal.—Garage, 1 story and base, brick. Cost not stated. Architects, Morgan, Walls & Morgan, State Bldg., L. A. Owner, Mrs. E. J. Sanborn. The building will be 60x120. A cement floor will cover the entire floor area. The exterior walls will be faced with cement plaster. There will be large gasoline storage tanks. The plans are being prepared.

GOVERNMENT WORK AND SUPPLIES.

The secretary of war has approved the recommendations which have been made concerning the ultimate military force which shall compose the command in the Hawaiian Islands. This question had to be determined before there could be an adoption of any comprehensive plan for the construction of barracks, quarters, and storehouses in Hawaii. The War Department has, therefore, decided that there shall be in the islands, eventually, five regiments of infantry, with 150 men per company; one regiment of cavalry at war strength; one regiment of field artillery; one company of engineers, one company of the signal corps, eight companies of coast artillery (to be separated from the mobile army), and the necessary sanitary troops. The latter branch will consist of medical officers and hospital corps personnel of an extent allowed by the regulations, and in addition there will be unquestionably a field hospital in the Hawaiian Islands, for the initial provision of which the surgeon general of the Army has made recommendations. During the past two or three years. It is desired to obtain an allotment of \$100,000 for such an institution, but there has been a delay in submitting this estimate to Congress, with the prospect that the Hawaiian Island garrison will be established before the adequate hospital facilities are provided. All of the mobile troops will be stationed at Schofield Barracks, with the exception of one battalion of infantry, which will be retained at Fort Shafter, about three miles from Honolulu, where the supply depot, the reserve storehouse, and other buildings will be located. There will be a great deal of construction necessary to provide the shelter and other buildings for this command. It is estimated that the cost will be about \$6,000 per regiment, or an aggregate, taking into consideration all construction, of about \$5,000,000.

HALLS AND SOCIETY BUILDINGS.

Tacoma, Wash.—Yacht club, 2 story and base, reinforced concrete, \$30,000. Architect, C. F. Lundberg, Tacoma. Owners, Tacoma Yacht Club. The building will contain social rooms, boat house, parlors, dining room, garage and sleeping accommodations for 50 persons. There will be a central heating system. The exterior of the building will be covered with cement plaster. The roof will be of clay tile. Plans are now out for figures.

Seattle, Wash.—Lodge hall, 4 story and base, brick and steel, \$150,000. Architect, John Carlgren, Oriental Bldg., Seattle. Owners, Elks' Hall Association, Seattle. This work has been

mentioned here before when the plans were first started. The working drawings are now complete and the architect states that figures will be called for by February 1st. Bids will be asked for the general construction, plumbing, heating and electric work.

Santa Monica, Los Angeles Co., Cal.—Lodge hall, 3 story and base, brick, \$10,000. Architect, H. N. Goetz, 7042 2nd St., Santa Monica. Owners, Santa Monica Elks' Hall Association. The building will contain the lodge rooms of the order, a large social hall, banquet room, library, etc. There will be steam heat and some living apartments. The exterior of the building will be faced with pressed brick. The working drawings are being prepared.

Fresno, Fresno Co., Cal.—Lodge hall, 3 story and base, brick and steel, \$75,000. Architects, Starbuck & Clark, Fresno. Owners, Fresno Eagles' Hall Association. The building will be 75x115 feet. There will be stores on the first floor, social rooms, lodge halls and offices for the order on the upper floors. The roof will be arranged for a dance floor and open air stage. The exterior of the building will be faced with terra cotta and brick. The plans are being prepared and construction will be undertaken shortly.

HOTELS.

Fresno, Fresno Co., Cal.—Hotel, 6 story and base, reinforced concrete, \$150,000. Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owners, Fresno Hotel Co. Information has been received from Fresno stating that the work on the \$100,000 hotel building of the Fresno Hotel Company is to be resumed at once, and under the direction of the owners and not by the bonding company, as has been reported. This is the work abandoned some time ago by Contractor H. C. Farley, formerly of the Monadnock Bldg., S. F. E. E. Manheim of Fresno is the acting head of the Fresno Hotel Co., and authorizes the above statement.

Fresno, Fresno Co., Cal.—Hotel additions, 3 stories, brick construction, \$20,000. Architect, Ben J. G. McDougall, Sheldon Bldg., S. F. Owners, Blasingame Estate. This work has been mentioned in these columns before, and at that time it was stated that the work would be done by Day Labor. The plans have been completed and the architect has been instructed to take figures on the construction and to let a general contract.

San Francisco—Hotel annex, 10 story and base, Class A construction, \$750,000. Architects, Bliss & Faville, Balboa Bldg., S. F. Owners, St. Francis Hotel Co. At a recent meeting of the directors of the hotel company the architects were instructed to proceed with the working drawings for the addition to the building. No decision was reached, however, whether to construct the wing with the tower or to simply duplicate the present architecture. Instructions were given the architects to prepare estimates on the cost of the work by general contract and under the Day Labor system.

Auburn, Wash.—Hotel and stores, 3 story and base, reinforced concrete, \$20,000. Architect, V. W. Voorhees, Eltel Bldg., Seattle. Owner, W. W. Townsend. The building will be 30x90 feet and has been arranged for stores on the first floor and hotel rooms above. There will be a hot water heat-

ing system. The exterior of the building will be faced with cement plaster. The plans are complete and figures are to be taken at once.

HOSPITALS.

San Francisco—Hospital electric work, Cost not stated. Architect, City Architect Alfred J. Coffey, 1204 David Hewes Bldg., S. F. Owners, City and County of San Francisco. Plans have been completed and placed in the hands of the Board of Public Works for the electric wiring and electric supplies for the San Francisco Hospital buildings. Bids will be opened on January 15th.

Phoenix, Ariz.—Asylum, 2 story and base, brick, \$20,000. Architect, Royal W. Lecher, Phoenix. Owners, State of Arizona. The building has been designed for a general administration building and will cover an area of 60x100 feet. The first floor will be given over to the officers of the institution, while the second floor has been arranged for use of the patients. The exterior will be faced with cement plaster.

Contracts Awarded.

Victoria, B. C.—Hospital, 2 story and base, reinforced concrete, \$25,000. Architect's name not given. Owner, Dr. O. W. Jones, Victoria. Contractors Sound Construction Co., Lowman Bldg., Seattle. Contract price, \$25,000.

LIBRARY.

Los Angeles, Cal.—Library, 1 story and base, reinforced concrete, \$35,000. Architects, Hunt & Burns, Laughlin Bldg., L. A. Owners, City of Los Angeles. This work has been mentioned here before when the architects were first commissioned to prepare the plans. The working drawings have been completed and approved by the Library Trustees and forwarded to Mr. Carnegie for final approval. The building will be fire proof throughout with concrete floors and roof. The exterior will be faced with terra cotta. Figures will be called for within one month.

RAILROAD CONSTRUCTION—STATIONS AND EQUIPMENT.

San Diego, Cal.—Freight depot, 2 story and base, reinforced concrete, \$100,000. Architectural Dept. Santa Fe, Topeka, Kan. Owners Santa Fe Railroad Co. The building will be 300x60. The freight shed will be but one story in height, while the part containing the general offices will be a two-story structure. The approved plans have been placed in the hands of the local authorities and bids will be taken at once.

Aberdeen, Wash.—Passenger depot, 1 story and base, reinforced concrete, \$35,000. Architectural Dept. Oregon-Washington Railroad and Navigation Co. The plans for this building will be ready for figures within the next six weeks. The structure has been designed in the Mission style. The exterior will be faced with cement plaster. There will be a clay tile roof.

Contracts Awarded.

Riverbank, Stanislaus Co., Cal.—Roundhouse, 1 story, reinforced concrete, \$10,000. Engineering Dept. Santa Fe System Topeka, Kan. Owners Santa Fe Railroad Co. Contractors

tors, Van Sant, Houghton, Bayboa Bldg., S. F. Contract price, \$10,000.

Argo, Wash.—Machine shop and power house, 1 story, reinforced concrete, \$50,000. Engineer Dept., Oregon-Washington Railroad and Navigation Co., Seattle. Owners, Oregon-Washington Railroad and Navigation Co. Contractors, Grant Smith & Co., Henry Bldg., Seattle. Contract price, \$50,000.

RESIDENCES.

San Francisco—Residences, 2, 2 story and base, frame, \$4,500 each. Architect none. Owner, W. W. Rednall, 2500 Filbert St., S. F. The dwellings will each contain six rooms and bath. The trim will be of pine with oak floors in the principal rooms. There will be open fire places and tile mantels. The exteriors will be finished in tile. The exteriors of the dwellings will be covered with cement plaster on metal lath. The plans are in the hands of the owner and the work will be done by Day Labor.

San Francisco—Residence, 2 story and base, frame, Cost not stated. Architect, Henry Sherman, Mills Bldg., S. F. Owner, W. W. Seals. The dwelling has been designed for a six-room house with bath and garage. The interior trim will be of pine and elm and white enamel. There will be oak floors throughout. The dwelling will be heated by a furnace. There will be three open fire places with attractive tile mantels. The bath will be finished in tile. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the architect is taking figures on the work.

Alameda, Alameda Co., Cal.—Residence, 1 story and base, frame, \$5,000. Architect, none. Owner, E. A. Larkin, 1154 Park Ave., Alameda. The dwelling will contain eight rooms and two baths. There will be furnace heat and open fire places. The interior trim will be largely of hardwoods and white enamel. The floors throughout will be of oak. The bath room will be finished in tile. The mantels will be of brick. The exterior of the dwelling will be covered with rustic. The plans are in the hands of the owner and he is now purchasing all materials.

Oakland, Cal.—Bungalow, 1 story and base, frame, \$2,500. Architect, none. Owner, H. E. Hill, 1420 11th St., Oakland. The dwelling will contain six rooms and bath. The trim will be of pine throughout. There will be coal grates with tile mantels. The exterior of the dwelling will be covered with shingles. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Residence, 2 story and base, frame, \$5,000. Architect, George C. Muller, 2435 Peralta St., Oakland. Owner, L. B. Pollard. The dwelling has been designed for an eight-room house with two baths. The interior finish will be largely of hardwood. The floors of the principal rooms will be of oak. There will be furnace heat and open fire places. The mantels and the trim in the bath rooms will be of tile. The exterior of the house will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Oakland, Cal.—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, R. A. McWilliams, 191 Moss Ave., Oakland. The dwelling will contain eight rooms and bath. The trim

will be of pine throughout. There will be some hardwood floors. The dwelling will be heated by a furnace and open fire places. The mantels will be of tile. The exterior of the dwelling will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Residence, 2 story and base, frame, \$5,000. Architect, C. E. Burks, 5117 Geneva St., Oakland. Owner, Mr. Spangler. The dwelling has been designed for an eight-room house with two baths. The interior trim will be of pine and hardwoods with hardwood floors in the principal rooms. There will be open fire places and furnace heat. The mantels will be of tile and brick. The exterior of the dwelling will be finished in cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Bungalow, 1 story and base, frame, \$2,000. Architect, none. Owner, James H. Young, 2929 East 14th St., Oakland. The dwelling will contain six rooms and bath. The trim throughout will be of pine with oak floors in the living and dining rooms. There will be coal grates and the mantels. The exterior of the bungalow will be covered with rustic and cement plaster. The work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Bungalow, 1 story and base, frame, \$3,000. Architect, none. Owners, Peake-Munroe Co., 2035 Shattuck Ave., Berkeley. The dwelling will contain six rooms and bath. The trim will be of pine with some hardwood floors. There will be furnace heat and coal grates. The mantels and the trim in the bath will be of tile. The exterior of the dwelling will be covered with cement plaster on metal lath. The work will be done by Day Labor.

A similar building is also being designed by the same company and will be erected on property adjoining the other dwelling. The estimated cost of this house is \$2,500.

Berkeley, Alameda Co., Cal.—Cottage, 1 story and base, frame, \$2,000. Architect, none. Owner, C. E. Hanson, 2926 Roosevelt Ave., Berkeley. The cottage will contain six rooms and bath. The trim throughout will be of pine. There will be coal grates. The exterior of the cottage will be covered with rustic. The plans are complete and the work will be done by Day Labor.

San Francisco—Residence, 2 story and base, frame, \$2,600. Architect, none. Owner, Charles F. Beha, 682 4th Ave., S. F. The dwelling will contain six rooms and bath. The interior trim will be of pine with hardwood floors in the principal rooms. There will be open fire places with attractive brick mantels. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Bungalow, 1 story and base, frame, \$2,000. Architect, none. Owner, Charles A. Werner, 2323 9th St., Berkeley. The dwelling will contain five rooms and bath. The trim throughout will be of pine. There will be some oak floors. The exterior of the bungalow will be covered with rustic. The work will be done by Day Labor.

Oakland, Cal.—Residence, 2 story and base, frame. Cost not stated. Architect, none. Owner, A. F. Ellet, 2507

Randolph Ave., Oakland. The dwelling has been designed for an eight-room house with bath. There will be pine and hardwood interior finish, open fire places and tile mantels. There will be furnace heat. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Los Angeles, Cal.—Residence, 2 story and base, frame. Cost not stated. Architect, W. J. Slrcey, 1 W. Helman Bldg., L. A. Owner, Charles S. McKelvey. The dwelling will contain ten rooms and bath. The interior trim will be of pine and hardwoods. The floors will be of oak throughout. There will be furnace heat and open fire places. The exterior of the dwelling will be covered with shakes. The plans are complete and the work will be done by Day Labor.

Los Angeles, Cal.—Residence, 2 story and base, frame, \$12,000. Architect, Edward C. Taylor, Consolidated Realty Bldg., L. A. Owner, C. Kirchner. The dwelling will contain twelve rooms and three baths. The interior trim will be of pine and hardwoods with oak doors throughout. There will be open fire places and furnace heat. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

SCHOOLS.

Santa Clara, Santa Clara Co., Cal.—College, 5 story and base, reinforced concrete. Cost not stated. Architect, Will D. Shea, 244 Kearny St., S. F. Owners, Santa Clara College. This building will be known as Senior Hall, and will be almost a duplicate of the building now in the course of construction. The work will be done by the Graham Co., Williams Bldg., S. F., and they are now taking sub-figures on all parts of the work.

Los Angeles, Cal.—School annex, 1 story and base, frame. Cost not stated. Architect, W. J. Bliesner, Laughlin Bldg., L. A. Owners, City of Los Angeles. The building will be separate from the main building and will cover an area of 75x106. There will be an auditorium seating 900, four class rooms, library and principal's office. There will be a central heating system. The exterior of the building will be covered with cement plaster. The plans are being prepared.

Ellensburg, Wash.—School, 2 story and base, brick and steel, \$30,000. Architects, Stephen & Stephen, New York Bldg., Seattle. Owners, City of Ellensburg, L. A. This work has been mentioned here several times. The bids for the construction were recently opened and all have been rejected as too high. The lowest figure received for the general construction was \$58,723, and from this the figures ran as high as \$83,000. The plans will be revised and new bids will be called for shortly.

GILROY HIGH SCHOOL BIDS.

Fourteen Sets of Figures Were Opened For the General Construction. All Bids Taken Under Adjudgment.

Bids were opened on January 6th by the Board of School Trustees of the Gilroy School District, Santa Clara County, for the construction of their

new high school building, plans for which were prepared by Architect W. H. Weeks, 251 Kearny street, San Francisco. Fourteen bidders submitted figures for the general construction while a number of figures were also received for the heating and ventilating and chemistry laboratory fittings. There were three propositions on which bids were asked under the general contract. Proposition No. 1, pressed buff brick veneered building; Proposition No. 2, pressed red brick veneered building, and Proposition No. 3, plastered exterior from cement base up. The following is a complete list of the bidders and the amounts of their figures:

Moore & Kenyon (1), \$37,096; (2), \$—; (3), \$35,600.

Peterson & Wilson, 1113 Post, S. F. (1), \$39,282; (2), \$39,051; (3), \$37,750.

Lange & Bergstrom, Monadnock Bldg. S. F. (1), \$44,000; (2), \$43,530; (3), \$42,100.

B. T. Owsley, Williams Bldg., S. F. (1), \$37,250; (2), \$36,850; (3), \$35,450.

R. O. Summers, San Jose, (1) \$40,634; (2), \$—; (3), \$39,956.

E. A. Hettinger, Palo Alto, (1) \$42,500; (2), \$42,270; (3), \$40,550.

W. S. Simpson, (1) \$38,855; (2), \$38,158; (3), \$38,138.

Hoyt Bros., Monadnock Bldg., S. F. (1), \$34,900; (2), \$34,600; (3), \$32,710.

Z. O. Field, San Jose, (1) \$42,550; (2), \$42,850; (3), \$40,607.

Frank Wimer (1) \$36,220; (2), \$36,170 (3), \$37,165.

Robert Trost, 26th and Howard, S. F. (1), \$34,480; (2), \$34,180; (3), \$33,830.

Morrison Bros., San Jose, (1) \$41,090; (2), \$—; (3), \$38,508.

O. Christensen, San Jose, (1) \$35,726 (2), \$33,850; (3), \$—.

James Furlong, 663 Fillmore, S. F. (1), \$36,200; (2), \$36,100; (3), \$34,320.

All bids were taken under advisement and no contract was awarded. The Trustees will meet again this week and with the architect will decide upon the best of the three propositions and will award the contract.

Bids for the heating and ventilating range from \$345 to \$1208. For the chemistry laboratory fittings from \$520 up.

Contracts Awarded.

Wasco, Kern Co., Cal.—School, 1 story and base, concrete and frame, \$20,000. Architect not given. Owners, Wasco School District. Contractor, Oscar Pa'ler, Tulare, general construction. Contract price, \$11,369. Machinery and Electric Co., L. A. heating and ventilating. R. Rosenthal, Tulare, blackboards.

SEWERS, STREET WORK AND WATER SYSTEMS.

Contracts Awarded.

Big Creek, Fresno Co., Cal.—Hydro-electric plant, \$10,000,000. Engineering Dept. Pacific Light and Power Co., L. A. Owners, Pacific Light and Power Co. Contractors, Stone & Webster, White Bldg., Seattle. Contract price, \$10,000,000. This company has recently been awarded the contract for the largest power unit in the world. The work will embrace the complete construction of a power plant capable of generating 150,000 horse power, and distributing stations throughout the San Joaquin Valley. The contractors already have a large force of draughtsmen at work and will shortly put a

crew of 300 construction men in the field.

Elma, Wash.—Water system and pipe line, \$14,500. Engineer Lewis C. Kelsey, Elma. Owners, City of Elma. Contractors, Welton, Kilde & Cochran, Portland. Contract price, \$14,806.

STORES & OFFICE BUILDINGS.

San Francisco—Stores and lofts, 6 story and base, reinforced concrete, \$100,000. Architects, Reid Bros., Call Bldg., S. F. Owners, Sharon Estate. This building has been mentioned here recently. The plans are now out for figures for certain parts of the work and construction will be started at once. The entire building has been leased to the Government for use by the quartermaster's department of the army. There will be steam heat, electric elevators and sidewalk lifts. The construction will be fire proof throughout. The exterior will be faced with cement plaster.

Oakland, Cal.—Stores, 1 story and base, brick. Cost not stated. Architects, Milwain Bros., Delger Bldg., Oakland. Owner, Mr. Thompson. The building will contain several stores with plate glass display windows and pine finish. The exterior of the building will be faced with pressed brick. The plans are complete and figures are now being taken.

Reedley, Fresno Co., Cal.—Stores and offices, 2 story and base, brick, \$13,500. Architects, Starbuck & Clark, Fresno. Owner, H. F. Winnes, Reedley. The building will be erected in the center of the business district. There will be several stores on the first floor and modern offices on the second floor. The trim throughout will be of pine. There will be large plate display windows. The exterior of the building will be faced with pressed brick and artificial stone. The plans are complete and figures are being taken.

Santa Monica, Los Angeles Co., Cal.—Stores, 1 story and base, brick, \$6,000. Architects, C. C. Cross & Sons, 216 Commercial St., Santa Monica. Owner, F. E. Rundy. The building will be 52x60 feet, and will be divided into three stores. The exterior will be faced with pressed brick and the work will be done by Day Labor.

Long Beach, Los Angeles Co., Cal.—Stores and offices, 5 story and base, brick and steel. Cost not stated. Architect, owner. Owner, Scott W. Alexander, O. T. Johnson Bldg., L. A. The building will be 50x90. The first floor will be divided into stores and the upper floors will be arranged for modern office. There will be steam heat and elevator service. The exterior of the building will be faced with pressed brick and terra cotta. The owner is now busy on the working drawings.

Los Angeles, Cal.—Stores and offices, 14 story and base, steel and brick. Cost not stated. Architect, Thornton Fitzhugh, Pacific Electric Bldg., L. A. Owner, Harold F. Whitcomb, Consolidated Realty Bldg., L. A. The owner has just secured a long lease on the property upon which this building is to be erected. The preliminary plans only have been prepared and changes may be made in these. The structure will, however, be a Class A building, and, according to the terms of the lease, must be completed by 1915. The exterior will be faced with either

pressed brick or terra cotta. Construction will be started in March.

Seattle, Wash.—Stores and lofts, 3 story and base, brick and steel, \$50,000. Architect, Harlan Thomas, Ellers Bldg., Seattle. Owner, William Thannum. The building will be 70x90 feet. The first floor will be arranged for a large market, while the upper floors will be divided into lofts. The exterior will be faced with pressed brick. The plans are complete and figures are being taken.

Portland, Ore.—Stores and apartments, 3 story and base, brick. Cost not stated. Architect, C. H. Bristow, Portland. Owner, L. E. Sauvie. The building will be 50x80. The first floor will be given over to store purposes and the upper floors will be arranged for small apartments. There will be steam heat and running water. The exterior will be faced with pressed brick. The plans will be out for figures on January 22nd. A contract will be awarded February 1st.

Contracts Awarded.

Los Angeles, Cal.—Stores and offices, 6 story and base, brick and steel. Cost not stated. Architect, none. Owner, H. H. Cotton, L. A. Contractors, Western Building and Investment Co., 303 West 3rd St., L. A. Contract price not stated.

THEATRES.

San Francisco—Theatre, 1 story and base, brick and steel, \$15,000. Architect, John J. Foley, Monadnock Bldg., S. F. Owner's name withheld. The building will be 50x137½, and will be of the Class C type of construction. The exterior will be faced with white Medusa cement. There will be considerable mosaic and terrazzo used. The seating capacity will be 500. There will be steam heat and a ventilating system. The plans are complete and figures are being taken.

Oakland, Cal.—Theatre, 1 story and base, brick or reinforced concrete, \$12,000. Architect, none. Owner, T. D. Sullivan, 1316 East 27th St., Oakland. The owner will prepare plans and will shortly start the construction by Day Labor of a man moving picture theatre. Mr. Sullivan will be interested in any information pertaining to this type of building that may be sent him.

SEALED PROPOSALS.

CONSTRUCTING BRIDGE.

(Bids close Jan. 22.)

NOTICE is hereby given that sealed bids will be received by the Board of Supervisors of the County of Los Angeles, State of California, up to 2 o'clock p. m. of January 22, 1912, for furnishing all labor and materials necessary for the construction of a pile trestle bridge on Mozart street, in the Ballona Road District, in said county and State.

Said work is to be done in accordance with plans and specifications on file in the office of the Board of Supervisors of said county, and bidders are referred to said plans and specification for further information.

By order of the Board of Supervisors of the County of Los Angeles, State of California. H. J. LELANDE, County Clerk.

PROPOSALS FOR SWEEPING MACHINES

(Bids close Jan. 17.)

OFFICE of the Board of Public Works of the City and County of San Francisco.—Sealed proposals will be received at the office of the said Board of Public Works, tenth floor, David Hewes Building, 995 Market street, between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 17th day of January, 1912, for furnishing and delivering to the City and County of San Francisco, the following materials, to wit:

Two (2) "Hvass" steel street sweeping machines or equal, arranged to be hauled by two horses.

PROPOSALS FOR LAYING PIPE.

(Bids close Jan. 24.)

OFFICE of the Board of Public Works of the City and County of San Francisco.—Sealed proposals will be received at the office of the said Board of Public Works, tenth floor, David Hewes Building, 995 Market street, between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 24th day of January, 1912, for doing the following work, to wit:

The completion of Contract No. 44 of the Auxiliary Water Supply System for Fire Protection, for hauling and laying cast-iron High Pressure Mains, conduits and appurtenances, in the district bounded by the westerly line of Powell street, the southeasterly line of Market street, and the Bay of San Francisco.

PROPOSALS FOR ELECTRIC WORK.

(Bids close Jan. 17.)

OFFICE of the Board of Public Works of the City and County of San Francisco.—Sealed proposals will be received at the office of the said Board of Public Works, tenth floor, David Hewes Building, 995 Market street, between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 17th day of January, 1912, for furnishing and delivering to the City and County of San Francisco, the following materials, to wit:

The necessary electric wire and supplies for the San Francisco Hospital Buildings.

PROPOSALS FOR EARTHWORK.

(Bids close Jan. 22.)

EARTHWORK.—Department of the Interior, United States Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service, Montrose, Colo., until 4 o'clock p. m. January 22, 1912, for the construction of 12 miles of the West Canal, Uncompahgre Valley project, in the vicinity of Montrose, Colo. This work involves the excavation of about 210,000 cubic yards of material in open cut and 1,750 linear feet of tunnel. For particulars address the United States Reclamation Service, Montrose, Colo.; 519 Commonwealth Building, Denver, Colo., or Washington, D. C. H. NEWELL, director.

PROPOSALS FOR CANAL SUPPLIES.

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings such as Banks, Churches, Hotels, etc.

a. m. January 24, 1912, at which time they will be opened in public, for furnishing the above-mentioned articles. Blanks and general information relating to this circular (No. 671) may be obtained from this office or the office of the assistant purchasing agent, 1046 North Point street, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer

SAN FRANCISCO.

Residences.—2, 2 story and base, frame \$4500 each. San Francisco. Architect, nne. Owner, W. W. Rednall, 2500 Filbert St., S. F. The dwellings will each contain six rooms and bath. The trim will be of pine with oak floors in the principal rooms. There will be open fire places and tile mantels. The baths will be finished in tile. The exteriors of the dwellings will be covered with cement plaster on metal lath. The plans are in the hands of the owner and the work will be done by Day Labor.

Residence.—2 story and base, frame. Cost not stated. San Francisco. Architect, Henry Shermund, Mills Bldg., S. F. Owner, W. W. Seals. The dwelling has been designed for a six-room house with bath and garage. The interior trim will be of pine and elm and white enamel. There will be oak floors throughout. The dwelling will be heated by a furnace. There will be three open fire places with attractive tile mantels. The bath will be finished in tile. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the architect is taking figures on the work.

Apartment House Alterations to Four Frame Buildings.—Cost not stated. San Francisco. Architect, Earl B. Scott, Humboldt Bank Bldg., S. F. Owner, Mrs. Proffe. The work will consist of the alteration of four large frame dwellings into a modern apartment house containing 16 apartments of two and three rooms each and bath. There will be new plastering, electric work, plumbing and painting. There will be also considerable exterior work. The plans are complete and figures are being taken.

Flats.—3 story and base, frame, \$4,600. San Francisco. Architect, Henry Shermund, Mills Bldg., S. F. Owner's name withheld. The building will contain three small apartment flats. The trim will be of pine with hardwood floors. There will be open fire places. The exterior will be covered with cement plaster. The architect is preparing the plans.

Flats.—2 story and base, frame, \$15,000. San Francisco. Architect, John Davis Hatch, Humboldt Bank Bldg., S. F. Owner, I. W. Vulzen. The building will be arranged for five stores on the first floor and a number of offices and flats above. The building will be 75x75 feet. The trim will be of pine. There will be plate glass store fronts. The exterior of the building will be

covered with cement plaster on metal lath. The plans are complete and contracts for part of the work have been let. The balance of the work is now being figured.

Stores and Loft.—5 story and base, reinforced concrete, \$100,000. San Francisco. Architects, Reid Bros., Call Bldg., S. F. Owners, Sharon Estate. This building has been mentioned here recently. The plans are now out for figures for certain parts of the work and construction will be started at once. The entire building has been leased to the Government for use by the quartermaster's department of the army. There will be steam heat, electric elevators and sidewalk lifts. The construction will be fire proof throughout. The exterior will be faced with cement plaster.

Apartment House.—3 story and base, frame, \$7,000. San Francisco. Architect, none. Owner, Charles Mitchell, 1248 17th St., S. F. The building will be arranged for five small apartments fitted with every modern convenience. The trim will be of pine with some hardwood floors. There will be wall beds. The exterior of the building will be covered with brick and cement plaster. The plans are in the hands of the owner and the work will be done by Day Labor.

Apartment House.—3 story and base, frame, \$20,000. San Francisco. Architect, none. Owner, J. V. Campbell, 1040 Bryant St., S. F. The building will contain twelve apartments arranged in suites of three and four rooms each. The trim will be of pine. There will be steam heat and wall beds. The exterior of the building will be covered with brick veneer and shingles. The plans are in the hands of the owner and he will take sub-figures next week.

Wharf Construction.—Reinforced concrete, \$250,000. San Francisco. Engineer, Assistant State Engineer Saph, Ferry Bldg., S. F. Owners State of California. The following bids were opened for the construction of the Union Street wharf:

1. Healy-Thibblitts Co. (a) \$267,400; (b) \$233,400; (c) \$263,400; (d) \$229,000.
2. Thompson Bridge Co. (a) \$312,452; (b) \$282,286; (c) \$306,397; (d) \$276,563.

3. San Francisco Bridge Co. (a) \$283,600; (b) \$256,600; (c) \$285,300; (d) \$253,300.

4. Caldwell Co. (a) \$295,738; (b) \$264,372; (c) \$294,495; (d) \$259,584.

5. Ross Construction Co. (a) \$268,862; (b) \$233,533; (c) \$267,000; (d) \$229,000.

6. Grant Fee (a) \$290,000; (b) \$251,000; (c) \$282,000; (d) \$243,000.

7. Mercer-Fraser Co. (a) \$317,233; (b) \$283,882; (c) \$312,000; (d) 278,650.

All bids for furnishing the State Board with cement were rejected and will be readvertised. The contract for furnishing oil was awarded to the Associated Oil and the Standard Oil, their two bids being the same.

No contract was let for the construction of the Union Street Pier and figures were taken under advisement until the next meeting of the Board

A contract will probably be let for the work next Tuesday.

Fintz—2 story and base, frame, \$4,500. San Francisco, Architect, none. Owner, A. Petry, 326 Pierce St., S. F. The building has been arranged for three flats of five and six rooms each with bath. The interior trim will be of pine with some oak. There will be gas grates. The exterior of the building will be covered with ship-lap and brick veneer. The plans are in the hands of the owner and the work will be done by Day Labor.

Hotel Annex—10 story and base. Class A construction, \$750,000. San Francisco. Architects, Bliss & Faville, Balboa Bldg., S. F. Owners, St. Francis Hotel Co. At a recent meeting of the directors of the hotel company the architects were instructed to proceed with the working drawings for the addition to the building. No decision was reached however. The architect to construct the wings with the tower or to simply duplicate the present structure. Instructions were given the architects to prepare estimates on the cost of the work by general contract and under the Day Labor system.

Hospital Electric Work—Cost not stated. San Francisco. Architect, City Architect Alfred I. Coffey, 1204 David Hewes Bldg., S. F. Owners, City and County of San Francisco. Plans have been completed and placed in the hands of the Board of Public Works for the electric wiring and electric supplies for the San Francisco Hospital buildings. Bids will be opened on January 17.

Residence—2 story and base, frame, \$3,600. San Francisco, Architect, none. Owner, Charles F. Bela, 682 4th Ave., S. F. The dwelling will contain six rooms and bath. The interior trim will be of pine with hardwood floors in the principal rooms. There will be open fire places with attractive brick mantels. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Therme—1 story and base, brick and steel, \$15,000. San Francisco, Architect, John J. Foley, Monadnock Bldg., S. F. Owner's name withheld. The building will be 50x137½ feet, and will be of the Class C type of construction. The exterior will be faced with white Medusa cement. There will be considerable mosaic and terrazzo used. The seating capacity will be 500. There will be steam heat and a ventilating system. The plans are complete and figures are being taken.

City Bids Opened.

BOARD OF PUBLIC WORKS OPENS FIGURES FOR SIX CONSTRUCTION JOBS, WORK ATTRACTS MANY FIRMS.

Bids were opened yesterday afternoon by the Board of Public Works for the heating and ventilating, plumbing, electric work and vacuum cleaning system for the Girls' High School, for the finish hardware on the Lowell High School and for the construction of the Everett School annex. The work attracted an unusually large number of bidders and the figures submitted were close. Below is given a complete list of the firms bidding and the amount of their bids:

Plumbing Girls' High School.

1. Wm. S. Snook & Son.....	\$14,980
2. C'm. Plumb.&Heating Co.....	17,800
3. Lettich Bros.....	19,343
4. Krieman & O'Brien.....	15,392
5. Whitman, Lyman & Co.....	13,964
6. Herman & Lawson.....	19,913.08
7. Turner & Co.....	14,950
8. John G. Sutton & Co.....	15,998
9. J. Looney Co.....	13,769
10. Robt. Palzied Jr. Co.....	16,597

Everett School Annex.

1. Eckenroth & Shale.....	\$ 7,995
2. C. C. Holt.....	8,870
3. Robt. Trost.....	9,287
4. Fred Jones.....	9,310
5. Hawkins Bldg. Co.....	8,295
6. Elmer Carlson.....	7,600
7. Lange & Bergstrom.....	6,989
8. L. M. Bruce.....	11,217
9. H. B. Brown.....	8,727
10. W. A. Newsum.....	7,390
11. McSheehy Bros.....	7,842

Electric Work Girls' High School.

1. National Elec. Co.....	\$7,896
2. Central Elec. & Heating Co.....	6,230
3. Turner Co.....	6,700
4. General Elec. Constr. Co.....	6,467
5. Standard Elec. Constr. Co.....	5,497
6. John G. Sutton Co.....	6,280
7. Baite Eng. & Elec. Co.....	5,737
8. McFell Elec. Co.....	6,695

Vacuum Cleaning System Girls' High School.

1. Jos. Thibien & Co.....	\$3,196
2. Pneumatic Co.....	3,080
3. H. W. Mott & Co.....	2,790.50
4. Waterhouse & Price.....	4,313

Hardware Lowell High School.

1. Palace Hardware Co.....	\$2,973
2. Bennett Bros.....	2,912
3. Jaost Bros.....	3,118

Heating and Ventilating Girls' High School—Four Propositions.

1. Pacific Fire Ext. Co. (1) \$33,995;	
(2) \$33,825; (3) \$—; (4) \$33,785	
2. Abrahamson & de Gier (1) \$29,973;	
(2) \$29,812; (3) \$29,973; (4) \$28,483;	
3. Wales (H. W. Moffatt) (1) \$39,860;	
(2) \$39,254.50; (3) \$35,410.50 (4) \$38,199.25	

4. Whitman, Lyman Co. (1) \$33,800;	
(2) \$32,540; (3) \$—; (4) \$33,849.	
5. Atlas Heating & Ventilating Co. (1) \$37,187; (2) \$37,187 (3) \$—; (4) \$—	
6. John G. Sutton Co. (1) \$36,180; (2) \$36,270; (3) \$—; (4) \$36,220.	
7. Robt. Dubzai Jr. Co. (1) \$37,247; (2) \$37,087; (3) \$—; (4) \$37,037.	

HARBOR BIDS OPENED.

Bids for Union Street Pier Taken Under Advertisment. Cement Bids Rejected. Oil Contract Awarded.

Bids opened by the State Board of Harbor Commissioners for construction of the Union Street Pier show the Healy-Thibbitts Company low on the first three propositions submitted and tie with the Ross Construction Company on the fourth proposition. A complete list of the bidders and their figures follows:

1. Healy-Thibbitts Co. (a) \$267,400; (b) \$232,400; (c) \$262,400; (d) \$229,000.	
2. Thompson Bridge Co. (a) \$312,452; (b) \$282,286; (c) \$206,397; (d) \$276,563	
3. San Francisco Bridge Co. (a) \$283,600; (b) \$256,600; (c) \$283,200; (d) \$252,200	
4. C. O. Dahl Co. (a) \$298,798; (b) \$264,372; (c) \$294,495; (d) \$259,594.	
5. Ross Constr. Co. (a) \$268,862; (b) \$233,632; (c) \$267,000; (d) \$229,000.	
6. Grant Fire (a) \$290,000; (b) \$251,000; (c) \$232,000; (d) \$243,000.	

7. Mercer-Fraser Co. (a) \$317,233 (b) \$283,882; (c) \$312,000; (d) \$278,650.

All bids for furnishing the State Board with cement were rejected and will be readvertised. The contract for furnishing oil was awarded to the Associated Oil and the Standard Oil their two bids being the same.

No contract was let for the construction of the Union Street Pier and figures were taken under advisement until the next meeting of the Board. A contract will probably be let for the work next Monday or Tuesday.

Contracts Awarded.

Warehouse—2 story and base, mill construction. Cost not stated. San Francisco. Architect, G. Albert Lansburgh, M. A., Gunst Bldg., S. F. Owner, H. Levi & Co. Contractors, C. P. Moore Building Co., Monadnock Bldg., S. F. Contract price not stated.

once and under the direction of the owners and not by the bonding company, as has been reported. This is work abandoned some time ago by Contractor H. C. Farley, formerly of the Monadnock Bldg., S. F. E. E. Mannheim of Fresno is the acting head of the Fresno Hotel Co., and authorizes the above statement.

Hotel Additions—3 story, brick construction, \$30,000. Fresno, Fresno Co., Cal. Architect, Benj. G. McDougall. Sheldon Bldg., S. F. Owners, Blasingame Estate. This work has been mentioned in these columns before and at that time it was stated that the work would be done by Day Labor. The plans have been completed, and the architect has been instructed to take figures on the construction and to let a general contract.

Stores and Offices—2 story and base, brick, \$13,500. Reedley, Fresno Co., Cal. Architects, Starbuck & Clark, Fresno. Owner, H. F. Winnes, Reedley. The building will be erected in the center of the business district. There will be several stores on the first floor and modern offices on the second floor. The trim throughout will be of pine. There will be large plate glass display windows. The exterior of the building will be faced with pressed brick and artificial stone. The plans are complete and figures are being taken.

Lodge Hall—2 story and base, brick and steel, \$75,000. Fresno, Fresno Co., Cal. Architects, Starbuck & Clark, Fresno. Owners, Fresno Eagles' Hall Association. The building will be 75x115 feet. There will be stores on the first floor, social rooms, lodge hall and offices for the order on the upper floors. The roof will be arranged for a dance floor and open air stage. The exterior of the building will be faced with terra cotta and brick. The plans are being prepared and construction will be undertaken shortly.

Contracts Awarded.

Roundhouse—1 story, reinforced concrete, \$10,000. Riverbank, Stanislaus Co., Cal. Engineering Dept. Santa Fe System, Topeka, Kan. Owners, Santa Fe Railroad Co., Contractors, Van Sant-Houghton, Balboa Bldg., S. F. Contract price, \$10,000.

School—1 story and base, concrete and frame, \$20,000. Wasco, Kern Co., Cal. Architect not given. Owners, Wasco School District. Contractor, Oscar Paller, Tulare, general construction. Contract price, \$13,369. Machinery and Electric Co., L. A., heating and ventilating. S. Rosenthal, Tulare, blackboards.

Hydro-Electric Plant—\$10,000,000. Engineering Dept. Pacific Light and Power Co., L. A. Owners Pacific Light and Power Co. Contractors Stone & Webster, White Bldg., Seattle. Contract price, \$10,000,000. This company

has recently been awarded the contract for the largest power unit in the world. The work will embrace the complete construction of a power plant capable of generating 150,000 horsepower and distributing stations throughout the San Joaquin Valley. The contractors already have a large force of draughtsmen at work and will shortly put a crew of 300 construction men in the field.

LOS ANGELES AND SOUTHERN CALIFORNIA.

Apartment House—3 story and base, frame. Cost not stated. Los Angeles, Cal. Architect, Clyde Cheney, Story Bldg., L. A. Owners, Mr. and Mrs. O'Keefe. The building will be 46x108, and will contain 42 rooms arranged in 18 apartments, all with connecting baths. There will be steam heat and wall beds and electric cooking apparatus. The exterior of the building will be covered with cement plaster. Plans are being prepared.

Apartment House—2 story and base, frame. Cost not stated. San Bernardino, Cal. Architect, Van Tress, Citizens' National Bank Bldg., L. A. Owner, J. W. Barton. The building will contain twelve rooms, arranged in four three-room suites and baths. There will be wall beds and gas water heaters. The exterior of the building will be covered with shakes. The plans are being prepared.

Apartment House—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, Robert M. Cassidy, 914 West 11th St., L. A. The building will contain in the neighborhood of forty rooms, arranged in two, three and four room suites with connecting baths. There will be steam heat, elevators and wall beds. The exterior of the building will probably be faced with pressed brick. The plans are only in the preliminary stage.

Apartment House—1 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, Fernand Parmentier, Verne Bldg., L. A. Owner, J. E. Murray. The building will cover an area of 60x90 feet, and will contain 90 apartments, divided into two and three room apartments. There will be connecting baths, steam heat, wall beds, elevators and a vacuum cleaning system. The exterior of the building will be faced with pressed brick. The plans are being prepared.

Apartment House—2 story and base, frame. Cost not stated. Los Angeles, Cal. Architect, T. Franklin Power, Higgins Bldg., L. A. Owner, Thomas F. Keating. The building will contain one eight-room and three three-room apartments. There will be furnace heat

and wall beds. The exterior of the building will be covered with shingles. The plans are complete and the work will be done by Day Labor.

Apartment Houses—2 story and base, frame, \$25,000. Los Angeles, Cal. Architect, Lawrence B. Burck, 142 South Spring St., L. A. Owner, same. The building will be 50x125, and will contain 75 rooms, arranged in suites of two, three and four rooms each with baths. There will be wall beds, steam heat and a vacuum cleaning system. The exterior of the building will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Church—1 story and base, frame. Cost not stated. Los Angeles, Cal. Architect, C. C. Rittenhouse, Wilcox Bldg., L. A. Owners Knox Presbyterian Church. The building will be 62x48, and will contain a main auditorium, sixteen class rooms, social rooms and furnace room. The exterior of the building will be covered with artificial stone veneer. The plans are being prepared.

Church—2 story and base, brick, \$40,000. Santa Barbara, Santa Barbara Co., Cal. Architects, Frohman & Martin, Slavin Bldg., Pasadena. Owners, Trinity Church of Santa Barbara. The revised plans for this work have been completed and will go out for figures next week. There will be a central heating system. The cost does not include the art glass windows. The exterior of the building will be faced with cement plaster. The roof will be of clay tile.

Church—2 story and base, frame, \$35,000. Los Angeles, Cal. Architect, E. E. Meinardus, Higgins Bldg., L. A. Owners, Lutheran Evangelical Congregation. This work has been mentioned here several times before. The committee has now decided to reduce the cost of the structure to \$25,000, which will necessitate the change of the construction from brick to frame. The new plans are being prepared.

Warehouse—5 or 6 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architect, W. J. Saunders, Wright and Callender Bldg., L. A. Owner, F. W. Braunn. The building will cover an area of approximately 100x200 feet, and will be entirely of reinforced concrete. There will be the cantilever system of floor construction. There will be two large elevators, sidewalk elevators, two box chutes, metal trim and a sprinkler system. The exterior will be faced with cement plaster. The plans are complete and bids are being taken for both the five and six story building.

Warehouse—5 story and base, reinforced concrete, \$35,000. Los Angeles, Cal. Architect, A. C. Martin, Higgins Bldg., L. A. Owners, Peck and Hillis. This work has been mentioned here before when the drawings were being prepared. Bids are now being taken on the work and a general contract will be let at once.

School Annex—1 story and base frame. Cost not stated. Los Angeles, Cal. Architect, W. J. Bliesner, Laughlin Bldg., L. A. Owners, City of Los Angeles. The building will be separated from the main building, and will cover an area of 75x106. There will be a auditorium seating 900, four class rooms, library and principal's office. There will be a central heating system. The exterior of the building will be covered with cement plaster. The plans are being prepared.

SEATTLE AND WASHINGTON.

Asylum—2 story and base, brick, \$20,000. Phoenix, Ariz. Architect, Royal W. Lescher, Phoenix. Owners, State of Arizona. The building has been designed for a general administration building and will cover an area of 60x100 feet. The first floor will be given over to the officers of the institution, while the second floor has been arranged for the use of the patients. The exterior will be faced with cement plaster.

Residence—2 story and base, frame, \$12,000. Los Angeles, Cal. Architect, Edward C. Taylor, Consolidated Realty Bldg., L. A. Owner, C. Kirchner. The dwelling will contain twelve rooms and three baths. The interior trim will be of pine and hardwoods with oak floors throughout. There will be open fire places and furnace heat. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Stores—1 story and base, brick, \$8,000. Santa Monica, Los Angeles Co., Cal. Architects, C. C. Cross & Son, 316 Oregon St., Santa Monica. Owner, F. E. Bundy. The building will be 52x60 feet, and will be divided into three stores. The exterior will be faced with pressed brick. The plans are complete and the work will be done by Day Labor.

Stores and Offices—5 story and base, brick and steel. Cost not stated. Long Beach, Los Angeles Co., Cal. Architect, Owner. Owner, Scott W. Alexander, O. T. Johnson Bldg., L. A. The building will be 58x90. The first floor will be divided into stores, and the upper floors will be arranged for modern offices. There will be steam heat and elevator service. The exterior of the building will be faced with pressed brick. The owner is now busy on the working drawings.

Stores and Offices—14 story and base, steel and brick. Cost not stated. Los Angeles, Cal. Architect, Thornton Fitzhugh, Pacific Electric Bldg., L. A. Owner, Harold F. Whitcomb, Consolidated Realty Bldg., L. A. The owner has just secured a long lease on the property upon which this building is to be erected. The preliminary plans only have been prepared and changes may be made in these. The structure will, however, be a Class A building, and, according to the terms of the lease, must be completed by 1915. The exterior will be faced with either pressed brick or terra cotta. Construction will be started in March.

Garage—1 story and base frame. Cost not stated. Stanton, Los Angeles Co., Cal. Architects, Gentry & Schultz, Byrne Bldg., L. A. Owners, Stanton Improvement Co. The building will be 40x60. The exterior will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Garage—1 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owner, Mrs. E. J. Sanborn. The building will be 60x120. A cement floor will cover the entire floor area. The exterior walls will be faced with cement plaster. There will be large gasoline storage tanks. The plans are being prepared.

Library—1 story and base, reinforced concrete, \$25,000. Los Angeles, Cal. Architects, Hunt & Burns, Laughlin Bldg., L. A. Owners, City of Los

Angeles. This work has been mentioned here before when the architects were first commissioned to prepare the plans. The working drawings have been completed and approved by the Library Trustees and forwarded to Mr. Carnegie for final approval. The building will be fire proof throughout with concrete floors and roof. The exterior will be faced with terra cotta. Figures will be called for within one month.

Lodge Hall—3 story and base, brick, \$40,000. Santa Monica, Los Angeles Co., Cal. Architect, H. N. Goetz, 1013 3rd St., Santa Monica. Owners, Santa Monica Elks' Hall Association. The building will contain the lodge rooms of the order, a large social hall, banquet room, library, etc. There will be steam heat and some living apartments. The exterior of the building will be faced with pressed brick. The working drawings are being prepared.

Freight Depot—2 story and base, reinforced concrete, \$100,000. San Diego, Cal. Architectural Dept. Santa Fe, Topeka, Kan. Owners, Santa Fe R. R. Co. The building will be 300x50. The freight shed will be but one story in height, while the part containing the general offices will be a two-story structure. The approved plans have been placed in the hands of the local authorities and bids will be taken at once.

Residence—2 story and base, frame, Cost not stated. Los Angeles, Cal. Architect, W. J. Sirecy, 1 W. Helman Bldg., L. A. Owner, Charles S. McKelvey. The dwelling will contain ten rooms and baths. The interior trim will be of pine and hardwoods. The floors will be of oak throughout. There will be furnace heat and open fire places. The exterior of the dwelling will be covered with shakes. The plans are complete and the work will be done by Day Labor.

Contracts Awarded.

Apartment House—7 story and base, reinforced concrete, \$200,000. Los Angeles, Cal. Architect's name not given. Owner, F. O. Engstrom, Contractors, 5th and Seaton Sts., L. A. Contract price, \$200,000.

Church—1 story and base, frame, \$25,000. San Dimas, Los Angeles Co., Cal. Architect's name not given. Owner, Christian Congregational Church of San Dimas. Contractor, George Ford, San Dimas. Contract price, \$25,000.

Contract price, \$350,000. The contract does not include the installation of the machinery, bids for which are now being taken.

Factory—1 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architect, none. Owner, H. M. Binford, Contractor, V. P. Gilbert, Douglas Bldg., L. A. Contract price not given. Note: Building will be 80x140.

Stores and Offices—6 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architect, none. Owner, H. H. Cotton, L. A. Contractors, Western Building and Investment Co., 303 West 3rd St., L. A. Contract price not stated.

Apartment House Alterations—\$15,000. Seattle, Wash. Architect, Clayton D. Wilson, Arcade Annex Bldg., Seattle. Owner, John Ervine. The work will include the installation of a complete new plumbing system, electric wiring, plumbing and plastering. There will also be exterior alterations and additions. The plans are complete and the work will be started at once.

Wharf—Wood and concrete, \$15,000. Bremerton, Wash. Engineer not selected. Owners, City of Bremerton. C. E. Foss Chairman of the Building Committee. The committee are now securing plans for the construction of a municipal wharf. Bids will be received as soon as plans can be prepared.

Harbor Improvements—\$5,000,000. Seattle, Wash. Engineers not selected. Owners, Bush Terminal Co., Brooklyn N. Y. The Bush Company have secured the Harbor Island property in Elliott Bay and will expend five millions in improvements before 1915. The company intend to erect a large number of warehouses besides several wharves. The construction will be of reinforced concrete throughout. No details of the construction are obtainable as yet.

Temple of Justice—2 story and base. Class A construction, \$250,000. Olympia, Wash. Architects, Wilder & White, New York. (C. H. Bebb, Denny Bldg., Seattle, Advisor.) The plans for the Temple of Justice have been completed and forwarded to Seattle for figures. The bids will be opened at Olympia on February 24th.

Factory Additions—2 story and base, brick, \$50,000. Seattle, Wash. Architects, Blackwell & Baker, Northern Bank Bldg., Seattle. Owners, Washington Shoe Manufacturing Co. The addition will be made to the present four-story building and will be 110x120 feet. There will be five elevators. The plans are complete and the architects are taking figures on the work.

Warehouse—2 story and base, reinforced concrete. Cost not stated. Aberdeen, Wash. Architects, MacNaughton & Raymond, Portland. Owners, Fidelity Investment Co. The building will be 100x120 feet. The exterior walls will be of reinforced concrete faced with cement plaster. The balance of the building will be of mill construction. The plans are complete and figures will be opened for the construction on February 5th.

School—2 story and base, brick and steel, \$80,000. Ellensburg, Wash. Architects, Stephen & Stephen, New York Bldg., Seattle. Owners, City of Ellensburg. This work has been mentioned here several times. The bids for the construction were recently opened and all have been rejected as too high. The lowest figure received for the general construction was \$38,725, and from this the figures run up as high as \$83,000. The plans will be revised and new bids will be called for shortly.

Incinerator Additions—\$12,000. Seattle, Architect, John Graham, Lyon Bldg., Seattle. Owners, E. R. Butterworth & Sons. The work includes the construction of a reception room, receiving tombs, receptacle for urns, etc. The interior will be entirely finished in terra cotta and marble. The plans

are complete and figures are being taken.

Stores and Lofts—3 story and base, brick and steel, \$50,000. Seattle, Wash. Architect, Harlan Thomas, Elfers Bldg., Seattle. Owner, William Thaanum. The building will be 70x90 feet. The first floor will be arranged for a large market, while the upper floors will be divided into lofts. The exterior will be faced with pressed brick. The plans are complete and figures are being taken.

Hotel and Stores—3 story and base, reinforced concrete, \$20,000. Auburn, Wash. Architect, V. W. Voorhees, Ellet Bldg., Seattle. Owner, W. W. Downing. The building will be 36x90 feet, and has been arranged for stores on the first floor and hotel rooms above. There will be a hot water heating system. The exterior of the building will be faced with cement plaster. The plans are complete and figures are to be taken at once.

Yacht Club—2 story and base, reinforced concrete, \$30,000. Tacoma, Wash. Architect, C. F. Lundberg, Tacoma. Owners, Tacoma Yacht Club. The building will contain social rooms, boat house, parlors, dining room, garage and sleeping accommodations for 50 persons. There will be a central heating system. The exterior of the building will be covered with cement plaster. The roof will be of clay tile. Plans are now out for figures.

Lodge Hall—6 story and base, brick and steel, \$150,000. Seattle, Wash. Architect, John Carrigan, Oriental Bldg., Seattle. Owners, ELKS' Hall Association, Seattle. This work has been mentioned here before when the plans were first started. The working drawings are now complete and the architect states that figures will be called for by February 1st. Bids will be asked for on the general construction, plumbing, heating and electric work.

Passenger Depot—1 story and base, reinforced concrete, \$35,000. Aberdeen, Wash. Architectural Dept. Oregon-Washington Railroad and Navigation Co., Seattle. Owners, Oregon-Washington Railroad and Navigation Co. The plans for this building will be ready for figures within the next six weeks. The structure has been designed in the Mission style. The exterior will be faced with cement plaster. There will be a clay tile roof.

Contracts Awarded.

Water System and Pipe Line—\$14,500. Elma, Wash. Engineer Lewis C. Kelsey, Elma. Owners, City of Elma. Contractors, Welton, Kilbee & Cochran, Portland. Contract price, \$14,500.

PORTLAND AND OREGON.

Church and Rectory—2 story and base, stone. Cost not stated. Oregon City, Ore. Architects Whitehouse & Foulhouse, Portland. Owners, St. Paul's Episcopal Church. The architects have just been commissioned to prepare plans for this work and details cannot be given at this time. Work has been started on a large stone retaining wall and when this is completed the construction on the church edifice will be started.

Stores and Apartments—3 story and base, brick. Cost not stated. Portland, Ore. Architect, C. H. Bristow, Portland. Owner, L. E. Sauvie. The building will be 50x80. The first floor will be given over to store purposes, and the upper floors will be arranged for small apartments. There will be steam heat and running water. The exterior will be faced with pressed brick. The plans will be out for figures on January 22nd. A contract will be awarded February 1st.

Fire House—2 story and base, brick, \$15,000. Portland, Ore. Architects, Tokey & Mills, Portland. Owners, City of Portland. The building will be 34x 90 feet and will contain accommodations for two fire companies. The exterior of the building will be faced with pressed brick. There will be special electric apparatus. The plans are being revised and new figures will be taken shortly.

EDITORIAL

Announcement has been made that as soon as the recent State water district law goes into effect at the end of the ninety-day period specified under the referendum legislation, the City of Oakland will proceed with a condemnation suit against the People's Water Company and by this means acquire the city delivery system in Oakland, and also the sources of the company's water supply. The supply across the bay is said not to be much in excess of the City of Oakland's present needs and with the increase of population the sources will soon be taxed to their limit.

The incoming administration under Mayor Rolph is reported to take up negotiations for the purchase of the property of the Spring Valley Water Company and it is intended to bring the matter to an issue for a bond election not later than April, 1912. If this can be done and this city can acquire the Spring Valley plant at a reasonable figure and the cities of Oakland and Alameda can acquire their own water supply then there should be a good many of the obstacles removed for acquiring the Hetch Hetchy supply.

If these private interests can be purchased at a reasonable price, or if failing in that, they can be acquired by condemnation proceedings with reasonable recompense to the owners, then a great good will have been done. As soon as these financial obstacles have been removed the difficulties in securing federal permits will no doubt be lessened. The nature fakers who have been so loud in their denunciation of the spoliation of the natural beauties of Hetch-Hetchy will in all probability be deaf, dumb and blind. As soon as the financial backers of these

obstructionists withdraw their support it will no doubt be surprising why there has been so much delay.

Should all the bay cities desire their supply from the same source it would make the burden easier on San Francisco. They all have a common interest and there is no reason why they should not co-operate and act jointly in securing a water supply from the high Sierras. If we could get together and imitate the example of Los Angeles and secure an inexhaustible water supply it will do more to upbuild the cities and manufacturing about the bay than any other one thing.

There seems to be a feeling of confidence on both sides of the bay that some such thing is going to be effected. It is to be hoped that this feeling is well founded and that at no distant date something definite will be done. It will be some source of gratification at least to the public spirited citizens who have fought so valiantly for years for the city's welfare.

What were known as the Blue Laws of New England were enacted to keep the people in line on religious questions and prevent the violation of the Sabbath in accordance with the stern ideas of the puritan forefathers. These ideas have changed in the main although some of them still remain on the statute books of many of the eastern states, usually dead letters now, until invoked by some religious fanatic upon the head of some innocent transgressor who learns to his sorrow that "ignorance of the law excuses no one."

While these laws have served their day, if they ever had a good reason for existence, there is a present need of some such legislation as has been adopted in Kansas and has received the name of "Sky Blue Laws," because of its purifying influence in ridding the state of a lot of get-rich-quick promoters and stock salesmen who sell stock in mythical enterprises. This law is subject of quite a lengthy description in a recent issue of The Saturday Evening Post. According to its provisions a corporation or agent wishing to sell stock in the State of Kansas must first secure permission from the State Bank Commissioner who is required to make a thorough examination of the company's assets, liabilities, properties and prospects before acting. If he is satisfied that the proposition is legitimate permission is given, if not he refuses the permit and the promoter must fish for suckers somewhere else.

With an honest and capable Bank Commissioner in office the law is said to have already worked wonders in Kansas. Of 550 applications made by stock promoters during the first six months after the law was passed only forty-four were approved. It has been estimated that the people of the State will thus be saved from \$2,000,000 to \$5,000,000 a year.

It would be a good thing if California had a similar law. The vast resources of the state with their marvelous development has made it a rich field for the wildest promoter. Its mines, its oil wells and its orchards and farms have been the means of making men rich over night. With these shining examples to draw from the fake financier has a fertile field for his work and succeeds in parting people from

their savings in the same old way. Such a law would help legitimate business enterprises as it would direct this money into proper channels eventually.

With such a law along with the increased powers which the public utilities act gives the State Railroad Commission in the matter of supervision of stock issues of public service corporations, there would be little chance for the watering of stock of corporations to such an extent as has been done in the past. What an astounding piece of frenzied finance has been unearthed in the investigations into the proceedings of the beef trust! According to the published reports the deal that was attempted in 1902 provided that with a capital of \$187,000,000 was to be raised to \$733,547,000. The 500 million would represent the water in the stock, the promoters' share of the profit. Thus on an investment of 187 million dollars the business would have to pay a profit on more than 773 million. This did not go through on account of financial depression. But it is on all fours with a lot of other mergers that did go through and upon which the people are drawing a rate of interest on money which never went into the enterprise. It has taken the people a score of years to wake up to the situation. But the time is past when these things can be put over on the public and they fight each other on trumped up political platforms while the buccaners of finance grab the whole works.

Building operations for the year 1911 in San Francisco amounted to \$24,431,268, an average of a little more than 2 million a month. December itself shows a little gain over the same month of last year the total being \$1,218,022 as against \$1,169,131 of the previous year. This was divided as follows: Brick and concrete construction, \$601,007; frame, \$532,754; alterations, \$84,261. The past month has been mainly one of small contracts, the larger buildings being let on segregated work.

Altogether the year has made a very good showing. When cities throughout the country representing the building centers have shown a monthly loss the year here has shown a gain of nearly 2 million over the preceding one. Here are the comparative figures:

1911.

January	\$1,242,806
February	1,568,680
March	2,819,727
April	2,139,696
May	2,326,562
June	2,625,740
July	2,126,729
August	1,686,518
September	2,100,658
October	1,928,826
November	2,647,318
December	1,218,022
Total	\$24,431,268

As against these figures are the following for 1910:

1910

January	\$2,273,044
February	2,066,034
March	2,381,909
April	3,383,269
May	2,789,204
June	1,458,464
July	1,596,613
August	1,748,587
September	1,433,797

October	1,772,952
November	805,938
December	1,169,131
Total	\$22,873,942

Outside of the four years embracing 1906, 1907, 1908, 1909, which might be classed as the rebuilding period, the past year has been the greatest of the city's growth. This too when times were apparently very dull. With the last ten years have shown a remarkable amount of building in San Francisco. During the decade permits have been issued amounting to \$268,898,461. And for these years the totals have been as follows

1902	\$14,289,938
1903	14,984,514
1904	16,916,118
1905	20,111,865
1906	32,254,467
1907	50,496,499
1908	35,128,651
1909	30,411,196
1910	22,873,942
1911	24,431,268
Total	\$268,898,461

If the next ten years grow as prospects seem to indicate, this total figure, great as it is for a city the size of San Francisco, will be outstripped in the solid growth and general developments of the years to come.

While the building record of San Francisco shows a substantial increase over last year other statistics make just as substantial, if not a more creditable, showing. As a financial center San Francisco ranks high among the cities of the United States. The bank clearings for the year foot up close to \$2,500,000,000 and show an increase of almost \$100,000,000 over 1910. The shipping business shows this port to rank fifth in the United States with prospects that it will soon take fourth place. The total tonnage of the port amounts to 6,135,276 tons. The imports as recorded by the custom house were valued at \$8,000,000 and the exports at \$59,000,000.

These facts and figures show a substantial basis for the future prosperity of the city and in some degree indicate its possibilities.

The trade with Alaska could be much increased. Exports to that district from this port amounted to \$2,273,799. With the development of this vast mineral and other resources of that territory we should get an increase of trade commensurate with the commanding situation of this port.

Agricultural conditions have of course changed. California no longer produces wheat enough for home consumption. The production of barley has greatly increased, however, the State producing 26,380,000 bushels of this cereal last year. Fruit products have of course greatly increased. The oil fields have poured forth their wealth during the last ten years. While business throughout the country has been quiet last year California and San Francisco have no cause to complain on account of material prosperity.

In a report from the United States Consul general at Sydney, Australia, statistics are given of the old age pensions granted in the antipodean country. According to this statement 16,465 old age pensioners were admitted to the government rolls during the fiscal year 1910-11. Of these 6,154 were

males and 10,311 females. There were also 1,161 admitted as invalid pensions. In that country there were \$2,923 pensioners on June 30, 1911. The expenditures on pensions for the year amounted to \$9,993,775 not including the cost of administration of the pension department.

The act of the government in caring for the aged and infirm in the matter of pensions is along the line of socialism. Here the government pays pensions but only to survivors and dependents of wars, soldiers and sailors, their widows and orphans. Vast sums are expended for this purpose and it has become more or less a political measure.

Strange as it may seem, Australia which was a convict colony, now leads the world in many of its governmental functions. Its cities for instance are governed by people who are best fitted for the office. If a municipal treasurer or an auditor or person of that kind is to be secured an advertisement is placed in the papers and a competitive examination is held. Just now a world wide competition among architects is being held to plan a federal city for the entire commonwealth and it is to be designed for the best interests of the entire country. These things may be socialistic in their tendencies but they look to the common weal.

The Architectural Commission and the Board of Supervisors have signaled the advent of the new administration by adopting the old City Hall site as the civic center. The majority report of the Commission in making their recommendation to the Board stated that their conclusion was based on three permanent considerations. First, of the most practical convenience of the city; second, of the greatest aesthetic possibilities for the City Hall itself and for the monumental buildings to be grouped with it as the civic center; and third, of economy in achieving the best results, both practical and aesthetic. These grounds for recommendation we think to be well taken. One important consideration is to accomplish something and do it without delay.

The minority report favored the site at Van Ness avenue and Market street.

Whatever advantage the latter site may have is more than compensated by the lack of facilities for immediate action. Under the present scheme work can be begun at once looking to the erection of a City Hall. The plan includes the idea of annexing property on Van Ness avenue, Market street and Marshall square, City Hall avenue and possibly Eighth street as far south as Mission street. This should furnish an appropriate site for the monumental buildings to be erected and be the start for the later work of city planning that will finally develop into the city beautiful.

The office of the destruction of the Equitable Life Insurance Building in New York is another demonstration in the cause of fireproof construction. No building is really fireproof unless its structural material and its contents will not burn. And the annual loss of property and lives through this one source is certainly sufficient to make any one sit up and take notice.

THE CORBIN UNIT LOCK-SET

comes with all parts attached just as it will appear on your door. It is as secure and smooth in action as a Safe Lock. IT is found on the finest Office Buildings and Residences in the City. Why not on yours?

Have you considered the Corbin Unit Lock in connection with your new Building or Residence? Look into it. It will pay you

Editorial Comment.

The United States Supreme Court has
sustained the Oklahoma Liability law
abolishing the fellow servant rule with
respect to railroad corporations. The
opinion was written by Justice Mc-
Kenna and the law in question does
away with the former defense to an
action for personal injuries or death
from negligence that it was the fault
of a "fellow servant" for which the
company could not be held responsible.
This decision is understood to apply to
railroads and the same tribunal has
upheld the constitutionality of the Act
of Congress of 1908 with relation to
interstate railroads which does away
with the fellow servant defense.

In the Employer's Liability law of
last year the Legislature of California
abolished the "fellow servant" defense
and also the defense of contributory
negligence which has obtained so long
under the old common law rule. These
acts by the state and federal legisla-
tures have become necessary under the
changed industrial conditions. The
procedures of courts has ever been
slow and encumbered with innumerable
delays. Where corporations employ
thousands of men, where an employee is
injured in the performance of his duty
it is next to impossible to prove a case
of damages under the old common law
rules. If there is a clear case and if the
company elects to fight the case the in-
jured workman would die of old age
before a recovery would be effected.
And the expense would be such that
after his attorney was paid for attend-
ing to the case there would be
nothing left for the injured man. In
the abolishing of these defenses the
State looks to speedy action and some
form of industrial insurance. While the
California law abolishes the defense of
contributory negligence this fact is to be
considered by the jury in the award of
damages which is reasonable and just.
Under the recent decision of the Okla-
homa case there seems to be every
reason to suppose that the California
law is constitutional. So it seems that
even the court of last resort is getting
progressive and taking account of the
changed order of things in relation to
industrial conditions.

The report is that the political labor
leaders of the State are trying to
amalgamate the Union Labor party and
form a new organization. The growth
of the socialistic idea throughout the
world during the last ten years has
been marked and rapid. As a rule a
goodly proportion of the socialists are
students of economic and political
questions and while a good many of
them have warped views of things in
the main their sentiments are right
and they look to the greatest good for
the greatest number.

Like most popular movements the

noisy blatherskite usually attracts the
most attention and the rank and file
of the organization are usually judged
by his utterances. So it is that a
great many people who are intelligent
citizens and sincere in their ad-
vocacy or socialism are judged by the
noisy mouthings of curbstone orators
or the fanatical expressions of such
papers as the Appeal to Reason.

If the socialist organization is to
be a force for good in the State and
the nation, it should be careful to not
allow itself to be captured by design-
ing politicians. Human nature is ever
the same and the methods of the
politician are the same in one party as
another. Men and leaders come and go
but the principle still lives on and if
there is truth and practicability in the
tenets of socialism under present con-
ditions it is of more importance than
temporary success. Truth craved to
earth will rise again. The cause of
labor will ever be present for the great
majority of us are laborers. These
principles should not be sacrificed on
the altar of the political ambition of
any man for Life Culture drags down the
cause with him.

The Steamship Tahiti of the Union
Steamship Company, which sailed Wed-
nesday for the South Seas, is the start
of a new line to trade with Samoa,
New Zealand, Australia and the islands
of the South seas. It is an English
company and the ships that it runs are
ocean liners that rank well among the
ships of the world's merchant marine.
This act of the English company is
said to have awakened the Pacific Mail
and the Oceanic Steamship company to
a sense of their dangers of losing
an important trade and they will
establish competing lines. For a long
time trade in this quarter has languish-
ed, there being no direct line of
steamers from those islands to this
port. Now that a foreign company has
taken the initiative it looks like there
is apt to be a service there that will
many times increase the trade in this
direction.

There is one thing certain, so long
as trade is unfettered there can not be
a monopoly of the sea for a very long
period. As when the Pacific Mail con-
trolled the steamship line to Panama
there was little traffic by sea and that
was unprofitable. As soon as rebating
by rail road was stopped in a great
measure by the government and a real
competitor appeared on the scene for
the sea trade conditions instantly
changed. The traffic by the way of
Panama increased many fold. Facts
and figures of bookkeeping often
change rapidly when a real competition
appears. It is to be hoped that the
new line between this port and the
south seas will prosper. All is fish
that come to the net and San Fran-
cisco is the natural center for the
world's commerce on the Pacific Coast
of North America.

The Use Of Brick In American Architecture.

Abstracts from a Paper Read by Donn Barber, Architect, before the Twenty-fourth Annual Convention of the National Brick Manufacturers' Assn. Held in Pittsburg, Penn., in Feb. 1910.

Architecture is a comprehensive art, in the sense that nature is comprehensive. It is the material expression of the character of a man and it impresses us as a great whole after the manner of a landscape. Architecture is practical and scientific, but at the same time architecture is art. The anatomy of a building and its geological structure is determined by science, the use and plan of a building is determined by practice. Art it is that clothes a building and makes it impressive through its outward appearance. Architecture manifests an infinite variety of organic forms and color, but it invariably refers all to a common cause. The architect has always had every opportunity for the development of his creative faculties, for through the medium of his mind's work he has the power of transmitting crude materials into beautiful forms. The functions of a true architect would, therefore, seem to be the highest that can be bestowed on any human being. His experiences are far greater than those of an ordinary artist; his field is more extended; his work is more durable, and its uses more widely diffused. It might be well if architects realized more fully these great responsibilities, for what they build must of necessity remain as an achievement or a failure, and once their work is consummated it cannot easily be changed.

Let us now turn to the subject of brickwork.

Until very recently the layman unfamiliar with the affairs of the building world, has had little or no opinion regarding brickwork except, perhaps, to believe it to be an aggregation of clay cubes burned to permanent hardness and possessing as such about as much human interest as the ordinary sheaf of building sand or a handful of wire nails.

It must be admitted that the monotonous and uninteresting methods of brick laying in vogue in this country, even in the immediate past, justifies more or less such public indifference.

Brickwork now, however, seems to be really emerging from what might be termed its "dark ages," and it is interesting to observe that it is rapidly and surely entering upon a real "Renaissance" of its own.

Architecture has already been defined as an art which seeks to harmonize in a building the requirements of utility and beauty. The brickmaker of today should accept this definition of his "platform" in order that he may be able to challenge with his product every other building material to a comparison of merits as measured by such a standard.

First From the point of view of utility, because of its size and the ease with which it can be handled, brick is readily adaptable to every form of construction, both large and small. A good brick can further be made imperishable. We have to admit that the ultimate test of everything in this world is "Time." After centuries of

competition from every other kind of building material that man has been able to discover or invent, brick stands today where other materials have fallen. The earliest records of man have been found inscribed on tablets of burned clay, where everything around them has crumbled to dust. Brick has far greater crushing strength than it can ever be called upon to develop, and furthermore, it is fireproof. Well burned brick never needs to be painted and seldom requires repainting. Possessing, as it does in the highest degree, these essential requirements of utility, brick is at the same time one of the cheapest building materials in existence.

Considered from the point of view of beauty, brick would seem to occupy a unique position among the structural materials available for the creation of beautiful buildings. Further analysis discloses, among others, the following interesting points:

Brick is made in reasonably small units, so that in the case of many modern buildings, at least one hundred thousand of them show on the exterior. This, together with the varying shapes and sizes now obtainable, make possible an almost infinite variety of form and pattern thus giving full scope to the imagination, ingenuity and skill both of the designer and of the workman.

Brick, moreover, is now made in almost every conceivable color and shade, the permanency of which is unequaled by hardly any other building material; with such a "palette," therefore, at one's command, and by a skillful use of color, the brickbuilder of today can readily add to his design that living touch which the painter gives to his painting.

Brick may also be counted unique in the fact that it requires for its structural efficiency the use of a very considerable amount of material of quite another kind and color, namely, mortar, and further that this material must of necessity show in the form of a joint to a more or less degree in the face of the finished wall. A mistaken idea has prevailed that the mortar joint is a blemish that should be suppressed as far as possible, or be colored to match the brick. We find, however, that the designer of today seizes the very opportunity afforded by a mortar joint to introduce into his wall another element of color and pattern.

The word "texture" has lately come into use in connection with brickwork, and strange as it may seem, the word has a very plausible application; for the builder of interesting brickwork has much in common with the weaver at the loom as far as resulting color effects go. Just as the weaver, with his threads of varying shades and colors, produces a never ending variety of useful and beautiful fabrics, just so it is possible for the brickbuilder, with his bricks and joints of many colors and sizes, to weave new ideas and combinations into his work, all in beauti-

ful and imperishable patterns; and this applies to all brick.

Just as the fabric charms and delights the eye and at the same time protects man from heat and cold, and performs a thousand other functions, so the beautiful wall of brick, exemplifying man's ingenuity and his artistic skill, forms also the protective structure of the buildings erected for his use. Brick, therefore, would seem to fulfill to a very high degree the requirements of an ideal architectural material.

The modern brickmaker should strive to make his material the most economical so that the architect can do his part to make it the most beautiful, the most useful and the most permanent. It is interesting to note that the architect of today continues to avail himself of the same material that served his forefather craftsmen so well in the temples and palaces of Assyria and Persia, and the hanging gardens of Babylon.

In view of its general use throughout the ages it seems strange that we moderns do not look upon brick as one of our most usable resources. To be sure, we have used brick with more or less fluency in this country for walls, for pavements and in some modest degree for decorations, but it is only within the last ten years that we see brick creating a real place of its own in our American architecture. What has already been accomplished indicates plainly what can be done when brick is used in a proper way, and from the point of view of its own peculiar charm and character. The development and perfection of the characteristic traits of a brick style would seem to be now only a matter of time and opportunity.

Looking for a moment to our history of ancient brickwork, we find Northern Italy, where clay abounds and where stone is scarce, that the Italian builders have developed a remarkable love for their work, particularly in the use of brick and terra cotta. The French availed themselves quite freely of the use of brick for the pattern work of their Normandy manor houses and for the charming wall surfaces of their chateaux. We also find that the Dutch have built up for themselves a charming architecture both for the city and country, in brick and terra cotta; and that finally we find that the English have brought all the good, sensible, homely character of the true use of brick in their very delightful country houses. Each of these people mentioned has impressed its personal and characteristic stamp and form on the brick architecture which it has perfected. Each has, moreover, received a due reward for its labors in producing notable variations of its own, in type of architecture, differing widely perhaps, in spirit, from those of the eastern nations, but based usually on the better traditions of older work. We, as moderns, are now free to appreciate the best of all that is past to an architect-

ture which will suit our own present day needs and purposes.

In the history of art we find that each successive family of artisans takes from the common stock of antiquity that which it can devise and use, bringing to the working over of the old forms, a new and ever human interest and seemingly a real expression of a new life and style.

It is, therefore, of inestimable value to have continually before us for study, the cultivated field of European and Oriental brickwork available today in book and picture form, and to seek the inspiration that comes from a thoughtful appreciation of what true artists in clay have already produced. The first important step to be taken is to be absolutely sure that we are using bricks in ways appropriate to their peculiar and individual qualities. We can then proceed with confidence in our ultimate ability to build up interesting and beautiful worthwhile walls.

In our American cities no brick that we can find can be said to be very old or very impressive; the weather has invariably worked into the poor mortar of the earlier work, causing ruins which seem to lack that something of dignity we find so common in the antiquity of Europe. We have, strictly speaking, no real brick past in America to draw on for precedent. As for new ideas and combinations, it would certainly seem to be inevitable that every possible motive had been exhausted by the ancients who were not only limited strictly to the use of burnt clay, but were instinctive artists in the production of extraordinary patterns and color. Old forms, however, can be readily adapted to our own use, and with study and intelligent handling can be made to take on a new, interesting, and quite natural look.

Brick architecture would seem today to open up to us vistas of new and hitherto unthought-of problems of possible wall surfaces that can be made appropriate and beautiful both for our city streets or country lawns. Houses, terraces, pavilions and pavements in brick can logically and acceptably be made to become part of their natural setting. The gradual expansion of our artistic life must of necessity bring to the competent designer an opportunity to lavish on brickwork his greatest skill. Brick forms, as we use them, more and more for some reason or other, to become very companionable and comfortable. Whether the bricks themselves be the long Roman shapes of the Baths and the Pantheon, the smooth gray brick of China, or the great flat slabs of the city wall of Mandalay, whether the jointing employed is a hair crack or the deep mortar beds that exceed the thickness of the clay, wherever the inspiration comes from they are still brick walls, mellowed it may be by centuries of exposure or built from a burning of a few months ago. The weather of a thousand years may have eaten out the joints, or the tucking tool may have raked them out; it is the resulting effect that must surely interest us primarily, for individual brick patterns can be made today to show a bond that will compare favorably with those of the ancient examples in Europe.

In the hands of those who really love its use, the resources of brick as an

artistic possibility are limitless. Given a single color and size and the freedom to lay the brick in patterns, with vertical and header courses, and corners to make diagonal flutes, raised or sunken bands or panels, the wall so built becomes an inspiring study; the surface calm in the direct light seizes our attention with unexpected interest as the sun's rays change, every elevation and depression is gradually brought into delicate relief. Another shade of the same color brick may be added to make the wall less dependent on the direction of the light and capable of almost infinite variations and play of surface. We may even add bricks of another color altogether, and set tiles into the walls, thus accentuating our hands of perceptible contrasts, bringing out all imaginable play in panels over the wall surface and creating all at once that indispensable wall texture which counts for so much in the general aspect of the building.

Brick in varying colors with the added liberty of surface manipulation and bond, really becomes for the designer in brick the painter's palette of pigments, for just as the painter mixes his colors or uses them in juxtaposition either for harmony of arrangement, or for brilliant contrast, just so can we use in an infinite variety of effects multi-colored brick and mortar joints for the painting of our building picture.

To appreciate the elemental qualities of brick we must, as has already been said, use them where they appear at their best. Whatever the similarity or difference of the neighboring material, brick must be used in ways appropriate to its scale and its intractable nature. Its limitations are both evident and inevitable. Brick should be used on broad wall surfaces and panels, slight offsets and flutes.

Within the last few years, architects have come gradually into the use of many new shapes and colors of brick and what is of greater consequence, they have arrived at better ways of laying them, suggested partly by the careful study of the older and sturdier work, and partly by their own inventive genius.

Embarrassed by the sudden wealth of materials at their disposal, they only fear that they may not have opportunities enough to fully exploit the resources now offered. Good bricks in many colors have been manufactured for some time, and satisfactory results have been obtained with their use in association with stone and terra cotta. In general, however, brickwork has played only a secondary part and the building has been made to depend almost entirely on the character of the so-called stone framework—the laying has been regular, the joints small, the wall surfaces smooth and unvarying, forming only the real background for the real architectural display.

In America, brick and terra cotta have always been much used together, the latter imperfectly filling a place midway between brick and stone, often out of scale with both, the pieces too large for the brick and too small for the stone. Some of the accepted functions of terra cotta can now be performed by moulded bricks, in forms a little larger than the wall bricks, for bands of ornament and mouldings, or as individual units of ornamental panels, through which the wall joints run, insuring a complete unity of color

texture and scale with the other parts of the wall.

In the combination of its simple, honest qualities, brickwork serves the cause of artifice as it brings to the builder the assurance of sturdy resistance as compared to the shapeless forms of dough-like materials—such as concrete and stucco. There is less temptation and no less danger, of falling into the eccentric and the Art Nouveau when using well laid bricks. Many sins, of course, have been committed in the use of all materials. But brick can be said to be a reasonably safe material to start with.

Bricks call for strong and idiomatic handling, and the present generation of designers has but just commenced to enter upon its study. While very many edifying examples of detail are well known to exist, only a very few good buildings composed completely of brick and terra cotta could have been found in our cities before the present time; even now their number is small, for good designs adapted to a newly used material develops but slowly.

The use of pattern, jointing and bond which can be successfully accomplished by any and all kinds of brick work, however, is found to interest and educate the people in brick construction and therefore, it should steadily increase the use of brick in future. No manufacturer, whether he makes a pressed brick, wire-cut brick, rough texture or common brick, can fail to share in the coming benefit. The wooden house must inevitably go. Already it has been fully demonstrated by actual and reliable figures that the cost of the averaged sized house in brick is only 5 per cent to 6 per cent more than the same house built of wood.

The use of brick in architecture presents to us a rapidly developing field of endeavor which is bound to grow as people come to realize more and more its advantages and common sense adaptability.

Finally it makes very little difference just what we do in architecture, but it makes all the difference in the world how we do it. With good bricks and good bricklayers available, the architects of today can surely be counted on to do their best in finding a way of producing an indigenous brick architecture which will become one of the most important branches of our great architectural scheme that is being developed and perfected in this broad land of ours.

BUILDING OPERATIONS FOR THE UNITED STATES.

Comparative Figures for December and the Year 1911.

Building operations for the month of December show a decrease of something like 16 per cent in the main building centers throughout the United States. From fifty-five of these cities reporting to the American Contractor, Chicago, a general decrease is noted although it made up to a great extent of losses in two cities. One of these is Chicago, which enacted a new building law which went into effect in January, 1911, and which limited the height of buildings in the downtown district. As a consequence there was a rush to secure permits before the end of December, 1910, with the result that the total for that month amounted

to over twelve million dollars.

Portland, Oregon, and some of the minor cities also showed large totals for December, 1910 with the result that the rather quiet month of 1911 lagged behind in the aggregate. The following table gives the figures:

City.	December 1911.		December 1910.	
	Cost.		Cost.	
Atlanta	321,671	\$	650,658	
Baltimore	702,810		394,625	
Birmingham	192,277		299,460	
Bridgeport	152,000		77,575	
Buffalo	1,394,000		488,000	
Cambridge	182,175		80,650	
Chicago	6,805,300		12,287,900	
Cedar Rapids	252,000		800,000	
Cincinnati	694,560		333,145	
Cleveland	2,326,800		715,955	
Columbus	129,657		481,819	
Dallas	165,710		371,728	
Denver	370,150		439,215	
Detroit	1,082,700		1,480,155	
Indianapolis	97,010		155,375	
Evansville	75,225		94,353	
Grand Rapids	117,522		111,210	
Hartford	206,120		245,530	
Indianapolis	759,418		559,600	
Kansas City	126,061		1,005,320	
Los Angeles	1,421,525		1,472,791	
Louisville	222,720		152,760	
Manchester	58,715		78,100	
Memphis	215,000		460,425	
Milwaukee	734,659		196,173	
Minneapolis	490,225		575,230	
Nashville	33,952		35,325	
Newark	814,124		2,482,701	
New Haven	257,320		91,320	
Manhattan	7,198,121		7,115,977	
Brooklyn	2,617,919		1,988,888	
Bronx	2,180,230		870,950	
New York	11,977,469		10,035,815	
Oakland	157,339		420,612	
Oklahoma City	146,855		206,710	
Omaha	164,000		110,850	
Paterson	128,113		73,813	
Pittsburg	867,419		638,264	
Portland, Ore.	1,293,526		4,720,420	
Rochester	696,095		325,815	
St. Louis	635,408		826,879	
Salt Lake City	35,600		240,300	
San Francisco	1,238,022		1,169,131	
Scranton	327,325		116,250	
Seattle	326,890		752,530	
Spokane	71,080		124,650	
Tacoma	88,265		111,793	
Toledo	111,757		824,171	
Wilkes Barre	126,598		165,873	
Worcester	287,017		218,176	
Total	\$329,755,808		\$45,824,163	

It will be noted that all the cities of the Pacific Coast showed slight decreases except San Francisco and Oakland. This is perhaps due to the fact that December, 1910, was rather a quiet month for these two cities on San Francisco Bay and the month just past was a little better in comparison.

Comparatively speaking the year 1911 has averaged up in about the same proportion as the month of December. The year has been comparatively quiet and the aggregate loss for the twelve months is about the same percentage as for the last month of the year. New York and Chicago respectively fell off 20 and 19 million dollars. Duluth, the Zenith city of the Unsettled States, recorded a permit for a steel plant in 1910 which amounted to ten million dollars. The following figures show the year's totals:

City.	1911.		1910.	
	Cost.		Cost.	
Atlanta	\$ 6,215,900		\$ 7,405,590	
Baltimore	9,225,833		9,798,312	
Birmingham	3,554,157		3,524,035	
Bridgeport	2,428,552		2,267,488	
Buffalo	10,361,000		9,222,000	
Cambridge	2,805,525		2,644,125	
Chicago	165,269,700		96,932,700	
Cedar Rapids	2,021,450		2,685,050	
Cincinnati	12,184,925		8,048,010	
Cleveland	16,991,677		13,948,413	
Columbus	4,668,242		5,124,828	
Dallas	5,522,373		4,199,040	
Denver	6,084,260		11,319,955	
Detroit	19,012,659		17,515,915	
Duluth	2,563,328		13,311,264	
Evansville	2,606,966		1,317,010	
Grand Rapids	2,508,714		2,255,621	
Hartford	5,896,244		4,541,979	
Indianapolis	8,349,477		8,194,311	
Kansas City	13,310,791		12,783,169	
Los Angeles	23,004,185		21,684,190	
Louisville	8,951,123		3,690,022	
Manchester	1,180,810		1,334,530	
Memphis	5,839,116		6,290,497	
Milwaukee	12,336,098		9,797,581	
Minneapolis	13,735,285		14,363,830	
Nashville	1,269,609		1,623,796	
Newark	10,975,324		13,394,812	
New Haven	5,868,519		4,336,065	
Manhattan	111,290,408		108,643,095	
Brooklyn	37,711,967		39,736,810	
Bronx	21,413,397		45,432,530	
New York	172,411,782		192,872,465	
Oakland	7,118,197		7,075,635	
Oklahoma City	2,828,156		5,492,230	
Omaha	5,426,863		6,250,988	
Paterson	2,263,597		2,199,756	
Pittsburg	11,706,898		12,790,599	
Portland, Ore.	17,419,090		19,766,998	
Rochester	9,389,775		10,082,528	
St. Louis	18,607,555		19,600,063	
Salt Lake City	3,159,600		4,461,100	
San Francisco	24,311,268		22,578,842	
Scranton	1,753,570		2,085,948	
Seattle	7,491,170		17,162,080	
Spokane	3,211,780		5,832,184	
Tacoma	1,707,641		2,685,051	
Toledo	3,722,536		3,953,622	
Wilkes Barre	2,104,277		2,052,180	
Worcester	5,022,985		4,304,207	
Total	\$626,787,892		\$556,013,943	

San Francisco, Los Angeles and Oakland all show gains for the year, while the other Pacific Coast cities indicate a decrease.

Generally speaking the year has been a pretty fair one for San Francisco.

Outside of the four years embracing 1906, 1907, 1908, 1909, which might be classed as the rebuilding period, the past year has been the greatest of the city's growth. This too, when times were apparently very dull. With all the last ten years have shown a remarkable amount of building in San Francisco. During the decade permits have been issued and contracts recorded amounting to \$268,598,461. And for these years the totals have been as follows:

1902	\$11,259,938
1903	14,984,514
1904	16,916,118
1905	20,111,868
1906	33,251,467
1907	50,196,499
1908	33,128,651
1909	30,111,196
1910	28,872,942
1911	24,421,268
Total	\$268,598,461

If the next ten years grow as pros-

pects seem to indicate, this total figure, great as it is for a city the size of San Francisco, will be outstripped in the solid growth and general developments of the years to come.

"SQUIRT GUN" CONSTRUCTION.

Constructing Quartermasters' Report Success With The New Plastering Machine.

The army quartermasters, who have to do with the various types of construction at military posts, are gratified over the results of the methods adopted for the buildings at San Francisco artillery post at Presidio of San Francisco, at Fort Ruger, Hawaiian Islands, and at Fort Sam Houston, Tex. This is the application of cement plaster by means of the "s squirt gun" or cement gun by the use of compressed air. A sample of the material has been received at the office of the quartermaster general and is found to have the appearance and durability of granite, at the same time capable of acquiring the polish of that stone. It is considered that the practical test of this type of construction at Fort Ruger in the barracks and officers' quarters at that post justifies the adoption of the method, not only at Fort Sam Houston, where the project is under way, but at the new concentrated post at Schofield Barracks, in the Hawaiian Islands. If the army quartermasters are to have charge of the construction on the Canal Zone, this type will probably be used there, but that project may be turned over to the canal commissioners. The machinery for the manufacture of the material and its application has been sent to the Philippines, where the cement will be used on steel frames instead of wood, thereby preventing the devastations by the insects.

ARMY CONSTRUCTION IN PANAMA.

Now that the War Department has settled the question of the construction of barracks and quarters and other edifices at the concentrated post at Schofield Barracks, Hawaiian Islands, the military authorities are likely to take up the problem of construction on the Canal Zone. This is a subject to which has been given much attention by the Army quartermasters. No definite conclusion has been reached, although several plans have been drafted. The first step in military personnel which will form the defensive force along the line of the canal. There has been some indication of the intention of the military authorities in that direction, mainly in the hearings which have been held before the House appropriations committee and the House military committee. General Wood has explained to the legislators what he believes would be an adequate force for the purposes in the Canal Zone, but before the plans for construction are approved it will be necessary to positively determine the composition of the garrison, as was done in the case of the troops which will ultimately occupy the Hawaiian Islands. It will be necessary to erect some new structures, and there will be great care exercised in the selection of the sites of the buildings. The type of building will be of special design, probably of concrete, and adapted to the tropical situation, with plenty of porch room

and all the architectural accessories which are conducive to health in that section.

BIG HARBOR IMPROVEMENTS.

The Diario Oficial, of Brazil, announces that tenders will be opened on April 18, 1912, at the office of the Ministerio da Viação e Obras Publicas, Rio de Janeiro, Brazil, for the carrying out of extensive harbor works at Paranaguá, State of Paraná. This work will include the construction of wharves, warehouses and administration buildings, dock railway lines, reinforced concrete bridge, paving works and kindred projects. The cost of the contemplated improvements is estimated at about \$1,500,000. A deposit of about \$16,000 is required to qualify any tender, and this amount will have to be doubled by the successful tenderer on the award of the contract. The work must be completed in four years after the signing of the contract. It is stated that it will be necessary for foreign contractors who desire to compete in the bidding to have duly qualified agents in Brazil, possessing full powers for the carrying on of the enterprise. Local representation is necessary for the tenderers.

Illustrations for the Week.

Architect Italo Zanolini, 604 Montgomery street, has completed the plans for the Italian Civic building for Casa Coloniale Italiana Fugazzi, the design of which was awarded to Architect Zanolini in competition with several other architects of this city. The building will be a three-story brick and steel structure located on the north line of Green street 70 feet east of Powell on a lot 43x125 feet. The design has been executed in the true Italian Renaissance with the street elevation faced with granite, pressed brick and terra cotta. Particular attention has been given to the detail of the cornice and other ornamental work with the result that the building will be a decided architectural addition to the city. The basement will contain a large conference room and the mechanical equipment. The main floor has been given over to an assembly room 125x75 feet, a foyer, elaborately finished entrance, refreshment room and elevator space. The entrance will be finished in marble, mosaics and terrazzo. The assembly room will extend through the second floor and will be arranged with balconies at both sides and one end. The second floor will also contain handsomely finished apartments for the Italian Consul and a large society room. The third floor has been arranged for the use of the Italian Chamber of Commerce and the Dante Alighieri Association. There will also be one large society room on this floor. The attic floor space has been divided into living quarters for the janitor and smaller society rooms. The main assembly room will be lighted by a large skylight in the center. Bids for the construction will be received at the office of the architect until 1 o'clock p. m. on January 30th.

Firms desiring news on special classes of buildings such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

San Francisco—Apartment house, 1 story and base, frame, \$12,000. Architect, Charles J. Rousseau. Mendocino Bldg., S. F. Owner, Albert Broetbauer. The building will contain thirty rooms besides the baths. The rooms will be arranged in suites of 4 rooms each. There will be a central heating plant and wall beds. There will be some hardwood floors. The exterior of the apartment house will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

San Francisco—Apartment house, 2 story and base, frame, \$20,000. Architect, S. Heiman, 127 Montgomery St., S. F. Owner, Minnie Tonn, 314 Clay St., S. F. The building will be 39x114, and will contain 26 apartments arranged in suites of two, three and four rooms each with bath. There will be steam heat and wall beds. The floors in some of the rooms will be of oak. The exterior of the building will be covered with cement plaster on metal lath. The architect is preparing the working drawings.

San Francisco—Apartment house, 3 story and base, reinforced concrete, \$20,000. Architect, Earl B. Scott. Humboldt Bank Bldg., S. F. Owner, Edward Swift. The building will contain twelve apartments of two and three rooms with connecting baths. There will be steam heat and wall beds. There will be considerable tile used in the bath rooms. The exterior of the building will be faced with cement plaster. The plans for this work are complete and the architect is now taking figures on the construction.

San Francisco—Apartment house, 2 story and base, frame, \$15,000. Architects, Fabre & Bearwald, Metropolis Bank Bldg., S. F. Owner's name withheld. The building will be erected on Van Ness Avenue. There will be a large number of two and three room apartments all arranged with private entrance hall and connecting bath. There will be a central heating plant. The bed rooms will be fitted with wall beds. The exterior of the building will be covered with shiplap. The architects are taking figures on the work.

San Francisco—Apartment house alterations. Cost not stated. Architect, Earl B. Scott, Humboldt Bank Bldg., S. F. Owner, Mrs. Proffe. This work has been mentioned here before. The work will consist of the alteration of four large frame residences into a modern apartment house. The plans are now complete and the architect is taking figures on the work.

San Francisco—Apartment house, 2 story and base, frame, \$15,000. Architects, Fabre & Bearwald, Metropolis Bank Bldg., S. F. Owner's name withheld. The building will contain twelve apartments of three and four rooms each with bath. There will be steam heat and wall beds. The interior of the building will be finished in pine with some hardwood floors. The exterior of the building will be covered with shiplap. The plans are complete and figures are being taken.

Oakland, Cal.—Apartment house, 1

story and base, brick and steel, \$75,000. Architect, A. L. Haley, Higgins Bldg., L. A. Owner, J. W. Owen. The building will contain 112 rooms arranged in suites of two rooms each with baths or 1 sleeping rooms. There will be steam heat, automatic passenger and a freight elevator, a vacuum cleaning system, refrigerating plant and wall beds. The exterior of the building will be faced with pressed brick and terra cotta. The working drawings are nearly complete.

Los Angeles, Cal.—Apartment house, 3 story and base, frame. Cost not stated. Architects, Architectural Designing Co., Grasse Bldg., L. A. Owners, Stanton Bros. The building will contain 90 rooms, divided in two and three room apartments with private baths, wall beds and other conveniences. There will be steam heat. The exterior of the building will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Los Angeles, Cal.—Apartment house, 3 story and base, brick and steel. Cost not stated. Architect E. J. Borgmeyer, Stimson Bldg., L. A. Owner, Dr. J. T. Miller. The building will cover an area of 50x128 feet, and will contain 66 rooms arranged in two and three room suites with connecting baths. There will be steam heat, vacuum cleaning plant, wall beds and elevator service. The exterior of the structure will be faced with pressed brick. The plans are now being revised and figures will be called for shortly.

Los Angeles, Cal.—Apartment house, 3 story and base, brick and steel. Cost not stated. Architect, A. L. Haley, Higgins Bldg., L. A. Owner, R. L. Horton. The building will contain 27 apartments arranged in suites of two and three rooms each with connecting baths. There will be wall beds, steam heat, a vacuum cleaning system and hardwood interior trim. The exterior of the building will be faced with gray pressed brick. The plans are being prepared and will go out for figures within three weeks.

Los Angeles, Cal.—Apartment house, 1 story and base, brick and steel. Cost not stated. Architects, Train & Williams, Exchange Bldg., L. A. Owner, P. L. Anton. The building will cover an area of 115x119 feet. The interior has been arranged for 63 apartments of the two, three and four room type. There will be steam heat, vacuum cleaning system, wall beds, elevator service and brick interior trim. The exterior of the building will be faced with tapestry brick and flat stone. The architect is now completing the plans.

Placentia, Los Angeles Co., Cal.—Apartment house, 2 story and base, brick. Cost not stated. Architect, Alfred P. Proff, Ex Bldg., L. A. Owner, J. M. Strogan. The building will be 56x72 1/2 feet. The interior has been arranged for 12 two-room apartments besides 12 one-stories which will occupy the first floor. There will be five bath rooms. The exterior of the building will be faced with pressed brick. The plans are complete and figures are being taken.

Los Angeles, Cal.—Apartment house,

3 story and base frame. Cost not stated. Architect, Fred Biren, Broadway Central Bldg., L. A. Owner, T. E. Shoults. The building will be 40x60, and has been arranged for stores on the first floor and four suites on the upper floors. The exterior will be covered with cement plaster on metal lath. The plans are being prepared.

Portland, Ore.—Apartment and stores, 3 story and base, reinforced concrete. Cost not stated. Architects, Tobey & Miers, Portland. Owner, George T. Moore. The building will be 35x25x100. The first floor has been arranged for stores. The upper two floors will contain seven suites of three and four rooms each with connecting bath to the floor. There will be steam heat. The exterior of the building will be faced with cement plaster. The figures are in the hands of the architects and a contract will be awarded at once.

Portland, Ore.—Apartment house, 2 story and base brick. Cost not stated. Architect, W. H. Cowan, Portland. Owners, M and C Lindebach. The building will be 50x100, and will contain 22 apartments of two rooms and bath each. There will be steam heat and wall heat. The exterior of the building will be faced with pressed brick. The plans are complete and figures are being taken.

Portland, Ore.—Apartment house, 4 story and base, brick and steel. Cost not stated. Architects, Bridges & Webber, Portland. Owner, M. M. Mayo. The building will be 50x120 feet. The interior has been arranged for four three-room apartments and four four-room apartments to the floor. There will be steam heat, elevator service, vacuum cleaning system, wall heat and hardwood trim. The exterior of the structure will be faced with pressed brick. The working drawings are now being prepared and will go out for figures within three weeks.

BRIDGES, DAMS AND HARBOR WORK.

Long Beach, Los Angeles Co., Cal.—Piers 2, reinforced concrete. \$157,000. Engineer, Thomas D. Campbell Pacific Electric Bldg., L. A. Owners, City of Long Beach. The plans have been approved for two pleasure piers, one 1,850 feet long and the other 1,125 feet. Reinforced concrete piers will be used. The city authorities are to call for a bond election at once to secure funds for the construction.

Contracts Awarded.

Los Angeles, Cal.—Bridge, reinforced concrete, \$55,000. City Engineer Los Angeles. Owners, City of Los Angeles. Contractor, Robert Beattie, 223 West Second St., L. A. Contract price, \$54,421.

Auburn, Wash.—Bridge, steel span, \$14,000. Engineer, County Surveyor Kings Co. Auburn. Owners, Kings County. Contractor, P. J. McHugh, 3rd and Mercer Sts. Seattle. Contract price, \$13,310.62.

Roseburg, Ore.—Bridges, steel and concrete, \$12,000. Engineer's name not given. Owners, State of Oregon. Contractors, Portland Bridge and Iron Works, Wells-Pargo Bldg., Portland. Contract price, \$12,100.

CHURCHES.

Freitvale,ameda Co., Cal.—Church, 1 story and base, frame, \$10,000. Architect, H. H. Meyers, Kohl Bldg., S. F. Owners, Freitvale Methodist Church.

The building will be a small temporary structure with a seating capacity of about 350 people. There will be a Sunday school room in connection. The exterior of the building will be covered with rustic. The plans are complete and figures are being taken.

Oroville, Butte Co., Cal.—Church, 2 story and base, brick and frame, \$25,000. Architect, C. H. Russell, Humboldt Bank Bldg., S. F. Owners, Oroville Congregational Church. This building has been mentioned here before when the architect was first selected to prepare the plans. After considerable delay funds have been raised for the construction and the architect has been instructed to complete the working drawings as rapidly as possible. The exterior of the building will be faced with pressed brick. Plans will be ready for figures in three weeks.

Los Angeles, Cal.—Church, 1 story and base, frame, \$12,000. Architect, Jeffery & Van Trees, Citizens' National Bank Bldg., L. A. Owners, Normandie Ave. Methodist Church. The building will be 31x70 feet, and will contain an auditorium to seat 225 people. There will be Sunday school rooms, parlors, etc. The exterior of the building will be covered with rustic. The architects are now preparing the plans.

Brawley, Imperial Co., Cal.—Church, 1 story and base, frame \$12,000. Architect's name not given. Owners represented by E. Burelbach, Brawley. The plans for a small church edifice have been placed in the hands of the pastor, Rev. Burelbach, of Brawley, and he is now taking figures for the construction. The exterior of the building will be covered with cement plaster on metal lath. Bids will be opened on January 29th.

Contracts Awarded.

Venice, Los Angeles Co., Cal.—Church, 1 story and base, frame, \$10,000. Architect, H. M. Patterson, O. T. Johnson Bldg., L. A. Owners, First Church of Christ, Venice. Contractors, Frank Graves & Son, Alhambra. Contract price, \$7,000. Note. This contract does not include the painting or heating or plumbing.

Fowler, Fresno Co., Cal.—Church, 1 story and base, brick and frame, \$25,000. Architect, A. Burnside Sturges, Store Bldg., L. A. Owners, Fowler Presbyterian Church. Contractors, Johnson Bros., Kingsburg. Contract price, \$21,500.

FACTORIES & WAREHOUSES.

San Francisco—Shop building, 1 story brick, \$15,000. Architect, C. A. Meussdorffer, Humboldt Bank Bldg., S. F. Owner, Mrs. C. A. Meussdorffer. The building will cover an area of 46x80 feet. The floor will be of cement. There will be a tar and gravel roof. The exterior will be faced with cement plaster. The architect has completed the plans and the work will be done by Day Labor.

San Francisco—Laundry buildings, 2 story, brick and frame, \$7,000 and \$4,500. Architects, Fabre & Bearward, Metropolitan Bank Bldg., S. F. Owners' name withheld. These two structures have been designed for a modern laundry plant. The frame structure will contain the machines, while the brick building has been designed for a power plant. The plans will be completed

shortly and the work will then go out for figures.

Oakland, Cal.—Shop building, 1 story and base, concrete. Cost not stated. Architect, L. F. Hyde, 2715 26th St., Oakland. Owners, Scoville Iron Works. The building will be 36x75 and has been designed for a general office building for the works. There will be interior finish and heating. The exterior will be faced with cement plaster. The plans are being prepared.

San Francisco—Factory and stables, 1, 1 story and 2, 2 story, reinforced concrete, \$12,000. Architects, Rigetti & Headman, Flinders Bldg., S. F. Owners, Allee Cleaning and Dyeing Works. These buildings have been designed as a part of the new plant which this company is erecting on Shotwell street. The main cleaning plant will be contained in one of the two-story buildings, the stables in the other two-story structure and the power plant will occupy the one-story building. The exteriors will all be faced with cement plaster. The plans are complete and figures are being taken.

Oakland, Cal.—Warehouse, 1 story, frame, \$5,000. Architect, Robert Grant, 400 10th St., Oakland. Owners, Derby Estate. The building will be erected near the Southern Pacific tracks in Fruitvale. The exterior will be covered with rustic. There will be a shingle roof. The plans are now out for figures.

Oakland, Cal.—Factory, 3 story and base, frame, \$40,000. Architects, T. D. Newsom & Son, 906 Broadway, Oakland. Owners, Oakland Casket and Undertaking Co. The building has been designed with a large store room and offices on the first floor, warehouse on the third and factory on the second floor. There will be a steam heating plant. The exterior of the building will be covered with cement plaster. The plans will be complete and ready for figures about February 15th.

Seattle, Wash.—Grain elevators, 2 story frame, \$50,000. Architect, P. S. Masters, Massachusetts St., Seattle. Owners, Albers Bros. Milling Co. These two buildings will cover an area of 120x135 feet. The construction will be of heavy frame. The architect has the plans completed and is now taking figures for furnishing lumber, sheet metal, hardware, electric work and painting.

Aberdeen, Wash.—Warehouse, 2 story and base, reinforced concrete. Cost not stated. Architects, McNaughton & Raymond, Portland. Owners, Fidelity Investment Co. This work has been mentioned here before when the plans were first started. The drawings are now complete and figures will be opened on February 5th for the construction. The building will be 100x120 feet. The exterior will be faced with cement plaster.

Sumner, Wash.—Factory building, 2 story and base, reinforced concrete, \$100,000. Engineering Dept. Fleischmann Yeast Co., Cincinnati. Owners, Fleischmann Co. This work was mentioned here recently when it was first announced that the company would erect a western plant. Fred E. Clark has been appointed western manager and will make his headquarters at 617 Pine St., Seattle. Plans and specifications are now in his hands, and he will have full charge of letting all contracts.

Contracts Awarded.

Los Angeles, Cal.—Factory building, 2 story and base, brick. Cost not stated. Architect, Scott Quintin, Story Bldg., L. A. Owners, Los Angeles Can Co., Contractor, H. Whittaker, 3382 North Griffin Ave., L. A. Contract price not stated. The building will be 137x150. New plans are being prepared by the architect, and work will be started as soon as these are complete.

FLATS.

San Francisco.—Flats, 3 story and base, frame, \$5,000. Architect, none. Owner, John T. Quigley, 2452 15th St., S. F. The building has been designed for three flats of five and six rooms each with baths. The trim will be of pine with some hardwood floors. There will be gas grates. The exterior of the building will be covered with ship-lap. The plans are in the hands of the owner and the work will be done by Day Labor.

San Francisco.—Flats, 3 story and base, frame, \$12,000. Architect, J. C. Flueger, Crocker Bldg., S. F. Owner, J. C. Flueger. The building has been designed for nine modern flats of four, five and six rooms each with baths. There will be considerable tile used in the baths, marble and mosaic in the vestibules and brick steps. The interior trim will be of pine and hardwoods with oak floors. There will be a central heating system. The plans are nearly complete and figures will be called for shortly.

Richmond, Contra Costa Co., Cal.—Flats, 3 story and base, frame, \$10,000. Architect, W. C. Falth, Custom House, S. F. Owner, H. Stern. The building will contain five flats of five and six rooms each. There will be modern plumbing, baths in connection and electric work. The interior trim will be of pine throughout. The exterior of the building will be covered with rustic. The architect has completed the plans and construction will be started as soon as figures can be obtained.

Richmond, Contra Costa Co., Cal.—Flats and stores, 2 story and base, brick, \$20,000. Architect, J. W. Forsythe, 1927 Haste St., Berkeley. Owner, Mrs. Mary E. Smith. The building will cover a large area and has been arranged for several stores on the first floor and a number of modern flats on the upper floor. The flats will be of four and five rooms each with baths. The trim will be of pine throughout. All the stores will have large plate glass display windows. The exterior of the building will be faced with pressed brick. The plans are complete and figures are being taken.

Richmond, Contra Costa Co., Cal.—Flats, 2 story and base, frame, \$5,000. Architects, Richmond Building and Investment Co., Richmond. Owner, Mrs. Mary Lipps. The building has been designed for four flats of five and six rooms each and baths. The interior trim will be of pine. There will be open fire places and tile mantels. The exterior of the building will be covered with rustic and shingles. The plans are complete and figures are being taken.

GARAGES.

Oakland, Cal.—Garage, 1 story and base, brick. Cost not stated. Architect none. Owner, L. R. Jordan, 1302 Broadway, Oakland. The building will

be 100x113 feet, and has been designed for a one-car garage. A cement floor will cover the entire area. There will be a machine shop, store rooms and waiting room. The exterior of the building will be faced with pressed brick. The plans are being prepared by a brother of the owner.

Los Angeles, Cal.—Garage, 1 story and base, brick. Cost not stated. Architects, R. B. Young & Son, Lankershim Bldg., L. A. Owner, Mrs. Ruben Shettler. The building will be 50x150 feet, and has been arranged for two separate garages, with two display rooms and two shop departments. There will be a cement floor, pressed brick exterior and plate glass windows. The architects have completed the plans and are taking figures.

GOVERNMENT WORK AND SUPPLIES.

Bids were received by the supervising architect, Treasury Department, Washington, D. C., on January 4 for the installation of an automatic temperature control system in the United States postoffice at Bellingham, Wash., as follows:

The Powers Regulator Co., 40 Dearborn street, Chicago, Ill., \$3,590; time to complete, March 1, 1913.

Johnson Service Co., Seattle, Wash., \$3,885; time, February 1, 1913.

The contract for installing two additional filters in the pumping station at the Presidio, San Francisco, Cal., has been awarded to C. F. Braun & Co., of San Francisco, at the following prices. For two wooden filters, \$6,150; for Red Wing sand, \$1,400; and for pipe line outside of building, \$8,770.

The bid of J. S. Schwartz, of Colorado Springs, Colo., \$12,091 in amount, has been accepted for installing water-distributing system at Fort Logan, Colo.

No award has yet been made by the quartermaster, U. S. Marine Corps, Washington, D. C., for constructing commanding officers' quarters, barrack building, and two double sets junior officers' quarters at Pearl Harbor, H. T., under bids opened December 4.

HALLS AND SOCIETY BUILDINGS.

San Francisco.—Civic building, 3 story and base, steel and brick. Cost not stated. Architect, Italo Zancini, 604 Montgomery St., S. F. Owners, Italian Civic Building Association. The building will be 43x125 feet. The first floor will contain a large assembly room with the ceiling extending through the second floor and arranged with balconies around three sides, offices and elevator space. The second and third floors will contain society rooms, a large Italian Library Association and offices for the Italian Consul. There will be steam heat and elevator service. The exterior will be faced with terra cotta and pressed brick. The plans are complete and bids are being taken. The official proposal appears in another column of this issue.

San Bernardino, San Bernardino Co., Cal.—Association building, 3 story and base, brick and steel, \$60,000. Architects, Jeffrey & Van Trees, Citizens' National Bank Bldg., L. A. Owners, San Bernardino Young Men's Christian Association. The architects have just been commissioned to prepare the plans

for this work, and no details of the construction can be obtained at this time.

Corona, Riverside Co., Cal.—City hall, 2 story and base, brick and concrete. Cost not stated. Architect, Leo Kroonen, 7th and Crawford Sts., L. A. Owners, City of Corona. The building will be 62x93. The floor plans provide for the housing of the fire department, jail in the basement, council chamber and city offices. The exterior will be faced with cement plaster on brick. There will be a tile roof. There will be concrete vaults. The plans are complete and figures will be called for shortly.

Long Beach, Los Angeles Co., Cal.—Lodge Hall, 3 story and base, brick, \$100,000. Architects, Austin & Sedgwick, 18 Locust Ave., Long Beach. Owner, Long Beach F. K. S. Hall Association. The plans from the eastern designers of this building have been placed in the hands of the above mentioned firm to be carried out. Bids for the construction are now being taken. Figures will be opened on February 6th.

Sacramento, Cal.—Armory, 2 story and base. Class A construction, \$100,000. State Architect Digges, Capitol Bldg., Sacramento. Owners, State of California. Bids for this work were opened last week in the State Engineer's office. Lindgren & Co., of San Francisco, were low on the general construction, but their total bid was some \$7,000 more than the appropriation. The lowest of the segregated figures totaled \$97,925. For a complete list of the bidders and their figures see under Sacramento, Stockton and Northridge in California in this issue.

San Diego, Cal.—Association building, 4 story and base, reinforced concrete, \$100,000. Architect, George William Kelham Crocker Bldg., S. F., associated with Architects Bristow & Lyman, San Diego. Owners, San Diego Young Men's Christian Association. This work was mentioned here when the selection of an architect was first announced. The working drawings have been completed and will be put out for figures at once.

LIBRARY.

Pomona, Los Angeles Co., Cal.—Library, 1 story and base, brick, \$10,000. Architect, Robert Orr, Pomona. Owners, City of Pomona. This work has been mentioned here before. The second set of figures for the work have been opened and found too high. The plans will again be revised and figures taken.

HOTELS.

Willows, Glenn Co., Cal.—Hotel, 3 story and base, reinforced concrete, \$50,000. Architect, C. H. Russell, Humboldt Bank Bldg., S. F. Owners, Willows Hotel Co. The plans for a building covering an area of 78x110 feet are being prepared. The structure will contain several stores on the first floor besides the main offices and general lobby of the hotel. There will be in the neighborhood of 100 rooms and baths on the two upper floors. There will be steam heat. The exterior of the building will be faced with pressed brick. The working drawings are now being prepared.

Los Angeles, Cal.—Hotel, 3 story and base, brick. Cost not stated. Architects, Noonan & Kyser, Wright and Chandler Bldg., L. A. Owner, Mrs. H.

W. Little. The building will be 42x104 feet, and will contain 50 rooms on the upper floors besides stores on the first floor. There will be a number of baths, steam heat and lavatory in each room. The exterior of the building will be faced with enameled brick. The plans are complete and figures are being taken.

Redwood City, San Mateo Co., Cal.—Hotel, 3 story and base, reinforced concrete, \$25,000. Architects, Havens & Teeple, 46 Kearny St., S. F. Owner's name withheld. The building will be arranged for an up-to-date commercial house with large lobby on the first floor and about 60 rooms on the upper floors. There will be a dining room in connection. The exterior of the building will be faced with cement plaster. The plans are being prepared.

Fresno, Fresno Co., Cal.—Hotel alterations, \$10,000. Architects, A. C. Swartz & Son, Fresno. Owners, Donohoe-Emmons. The work will consist of the alteration of the two upper floors of a building 50x150. Steam heat, lavatories and baths will be installed. The roof will be new. The plans are being prepared.

San Fernando, Los Angeles Co., Cal.—Hotel, 2 story and base, brick. Cost not stated. Architect, Albert C. Martin, Higgins Bldg., L. A. Owner, Henry Flynn. The first floor will contain stores. There will be fifteen rooms on the second floor. Steam heat, baths and a freight elevator will be installed. The exterior of the building will be faced with glazed and pressed brick. The plans are being prepared.

Green River Springs, Wash.—Hotel, 3 story and base, brick and concrete, \$250,000. Architects, Kingsley & Eastman, Empire Bldg., Seattle. Owners, Green River Springs Hotel Co. The main building will be 200 feet square, and will contain in the neighborhood of 150 guest rooms. There will be three outbuildings to contain the garage, laundry and stables. The main structure will be modern in every particular. The exterior will probably be faced with pressed brick. The working drawings are being prepared.

Helena, Mont.—Hotel, 8 story and base. Class A construction, \$400,000. Architects, Cass Gilbert, New York, and H. Carsley, Helena, Mont., associated. Owner's name withheld. The architects have just been commissioned to prepare the plans for this building and no details of the construction can be learned at this time.

Portland, Ore.—Hotel and stores, 4 story and base, brick and steel, \$40,000. Architects, Bennes & Hendricks, Portland. Owners, Pickenstein, Meyer Co. The building will be on a lot. The first floor will be arranged for stores. The upper three floors will each be divided into 25 rooms and several baths. There will be steam heat, elevator service and running water in each room. The exterior of the building will be faced with pressed brick and terra cotta. The plans are complete and bids will be opened about January 28th.

Contracts Awarded.

San Francisco—Hotel, 7 story and base, brick and steel, \$70,000. Architect, C. W. Buckley, Oakland. Bank of Savings, Oakland. Owners, S. W. Dick & Co. Contractor, P. J. Walker, Monadnock Bldg., S. F. Contract price, \$70,000. Sub-figures are being taken on all parts of the work.

San Francisco—Hotel, 6 story and base, brick and steel, \$100,000. Archi-

tect, Nathaniel Blaisdell, 255 California St., S. F. Owner, Samuel Knight. Contractors, Van Sant-Houghton, Balboa Bldg., S. F. Contract price, \$98,500. Sub-figures are now being taken on all parts of this contract.

Los Angeles, Cal.—Hotel and stores, 3 story and base, brick, \$25,000. Architects, Lindhwaite & Flaherty, 1 W. Hellman Bldg., L. A. Owner, Joseph R. Jipek. Contractor, J. F. Atkinson, Story Bldg., L. A. Contract price, \$25,000.

RAILROAD CONSTRUCTION—STATIONS AND EQUIPMENT.

Auburn, Wash.—Terminal sheds, concrete, \$50,000. Engineering Dept., Northern Pacific R. R. Co., Tacoma. Owners, Northern Pacific R. R. Co. Plans are complete and figures are now being taken by the Tacoma office of the Northern Pacific Co. for the construction of the terminal sheds which are to be located at Auburn. The work will be entirely of reinforced concrete.

RESIDENCES.

San Francisco—Residence, 1½ story and base, frame, \$2,500. Architect, none. Owner, E. J. Durell, Vienna St., near Brazil, S. F. The dwelling will contain five rooms and bath. The interior trim will be largely of pine with oak floors in the living and dining rooms. There will be open fire places and tile mantels. The exterior of the dwelling will be covered with shiplap. The plans are complete and the work will be done by Day Labor.

San Francisco—Residence, 2 story, attic and base, brick and stone, \$20,000. Architect, Nathaniel Blaisdell, 255 California St., S. F. Owner, Frederick Hohwiesner. The dwelling will be erected in the Marine View District and will contain a large number of living rooms and several baths. There will be hardwood trim, oak mahogany and white enamel. The halls will be finished in tile. There will be open fire places with brick and tile mantels. The dwelling will be heated by warm air. The exterior of the house will be faced with stone and cement plaster. The architect has completed the plans and specifications and is now taking figures on the work.

San Francisco—Residence, 3 story attic and base, steel and brick, \$300,000. Architects, Bliss and Faville, Balboa Bldg., S. F. Owner, James L. Flood. This work has been mentioned here before when the architects first started the working drawings. The plans are now well advanced and will go out for figures very shortly. The dwelling will be one of the most elaborate structures in the city and will be entirely finished in hardwoods and marble. There will be in the neighborhood of 50 rooms. There will be a steam heating plant and oil burning furnace. The baths will be finished in tile and marble. A feature of the dwelling will be the open fire places and mantels. There will be electric elevators. A garage will be built in connection. The exterior of the dwelling will be faced with marble. Plans will be on the market by the end of this month.

San Francisco—Residence, 2 story and base, frame, \$1,000. Architect, none. Owner, J. Johnson, 488 9th Ave., S. F.

The dwelling has been designed for an eight-room house. The interior trim will be of pine with some oak floors. There will be furnace heat and open fire places. The mantels will be of tile. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are in the hands of the owner and the work will be done by Day Labor.

Oakland, Cal.—Residence, 2 story and base, frame, \$1,000. Architect, A. W. Smith, 1004 Broadway, Oakland. Owner, F. R. Jordan. The dwelling has been designed for an eight-room house with two bath rooms. The interior trim will be of pine. There will be hardwood floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick or tile. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Residence, 2 story and base, frame, \$5,000. Architect, Noble Newsom, 2610 Durant St., Berkeley. Owner, C. Batsford. The dwelling will contain eight rooms and baths. The trim will be of pine and hardwood with oak floors in the principal rooms. There will be furnace heat and coal grates. The mantels will be of tile. There will also be considerable tile used in the baths. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, \$10,000. Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owner, Dr. Walter Scott. The dwelling has been mentioned in these columns before. There will be ten living rooms and two baths. The interior finish will be largely of pine and white enamel. There will be furnace heat and open fire places. The mantels will be of brick and tile. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are now complete and figures are being taken.

Piedmont, Alameda Co., Cal.—Residence, 2 story and base, frame, \$4,000. Architect, Olin S. Groves, 2911 Telegraph Ave., Berkeley. Owner, J. K. Carpenter. The dwelling will contain seven rooms and baths. The interior trim will be of pine and hardwood with oak floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick. The exterior of the dwelling will be covered with shingles. The plans are complete and the architect is taking figures on the work.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, \$11,000. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, H. L. Johnson. The dwelling has been designed for a twelve-room house with two bath rooms. The interior trim will be of pine, hardwoods and white enamel. There will be furnace heat and open fire places. The mantels will be of tile or brick. The exterior of the dwelling will be covered with cement plaster. The plans are complete and figures will be taken at once.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, \$8,000. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, W. F. Cannon. The dwelling will be erected in the Thousand Oaks section of Berkeley, and has been de-

signed for a ten-room house with all modern conveniences. The interior trim will be of pine with hardwood floors in the principal rooms. There will be furnace heat, open fire places and brick or tile mantels. The exterior will be covered with cement plaster on metal lath. The plans are now being prepared.

Oakland, Cal.—Residence, 2 story and base, frame, \$8,000. Architect, Nels P. Anderson, 712 Market St., Oakland. Owner, Robert Dunlap. The dwelling will contain about eight rooms and baths. The interior trim will be of pine throughout. There will be attractive brick mantels. There will be furnace heat and coal grates. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Oakland, Cal.—Bungalow, 1 story and base, frame, \$2,500. Architect, none. Owner, John A. Bischoff, 1253 Channing Way, Berkeley. The bungalow will contain six rooms and bath. The interior trim will be of pine throughout. There will be open fire places with tile or brick mantels. The exterior of the dwelling will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Bungalow, 1 story and base, frame, \$2,000. Architect, none. Owner, Edward Larmer, 631 Polier St., Oakland. The dwelling will contain five rooms and bath. The trim will be of pine throughout. There will be open fire places and tile mantels. The exterior of the dwelling will be covered with shingles. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Residence, 2 story and base, frame, \$7,000. Architect, O. W. Barnes, 2935 Ashby St., Berkeley. Owner, R. Cushing. The dwelling has been designed for a nine-room house with furnace heat and open fire places. The mantels will be of brick or tile. The interior trim will be of pine throughout. There will be some oak floors. The baths will be tiled. The exterior of the dwelling will be covered with rustic. The plans are complete and figures are being taken.

Berkeley, Alameda Co., Cal.—Cottage, 1 story and base, frame, \$2,000. Architect, Miss Dora Spencer, 669 11th St., Oakland. Owner, Arthur Edgar. The dwelling will contain five rooms and bath. The interior trim will be of pine throughout. There will be coal grates with tile mantels. The exterior of the house will be covered with rustic. The plans are now out for figures.

Albany, Contra Costa Co., Cal.—Residences, 2 and 2 story and base, frame, \$2,500 each. Architect, none. Owners, Peake-Munroe Co., 2035 Shattuck Ave., Berkeley. The dwellings will each contain six rooms and baths. The interior trim will be of pine throughout. There will be coal grates and brick mantels. The exteriors of the dwellings will be covered with shingles. The plans are complete and the work will be done by Day Labor.

Walnut Creek, Contra Costa Co., Cal.—Residence, 2 story and base, frame, \$20,000. Architects, Bakewell & Brown, 147 Montgomery St., S. F. Owner, Walter Arnstein. The dwelling has been designed for a handsome country home with all modern conveniences.

There will be in the neighborhood of fourteen rooms and several baths. The interior trim will be of pine, hardwoods and white enamel. There will be furnace heat and open fire places. The mantels will be of brick and tile. There will be considerable tile used in the bath rooms. The exterior of the dwelling will be covered with rustic. The plans are complete and figures are being taken.

Oakland, Cal.—Bungalows, 3, 1 story and base, frame, \$2,000 each. Architect, none. Owners, Morgensen Bros., 560 63rd St., Oakland. The dwellings will be designed for five room houses with baths. The trim will be of pine throughout. There will be some oak floors. There will be fire places and tile mantels. The exteriors of the dwellings will be covered with shingles. The plans are complete and the work will be done by Day Labor.

San Francisco—Residence, 2 story and base, frame and brick, \$1,000. Architect, John J. Foley, Monachock Bldg., S. F. Owner, John O'Connor. The dwelling has been designed for a six-room house. The interior trim will be of pine with hardwood floors throughout. There will be furnace heat and coal grates. The mantels will be of brick. The exterior of the dwelling will be covered with veneered pressed brick and rustic. The plans are complete and figures are being taken.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, \$1,500. Architect, John White, 35 Montgomery St., S. F. Owner, Mrs. E. A. Clark. The dwelling will contain seven rooms and bath. The interior trim will be of pine and white enamel. The floors will be of oak. There will be furnace heat and open fire places. The mantels will be of brick or tile. The exterior of the dwelling will be covered with shingles. The plans are complete and figures are being taken.

Oakland, Cal.—Bungalow, 1 story and base, frame, \$2,500. Architect, none. Owner, J. R. Maxwell, Washington and 12th Sts., Oakland. The dwelling will contain five rooms and bath. The trim will be of pine throughout. There will be open fire places. The exterior of the bungalow will be covered with shingles. The plans are in the hands of the owner and he is taking figures on the work.

Richmond, Contra Costa Co., Cal.—Bungalow, 1½ story and base, frame, \$2,500. Architect, none. Owner, A. B. Carpenter, Richmond. The dwelling will contain six rooms and bath. The interior trim will be of pine throughout. There will be open fire places with attractive tile mantels. The exterior of the dwelling will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Richmond, Contra Costa Co., Cal.—Cottage, 1 story and base, frame, \$2,000. Architect, B. F. Grayford, Richmond. Owner's name withheld. The dwelling will contain five rooms and bath. There will be pine trim, oak floors and tile mantels. The dwelling will be heated by open fire places. The exterior will be covered with shingles. The plans are complete and the work will be done by Day Labor.

Fresno, Fresno Co., Cal.—Bungalows, 3, 1 story and base, frame, \$2,500 to \$3,000 each. Architect, F. M. Chittenden, Fresno. Owner's name withheld. The plans for eight dwellings of the bungalow type are being prepared.

Each will contain six rooms and bath. The trim will be of pine with some oak floors. There will be open fire places. The exteriors will be covered with shingles, cement plaster on metal lath and rustic. As soon as the plans can be completed the work will be done by Day Labor.

Lindsay, Tulare Co., Cal.—Residence, 2 story and base, frame, \$1,000. Architects, A. C. Swartz & Son, Fresno. Owner, L. C. Haulman. The dwelling will contain seven rooms and bath. The interior trim will be of pine with oak floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick. The exterior of the dwelling will be covered with shingles. The plans are nearly complete and figures will be called for at once.

Alhambra, Los Angeles Co., Cal.—Residence, 2 story and base, frame. Cost not stated. Architect, Edward C. Taylor, Consolidated Realty Bldg., L. A. Owner, C. Krehner. The dwelling will contain twelve rooms and four baths. The interior trim will be of pine and mahogany with oak floors throughout. The mantels will be of tile and considerable tile will be used in the baths. There will be furnace heat. The exterior will be covered with shiplap. The plans are complete and figures are being taken.

Los Angeles, Cal.—Residence, 2 story, attic and base, frame. Cost not stated. Architects, Edelman & Barnett, Blanchard Bldg., L. A. Owner, Otto Sweet. The dwelling has been designed for a fifteen-room house with several baths. The interior trim will be of hardwood on the first floor and white enamel on the second. Hardwood floors will be used throughout. There will be a hot water heating system. Tile will be used in the baths and mantels. The exterior will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Los Angeles, Cal.—Residence, 2 story and base, frame. Cost not stated. Architect, Frank M. Tyler, Union Trust Bldg., L. A. Owner, G. F. Sloan. The dwelling will contain twelve rooms and three baths. The interior trim will be of pine, white enamel and mahogany. There will be tile mantels and tile floors in two of the bath rooms. There will be furnace heat. The exterior will be covered with brick veneer and cement plaster. The plans will be completed shortly and the work will be done by Day Labor.

SCHOOLS.

North Stockton, San Joaquin Co., Cal.—School, 2 story and base, brick, \$20,000. Architect, P. L. Jones, Stockton. Owners, North Stockton School District. The architect has recently been commissioned to prepare plans for this work, and other than the fact that the building will be of brick construction and that it will contain a central heating system no details can be given. The plans will shortly be approved by the Superintendent of Schools and working drawings will be ordered prepared.

Berkeley, Alameda Co., Cal.—School, 2 story and base, brick and steel, \$50,000. State Architect, Biggs, Capitol Bldg., Sacramento. Owners, State of California. This building has been designed for a manual training department for the State School for the Deaf,

Dumb and Blind. The working drawings are complete and figures are now being taken. Bids will be opened by the State Engineer on February 20th.

Los Angeles, Cal.—School, 2 story and base, brick. Cost not stated. Architects Eager & Eager, Story Bldg., L. A. Owners, City of Los Angeles. The architects have just been commissioned by the School Board to prepare plans for a two-story, eight-room building. The architects have not submitted plans to the Board as yet, and details of the construction cannot be given at this time.

Cucamonga, San Bernardino Co., Cal.—School, 2 story and base, reinforced concrete, \$35,000. Architect, Scott Quintin, Story Bldg., L. A. Owners, Cucamonga School District. The building will contain an auditorium and 12 class rooms. The construction is to be fireproof throughout. The roof will be of tile. The exterior of the building will be faced with cement plaster. The architect is preparing the working drawings.

Canby School District, Fresno Co., Cal.—School, 1 story and base, frame. Cost not stated. Architect, none. Owner, Canby School District. Mrs. C. W. Casholt, Clerk of the Board, care of County Superintendent of Schools, Fresno. The district is now advertising for bids for the construction of a one-story frame school building. The plans can be secured from the County Superintendent, Fresno. Bids will be opened on February 3rd.

Ellensburg, Wash.—School, 2 story and base, reinforced concrete \$65,000. Architects, Stephens & Stephens, New York Bldg., Seattle. Owner, City of Ellensburg. This work was reported here last week when the figures were rejected. The architects state that revised plans will be ready for figures by February 1st.

Contracts Awarded.

Altos, Santa Clara Co., Cal.—School, 2 story and base, brick and frame, \$50,000. Architect, W. H. Weeks, 251 Kearny St., S. F. Owners, Gilroy High School District. Contractors, Hoyt Bros., Monmouth Bldg., S. F. Contract price, \$48,500.

St. Helena, Napa Co., Cal.—School, 2 story and base, brick and stone, \$30,000. Architect, Frederick Soderberg, Union Savings Bank Bldg., Oakland. Owners, St. Helena Union High School District. The following is a complete list of the bids recently opened for this building: The contract was awarded to E. T. Thurston, East and Oregon Sts., S. F., on his bid of \$23,991. The other firms submitting figures were as follows:

J. H. Babey	\$29,109
F. H. Born, 65 Prospect, S. F.	29,669
J. B. Newman	29,390
F. B. Smith	32,343
R. A. McLean	32,987
Phil Sheridan, Berkeley	33,122

Hollywood, Los Angeles Co., Cal.—School addition, 2 story and base, reinforced concrete, \$20,000. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, Hollywood School District. Contractor, W. S. Allee, 605 Pasadena Ave., Azusa. Contract price, \$19,866.

SEWERS, STREET WORK AND WATER SYSTEMS.

Fullerton, Orange Co., Cal.—Water and sewer system \$90,000 and \$100,000. Engineers, Sloan & Robson, Nevada

Bank Bldg., S. F., associated with Vivian G. Barr, L. A. Owners, City of Fullerton. The City Trustee have received a report from the engineers which contains the estimates on both the proposed municipal water system and the sewer system. The former will, in the opinion of the engineers, cost \$90,000, and the latter \$100,000. The matter of bonds is to be taken up at once.

Moorepark, Ventura Co., Cal.—Reservoir, reinforced concrete. Cost not stated. Architect, Albert C. Martin, Higgins Bldg., L. A. Owner, H. K. Snow. The reservoir will be 140 feet in diameter and 8 feet deep. The total contents is estimated at 30,000 barrels. There will be twisted bar and wire fabric reinforcement. Plans are complete and figures are being taken.

Contracts Awarded.

Los Angeles, Cal.—Hydraulic and electric machinery, \$285,000. City Engineer L. A. Owners City of Los Angeles. Contractors, Union Iron Works, S. F., hydraulic machinery. Contract price, \$191,000. Westinghouse Electrical Mfg. Co., electrical machinery. \$90,000.

STORES & OFFICE BUILDINGS.

San Francisco—Stores and lofts, 4 story and base, reinforced concrete, \$25,000. Architect, J. C. Flueger, Crocker Bldg., S. F. Owner, Robert McMillan. The building will be erected at the corner of Second and Tehama streets, and has been designed for stores on the first floor and lofts on the upper three floors. There will be elevator service. The exterior of the building will be faced with cement plaster. The plans for this work are now complete and figures are being taken.

San Francisco—Stores, 1 story and base, frame, \$5,000. Architect, J. C. Flueger, Crocker Bldg., S. F. Owner, L. P. Hourihan. The building will contain three modern stores. There will be plate glass display windows. The exterior of the building will be faced with cement plaster. The plans are complete and the architect is now taking figures on the work.

Sacramento, Sacramento Co., Cal.—Stores and offices, 4 or 5 story and base. Class A construction, \$100,000. Architect, E. C. Hemmings, Sacramento. Owners, Pacific Gas and Electric Co. The building will occupy a prominent corner at 11th and K streets. The entire structure will be devoted to the purposes of the owners. There will be a large and elaborately finished public room on the first floor. The upper floors will be arranged for the offices of the company. There will be a complete steel frame, with the exterior walls faced with pressed brick and terra cotta. The construction will be fireproof throughout. There will be steam heat and elevator service. The architect has just received the commission to prepare the plans. The working drawings have been started and the detail plans will be completed as rapidly as possible.

Oakland, Cal.—Office, 1 story and base, concrete. Cost not stated. Engineer Wialen, Mutual Savings Bank Bldg., S. F. Owner, Union Gas Engine Co., Oakland. The building has been designed for a general office for the company. The interior will be finished in pine. There will be a tile roof. The exterior of the structure

will be faced with cement plaster. The plans are complete and figures are being taken.

Berkeley, Alameda Co., Cal.—Stores, 1 story and base, brick, \$6,000. Architect, none. Owner, W. R. Scott, 2718 Regent St., Berkeley. The building has been designed to contain five small stores. There will be plate glass windows. The exterior of the building will be faced with pressed brick. The plans are complete and in the hands of the owner who will do the work by Day Labor.

Pasadena, Los Angeles Co., Cal.—Stores and offices, 3 story and base, brick. Cost not stated. Architect, C. W. Buchanan, 65 N. Raymond Ave., Pasadena. Owner, W. C. Mason. The building will be 75x150 feet. The building has been designed for a retail furniture company. A large two-story brick warehouse 100x125 will be erected in the rear. The main building will be faced with pressed brick. The architect is preparing the plans.

Vancouver, B. C.—Stores and offices, 10 story and base. Class A construction, \$150,000. Architect, W. Marbury Somerville, White Bldg., Seattle. Owners, Birks & Sons. The building will cover an area of 100x120 feet. There will be a complete steel frame and exterior walls of brick. The structure will be faced with pressed brick and terra cotta. The working drawings have just been started and details of the construction cannot be given as yet.

Riverdale, Fresno Co., Cal.—Stores, 1 story and base, brick, \$10,000. Architects, A. C. Swartz & Son, Fresno. Owner, William Hensen. The building will be 45x65 feet and will contain small stores. The exterior will be faced with pressed brick. There will be plate glass display windows. The plans are being prepared.

Fresno, Fresno Co., Cal.—Stores and rooms, 2 story and base, brick, \$15,000. Architects, A. C. Swartz & Son, Fresno. Owners, Radin-Kamp. The work is to considerably increase the ground area of the present one-story building and add a second story to the same. The exterior will be faced with buff pressed brick. The plans are complete and figures are being taken.

Mariposa, Kern Co., Cal.—Stores and living apartments, 2 story and base, brick. Cost not stated. Architect, Thomas E. Wiseman, Producers' National Bank Bldg., Eureka. Owners, Coombs and Price. The building will be 50x80. The first floor will be arranged for several stores with plate glass and copper store fronts. The second floor will be divided into living apartments. The exterior of the building will be faced with pressed brick. The architect is preparing the plans.

Contracts Awarded.

Los Angeles, Cal.—Stores, 10 story and base. Class A construction. Cost not stated. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owners, Arthur Letts and J. G. Bullock. Contractor, Paul Haupt, Central Bldg., L. A. The architects are preparing the plans and the contract will be on the percentage basis. No details of the structure are being given to the public.

THEATRES.

Oakland, Cal.—Theatre, 1 story and base, brick and frame, \$5,000. Architect, L. S. Pearson, 2360 Woodsey St., Berkeley. Owner, Mr. Sallinger. The building has been designed for a mov-

ing picture house. There will be a system of ventilation. The exterior will be covered with cement plaster. The plans are complete and the work will be done by Day Labor.

Pomona, Los Angeles Co., Cal.—Theatre and stores. 3 story and base, brick, \$10,000. Architect, Robert Orr, Pomona. Owners, Pomona Opera House Co. This work has been opened here before when the plans were first put out for figures. The plans have been slightly revised and new figures will be called for in the course of the next few weeks. There will be stores in the front portion of the first floor. The theatre will have a seating capacity of 800 people. The exterior will be faced with pressed brick.

Portland, Ore.—Theatre, 5 story and base, brick and steel, \$300,000. Architects, Kingsley & Eastman, Empire Bldg., Seattle. Owners, Sullivan and Considine Circuit. The building will be 100x150 feet. The plans for the foundation are complete and Mr. Decamp, who will have charge of the construction, is now tearing down the present building. All sub-figures will be taken through Mr. Decamp's office, and he may be addressed in care of the owners at Portland.

SEALED PROPOSALS.

PROPOSALS FOR WIRE FENCE.

(Bids close Jan. 3.)

PROPOSALS FOR WIRE FENCE.—Office of the Quartermaster, Presidio of San Francisco, Cal.—Sealed proposals for constructing Wire Fence at Sub-Post, Fort Riley, Cal., will be received here until 11 a. m., January 31, 1912, and then opened. Information furnished on application. Envelopes containing proposals should be endorsed "Proposals for Wire Fence," and addressed "Major K. J. HAMPTON, Quartermaster."

NOTICE TO ARCHITECTS.

The Board of Education of the City of Sacramento, desiring to erect a school building, hereby invite architects to submit competitive plans, description and estimate for a two-story grammar school building, with basement, and containing thirteen rooms, to be situated upon the South Half of the Block bounded by D and E, 25th and 26th streets, in the City of Sacramento, County of Sacramento, State of California, in accordance with the program adopted by the said Board of Education, and which can be obtained by applying to the Secretary.

All plans to be submitted on or before the hour of 8 p. m., February 7, 1912, at the office of said Board, Room 20, Odd Fellows' Building, Ninth and K streets, City of Sacramento, California.

The said Board reserves the right to accept or reject any or all plans.

J. A. GREEN,

President of the Board of Education of the City of Sacramento, California.

O. W. ERLEWINE,

Secretary of the Board of Education of the City of Sacramento, California.

Dated, January 16, 1912.

CONSTRUCTING BUILDING.

(Bids close Jan. 29.)

The right is reserved to reject any or all bids.

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

Apartment House—1 story and base, frame, \$12,000. San Francisco. Architect, Charles J. Rousseau, Mononock Bldg., S. F. Owner, Albert Broetlicher. The building will contain thirty beds besides the baths. The rooms will be arranged in suites of four rooms. There will be a central heating plant and wall beds. There will be some hardwood floors. The exterior of the apartment house will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Apartment House—2 story and base, frame, \$30,000. San Francisco. Architect, S. Heiman, 127 Montgomery St., S. F. Owner, Minnie Tonn. 3119 Clay St., S. F. The building will be 53x114, and will contain 36 apartments, arranged in suites of two, three and four rooms each with baths. There will be steam heat and wall beds. The floors in some of the rooms will be of oak. The exterior of the building will be covered with cement plaster on metal lath. The architect is preparing the working drawings.

Apartment House—3 story and base, reinforced concrete, \$30,000. San Francisco. Architect, Earl B. Scott, Humboldt Bank Bldg., S. F. Owner, Edward Swift. The building will contain twelve apartments of two and three rooms with connecting baths. There will be steam heat and wall beds. There will be considerable tile used in the bath rooms. The exterior of the building will be faced with cement plaster. The plans for this work are complete and the architect is now taking figures on the construction.

Apartment House—2 story and base, frame, \$15,000. San Francisco. Architects, Fabre & Bearwald, Metropolis Bank Bldg., S. F. Owner's name withheld. The building will be erected on Van Ness Avenue. There will be a large number of two and three room apartments all arranged with private entrance hall and connecting baths. There will be a central heating plant. The bed rooms will be fitted with wall beds. The exterior of the building will be covered with ship-lap. The architects are taking figures on the work.

Apartment House Alterations—Cost not stated. San Francisco. Architect, Earl B. Scott, Humboldt Bank Bldg., S. F. Owner, Mrs. Prof. This work has been mentioned here before. The work will consist of the alteration of four large frame residences into a modern apartment house. The plans are now complete and the architect is taking figures on the work.

Shop Building—1 story, brick, \$4,000. San Francisco. Architect, C. A. Meussdorffer, Humboldt Bank Bldg., S. F. Owner, Mrs. C. A. Meussdorffer. The building will cover an area of 46x89 feet. The floor will be of cement. There will be a tar and gravel roof. The exterior will be faced with cement plaster. The architect has completed the plans and the work will be done by Day Labor.

Laundry Building—2, 1 story, brick

and frame, \$7,000 and \$4,500. San Francisco. Architects, Fabre & Bearwald, Metropolis Bank Bldg., S. F. Owner's name withheld. These two structures have been designed for a modern laundry plant. The frame structure will contain the machines, while the brick building has been designed for a power plant. The plans will be completed shortly and the work will then go out for figures.

Flats—3 story and base, frame, \$5,000. San Francisco. Architect, none. Owner, Julia T. Quisley, 2152 15th St., S. F. The building has been designed for three flats of five and six rooms each with baths. The trim will be of pine with some hardwood floors. There will be gas grates. The exterior of the building will be covered with ship-lap. The plans are in the hands of the owner and the work will be done by Day Labor.

Flats—3 story and base, frame and brick, \$12,000. San Francisco. Architect, J. C. Flugger, Crocker Bldg., S. F. Owner, J. C. Flugger. The building has been designed for nine modern flats of four, five and six rooms each with baths. There will be considerable tile used in the baths, marble and mosaics in the vestibules and brick steps. The interior trim will be of pine and hardwoods with oak floors. There will be a central heating system. The exterior of the building will be covered with ship-lap and cement plaster. The plans are nearly complete and figures will be called for shortly.

Residence—1½ story and base, frame, \$25,000. San Francisco. Architect, none. Owner, E. J. Durrell, Vienna St., near Broadway, S. F. The dwelling interior trim will be largely of pine with oak floors in the living and dining rooms. There will be open fire places and tile mantels. The exterior of the dwelling will be covered with ship-lap. The plans are complete and the work will be done by Day Labor.

Residence—2 story, attic and base, brick and stone, \$20,000. Architect, Nathaniel Blunsell, 255 California St., S. F. Owner, Frederick Hohwiesner. The dwelling will be erected in the Marine View District and will contain a large number of living rooms and several baths. There will be hardwood trim, oak, mahogany and white enamel. The baths will be finished in tile. There will be open fire places with brick and tile mantels. The dwelling will be heated by warm air. The exterior of the house will be faced with stone and cement plaster. The architect has completed the plans and specifications and is now taking figures on the work.

Residence—3 story, attic and base, steel and brick, \$50,000. San Francisco. Architects, Bliss & Faville, Baldwin Bldg., S. F. Owner, James L. Flood. This work has been mentioned here before when the architect first started the working drawings. The plans are now well advanced and will go out for figures very shortly. The dwelling will be one of the most elaborate structures in the city, and will be entirely finished in hardwoods and marble. There will

be in the neighborhood of fifty rooms. There will be a steam heating plant and oil burning furnace. The baths will be finished in tile and marble. A feature of the dwelling will be the open fire places and mantels. There will be electric elevators. A garage will be built in connection. The exterior of the dwelling will be faced with marble. Plans will be on the market by the end of this month.

Residence—2 story and base, frame, \$1,000. San Francisco. Architect, none. Owner, J. Johnson, 483 9th Ave., S. F. The dwelling has been designed for an eight-room house. The interior trim will be of pine with some oak floors. There will be furnace heat and open fire places. The mantels will be of tile. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are in the hands of the owner and the work will be done by Day Labor.

Civic Building—3 story and base, steel and brick. Cost not stated. San Francisco. Architect, Halo Zanolini, 604 Montgomery St., S. F. Owners, Italian Civic Building Association. The building will be 43x125 feet. The first floor will contain a large assembly room with the ceiling extending through the second floor and arranged with balconies around three sides, offices and elevator space. The second and third floors will contain society rooms, a large Italian Library Association and offices for the Italian Consul. There will be steam heat and elevator service. The exterior will be faced with terra cotta and pressed brick. The plans are complete and bids are being taken. The official proposal appears in another column of this issue.

Factory and Stables—1, 1 story and 2, 2 story, reinforced concrete, \$12,000. San Francisco. Architects, Righetti & Hoiland, Puelan Bldg., S. F. Owners, Albee Cleaning and Dyeing Works. These buildings have been designed as a part of the new plant which this company is erecting on Shotwell street. The main cleaning plant will be contained in one of the two-story buildings, the stables in the other two-story structure and the power plant will occupy the one-story building. The exteriors will all be faced with cement plaster. The plans are complete and figures are being taken.

School—3 story and base, brick and steel, \$50,000. Berkeley, Alameda Co., Cal. State Architect Diggs, Capitol Bldg., Sacramento. Owners, State of California. This building has been designed for a manual training department for the State School for the Deaf, dumb and Blind. The working drawings are complete and figures are now being taken. Bids will be opened by the State Engineer on February 5th.

Stores and Lodging—2 story and base, reinforced concrete, \$25,000. San Francisco. Architect, J. C. Flugger, Crocker Bldg., S. F. Owner, Robert McMillan. The building will be erected at the corner of Second and Tehama streets, and has been designed for stores on the first floor and lofts on the upper three floors. There will be elevator service. The exterior of the building will be faced with cement plaster. The plans for this work are now complete and figures are being taken.

Stores—2 story and base, frame, \$3,500. San Francisco. Architect, J. C. Flugger, Crocker Bldg., S. F. Owner, L. P. Hourihan. The building will

Italo Zano'ni, Architect,
San Francisco.

THE NEW LIOLA APARTMENTS
San Francisco

Henry C. Smith, Architect,
San Francisco

contain three modern stores. There will be plate glass display windows. The exterior of the building will be covered with cement plaster. The plans are complete and the architect is now taking figures on the work.

Apartment House—2 story and base, frame, \$15,000. San Francisco. Architect, Eugene & Benward, Metropolis Bldg., S. F. Owner's name withheld. The building will contain about twelve apartments of three and four rooms each and baths. There will be tile heat and wall beds. The interior will be finished in pine with some hardwood floors. The exterior of the building will be covered with shiplap. The plans are complete and figures are being taken.

Residence—2 story and base, frame and brick, \$4,600. San Francisco. Architect, John J. Foley, Monadnock Bldg., S. F. Owner, John O'Connor. The dwelling has been designed for a six-room house. The interior trim will be of pine with hardwood floors throughout. There will be furnace heat and oak grates. The mantels will be of brick or tile. The exterior of the dwelling will be covered with veneered pressed brick and rustic. The plans are complete and figures are being taken.

Residence—2 story and base, frame, \$4,500. Berkeley, Alameda Co., Cal. Architect, John White, 35 Montgomery St., S. F. Owner, Mrs. E. A. Clark. The dwelling will contain seven rooms and bath. The interior trim will be of pine and white enamel. The floors will be of oak. There will be furnace heat and open fire places. The mantels will be of brick or tile. The exterior of the dwelling will be covered with shingles. The plans are complete and figures are being taken.

Bungalow—1 story and base frame, \$2,500. Oakland, Cal. Architect, none. Owner, J. R. Maxwell, Washington and 12th Sts., Oakland. The dwelling will contain five rooms and bath. The trim will be of pine throughout. There will be open fire places. The exterior of the bungalow will be covered with shingles. The plans are in the hands of the owner and he is taking figures on the work.

CITY BIDS OPENED.

HARDWARE FOR THE CITY AND COUNTY JAIL AND ELECTRIC SUPPLIES FOR HOSPITALS THE ONLY WORK OF IMPORTANCE.

Yesterday's meeting of the Board of Public Works was of little importance as far as the opening of bids for city and county work was concerned. The only construction work for which bids were opened was the furnishing of the finish hardware for the City and County Jail, the furnishing of electric wire and electric supplies for the San Francisco Hospital buildings and the bids on three street cleaning machines. The following is a complete list of the bids opened at Wednesday's meeting:

Hardware City and County Jail.	
1. Palace Hardware Co.....	\$2200
2. Joost Bros.....	2050
3. Bennett Bros.....	1747
Furnishing Two Street Cleaning Machines.	
1. A. L. Young Machine Co.....	\$397.50
2. S. S. Smith.....	900.00
3. Austin Western Co.....	

Electric Wiring and Electric Supplies San Francisco Hospital Buildings.

1. John A. Roebblings Co. (1) —; (2) \$926; (3) —.
2. Western Elec. Wire & Supply Co., (1) \$3765.32 (2) \$950.76 (3) —.
3. Elec. Cable Co. (1) \$3109.60 (2) — (3) —.

Contract Awarded.

Hotel—2 story and base, brick and steel, \$70,000. San Francisco. Architect, C. W. Dickey, Oakland Bank of Savings, Oakland. Owners, S. W. Dick & Co. Contractor, P. J. Walker, Monadnock Bldg., S. F. Contract price, \$70,000. Sub-figures are being taken on all parts of the work.

Hotel—6 story and base, brick and steel, \$100,000. San Francisco. Architect, Nathaniel Blaisdell, 255 California St., S. F. Owner, Samuel Knight. Contractors, Van Sant-Houghton, Balboa Bldg., S. F. Contract price, \$98,500. Sub-figures are now being taken on all parts of this contract.

OAKLAND AND ALAMEDA COUNTY.

Church—1 story and base, frame, \$10,000. Fruitvale, Alameda Co., Cal. Architect, H. H. Meyers, Kohl Bldg., S. F. Owners, Fruitvale Methodist Church. The building will be a small temporary structure with a seating capacity of about 350 people. There will be a Sunday school room in connection. The exterior of the building will be covered with rustic. The plans are complete and figures are being taken.

Shop Building—1 story and base, concrete. Cost not stated. Oakland, Cal. Architect, L. F. Hyde, 2754 28th St., Oakland. Owners, Knoxville Iron Works. The building will be 38x75, and has been designed for a general office building for the works. There will be interior finish and heating. The exterior will be faced with cement plaster. The plans are being prepared.

Garage—1 story and base, brick. Cost not stated. Oakland, Cal. Architect, none. Owner, J. B. Jordan, 1302 Broadway, Oakland. The building will be 100x113 feet, and has been designed for a commercial garage. A cement floor will cover the entire area. There will be a machine shop, store rooms and waiting room. The exterior of the building will be faced with pressed brick. The plans are being prepared by a brother of the owner.

Residence—2 story and base, frame, \$4,000. Oakland, Cal. Architect, A. W. Smith, 1004 Broadway. Oakland. Own-

er, F. R. Jordan. The dwelling has been designed for an eight-room house with two bath rooms. The interior trim will be of pine. There will be hardwood floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick or tile. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$5,000. Oakland, Cal. Architect, Noble Newsom, 2610 Durant St., Berkeley. Owner, C. Ratsford. The dwelling will contain eight rooms and baths. The trim will be of pine and hardwood with oak floors in the principal rooms. There will be furnace heat and coal grates. The mantels will be of tile. There will also be considerable tile used in the baths. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Residence—2 story and base, frame, \$10,000. Berkeley, Alameda Co., Cal. Architect, Edward T. Foules, Crocker Bldg., S. F. Owner, Dr. Walter Scott. The dwelling has been mentioned in these columns before. There will be ten living rooms and two baths. The interior finish will be largely of pine and white enamel. There will be furnace heat and open fire places. The mantels will be of brick and tile. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are now complete and figures are being taken.

Residence—2 story and base, frame, \$4,000. Piedmont, Alameda Co., Cal. Architect, Olin S. Grove, 2911 Telegraph Ave., Berkeley. Owner, J. K. Crocker. The dwelling will contain seven rooms and baths. The interior trim will be of pine and hardwood with oak floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick. The exterior of the dwelling will be covered with shingles. The plans are complete and the architect is taking figures on the work.

Residence—2 story and base, frame, \$11,000. Berkeley, Alameda Co., Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, H. L. Johnson. The dwelling has been designed for a twelve-room house with two bath rooms. The interior trim will be of pine, hardwoods and white enamel. There will be furnace heat and open fire places. The mantels will be of tile or brick. The exterior of the dwelling will be covered with cement plaster. The plans are complete and figures will be taken at once.

Residence—2 story and base, frame, \$3,000. Berkeley, Alameda Co., Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, W. F. Cannon. The dwelling will be erected in the Thousand Oaks section of Berkeley, and has been designed for a ten-room house with all modern conveniences. The interior trim will be of pine with hardwood floors in the principal rooms. There will be furnace heat, open fire places and brick or tile mantels. The exterior will be covered with cement plaster on metal lath. The plans are now being prepared.

Residence—3 story and base, frame, \$3,000. Oakland, Cal. Architect, Nels

P. Anderson, 712 Market St., Oakland. Owner, Robert Dunlap. The dwelling will contain about eight rooms and baths. The interior trim will be of pine throughout. There will be attractive brick mantels. There will be furnace heat and coal grates. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Bungalow—1 story and base, frame, \$2,500. Oakland, Cal. Architect, none. Owner, John A. Bischoff, 1353 Channing Way, Berkeley. The bungalow will contain six rooms and bath. The interior trim will be of pine throughout. There will be open fire places with tile or brick mantels. The exterior of the dwelling will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Bungalow—1 story and base, frame, \$2,000. Berkeley, Alameda Co., Cal. Architect, none. Owner, Edward Larmer, 631 Polier St., Oakland. The dwelling will contain five rooms and bath. The trim will be of pine throughout. There will be open fire places and tile mantels. The exterior of the dwelling will be covered with shingles. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$7,000. Oakland, Cal. Architect, O. W. Barnes, 2935 Ashby St., Berkeley. Owner, R. Cushing. The dwelling has been designed for a nine-room house with furnace heat and open fire places. The mantels will be of brick or tile. The interior trim will be of pine throughout. There will be some oak floors. The baths will be tiled. The exterior of the dwelling will be covered with rustic. The plans are complete and figures are being taken.

Cottage—1 story and base, frame, \$2,600. Berkeley, Alameda Co., Cal. Architect, Miss Dora Spencer, 669 11th St., Oakland. Owner, Arthur Edgar. The dwelling will contain five rooms and bath. The interior trim will be of pine throughout. There will be coal grates with tile mantels. The exterior of the house will be covered with rustic. The plans are now out for figures.

Warehouse—1 story, frame, \$5,000. Oakland, Cal. Architect, Robert Grant, 400 10th St., Oakland. Owners, Derby Estate. The building will be erected near the Southern Pacific tracks in Fruitvale. The exterior will be covered with rustic. There will be a shingle roof. The plans are now out for figures.

Factory—2 story and base, frame, \$40,000. Oakland, Cal. Architects, T. D. Newsom & Son, 906 Broadway, Oakland. Owners, Oakland Casket and Undertaking Co. The building has been designed with a large store room and office on the first floor, warehouse on the third and factory on the second floor. There will be a steam heating plant. The exterior of the building will be covered with cement plaster. The plans will be complete and ready for figures about February 15th.

Bungalows—3, 1 story and base, frame, \$2,000 each. Oakland, Cal. Architect, none. Owners, Morgensen Bros., 560 63rd St., Oakland. The dwellings have been designed for five-room houses with baths. The trim will be of pine throughout. There will be some oak floors. There will be fire places and tile mantels. The exteriors of the dwellings will be covered

with shingles. The plans are complete and the work will be done by Day Labor.

Office—1 story and base, concrete. Cost not stated. Oakland, Cal. Engineer Whalen, Mutual Savings Bank Bldg., S. F. Owner, Union Gas Engine Co., Oakland. The building has been designed for a general office for the company. The interior will be finished in pine. There will be a tile roof. The exterior of the structure will be faced with cement plaster. The plans are complete and figures are being taken.

Stores—1 story and base, brick, \$6,000. Berkeley, Alameda Co., Cal. Architect, none. Owner, W. R. Scott, 2718 Regent St., Berkeley. The building has been designed to contain five small stores. The exterior of the building will be faced with pressed brick. The plans are complete and in the hands of the owner who will do the work by Day Labor.

Apartment House—4 story and base, brick and steel, \$75,000. Oakland, Cal. Architect, A. L. Haley, Higgins Bldg., L. A. Owner, J. W. Owen. The building will contain 112 rooms arranged in suites of two rooms each with baths and dressing rooms. There will be steam heat, automatic passenger and a freight elevator, a vacuum cleaning system, refrigerating plant and wall beds. The exterior of the building will be faced with pressed brick and terra cotta. The working drawings are nearly complete.

Theatre—1 story and base, brick and frame, \$5,000. Oakland, Cal. Architect, L. S. Pearson, 2360 Woolsey St., Berkeley. Owner, Mr. Salinger. The building has been designed for a moving picture house. There will be a system of ventilation. The exterior will be covered with cement plaster. The plans are complete and the work will be done by Day Labor.

Town of Concord. Foskett Elworthy to Hoyt Bros. Jan. 7, 1912

SACRAMENTO, STOCKTON & NORTHERN CALIFORNIA.

Church—2 story and base, brick and frame, \$25,000. Oroville, Butte Co., Cal. Architect, C. H. Russell, Humboldt Bank Bldg., S. F. Owners, Oroville Congregational Church. This building has been mentioned here before when the architect was first selected to prepare the plans. After considerable delay funds have been raised for the construction and the architect has been instructed to complete the working drawings as rapidly as possible. The exterior of the building will be faced with pressed brick. Plans will be ready for figures in three weeks.

Hotel—3 story and base, reinforced concrete, \$50,000. Wilfords, Glenn Co., Cal. Architect, C. H. Russell, Humboldt Bank Bldg., S. F. Owners, Wilfords Hotel Co. The plans for a building covering an area of 78x110 feet are being prepared. The structure will contain several stores on the first floor besides the main offices and general lobby of the hotel. There will be in the neighborhood of 100 rooms and baths on the two upper floors. There will be steam heat. The exterior of the building will be faced with pressed brick. The working drawings are now being prepared.

School—3 story and base, brick, \$20,000. North Stockton, San Joaquin Co., Cal. Architect, F. L. Jones, Stockton. Owners, North Stockton School District. The architect has recently been commissioned to prepare plans for this work, and other than the fact that the building will be of brick construction and that it will contain a central heating system, no details can be given. The plans will shortly be approved by the Superintendent of Schools and working drawings will be ordered prepared.

Stores and Offices—1 or 5 story and base, Class A construction, \$100,000. Sacramento, Sacramento Co., Cal. Architect, E. C. Hemmings, Sacramento. Owners, Pacific Gas and Electric Co. The building will occupy a prominent corner at 11th and K streets. The entire structure will be devoted to the purposes of the owners. There will be a large and elaborately finished public room on the first floor. The upper floors will be arranged for the offices of the company. There will be a complete steel frame, with the exterior walls faced with pressed brick and terra cotta. The construction will be fireproof throughout. There will be steam heat and elevator service. The architect has just received the commission to prepare the plans. The working drawings have been started and the detail plans will be completed as rapidly as possible.

FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA.

Hotel alterations—\$10,000. Fresno, Fresno Co., Cal. Architects, A. C. Swartz & Son, Fresno. Owners, Donohoe-Emmons. The work will consist of the alteration of the two upper floors of a building 50x150. Steam heat, lavatories and baths will be installed. The roof will be new. The plans are being prepared.

Bungalow—S. 1 story and base, frame, \$2,500 to \$3,000 each. Fresno, Fresno Co., Cal. Architect, F. M. Chittenden.

tenden. Fresno. Owner's name withheld. The plans for eight dwellings of the bungalow type are being prepared. Each will contain six rooms and bath. The trim will be of pine with some oak floors. There will be open fire places. The exteriors will be covered with shingles, cement plaster on metal lath and rustic. As soon as the plans can be completed the work will be done by Day Labor.

Residence—2 story and base, frame, \$1,000. Lindsay Tulare Co., Cal. Architects, A. C. Swartz & Son, Fresno. Owner, L. C. Haulman. The dwelling will contain seven rooms and bath. The interior trim will be of pine with oak floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick. The exterior of the dwelling will be covered with shingles. The plans are nearly complete and figures will be called for at once.

School—1 story and base, frame. Cost not stated. Cantua School District, Fresno Co., Cal. Architect, none. Owner, Cantua School District, Mrs. C. W. Casholt, Clerk of the Board, care of County Superintendent of Schools, Fresno. The district is now advertising for bids for the construction of a one-story frame school building. The plans can be secured from the County superintendent, Fresno. Bids will be opened on February 3rd.

Stores—1 story and base, brick, \$10,000. Riverdale, Fresno Co., Cal. Architects, A. C. Swartz & Son, Fresno. Owner William Hensen. The building will be 45x65 feet and will contain small stores. The exterior will be faced with pressed brick. There will be plate glass display windows. The plans are being prepared.

Stores and Houses—2 story and base, brick, \$15,000. Fresno, Fresno Co., Cal. Architects, A. C. Swartz & Son, Fresno. Owners, Radin-Kamp. The work is to considerably increase the ground area of the present one-story building and add a second story to the same. The exterior will be faced with buff pressed brick. The plans are complete and figures are being taken.

Stores and Living Apartments—2 story and base, brick. Cost not stated. Mariposa, Kern Co., Cal. Architect, Thomas B. Wiseman Producers' National Bank Bldg., Bakersfield. Owners, Rooms and Price. The building will be 50x80. The first floor will be arranged for several stores with plate glass and copper store fronts. The second floor will be divided into living apartments. The exterior of the building will be faced with pressed brick. The architect is preparing the plans.

Contracts Awarded.

Church—1 story and base, brick and frame, \$25,000. Fowler, Fresno Co., Cal. Architect, A. Burnside Sturges.

Story Bldg., L. A. Owners, Fowler Presbyterian Church. Contractors, Johnson Bros. Kingsburg. Contract price, \$21,700.

LOS ANGELES AND SOUTHERN CALIFORNIA.

Apartment House—2 story and base, frame. Cost not stated. Los Angeles, Cal. Architects, Architectural Designing Co., Grosse Bldg., L. A. Owners, Stanton Bros. The building will contain 90 rooms divided into two and three room apartments with private baths, wall beds and other conveniences. There will be steam heat. The exterior of the building will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Apartment House—3 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architect, E. J. Borgmeyer, Stimson Bldg., L. A. Owner Dr. J. T. Miller. The building will cover an area of 50x128 feet and will contain 66 rooms arranged in two and three room suites with connecting baths. There will be steam heat, vacuum cleaning plant, wall beds and elevator service. The exterior of the structure will be faced with pressed brick. The plans are now being revised and figures will be called for shortly.

Apartment House—3 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architect, A. L. Hale Higgins Bldg., L. A. Owner, R. Horton. The building will contain apartments arranged in suites of two and three rooms each with connecting baths. There will be wall beds, steam heat, a vacuum cleaning system and hardwood interior trim. The exterior of the building will be faced with gray pressed brick. The plans are being prepared and will go out in figures within three weeks.

Apartment House—4 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architects, Train

Williams, Exchange Bldg., L. A. Owner, P. L. Auten. The building will cover an area of 115x149 feet. The interior has been arranged for 63 apartments of the two, three and four room type. There will be steam heat, vacuum cleaning system, wall beds, elevator service and birch interior trim. The exterior of the building will be faced with tapestry brick and Utah stone. The architect is now completing the plans.

Apartment House—2 story and base, brick. Cost not stated. Placentia, Los Angeles Co., Cal. Architect, Alfred F. Priest, Pay Bldg., L. A. Owner, J. M. Gregory. The building will be 80x57½ feet. The interior has been arranged for 13 two-room apartments besides three stores which will occupy the first floor. There will be five bath rooms. The exterior of the building will be faced with pressed brick. The plans are complete and figures are being taken.

Apartment House—3 story and base, frame. Cost not stated. Los Angeles, Cal. Architect, Fred Eiren, Broadway Central Bldg., L. A. Owner, T. E. Shoults. The building will be 40x50 and has been arranged for stores on the first floor and four suites on the upper floors. The exterior will be covered with cement plaster on metal lath. The plans are being prepared.

Piers—2, reinforced concrete, \$157,000. Long Beach, Los Angeles Co., Cal. Engineer, Thomas D. Campbell, Pacific Electric Bldg., L. A. Owners, City of Long Beach. The plans have been approved for two pleasure piers, one 1,850 feet long and the other 1,125 feet. Reinforced concrete piles will be used. The city authorities are now calling for a bond election at once to secure funds for the construction.

Church—1 story and base, frame. Cost not stated. Los Angeles, Cal. Architects, Jeffery & Van Trees, Citizens' National Bank Bldg., L. A. Owners, Normandie Ave. Methodist Church. The building will be 34x70 feet and will contain an auditorium to seat 225 people. There will be Sunday school rooms, parlors, etc. The exterior of the building will be covered with rustic. The architects are now preparing the plans.

Church—1 story and base, frame. \$12,000. Brawley, Imperial Co., Cal. Architect's name not given. Owners represented by F. Burelbach, Brawley. The plans for a small church edifice have been placed in the hands of the pastor, Rev. Burelbach of Brawley, and he is now taking figures for the construction. The exterior of the building will be covered with cement plaster on metal lath. Bids will be opened on January 29th.

Library—1 story and base, brick. \$10,000. Pomona, Los Angeles Co., Cal. Architect, Robert Orr, Pomona. Owners, City of Pomona. This work has been mentioned here before. The second set of figures for the work have been opened and found too high. The plans will again be revised and figures taken.

Garage—1 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, R. B. Young & Son, Lankershim Bldg., L. A. Owner, M. A. Warner, Shettler. The building will be 50x150 feet, and has been arranged for two separate garages with two display rooms and two shop departments. There will be a cement floor, pressed brick exterior and plate glass windows. The

architects have completed the plans and are taking figures.

Hotel—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Noonan & Kyser, Wright & Calender Bldg., L. A. Owner, Mrs. H. W. Little. The building will be 123x104 feet and will contain 50 rooms on the upper floors besides stores on the first floor. There will be a number of baths, steam heat and lavatory in each room. The exterior of the building will be faced with enameled brick. The plans are complete and figures are being taken.

Hotel—2 story and base, brick. Cost not stated. San Fernando, Los Angeles Co., Cal. Architect, Albert C. Martin, Higgins Bldg., L. A. Owner, Henry Flynn. The first floor will contain stores. There will be fifteen rooms on the second floor. Steam heat, baths and a freight elevator will be installed. The exterior of the building will be faced with glazed and pressed brick. The plans are being prepared.

Association Building—6 story and base, reinforced concrete. \$109,000. San Diego, Cal. Architect, George William Ke'ham, Crocker Bldg., S. F., associated with Architects Bristow & Lyman, San Diego. Owners, San Diego Young Men's Christian Association. This work was mentioned here when the selection of an architect was first announced. The working drawings have been completed and will be put out for figures at once.

Stores and Offices—2 story and base, brick. Cost not stated. Pasadena, Los Angeles Co., Cal. Architect, C. W. Buchanan, 65 North Raymond Ave., Pasadena. Owner, W. C. Mason. The building will be 75x150 feet. The building has been designed for a retail furniture company. A large two-story brick warehouse, 100x125, will be erected in the rear. The main building will be faced with pressed brick. The architect is preparing plans.

Theatre and Stores—3 story and base, brick. \$10,000. Pomona, Los Angeles Co., Cal. Architect, Robert Orr, Pomona. Owners Pomona Opera House Co. This work has been mentioned here before when the plans were first put out for figures. The plans have been slightly revised and new figures will be called for in the course of the next few weeks. There will be stores in the front portion of the first floor. The theatre will have a seating capacity of 800 people. The exterior will be faced with pressed brick.

Association Building—2 story and base, brick and steel. \$60,000. San Bernardino, San Bernardino Co., Cal. Architects, Jeffery & Van Trees, Citizens' National Bank Bldg., L. A. Owners, San Bernardino Young Men's Christian Association. The architects have just been commissioned to prepare the plans for this work and no details of the construction can be obtained at this time.

City Hall—2 story and base, brick and concrete. Cost not stated. Corona, Riverside Co., Cal. Architect, Leo Kroonen, 7th and Crawford Sts., L. A. Owners, City of Corona. The building will be 62x82. The floor plans provide for the housing of the fire department, jail in the basement, council chamber and city offices. The exterior will be faced with cement plaster on brick. There will be a tile roof. There will be concrete vaults. The plans are complete and figures will be called for shortly.

Lodge Hall—3 story and base, brick. \$10,000. Long Beach, Los Angeles Co., Cal. Architects, Austin & Sedgwick, 18 Locust Ave., Long Beach. Owners, Long Beach Elks' Hall Association. The plans from the eastern designers of this building have been placed in the hands of the above-mentioned firm to be carried out. Bids for the construction will not be taken. Figures will be opened on February 6th.

Residence—2 story and base, frame. Cost not stated. Alhambra, Los Angeles Co., Cal. Architect, Edward C. Taylor, Consolidated Realty Bldg., L. A. Owner, C. Kierman. The dwelling will contain twelve rooms and four baths. The interior trim will be of pine and mahogany with oak floors throughout. The mantels will be of tile and considerable tile will be used in the baths. There will be furnace heat. The exterior will be covered with shiplap. The plans are complete and figures are being taken.

Residence—2 story and base, frame. Cost not stated. Los Angeles, Cal. Architect, Frank M. Tyler, Union Trust Bldg., L. A. Owner, G. F. Sloan. The dwelling will contain twelve rooms and three baths. The interior trim will be of pine, white enamel and mahogany. There will be tile mantels and tile floors in two of the bath rooms. There will be furnace heat. The exterior will be covered with brick veneer and cement plaster. The plans will be completed shortly and the work will be done by Day Labor.

Residence—2 story, attic and base, frame. Cost not stated. Los Angeles, Cal. Architects, Edelman & Harnett, Blanchard Bldg., L. A. Owner, Otto Sweet. The dwelling has been designed for a fifteen-room house with several baths. The interior trim will be of hardwood on the first floor and white enamel on the second. Hardwood floors will be used throughout. There will be a hot water heating system. Tile will be used in the baths and mantels. The exterior will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

School—2 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Eager & Eager, Story Bldg., L. A. Owners, City of Los Angeles. The architects have just been commissioned by the School Board to prepare plans for a two-story, eight-room building. The architects have not submitted plans to the Board as yet, and details of the construction cannot be given at this time.

School—2 story and base, reinforced concrete. \$25,000. Cucamonga, San Bernardino Co., Cal. Architect, Scott Quintin, Story Bldg., L. A. Owners, Cucamonga School District. The building will contain an auditorium and 12 class rooms. The construction is to be fireproof throughout. The roof will be of tile. The exterior of the building will be faced with cement plaster. The architect is preparing the working drawings.

Water and Sewer System—\$90,000 and \$100,000. Fullerton, Orange Co., Cal. Engineers, S. O. & Robson, Nevada Bank Bldg., S. F., associated with Vivian G. Barr, L. A. Owners, City of Fullerton. The City Trustees have received a report from the engineers which contains the estimates on both the proposed municipal water system and the sewer system. The former

will, in the opinion of the engineers, cost \$30,000 and the latter \$100,000. The matter of bonds is to be taken up at once.

Reservoir—Reinforced concrete. Cost not stated. Moorpark, Ventura Co., Cal. Architect, Albert C. Martin. Higgins Bldg., L. A. Owner, H. K. Snow. The reservoir will be 110 feet in diameter and 8 feet deep. The total contents is estimated at 30,000 barrels. There will be twisted bar and wire fabric reinforcement. Plans are complete and figures are being taken.

Contracts Awarded.

Bridge—Reinforced concrete, \$35,000. Los Angeles, Cal. City Engineer Los Angeles. Owners, City of Los Angeles. Contractor, Robert Boyle, 223 West Second St., L. A. Contract price, \$34,431.

Church—1 story and base, frame, \$10,000. Venice, Los Angeles Co., Cal. Architect, H. M. Patterson, O. T. Johnson Bldg., L. A. Owners, First Church of Christ, Venice. Contractors, Frank Graves & Son, Alhambra. Contract price, \$7,000. Note. This contract does not include the painting or heating or plumbing.

Factory Building—2 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, Scott Luntin, Story Bldg., L. A. Owners, Los Angeles Can Co. Contractor, H. Whitaker, 3202 North Gifford Ave., L. A. Contract price not stated. The building will be 127x150. New plans are being prepared by the architect and work will be started as soon as these are completed.

Hotel and Stores—3 story and base, brick, \$25,000. Los Angeles, Cal. Architects, Lanthwaite & Plaberty, 1 W. Hellman Bldg., L. A. Owner, Joseph R. Jick, Contractor, J. F. Atkinson, Story Bldg., L. A. Contract price, \$25,000.

School Addition—2 story and base, reinforced concrete, \$20,000. Hollywood, Los Angeles Co., Cal. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, Hollywood School District. Contractor, W. S. McAbee, 605 Pasadena Ave., Azusa. Contract price, \$19,566.

Hydraulic and Electric Machinery—\$283,000. Los Angeles, Cal. City Engineer, Los Angeles. Owners City of Los Angeles. Contractors, Union Iron Works, S. F. Hydraulic machinery. Contract price, \$191,000. Westinghouse Electrical Mfg. Co., electrical machinery, \$90,167.

Stores—10 story and base, Class A construction. Cost not stated. Los Angeles, Cal. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owners, Arthur Letts and J. G. Bullock. Contractor, Paul Haupt, Central Bldg., L. A. The architects are preparing the plans and the contract will be on the percentage basis. No details of the structure are being given to the public.

SEATTLE AND WASHINGTON.

Grain Elevators—2 story, frame, \$50,000. Seattle, Wash. Architect, P. S. Masters, 141 1/2 Massachusetts St., Seattle. Owners, J. S. Bros. Milling Co. These two buildings will cover an area of 120x435 feet. The construction will be of heavy frame. The architect has the plans completed and is now taking figures for furnishing lumber, sheet metal, hardware, electric work and painting.

Warehouse—2 story and base, reinforced concrete. Cost not stated. Aberdeen, Wash. Architects, McNaughton & Raymond, Portland. Owners, Fidelity Investment Co. This work has been mentioned here before when the plans were first started. The drawings are now complete and figures will be opened on February 5th for the construction. The building will be 100x120 feet. The exterior will be faced with cement plaster.

Factory Building—2 story and base, reinforced concrete, \$100,000. Sumner, Wash. Engineering Dept. Fleischmann Co. This work was mentioned here recently when it was first announced that the company would erect a western plant. Fred E. Clark has been appointed western manager, and will make his headquarters at 617 Pine St., Seattle. Plans and specifications are now in his hands and he will have full charge of letting all contracts.

Hotel—3 story and base, brick and concrete, \$250,000. Green River Springs, Wash. Architects Kingsley & Eastman, Empire Bldg., Seattle. Owners, Green River Springs Hotel Co. The main building will be 200 feet square and will contain in the neighborhood of 150 guest rooms. There will be three out buildings to contain the garage, laundry and stables. The main structure will be modern in every particular. The exterior will probably be faced with pressed brick. The working drawings are being prepared.

Hotel—8 story and base, Class A construction, \$100,000. Helena, Mont. Architects, Cass Gilbert, New York, and H. Carsley, Helena, Mont., associated. Owner's name withheld. The architects have just been commissioned to prepare the plans for this building, and no details of the construction can be learned at this time.

Terminal Sheds—Concrete, \$50,600. Auburn, Wash. Engineering Dept. Northern Pacific R. R. Co., Tacoma. Owners, Northern Pacific R. R. Co. Plans are complete and figures are now being taken by the Tacoma office of the Northern Pacific Co. for the construction of the terminal sheds which are to be located in Auburn. The work will be entirely of reinforced concrete.

School—2 story and base, reinforced concrete, \$65,000. Ellensburg, Wash. Architects, Stephens & Stephens, New York Bldg., Seattle. Owner, City of Ellensburg. This work was reported here last week when the figures were rejected. The architects state that revised plans will be ready for figures by February 1st.

Stores and Offices—10 story and base, Class A construction, \$450,000. Vancouver, B. C. Architect, W. Marbury Somervell, White Bldg., Seattle. Owners, Birks & Sons. The building will cover an area of 100x120 feet. There will be a complete steel frame and exterior walls of brick. The structure will be faced with pressed brick and terra cotta. The working drawings have just been started and details of the construction cannot be given as yet.

Contracts Awarded.

Bridge—Steel span, \$14,000. Auburn, Wash. Engineer, County Surveyor Kings County. Owners, Kings County. Contractor, P. J. McHugh, 3rd and Mercer Sts., Seattle. Contract price, \$13,310.62.

PORTLAND AND OREGON.

Apartment and stores—3 story and base, reinforced concrete. Cost not stated. Portland, Ore. Architects, Tobey & Mills, Portland. Owner, George T. Moore. The building will be 33x4x100. The first floor has been arranged for stores. The upper floors will contain seven suites of three rooms each with connecting baths to the floor. There will be steam heat. The exterior of the building will be faced with cement plaster. The figures are in the hands of the architects and a contract will be awarded at once.

Apartment House—2 story and base, brick. Cost not stated. Portland, Ore. Architect, W. H. Cowan, Portland. Owners, M. & C. Linebaugh. The building will be 50x100 and will contain 22 apartments of two rooms and bath each. There will be steam heat and wall beds. The exterior of the building will be faced with pressed brick. The plans are complete and figures are being taken.

Apartment House—4 story and base, brick and steel. Cost not stated. Portland, Ore. Architects, Bridges & Webster, Portland. Owner, M. M. Mayo. The building will be 50x120 feet. The interior has been arranged for four three-room apartments and four four-room apartments to the floor. There will be steam heat, elevator service, vacuum cleaning system, wall beds and hardwood trim. The exterior of the structure will be faced with pressed brick. The working drawings are now being prepared and will go out for figures within three weeks.

Hotel and Stores—4 story and base, brick and steel, \$10,000. Portland, Ore. Architects, Bennes & Hendricks, Portland. Owners, Fleckenstein-Meyer Co. The building will be 50x100. The first floor will be arranged for stores. The upper three floors will each be divided into 25 rooms and several baths. There will be steam heat, elevator service and running water in each room. The exterior of the building will be faced with pressed brick and terra cotta. The plans are complete and bids will be opened about January 28th.

Theatre—5 story and base, brick and steel, \$300,000. Portland, Ore. Architects Kingsley & Eastman, Empire Bldg., Seattle. Owners, Sullivan and Considine Circuit. The building will be 100x150 feet. The plans for the foundation are complete and Mr. Decamp, who will have charge of the construction, is now tearing down the present buildings. All sub-figures will be taken through Mr. Decamp's office, and he may be addressed in care of the owners at Portland.

Contracts Awarded.

BONDING COMPANIES TO COMPLY WITH THE PROVISIONS OF THE NEW LAEN LAW.

California Building Law Association Secures List of Companies Who Promise to Issue Valid Bonds.

Owing to the fact that some of the bonding companies had been furnishing bonds to owners on the old forms of completion bonds and there was a serious question as to the owners' protection thereunder the California Building Law Association, through its secretary, has written a letter to the different companies and has secured their promise to comply with the form of the statute. The letter and list of companies follow.

San Francisco, Cal.

Dear Sir:

Enclosed please find a list of Bonding Companies that have assured us that they will furnish bonds in conformity with the new law. The forms they submit vary in some particulars but they all contain the essential clause required by the 50% bond clause of Section 1183.

We also enclose our form of the 50% bond as drawn by the late Alex. G. Eells, which should be used in all cases when you desire to avail yourself of the 50% bond provision of Section 1183. These forms may be had in quantities at the office of the Daily Pacific Builder, 1325 Mission Street.

When the new law was passed we advised you that you would protect your clients better if you would disregard the 50% bond and in lieu thereof require a plain commercial guarantee like the typewritten copy enclosed herewith. This is at once a bond in any amount the exigencies of the case may require and is free from any statutory or other legal technicalities, and in case of trouble the owner can recover from the contractor and his bondsmen just as if it were a promissory note.

Please read Section 1193 of the new law and observe how well the owner is protected.

Thanking you for your interest in this matter and with best wishes, I am

Yours respectfully,

W. S. SCOTT, Secretary,

CALIFORNIA BUILDING LAW ASSOCIATION.

List of Bonding Companies That Have Promised The California Building Law Association That They Will Issue None But Valid Surety Bonds.

Massachusetts Bonding & Insurance Co., Robertson & Hall, Mgrs., 601 1st National Bank Bldg.

Pacific Coast Casualty Co., Marshall Frank, Mgr., 416 Montgomery St.

American Surety Co. of New York, Brantley W. Dobbins, Mgr., Metropolitan Bank Bldg.

Equitable Surety Co., A. P. Redding, Mgr., 412 Crocker Bldg.

Fidelity & Deposit Co. of Maryland, James W. Moyle, Dist. Mgr., Mills Bldg.

Hilltop Surety Co. of Chicago, C. T. Hughes, Gen. Agt., 920 Metropolitan Bank Bldg.

National Surety Co. of New York, Frank L. Gilbert, Coast Mgr., 401 Sansome St.

American Surety Co. of New York, Wm. P. Burke & Co. Agts., 1st National Bank Bldg.

Southwestern Surety Insurance Co., Lloyd & Spengler, Gen. Agts., 315 1st National Bank Bldg.

American Bonding Co. of Baltimore, C. K. Bennett, Mgr., Alaska Commercial Bldg.

Maryland Casualty Co., Arthur H. Connolly, Mgr., Surety Dept., Kohl Bldg.

Empire State Surety Co., Jas. C. Hayburn, Gen. Agt., 573 California St.

PAINT FOR TIN ROOFS.

A practical painter writes to The Metalworker as follows:

"The use of white lead in connection with metallic paints for the protection of tin roofs is a waste of money. It certainly does not add to the permanency of the coating nor to its efficiency as a rust retardant. The small amount of acid (?) which the lead may contain would probably not injure the tin, but as its use would add nothing to the function of good roof paint, it may as well be left out of the mixture. For instance, in my own work I use a very high grade of iron-ore oxide and pure linseed oil and I believe there is nothing to equal it as a safe, durable protection for tin roofs. The ordinary metallic paints when properly mixed will give general satisfaction and can always be relied upon as to freedom from any injurious substance. Eight or nine pounds of the ordinary metallic ore mixed in a gallon of pure linseed oil will probably prove a good rule to follow—the use of a small amount of dryer (best Japan) being optional and dependent on climatic conditions, temperature, etc. A half pint of dryer to the gallon is enough, as a slow drying paint will set hard and tough and will not crack. The paint, however, to give best results, should be thoroughly mixed and allowed to stand in the shop for a week or ten days and should be well stirred each day. No paint should ever be mixed "on the job." It should be remembered also that proper application is necessary to assure best results. I believe the old-fashioned iron ore oxide and pure linseed oil used by our forefathers has never had a satisfactory substitute. It has stood the test."

SPILLWAY DAM AT GATUN.

Work of Gathering Accessory Material Has Begun.

Sheet piling and accessory materials are being collected at the Spillway of Gatun dam for offering off parts of the channel while the base of the spillway dam is being built.

In laying the floor above and below the dam no concrete was placed under the downstream toe and a space 40 feet wide and reaching elevation 200 extends across the present channel of flow. Silt and debris will have to be cleaned from this space before the concrete forming the downstream toe of the dam can be placed.

In the first stage of the operations stop plank will be placed to rest against the upstream side of the piers for a little over half across the channel, beginning at the east side; a sheet

pile cofferdam will be driven across the 40-foot space and a cofferdam filled with clay and resting on the concrete floor below the dam will complete the closure. The space enclosed will be pumped out and cleaned and the laying of concrete will follow.

The piling will be driven with a steam hammer with leads suspended from the boom of a stiff-legged derrick, resting on one of the piers. Derricks will also be used in placing concrete, which will be supplied in two cubic yard buckets from the mixing plant 4,000 feet away.

ANCIENT REINFORCED CONCRETE.

A recent examination of the roof of one of the numerous ancient tombs along the Aprian Way, between Rome and Brindisi, Italy, revealed the construction of a roof slab made of hydraulic cement, reinforced with bronze rods crossing each other at right angles, thus forming a lattice reinforcement.

ECUADOR.

Water Supply, Sewerage, and Paving Works—Material for Quay Construction.

Relative to proposed water supply, drainage, and sewage works at Guayaquil, Ecuador, mentioned in Daily Consular and Trade Reports for November 11, 1911 the British consul at Quito reports the publication of a congressional decree authorizing the President of the Republic to contract with M. Edmund Coignet for the placing of a loan of 50,000,000 francs (\$3,650,000), to be issued at 85. Two-fifths of the proceeds are to be used for the sewerage and paving of Guayaquil, and the rest for water supply works, the construction of a new quay, and the repayment of the loan made to the municipality of that town by the Banco Territorial.

SPAIN.

(From Consul General Henry H. Morgan, Barcelona.)

Railroad Building.

A concession has been applied for by Cortes, Guillen & Co., for building and operating secondary railways with steam traction from Caceres to Trujillo, 27 miles, and from Trujillo to Logrosan, 21 miles in the Province of Caceres. The country to be traversed is very mountainous.

Tunnel Construction.

The Official Gazette of Madrid announces the award of constructing a tunnel near Tossa, Province of Gerona, to the Sociedad Corina, Retuarta y Brunet, of Sargosa. The tunnel will be constructed in connection with building a 23-mile railroad from Ripoll to Puigcerda, both in Province of Gerona. The estimated cost is \$1,117,260.

Editorial Comment.

"The whole country is saturated with latent prosperity," said Theodore N. Vail, president of the American Telephone and Telegraph Company, in reply to a request for his opinion concerning business prospects. It is a fine expression though not illuminating. Always there is a lot of latent prosperity lying around, in times of great trade activity as well as in periods of depression. Real prosperity is the rapid creation of wealth through service of some sort to the community and latent prosperity is the unused opportunities lying all about, for the creation of wealth.

Prosperity like morality is a relative term. Business in 1911 produced less profit than in 1910 to most men and therefore it is not considered a prosperous year. Yet 1911 made a boom record in comparison with conditions prevailing fifteen years ago, and the aggregate volume of mercantile and manufacturing transactions in the United States probably was greater in 1911 than in any former year, and most men of business would have been well satisfied with its returns if they had not experienced several years recently which produced greater net profits than last year.

There is no question about the unlimited possibilities of trade and industry in the United States and any halt that occurs in the steady expansion of business must be due to temporary causes and artificial conditions. Prosperity exists only when there is an expanding demand for the necessities and luxuries which keeps merchants active, factories busy, railroad traffic at full flood, the farming industry remunerative and labor fully employed.

An economic condition which enables the masses of people to lift their scale of living by acquiring the means for living in better houses, wearing better clothes, eating better food and enjoying more comfort and more pleasures, will necessarily produce an immense expansion in all trade and industry. Therefore a sound economic reason exists for a social readjustment whereby there shall be a more equitable distribution of the combined products of capital and labor. That is the most effective way to enliven latent prosperity.

The San Francisco Call seems to be much concerned as to the silence of Colonel Roosevelt as to his probable candidacy for president. It takes occasion to ironically speak of his "infinite variety" and to cast some deprecating allusions upon the boom of Senator La Follette. Concluding by saying:

"Meanwhile the quiet man in the White House goes his way, equal to

either fortune and doing the work next to his hand, regardless of politics and confident in the strong common sense of the American people to make up a just verdict."

Which shows the infinite variety of the Call in following the lead of the political machine.

If there ever was a president who tried to carry water on both shoulders and played the political game for all it is worth, that president is the one in the White House at present.

It is somewhat like that paper's great noise about bringing the old Liberty Bell to San Francisco for a symbol of patriotism and at the same time advocating the idea of higher criticism of the State University which holds that the only cause of separation which the colonists had was that of ineptability. If the old Liberty Bell is not an unmeaning symbol it means that the legend which it bears, "Proclaim liberty throughout all the land to all the inhabitants thereof" was a real and living sentiment in the days of 1776; that the men who devoted themselves to the cause of liberty at that time were in deadly earnest, that they were actuated by the highest motives of patriotism and that there was a real and tangible enthusiasm for the principles upon which this republic was founded. It is this idea and this enthusiasm for the right of equality before the law that leads the progressives of today to turn to such men as La Follette and Roosevelt for leadership.

At a meeting in Los Angeles last week E. O. McCormick of the Southern Pacific Company in an address on immigration presented some interesting figures as to the demand of the various counties of California for men. According to the figures there was a demand by the several counties at the time for 10,050 men in the state, that is unskilled laborers.

Some counties had no demand at all. The following list of figures was submitted from the different counties: Fresno, 2550; Sonoma, 1600; San Joaquin, 1620; Solano, 670; Tulare, 450; Kern, 450; Merced, 425; Inyo, 400; Orange, 300; Sierra, 300; Kings, 250; Lassen, 250; Plumas, 250; Monterey, 200; Stanislaus, 150; San Bernardino, 125; Napa, 100; Humboldt, 50; Santa Barbara, 50; Riverside, 50; Ventura, 30; Del Norte, 25; San Benito, 25; Total 10,050. All the other counties reported no jobs available.

Of course this did not take in the skilled trades, the man of special training or the man with money.

California has land and opportunity for the man of small or large capital. And further as the development increases so in an equal ratio increases the demand for all kinds of labor.

Joseph Aspdin, Leeds England, Given Credit As First Inventor of Portland Cement.

BY ALFRED JOHNSON IN THE "CEMENT WORLD."

It is extremely regrettable that anything savoring of personal animosity has ever entered into the discussion of a question such as this. The facts, of themselves, settle the issue; and the verdict of posterity, in the light of these facts, must finally and permanently award the crown to the humble bricklayer and builder of Leeds, upon whose brow it rested undisturbed until the attempt was made to snatch it away a generation or so after his death. The grave of Joseph Aspdin, in the little cemetery of St. John's Church, Wakefield, in the West Riding of Yorkshire, England, is sacred ground to every student of cement. For this fan was the originator of the Portland cement industry, though neither he nor any other man could claim the exclusive honor of bringing to perfection a product whose standardization has been essentially an evolution and which is still in process of development.

Joseph Aspdin's only serious dispute for the honor of the original invention was Isaac Charles Johnson, of Gravesend, founder of the English cement manufacturing firm of I. C. Johnson & Co. In the Cement World for February, 1911, in an article entitled "One Hundred Years of Portland Cement," appeared a discussion of the relative merits of the opposing claims, with a citation of pertinent historic data throwing ample light on the hitherto somewhat befuddled dispute. The whole controversy, however, has recently been revived by the publication in Cement Age (New York), for December, 1911, of certain correspondence transmitted by Mr. Johnson in June, 1911, only a few months before his death, which occurred on November 30, 1911. In this correspondence Mr. Johnson renewed his claims in spite of what his contemporaries in England took to be a disclaimer. An analysis, however, of this correspondence brings to light absolutely nothing new in the shape of facts that have any bearing on the case.

Joseph Aspdin died in 1855, thirty-one years after taking out his patent for Portland cement; and he had slept in his grave for half a century before Mr. I. C. Johnson began to publish himself as the original inventor.

In June, 1911, Mr. Johnson, his attention being called to a published statement that he had retracted his claim wrote to Cement Age, saying: "I have never retracted anything that I claim." In this connection, however, a significant interest attaches to the following passage from pages 83 and 94 of the February, 1911, number of Concrete and Constructional Engineering, the well-known standard English publication devoted to the Cement Industry:

"The history of Portland cement since its invention by Mr. Aspdin about the year 1824 has yet to be written in detail. . . . Hitherto Roman cement had held the field. This cement, as is

well known, is what is called 'natural' cement, while Portland cement is called 'artificial'—that is, it is based on the idea which occurred to its inventor that the ingredients of which Roman cement was composed might be artificially mixed in such proportions as to ensure greater strength and hydraulicity. The mere suggestion soon led to experiment and research in this direction, with the result that by degrees Portland cement was improved in quality and the methods of its manufacture emerged from their primitive crudity. . . .

In the middle of the last century, Mr. Johnson took his share in working out these improvements and founded the firm which bears his name. In several newspapers it has been said that he was the inventor, but we are glad to see that he has very properly disclaimed this mistaken statement."

And The Building News (London), another standard technical paper devoted to Architecture and the Building Industry in England, in its issue of December 8, 1911, commenting on the death of Mr. Johnson, says:

"The late Mr. Isaac C. Johnson was long associated with the cement industry, but was not, as the daily papers asserted, 'the inventor of Portland cement.' Aspdin was the first to erect a mill for the manufacture, on a commercial scale, of cement produced from an artificial mixture of calcareous and argillaceous raw materials, and he gave it the name of 'Portland.' He obtained a patent for his invention in 1824, when Mr. Johnson was a boy of thirteen. Portland cement as it is known today, is undoubtedly a vastly superior article to that produced by Aspdin; but this has been the result of countless experiments and investigations made by a large number of people, among whom Mr. I. C. Johnson was one."

In his letter to Cement Age, Mr. Johnson has great stress upon the high quality of his cement, pointing out that it was used in large quantities by the French Government, which set up tests of it as a standard of quality for all future supplies.

"So I can fairly claim to be," says he, "the first manufacturer of a cement that would pass the test of the exacting engineers of British and foreign governments."

This statement apparently, must have been made in forgetfulness or ignorance of the fact, which is on record, that large quantities of Aspdin's cement were used by both the French and Russian governments for harbor works, and were so used only after passing tests satisfactory to the government engineers. And on the Thames Tunnel, instead of being used merely to repair a break, as Mr. Johnson's correspondence would imply, Aspdin's cement was thoroughly tested by Sir Isambard Brunel, the engineer and constructor of the tunnel, who found it "three times stronger than any other cement then known to the public." And although it cost at that

time from 20 to 22 shillings per cask, besides the carriage to London, Brunel determined (notwithstanding his ability to procure "Roman" at 12 shillings per cask delivered on the spot) to adapt Aspdin's Portland cement as the chief material of construction. Many other official and "exacting" tests of Aspdin's cement, for both tensile and compressive strength, were made; and at the great Industrial Exhibition of 1851, after experimental tests before eminent engineers constituting the Jury of Class 27, Aspdin's Portland cement was awarded the Prize Medal. A description of the methods of testing in those days, with diagrams of the apparatus used and records of the results, forms interesting reading, especially for comparative study with latter-day methods; and will be found in Volume IV of "Radford's Cyclopaedia of Cement Construction" (published by the Radford Architectural Company, Chicago, Ill.).

As supporting his claims, Mr. I. C. Johnson also lays great stress on an article written by the late Dr. Wilhelm Michaelis in Tonindustrie-Zeitung (Berlin) for March 25, 1905, to the effect that "the contention that J. Aspdin was the discoverer of Portland cement cannot be maintained." Mr. Johnson himself, as acknowledged by its author, was largely the source of information upon which the article in question was based. "English technical literature," prior to that date, and "especially that of the first half of last century," referred to by Dr. Michaelis, has practically nothing to say on the subject; and Mr. Johnson himself, in January, 1909, writing to the publisher of his "Brief History of Cements" and agreeing to furnish the historical data embodied in that work, said: "I am the only person that can give it."

As bearing on the much dwelt-upon and crucial question of the uniform reliability and high quality of the cement developed by Mr. Johnson, this article makes the following significant admission:

"About 1845, the Portland cement manufacture began in England to make progress, but for several years thereafter it was carried on in an empirical manner—that is, by what is in England called 'rule of thumb.' The circumstance alone that the chalk and clay in England are in a high degree regular in quality rendered it possible under such conditions to produce a cement sufficiently uniform to be reliable. Even in the beginning of the 'seventies' there was as good as no chemical supervision in the English cement works."

In other words quality depended upon a chance uniformity of raw material. A true Portland cement is not made under such conditions; and the statement reflects to some extent upon Johnson's as well as upon Aspdin's product.

The fact of the matter is that the manufacture of a perfectly uniform and dependable Portland cement is a problem of which only the very latest

technical and scientific research is now approximating a final solution. No one ever claimed it for the Asplins, father or son; and no one can justly claim it for Mr. Johnson. It was a problem beyond them—beyond any individual. In fact—one for future generations to work out. There neither are, nor can be, any universally applicable formulae insuring an accurate, scientific determination of the relative proportions of ingredients and the degree of temperature necessary to secure an absolute uniform and reliable product. Since a wide range of raw materials may be used in the manufacture (limestone, marl, cement rock, clay, marble, shale, slate, slag, etc., together with the addition of gypsum or other material to regulate activity), the problem is one that has to be separately determined for each plant; and not only that, but, in the regular working of any plant, laboratory determinations have to be made daily to insure a constant conformity to standard requirements.

All this detracts not one whit from the important contributions which Mr. L. C. Johnson made, in the forties and later, toward the regulation and perfection of the processes of cement manufacture. It was he who first emphatically brought to the world's attention the need for such regulation by careful methods in the proportioning of ingredients—a point of vital importance. But it was the achievement of Joseph Asplin which started, in England, the whole train of subsequent development along the line of the commercial production of hydraulic cements from artificial mixtures.

Strangely enough, in the correspondence transmitted to Cement Age, already referred to, Mr. Johnson devotes considerable space to a rather quixotic attack upon the personality and business methods of William Asplin, in an endeavor to show him up as unworthy of being honored with a monument as the inventor of Portland cement. It is true that William Asplin, who was a son of the original patentee, had a "hard row to hoe" in the face of the methods adopted by his competitors; he may have been a hard man to get along with in a business way; his ambitious projects exceeded his financial abilities so that he was finally imprisoned for debt (a thing uncommon now only because the laws have changed), and he died in voluntary exile. But none of this is to the point; for no one has ever claimed William Asplin to be the inventor of Portland cement, or has proposed the erection of a monument to him as such.

It is to Joseph Asplin, father of William, that the honor of the original invention rightfully belongs. The inscription on his tombstone can still be plainly read:

Sacred

to the memory of the late Joseph Asplin of this Town (inventor of the Patent Portland Cement) who departed this life on the 20th day of March, 1855.

Aged 76 Years.

For about fifty years the title here given to Joseph Asplin remained unquestioned; and an impartial consideration of the facts will continue this title unto him forever. He was the

first man on record to conceive the idea that a hydraulic cement might be developed from an artificial mixture; and he was the first one actually to produce such a cement, after experiment, by artificially mixing limy and clayey ingredients, burning to a clinker, and then grinding—the essential method of making Portland cement to this day. He originated the name "Portland cement"; and the first patent ever issued for a hydraulic cement known under that name was granted him under royal seal, October 21, 1824. Although his product was no doubt far inferior in strength and uniformity of quality to the Portlands of the present time, yet it is a matter of record that Asplin's cement was able to demonstrate to engineers its great superiority over the best natural cements then made, by satisfactorily passing many tests that were "exacting" according to the engineering standards of those days; and this cement not only received the honored recognition of engineers of high authority, but of foreign governments as well.

Joseph Asplin needs no monument. His sufficient monument is the great industry to which he gave the original stimulus—an industry, which is teaching the world a new lesson of structural and hygienic regeneration, and which will lay all future generations of mankind under the tribute of indebtedness.

FIRST REINFORCED CONCRETE PIER IN THE PACIFIC.

Noteworthy Structure Recently Built at Santa Monica, Southern California.

By E. P. Ratley.

News of Santa Monica's concrete pier, now fully completed at the foot of Colorado avenue, has traveled around the world. From other continents and other Coast States, inquiries for the details of such a unique structure are reaching the contractor. In such numbers that he is tempted to employ a secretary whose sole duty shall be to answer questions concerning the pier.

While concrete has been used before in pier building, this is the first time that a reinforced concrete wharf has been built into the Pacific Ocean. The greatest confidence is expressed in its ability to stand the worst storms of the bay. Thus far it has made good all promises.

Extending into the ocean for a distance of 1,600 feet, with a width of 30 feet, this structure of reinforced concrete is already proving a great magnet. It is attracting fishermen by the thousand, and, unless all signs fail, it bids fair to be an important factor in the rehabilitation of the whole North Beach.

It is the only pier of the kind in the country. No wood has been used in its construction, even the piles, floor, struts, and girders being of concrete. It is calculated to endure for ages, as the drenched treads will find nothing about it upon which to feed. It will afford a favorable trip for automobile pleasure parties, as the approach is over a paved avenue from the mesa on which the city lies. The pier has

cost over \$115,000, and has been more than a year in building.

The style of construction being new, the contractors found themselves almost daily facing engineering difficulties of a trying nature. At first great boulders were encountered in the bed of the ocean when it was sought to sink the "battered trees" into the sand. These obstructions had to be removed and this was accomplished by the jettison of a stream of water about the great stones thus rendering it possible to roll them out of the way. At another time the stone sticks would drop into a strata of quicksand. It seemed as if this yielding material was without bottom; but in every case the piles came to solid foundation before the required depth had been reached.

In only one instance did the builders find it impossible to roll boulders out of the way and to sink the pile to the depth desired. This one impediment could not be removed, and there was nothing to do but to permit the pile to pile to rest upon the obstruction. Before this was done, however, ten barrels of liquid cement were forced by hydraulic pressure into the sand at the foot of the pile, and the nest of boulders.

This work was done by the city authorities of Santa Monica, and is primarily for the purpose of carrying the outfall pipe from the new sewer system of that city.

Hundreds of concrete piles were used in the construction work, ranging all the way from 10 to 70 feet in length. In diameter they vary from 14 to 22 inches, the first five hundred being of 14-inch, the second section of 18-inch, and the third of 22-inch diameter—a total of 1,800 piles in the pier.

The piles were cast near the point where the pier was being built, and after being cut were conveyed on a temporary tramway and lowered into the sea. They were sunk into the sand from 16 to 20 feet. This was done by means of a water jet. Each trestle bent of the pier was made of three piles spaced 12½ feet apart. Each of the round piles was reinforced with from six to eight 1-inch steel rods, arranged symmetrically 2 inches from the outside of the pile, and tied together every three feet of length with No. 11 wire.

There is a bulk point cast at the lower end of each pile, and into this the lower ends of the steel reinforcing rods are spayed. The upper ends of the rods extend through the bracketed heads of the piles to mesh into the reinforcement of the concrete girder and strut.

Through the end of each pile was run a 2-inch jet pipe, with a hose coupling connection for jettison. After the pile had been placed in permanent position, this pipe was filled with concrete. Each pile was next enclosed in a jacket of No. 12 steel. These jackets were 9 feet long and extended from 3 feet below the line of mean tide to 6 feet above.

The longitudinal struts and girders are of reinforced concrete, bolted and meshed into the bracketed heads of the piles by means of steel rods. The floor of the pier is of asphalt. At the point where the pier is built, the shore slope is very gradual about 2 feet in every 100 feet.

FOREIGN TRADE OPPORTUNITIES.

(From the Consular Reports.)
(Inquiries in which addresses are omitted are on file at Bureau of Manufactures, Washington, D. C. in applying for addresses refer to file number.)

No. 7825. Concrete-block machines.—A report from an American consular officer in the near east states that there is an excellent opening in his district for the sale of concrete-block machines, and he hopes that some American firm will be enterprising enough to take up the proposition. Requests have been received from architects and contractors, who are in the market for several machines, for particulars regarding American firms manufacturing such equipment. A company has also been formed in his district for the installation of an hydraulic lime mill. The president of the company, who is an engineer, is anxious to get in touch with an American firm that can supply the necessary installation, as well as all the machines required for the manufacture of cement.

No. 7824. Cast iron water pipes and valves.—An American consular reports that a city in his district is laying 28 kilometres of water pipe, 28 of which are to be purchased from the lowest bidder, or the one adjudged most desirable by the councilmen of the municipality. All information, such as lowest prices, cash discounts, terms of payment, c. i. f. certain city (which would be guaranteed by the municipality), catalogues, etc., should be contained in the bidders' first communications to obviate possibility of advantage accruing to more adjacent competitors, since the need is a very immediate one, the work being delayed until the material is ready. Illustration of the pipe and valves, together with particulars regarding length, diameter, weight, etc., can be obtained from the bureau of manufactures. Correspondence and literature should be in Spanish.

No. 7812. Agency for American goods.—An American consul in Australasia reports that a business firm in his district would like to secure the local agency for electric automobiles with storage batteries for covering long distances, and American specialties in building materials, including structural steel, as well as linings for the interior of buildings.

No. 7813. Fire apparatus and supplies.—A report from an American consular officer in a Latin-American country states that a firm is about to purchase for the local government a quantity of fire brigade appliances and supplies, including uniforms and also several gasoline fire engines for the fire department. The firm wishes to deal directly with manufacturers or their selling agents and desires to receive catalogues and quotations at the earliest possible date.

No. 7829. Building materials and equipment for power plant and pulp mill.—An American consular officer in Canada reports that a company in his district is establishing a hydro-electric plant to supply power for street cars and lighting in a certain municipality, as well as for similar purposes in surrounding country. The same firm is also planning an extension to a local pulp and paper mill. Firms in-

terested in supplying anything for constructing or fitting out such works should address the general manager of the company, whose name is given in the report.

No. 7836. Machinery and technical apparatus.—An engineer has informed an American consular officer that he desires to get in touch with American manufacturers in certain lines who want an agent in the country in which he is located. He is particularly interested in such machinery and devices as are applicable to engineering projects of various kinds, such as road construction, railway building, industrial architecture, and the like. He is already much interested in mining machinery and conveyors and would be willing to represent manufacturers in other lines of technical goods as well. He has had considerable experience as a civil and technical engineer in the United States and has letters from many American firms. He states he will furnish such bank guarantees as may be required.

GARRISON IN HAWAII.

The War Department has completed the plans for the military force which shall compose the command in the Hawaiian Islands, in which connection considerable expert attention has been given to the location of the garrison and the site and construction of barracks and quarters. The quartermaster general of the army has been for some months engaged in the development of details along this line, and the project involves a comprehensive scheme for the shelter of the troops and the erection of storehouses and other edifices in connection with the maintenance of the command.

The following description of the new Schofield Barracks will be of more than ordinary interest to the readers of the Building and Industrial News as it carries out the new line of procedure in military construction described in these columns some months ago. The article referred to described and illustrated the recent Government construction in and around San Francisco Bay. The new Schofield Barracks will follow closely the general ideas incorporated in the new work at the Presidio of San Francisco and at Fort Winfield Scott.

It has been decided that there shall be in the islands eventually five regiments of infantry, with 150 men per company, one regiment of cavalry at war strength, one regiment of field artillery, one company of engineers, one company of the signal corps, eight companies of coast artillery (to be separated from the mobile army), and the necessary sanitary troops. The latter branch will consist of medical officers and hospital corps personnel of an extent allowed by the regulations, and in addition there will be unquestionably a field hospital and ambulance company. There should be also an army general hospital in the Hawaiian Islands, for the initial provision of which the surgeon general of the army has made recommendations during the past two or three years. It is desired to obtain an allotment of \$100,000 for such an institution, but there has been a delay in submitting this estimate to Congress, with the prospect that the Hawaiian island garrison will be established before the adequate hospital facilities

are provided. All of the mobile troops will be stationed at Schofield Barracks, with the exception of one battalion of infantry, which will be retained at Fort Shafter, about three miles from Honolulu, where the supply depot, the reserve storehouse and other buildings will be located. There will be a great deal of construction necessary to provide the shelter and other buildings for this command. It is estimated that the cost will be about \$600,000 per regiment, or an aggregate, taking into consideration all construction, of about \$5,000,000.

The main post will be at Schofield Barracks, which will ultimately be a seven-regiment post, occupying a space about 1,100 feet deep and 4,200 feet long, including intervals, each regiment taking a space 600 feet wide and 1,100 feet long. The officers' quarters are arranged in what may be described as a horseshoe in form, with the buildings so placed as to face one road. There will be a main sewer and main water line, and by this arrangement there will be a material reduction in the cost of construction of buildings and the preparation and maintenance of grounds. The company officers' quarters will be built in double sets. The first floor will contain a dining room, living room, kitchen, pantry and servant's room; the second story will be composed of three bed rooms and bath. Each family will have a small yard. The field officers' quarters will be in single buildings, slightly more commodious than the company officers' quarters. The first floor will contain a living room, dining room, kitchen and two servants' rooms, and the second floor will have four bed rooms and two baths. These buildings will probably be constructed of concrete plaster, with possible steel frame, and will be of fireproof construction. The company officers' quarters will cost, it is estimated, \$2,500 per set, and the field officers' quarters will cost about \$5,000 each, which prices are based on wood frame. Should the steel be adopted, the cost will be slightly increased. Adjacent to the "horseshoe" area, containing the officers' quarters, will be the barracks. Each barracks will contain a battalion, four companies to a building, arranged in a hollow square to be closed by a building to contain all further accommodation required for the regiment—the band barracks, the post exchange, guardhouse, administration building, chapel or post hall, storehouses, and the quarters for the non-commissioned officers. The stables, in the case of a cavalry post, will be located at a distance from the barracks and will occupy a space 400 feet square.

The recommendations on which the departmental approval of the Hawaiian garrison was based came from a board composed of Major E. Frank Chatham, quartermaster's department; Major J. McI. Carter, of the cavalry arm and general staff; Captain John McA. Palmer, 15th infantry and general staff; Captain M. E. Hanna, of the cavalry arm and general staff; and Captain S. B. Embick, of the coast artillery and general staff. The report of this board follows the general lines originally laid down by General J. F. Aleschier, quartermaster general of the army, who formulated a plan after a visit to Hawaii.

SIXTY-SEVEN MILLIONS FOR IRRIGATION.

Approximately sixty-seven million dollars have been spent by the Government in irrigation work, and this vast sum is less than half the amount that will have been expended when Uncle Sam's engineers have completed the present program of reclamation. In nearly every western State the flood waters of the streams are being impounded, and already thousands of families are benefitting by this stored water. The activities of the Federal Government in reclamation work have resulted in awaking a widespread interest in irrigation, which is no longer a local question confined to our rainless country. Experience has shown that a more general application of its principles throughout the whole country would result in material benefit, especially in intensive agriculture, such as truck farming and small fruit growing.

The farmer in the east and middle west is subject in a large measure to the whim of an uncertain rainfall. What would it have been worth to him during twenty years' farming experience if he could have turned on the rain whenever his crops needed moisture? His half crops would have been full ones, his occasional crop failures would have been successes, and the money actually saved would amount to a sum which might well make him thoughtful. The western man realizes these things. A man who has practiced farming by irrigation, or who has carefully studied its advantages, rarely reverts to either the theory or practice of rainfall farming. The farmer in humid regions realizes clearly the handicaps under which he works, but hesitates to change because he has not had the object lessons or experience of the westerner, or has not given consideration to the matter of applying irrigation to his own fields.

Many eastern farmers have the idea that the irrigation farmer is in a chronic state of water shortage, or has to fight excess of alkali in the soil, or is so far from market that profits are eaten up by transportation charges. These things are sometimes true, but it is a grave mistake to believe that they are unavoidable defects or that they apply to all irrigated districts. In building its irrigation projects the Government selects only fertile soil; then it gauges the size of the area to fit the available water supply. The reservoirs and canals are built as substantially as engineering skill can devise, and when the farms have been laid out and water is running in the canals, then, and not till then, settlers are invited to use their homestead rights on the land. The money actually spent in building the irrigation works is prorated against each acre of land, and is repaid by the settlers in ten equal annual payments, without interest. Call it paternalism if you like—it is making homes by the thousand every year.

COST OF ARMY QUARTERS.

J. B. Aleshire, quartermaster general of the army, to take up this question, with the result that that officer after careful consideration has informed the committee chairman that the limit of cost for officers' quarters in the Philippines may be reduced as follows: In the case of quarters for general officers, from \$12,000 to \$10,000; in the case of quarters for colonels or officers above the rank of captain, from \$10,000 to \$8,000. It is urged by General Aleshire that there be no reductions in the limitations now fixed for any other officers' quarters at this time, since the department has had no experience in the construction of any buildings under the cement-gun method, but as soon as the appropriations for the next fiscal year are available buildings will be constructed under that method, and it will be possible to ascertain whether there may be any reduction of the limitation now fixed. The authorities are somewhat disappointed over the failure to show as much saving as was anticipated with reinforced concrete construction. The quartermaster general is in receipt of the following memorandum from Manila on the subject:

"Contrary to common impression, concrete construction work in the Philippines will not be inexpensive. All of the materials entering into a building cost more than in the United States; a barrel of cement costs 50 per cent more in the Orient. The cost of native lumber in the Philippine Islands is fairly prohibitive, and there is absolutely no reserve stock in the local yards. Sand, gravel and rock suitable for building purposes are difficult to obtain. A long haul by boat is the usual rule. At Camp Steinsburg an industrial railroad had to be constructed into the hills, and even then no very extensive supply of rock was assured thus far. The quartermaster's department is operating six rock-crushing plants besides the one on Corregidor Island. White labor costs more here than at home. The native works for a cheap wage, but his physical and mental capacity are so low as to make his salary anything but moderate. This latter condition will improve in time—in fact, it has changed considerably in the last two years—but his pay will probably advance in proportion. Most construction work must be done by day labor, which presents many difficulties not encountered in the contract system in vogue with the department in the United States. To overcome the many known, as well as unforeseen, obstacles requires a constructing quartermaster who is at once an engineer and a business man. His ability or his lack of ability means the saving or waste of great sums of money. Next to care in his selection it is of the utmost importance that his work and policy (if he is a success) be left uninterrupted for at least a two years' tour. In connection with the new construction entered upon, I favor leaving the matter of design very largely to the division authorities; likewise the purchase of materials and machinery can generally best be done through the local commercial houses, which are improving their facilities rapidly. Notwithstanding earnest efforts to devote the largest possible part of the appropriations to permanent construction, it has been necessary to spend a very large part upon repairs to existing buildings and con-

struction of temporary shelter. The necessities of the case render this unavoidable, and considerable expenditures for the same purpose will continue to be necessary."

Plans Wanted

A bond issue of \$50,000 is to be voted on in the new Burlingame School District in San Mateo County, California, in the course of the next few weeks. There will be \$35,000 available for the construction of the school building after the purchase of a site is made, provided that the bonds carry. The building will contain eight class rooms, assembly hall and principal's office. There will be a high basement. The Trustees favor a building of the reinforced concrete type. County Superintendent Roy Cloud, Redwood City, has appointed Mrs. George B. Miller, William Edwards and C. C. Barre as members of the Board of School Trustees. Competitive plans will be called for after the bond election is held.

The Ross Landing School District in Marin County, California, will be asked to vote on the project of bonding the district for \$25,000 on March 9th. The sum of \$10,000 will be used in improving the grounds and the balance, \$15,000, for the construction of a new school house. A suitable site for the building is now the property of the district. The names of the School Trustees may be secured by addressing the County Superintendent of Schools, San Rafael, Marin County. No architect has been secured and a competition will be held.

The Grand Jury of Monterey County, California, has recommended the immediate construction of a reinforced concrete County Hospital to replace the present frame structure which has been pronounced inadequate. The Grand Jury has urged the necessity of the Board of Supervisors giving this matter their immediate attention. The action of the Grand Jury is of such a recent date that particulars of their recommendations cannot be given here. Complete information can be obtained from the County Clerk at Monterey.

A new two-story and basement reinforced concrete school building has been decided upon by the Trustees of the Brandt Ferte School District of Santa Cruz County, California. This district embraces the city of Santa Cruz. No architect has been secured. A twelve-room building, two stories and basement with domestic science and manual training departments and an assembly hall, has been agreed upon. The assembly hall to seat 500 to 700.

A branch of the Colusa County Bank is to be established in the town of Grimes, Sutter County, California. The institution is to purchase a lot at once and will select an architect for the new building. The Board of Directors may be addressed at Colusa.

The Board of Education of the City of Sacramento, California, desiring to erect a school building, hereby invite architects to submit competitive plans, description and estimate for a two-story grammar school building, with basement and containing thirteen rooms, to be situated upon the South Half of the Block bounded by D and E, 5th and 26th streets, in the City

The War Department has succeeded in meeting the desires of the members of the House Military Committee to reduce the limit of cost for officers' quarters in the Philippine Islands. Representative Hay requested General

of Sacramento, County of Sacramento, State of California, in accordance with the program adopted by the said Board of Education, and which can be obtained by applying to the Secretary.

All plans to be submitted on or before the hour of 8 p. m. February 27, 1912, at the office of said Board, Room 20, Odd Fellows' Building, Ninth and K streets, City of Sacramento, California.

The said Board reserves the right to accept or reject any or all plans.

J. A. GREEN,

President of the Board of Education of

the City of Sacramento, California.

O. W. ERLEWINE,

Secretary of the Board of Education of the City of Sacramento, California.

The Christian Church of Ellensburg, Washington, has recently sold their property in that city to the Government and have acquired another site on which they contemplate the construction of a new and modern edifice. The funds to the amount of \$50,000 are now available, and this sum will probably be added to considerably. The new site is at the corner of Sixth and Ruby streets.

Firms desiring news on special classes of buildings such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

San Francisco—Apartment house, 3 story and base, frame, \$15,000. Architect, J. F. Dunn, Monadnock Bldg. S. F. Owner, W. M. Yager. The building will be 35x124 feet and has been designed to contain 18 apartments of two and three rooms each with baths. The interior trim will be of pine with some hardwood floors. There will be steam heat, elevator service and wall beds. The exterior of the building will be covered with cement plaster. The plans are complete and the work will be done by Day Labor.

San Francisco—Apartment house, 5 story and base, brick and steel, \$50,000. Architect, J. Bernard Joseph, First National Bank Bldg., S. F. Owner, Ray Levin. The building will contain a large number of two and three room apartments with connecting baths. There will be steam heat and elevator service. The trim will be of pine. The exterior of the building will be faced with white Medusa cement. The plans are complete and figures will be called for shortly.

San Francisco—Apartment house, 5 story and base, reinforced concrete, \$70,000. Architects, O'Brien & Werner, Foxcroft Bldg., S. F. Owner, S. G. Swiftfiguer. This work has been mentioned here before when the plans were first out for figures. There will be in the neighborhood of 120 rooms in the building arranged in suites of two, three and four rooms each with connecting baths. There will be steam heat, elevator service, wall beds and a vacuum cleaning system. The exterior of the building will be faced with cement plaster. The plans are now being revised and new figures will be called for at once.

San Francisco—Apartment house, 5 story and base, brick and steel, \$42,000. Architect, William Beasley, 127 Montgomery St., S. F. Owner, Walter H. Yorston, 501 Green St., S. F. The building will contain 65 rooms arranged in suites of two and three rooms each with baths. There will be steam heat and wall beds. The trim will be of pine. The exterior of the building will be faced with pressed brick. The plans are complete and in the hands of the owner and the work will be done by Day Labor.

San Francisco—Apartment house, 5 story and base, reinforced concrete, \$40,000. Architects, C. M. and A. F. Rousseau, Monadnock Bldg., S. F. Owner's name withheld. The build-

ing has been designed to contain 25 apartments arranged in two and three room suites with connecting baths. There will be steam heat, elevators and wall beds. A vacuum cleaning system will be installed. The exterior of the building will be faced with cement plaster. The plans are being prepared and will be ready for

Oakland, Cal.—Apartment house, 3 story and base, frame, \$15,000. Architects, T. D. Newsom & Son, 906 Broadway, Oakland. Owner, R. Asher. The building will contain 34 rooms arranged in suites of two and three rooms each. There will be private baths. The interior trim will be of pine throughout. The exterior of the building will be covered with cement plaster on metal bath. The plans are complete and figures are being taken.

Stockton, San Joaquin Co., Cal.—Apartment house and stores, 3 story and base, brick and steel, \$30,000. Architect, Ralph P. Morrill, Yosemite Theatre Bldg., Stockton. Owner, L. Griffiths. This building was mentioned here when the plans were first started. The working drawings have been completed and the architect is now taking figures on the construction. The building will be the most modern apartment house in the city of Stockton. There will be a steam heating system. The exterior of the structure will be faced with pressed brick. Considerable structural iron will be used.

San Francisco—Apartment house, 3 story and base, frame, \$12,000. Architect, C. O. Claussen, Phelan Bldg., S. F. Owner, Louis D. Stoff. The building will contain six apartments of two and four rooms each with connecting baths. The interior trim will be of pine with hardwood floors. There will be wall beds and a central heating system. The exterior of the building will be covered with brick veneer and shipap. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Apartment house, 3 story and base, frame, \$50,000. Architect, Houghton Sawyer, Shreve Bldg., S. F. Owners, Buckingham Court Co. This is the second building of the same nature erected this year by the Buckingham Court Co. The structure will contain a large number of two, three and four room apartments with baths. There will be a central system of heating, wall beds and other modern conveniences. The trim will be of pine and hardwoods. The exterior of the building will be covered

with cement plaster. The plans are complete and figures are being taken.

Los Angeles, Cal.—Apartment house, 3 story and base, brick. Cost not stated. Architect, Robert M. Tylor, Douglas Bldg., L. A. Owner, Marcos Lansberg. The building will be 48x148 and will contain 84 rooms arranged in 36 apartments of from two to three rooms each with baths connecting. There will be steam heat, wall and disappearing beds, elevator service and a vacuum cleaning system. The exterior of the building will be faced with enameled brick. The plans are complete and figures are being taken.

Los Angeles, Cal.—Apartment house, 3 story and base, frame. Cost not stated. Architect, O. M. Weaver, 739 Temple St., L. A. Owner, Ralph Guspy. The building will be 48x151 and has been arranged for 26 suites of two rooms and bath each. There will be steam heat, wall beds and oak floors. The exterior of the building will be covered with blue brick veneer and cement plaster. The architect is preparing the plans.

Los Angeles, Cal.—Apartment house, 3 story and base, brick. Cost not stated. Architect, E. J. Borgmeyer, Stimson Bldg., L. A. Owner, E. W. Lowell. The building will be 47x120. The interior will be divided into 60 rooms, arranged in apartments of two and three rooms each with connecting baths, wall beds and other modern conveniences. There will be steam heat and a vacuum cleaning plant. The exterior of the building will be faced with cream and red pressed brick. The architect is ready to receive figures on the work.

Venice, Los Angeles Co., Cal.—Apartment house, 2 story and base, frame, \$10,000. Architect, Robert H. Walker, Coulter Bldg., L. A. Owner, Mrs. E. Lawrence. The building will contain 16 suites of two and three rooms each. There will be wall beds. The exterior of the building will be covered with cement plaster on metal bath. The plans are complete and the work will be done by Day Labor.

Victoria, B. C.—Apartment house, 3 story and base, brick and steel, \$75,000. Architect, Robert Knipe, Henry Bldg., Seattle. Owners, Lindsay & Roberts, Victoria. The building will be 80x90 feet, and will contain 24 large apartments. There will be steam heat, elevator service, wall beds and other modern conveniences. The exterior will be faced with pressed brick and terra cotta. The plans are complete and figures are being taken.

Seattle, Wash.—Apartment house, 3 story and base, reinforced concrete, \$25,000. Architect, V. W. Voorhees, Ellet Bldg., Seattle. Owner, G. Havers. The building will be 60x60. The interior has been arranged for two-room apartments with connecting baths. There will be steam heat, wall beds and a vacuum cleaning system. The exterior of the building will be faced with cement plaster. The architect is now preparing the working drawings.

Contracts Awarded.

Monterey, Monterey Co., Cal.—Apartment house, 3 story and base, brick and steel, \$35,000. Architect, William H. Weeks, 251 Kearny St., S. F. Owner, A. R. Underwood, Monterey. Contractor, Robert Trost, 26th and Howard streets, S. F. Contract price, \$32,775.

Los Angeles, Cal.—Apartment house, 8 story and base, reinforced concrete \$250,000. Architect, Paul C. Pape, Union League Bldg., L. A. Owners, F. O. Knutstrom Co., Fifth and Seaton Sts., L. A. Contractors, F. O. Knutstrom Co. Contract price, \$250,000. Construction is to be started at once.

BANKS.

Fresno, Fresno Co., Cal.—Bank and offices, 6 story and basement. Class A construction. \$250,000. Architect, Edward T. Foulkes, Crocker Bldg. S. F. Owners, Rowell-Chandler Co. This work was mentioned here before when the selection of an architect was first made public. The building will have a complete steel frame with the exterior walls faced with pressed brick and terra cotta. There will be elaborate banking rooms on the first floor and modern offices above. There will be steam heat and elevator service. The interior partitions will be of terra cotta, the floor of concrete. There will be metal trim, oak, mahogany and marble. Plans for the steel work are complete and figures will be taken at once. All of the work will be segregated.

Princeton, Colusa Co., Cal.—Bank, 1 story and base, reinforced concrete, \$15,000. Architects, Parker & Kenyon, 244 Kearny St., S. F. Owners, Bank of Princeton. The building will be 75x30 feet and has been designed as a monumental structure. The entire building will be occupied by the bank. There will be a large public room, banking offices and offices for the president and other officials. Fire and burglar proof coin and safety deposit vaults have been provided. There will be steam heat. The interior of the banking rooms and the offices will be handsomely finished in hardwood, marble and plate glass. The exterior will be faced with white cement plaster. There will be a tile roof. The plans have just been started and it will be some time before figures can be taken.

BRIDGES, DAMS AND HARBOR WORK.

Santa Cruz, Santa Cruz Co., Cal.—Pier, reinforced concrete and wood, \$500,000. Engineering Dept. Santa Cruz Portland Cement Co., Crocker Bldg., S. F. Owners, Santa Cruz Portland Cement Co. The company has just secured a franchise from the city authorities to construct a large pier on the water front. The preliminary plans only have been prepared and considerable change may be made. The project under consideration is the construction of a reinforced concrete structure similar to the one at Santa Monica. The project will probably be brought to a focus within the next three months.

San Francisco—Harbor improvements, \$4,000,000. Engineer Saph, As State Engineer, Ferry Bldg., S. F. Owners, State of California. Harbor Commissioner, J. J. Dwyer, speaking at the weekly luncheon of the Home Industry League, outlined the preliminary plans for the next important work to be done by his Commission on the San Francisco water front. These improvements will call for an expenditure of about \$1,000,000 of the total of \$9,000,000, and will all be made on

the front south of the Ferry Bldg. Preliminary plans have been drawn for six new ferry slips and piers. The piers will be 500 feet long by 200 feet wide, and will be equipped with special loading machinery. Mr. Dwyer could not state when these plans would be ready, but said the work would be rushed with all possible speed.

Coronado, San Diego Co., Cal.—Sea Wall, reinforced concrete \$75,000. City Engineer, Coronado Owners, City of Coronado. Bonds will be voted upon March 4th to the amount of \$155,000 for the construction of a sea wall and the paving of Orange avenue from A avenue to First street. Plans for both of these projects have been prepared. There is little doubt but that the bonds will carry.

Contracts Awarded.

Portland, Ore.—Bridge, steel and reinforced concrete, \$200,000. Engineer, Ralph Modjeski, Chicago owners, City of Portland. Contractors, Pennsylvania Steel Co. Contract price, \$199,000.

Seattle, Wash.—Bridge, steel and concrete \$30,000. Engineers, Bowdman & McElroy, Central Bldg., Seattle owners, City of Seattle. Contractor, H. M. Stevenson, Portland. Contract price, \$29,494.

CHURCHES.

Santa Ana, Orange Co., Cal.—Church addition, 1 story and base frame, \$10,000. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, First Methodist Church of Santa Ana. The work will consist of a two-story addition. There will be an entire new heating system installed. The plans may be obtained from the architect or from 114 West 4th St., Santa Ana. Bids for this work will be opened on February 12th. The exterior of the building will be faced with rustic.

Riverside, Riverside Co., Cal.—Church, 2 story and base brick and concrete, \$75,000. Architect, Myron Hunt, Union Trust Bldg., L. A. Owners, First Congregational Church of Riverside. The building will be 88x160 feet. There will be a main auditorium and Sunday School rooms. The main auditorium will have a seating capacity of 500 and the Sunday School rooms of 500. FACTORIES & WAREHOUSES.

Los Angeles, Cal.—Warehouse, 5 story and base, reinforced concrete, \$25,000. Architect, A. C. Martin, Higgins Bldg., L. A. Owners, Peck & Mills Co. This work has been mentioned here several times before. The plans

are now being drawn. The area and bids will be called in a few days for the general construction of the building has been completed. It is a classic furniture store.

Linnton, Ore.—Factory buildings, 2, 1, 2 and 3 story reinforced concrete. General stored. Architect, Edward T. Foulkes, Portland Owners, Johnson & Bond & Co. There will be two one story and basement buildings, one designed for a foundry building and the other for the general office and machine shop. The exterior of each will be faced with cement plaster. The architect is now preparing the plans and bids will be called for at once.

Contracts Awarded.

Fresno, Fresno Co., Cal.—Factory, 2 story and base, reinforced concrete and brick \$25,000. Architect, none. Owners, Lauritzen Implement Co. Contractor, H. A. Hanson, Fresno. Contract price, \$25,000.

FLATS.

San Francisco—Flats, 2 story and base frame, \$2,000. Architect, none. Owner, Ole M. Engelson, 755 Elizabeth St., S. F. The building will be 25x25 and has been arranged for two flats of four and five rooms each with bath. The interior trim will be of pine throughout. There will be gas grates. The exterior of the building will be covered with shiplap. The plans are complete and the owner will do the work by Day Labor.

San Francisco—Flats 2 story and base frame \$10,000. Architect Henry C. Smith, Humboldt Bank Bldg., S. F. Owner, Dr. Adelaide. The building has been designed for large residential flats. The architecture is in the Spanish style. The interior will be handsomely finished in pine and hardwood with oak doors throughout. There will be a warm air heating system. There will be coal grates and brick mantels. The exterior of the building will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

San Francisco—Flats 3 story and base frame \$1,000. Architect none. Owner, C. Bartold, 1106 36th Ave., S. F. The building has been designed to accommodate three small flats of five and six rooms each. There will be bath in each flat and modern plumbing throughout. The interior trim will be of pine. There will be coal grates. The exterior will be covered with rustic. The owner is preparing the plans and when these are complete the work will be done by Day Labor.

San Francisco—Flats 2 story and base frame, \$1,500. Architect, none. Owner, E. B. Wickesham, 82 Harriett St., S. F. The building will contain four flats of five and six rooms each. There will be pine trim, open fire places and tile mantels. The exterior of the building will be covered with shiplap. The plans are in the hands of the owner and the work will be done by Day Labor.

GARAGES.

Oakland, Cal.—Garage, 1 story and base brick and concrete, \$1,000. Architect none. Owner, William McKinnon, 22nd and San Pablo Aves., Oak-

land. The building will be used as a commercial garage. There will be a large sales room and machine shop. The exterior of the building will be covered with cement plaster on metal lath. The roof will be of tin. The plans are complete and the owner is taking figures.

Contracts Awarded.

Portland, Ore.—Garage, 2 story and base, brick and steel. Cost not stated. Architects, Claussen & Claussen, Portland Owners, Winton Auto Co. Contractors, Advance Construction Co., Portland. Contract price not stated.

Portland, Ore.—Garage, 2 story and base, mill construction. Cost not stated. Architect, none. Owners Balou & Wright, Contractors, H. L. Camp & Co., Portland. Contract price not stated.

Seattle, Wash.—Garage, 2 story and base, brick and steel, \$26,000. Architect, Charles Haynes, Mehlhorn Bldg., Seattle. Owner, John Mathias. Contractor, William Meisner, 14th Ave., Seattle. Contract price, \$26,000.

GOVERNMENT WORK AND SUPPLIES.

No award has yet been made by the quartermaster, U. S. Marine Corps, Washington, D. C., for constructing commanding officer's quarters, barrack building, and two double sets junior officers' quarters at the naval station, Pearl Harbor, H. T., bids for which were opened on December 4.

The Secretary of the Interior has awarded a contract to the Riverside Portland Cement Co., of Riverside, Cal., for the delivery of about 10,000 barrels of Portland cement for use on the Yuma irrigation project, Arizona-California. The contract price is \$13.75 per barrel, f. o. b. cars at Riverside.

The bid of the Denver Dry Goods Co., of Denver, Colo., \$542.45 in amount, has been accepted for furnishing and installing curtain poles for certain buildings at Fort Logan, Colo.

The following projects, bids for which were opened on dates indicated below, are pending in the office of the supervising architect:

Albany, Ore., construction, etc., December 7.

Ames, Iowa, lighting fixtures, December 27.

Bismark, N. D., construction, etc., January 13.

Fendleton, Ore., construction, etc., September 15.

HALLS AND SOCIETY BUILDINGS.

Nevada City, Nevada Co., Cal.—Lodge hall, 3 story and base, brick and steel, \$30,000. Architects, Parker & Kenyon, 244 Kearny St., S. F. Owners, Elks' Hall Association, Nevada City. The building will be arranged for stores on the first floor, large lodge rooms on the upper floors, social hall, banquet room and kitchens. There will be steam heating. The interior will be finished in pine and hardwood. The exterior of the building will be faced with pressed brick. The architects have just received the commission to prepare the plans and working drawings have not been started.

HOSPITALS.

San Francisco—Hospital work. Cost not stated. City Architect Alfred I. Coffey, 1204 David Hewes Bldg., S. F. Owners, City and County of San Francisco. The plans for the interior marble work at the San Francisco Hospital buildings have been completed and bids for the same will be opened by the Board of Public Works on January 31st.

HOTELS.

San Francisco—Hotel, 4 story and base, brick and steel, \$25,000. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner's name withheld. The building will be erected in the district south of Market street and will contain 56 rooms and a number of baths. There will be steam heat and elevator service. The exterior will be faced with pressed brick. There will be stores on the first floor. The plans are complete and figures will be called for shortly.

San Francisco—Hotel and stores, 3 story and base, brick, \$12,000. Architect, Joseph Cahen, 43 Kearny St., S. F. Owner, Isidore Rosenherd. The building has been designed with stores on the first floor and a number of hotel rooms above. There will be no heat in the building. The trim will be of pine throughout. The exterior will be faced with pressed brick. The plans are complete and figures are being taken.

San Francisco—Hotel, 7 story and base, Class A construction, \$200,000. Architect, Frederick H. Meyer, Humboldt Bank Bldg., S. F. Owner, M. Fleischacker. This work has been mentioned here several times before. The big structure will be erected at the corner of Grant avenue and Bush street. The plans for the general construction will be completed within a few days and figures will be taken. The contract for the structural steel work has been awarded to the Pacific Rolling Mills.

Oakdale, San Joaquin Co., Cal.—Hotel additions. Cost not stated. Architect, Ralph P. Morrell, Yosemite Theatre Bldg., Stockton. Owner's name withheld. The plans for this work provide for extensive alterations and additions to the present brick building. The interior will be rearranged and a number of rooms added. There will be new plumbing, including several bath rooms, electric work, plastering, interior finish and painting. The exterior work will consist of some structural steel, pressed brick and terra cotta work and sheet metal. The plans are being prepared.

Los Angeles, Cal.—Hotel, 8 story and base, Class A construction. Cost not stated. Architect, W. J. Saunders, Wright and Callender Bldg., L. A. Owner, F. W. Braum. The building will contain a lobby and ladies' parlor in the first story; cafe, kitchen, etc., in the basement; twenty-four rooms and sixteen bath rooms on each of the upper floors; and a roof garden and sun porch on the roof. There will be a total of 184 guest rooms and 125 bath rooms. The interior finish will be in mahogany throughout. It will have a tile and marble entrance, freight elevators, vacuum cleaning system, steam heat, reversed lavatory in each room, hot and cold water plumbing, metal window frames and

wire glass, fire escapes, etc. The construction throughout will be of reinforced concrete, the cantilever system being used. The plans are complete and figures are now being taken by the architect.

Portland, Ore.—Hotel, 4 story and base, brick and steel. Cost not stated. Architects, MacNaughton & Raymond, Portland. Owners, Crown Trust Co. The building will cover a ground area of 50x200. There will be stores on the first floor as well as the office and lobby of the hotel proper. The upper floors will be divided into 96 large guest rooms with connecting baths. There will be steam heat and elevator service. The exterior of the building will be faced with pressed brick and terra cotta. The architects are now completing the working drawings.

LIBRARY.

Dixon, Solano Co., Cal.—Library, 1 story and base, brick, \$12,000. Architects, Parker & Kenyon, 244 Kearny St., S. F. Owners, Town of Dixon. The building has been designed in the classic style of architecture. There will be a large public room, reading rooms, rack room and office for the librarian and assistants. There will be furnace heat. The exterior of the building will be faced with cement plaster. The plans will be complete in one week and figures will be called for.

Centrino, Wash.—Library, 1 story and base, brick and steel, \$15,000. Architect, Watson Vernon, Aberdeen, Wash. Owners, City of Centralia. The building has been designed in the classic style with a large reading room, public room, rack room and office for the librarian and assistants. There will be a steam heating plant installed. The exterior of the building will be faced with pressed brick. The architect is now completing the working drawings and bids will be called for within the next few weeks.

Contracts Awarded.

Pomona, Los Angeles Co., Cal.—Library addition, 2 story and base, brick, \$11,500. Architect, Robert H. Orr, Pomona. Owners, City of Pomona. Contractor, F. L. Somers, Security Bldg., L. A. Contract price, \$11,500. Note. This work has been mentioned here before when the bids were advertised for and the contract has been taken on the percentage basis.

POST OFFICES.

Olympia, Wash.—Post office, 2 story, attic and base, steel, stone and brick. Cost not stated. Architect, James Knox Taylor, Washington, D. C. Owner, United States Government. Oakland, Cal.—Residence, 2 story and base, frame, \$5,000. Architect, none. Owners, Home Building Co., College and Lawton Ave., Berkeley. The dwelling will contain seven rooms and baths. The interior trim will be of pine and hardwood. The floors of the principal rooms will be of oak. There will be furnace heat and open fire places. The mantels will be of tile. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are in the hands of the owner and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Bungalow, 1 story and base, frame, \$2,000. Architect, none. Owner, J. T. Owens, 1765 Virginia St., Berkeley. The dwelling will contain five rooms and bath. The interior trim will be of pine with some hardwood floors. There will be open fire places and tile mantels. The exterior of the dwelling will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Residence, 2 story and base, frame, \$3,200. Architect, Ivan Satterlee, 517 25th St., Oakland. Owner, C. M. McGregor. The dwelling will contain six rooms and bath. The trim will be of pine with some oak floors on the first floor. There will be furnace heat and open fire places. The mantels will be of brick or tile. The exterior of the dwelling will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Stockton, San Joaquin Co., Cal.—Residence, 2 story and base, frame, \$6,500. Architect, Ralph P. Morrell, Yosemite Theatre Bldg., Stockton. Owner, Mr. Morris. The dwelling will contain all of the modern conveniences. The exterior of the dwelling is of attractive design and will be covered with shingles. The floors will be of klinker brick veneer. The interior trim will be of pine with hardwood floors. There will be furnace heat and open fire places. The mantels will be of tile. The tile will also be used in the baths. The architect has completed the plans and figures are now being taken for the construction.

Fair Oaks, San Mateo Co., Cal.—Bungalow, 1 story and base, frame and concrete, \$12,000. Architect, Le Baron R. Plater, Redwood City. Owner, Mr. Plater. The dwelling will contain in the neighborhood of twelve rooms and three baths. The interior trim will be of pine, hardwood and white enamel. There will be furnace heat and open fire places. The mantels will be of brick or tile. There will be tile floors in the baths. The exterior of the dwelling will be covered with cement plaster on metal lath. There will be six finished porches in the basement. The plans are complete and figures will be taken at once.

Fair Oaks, San Mateo Co., Cal.—Residence, 1½ story and base, frame, \$7,500. Architect, Roy Chelvers, Russ

Bldg., S. F. Owner, Harry E. Plicker. The dwelling will contain nine rooms and two baths. The interior will be finished in pine and hardwoods with will be furnace heat and open fire places. The mantels will be of brick and terra cotta. The exterior of the dwelling will be covered with shingles and cement plaster. The work is being done by Day Labor.

Pomona, Los Angeles, Co., Cal.—Residence, 1 story and base, frame. Cost not stated. Architect, C. E. Avolio, Pomona. Owner, T. Furlong. The dwelling is to be designed with a colonnaded stone porch and rustic exterior. The interior will be finished in stained grain Oregon pine. There will be open fire places with attractive mantels. The bath room will be randomly finished. The plumbing throughout will be standard. The architect is now preparing the plans.

Woodstock, Santa Barbara Co., Cal.—Residence, 2 story and base, frame, \$10,000. Architect, A. E. Benton, 114 North Spring St., L. A. Owner, E. A. Danielson. The dwelling has been designed for a nine-room house with three bath rooms. There will be pine and hardwood trim, furnace heat and open fire places. The baths will be finished in tile. The mantels will be of tile or brick. The exterior of the dwelling will be covered with cement plaster on metal lath. The architect has taken figures on the work.

Portland, Ore.—Residence, 2 story and base, frame, \$12,000. Architect, Edward T. Root, Portland. Owner, E. Brang. The dwelling will contain ten rooms and three baths. The interior will be finished in pine, oak and mahogany. There will be furnace heat, open fire places and brick mantels. The baths will be finished in tile. The exterior of the dwelling will be covered with cement plaster on metal lath and klinker brick veneer. The plans are complete and figures are being taken.

Oswego, Ore.—Bungalow, 1½ story and base, frame, \$10,000. Architect, Edward T. Root, Portland. Owner, Robert Kennedy. The dwelling will contain nine rooms and two baths. The interior trim will be of pine, hardwoods and white enamel. There will be furnace heat and open fire places. The mantels will be of brick. The baths will be finished in tile. The exterior of the dwelling will be covered with cement plaster on metal lath. The architect is preparing plans for this work.

Portland, Ore.—Residence, 2 story attic and base, frame, \$14,000. Architects, Ertz & Dele, Portland. Owner, A. W. Deelock. The dwelling has been designed for a fourteen-room house with several bath rooms. The interior trim will be of pine, oak and mahogany. There will be steam heat and open fire places. The baths will be finished in tile. The mantels will be of brick. The exterior of the dwelling will be covered with brick veneer and shingles. The plans are complete and figures are being taken.

SCHOOLS.

Richmond, Contra Costa Co., Cal.—School, 2 story and base, reinforced concrete, \$70,000. Architect, Louis S. Coffey, 1204 David Hewes Bldg., Oakland. Owners, City and County of San Francisco. The architect has not been commissioned to prepare plans for this building and complete details of the work cannot be

given at this time. The plans provide for one of the most modern school buildings in the State. The design is in the classic style. The exterior will probably be faced with cement plaster. There will be a complete system of steam heating and ventilation. There will be a large auditorium, library, principal's office, and twelve class rooms. A vacuum cleaning system, program clock system and other special features will be installed. The plans will be completed as soon as possible and construction will be started within three months.

North Stockton, San Joaquin Co., Cal.—School, 2 story and base, brick, \$20,000. Architects, Stone & Wright, Oakland and Stockton. Owners, North Stockton School District. The architects' plans for this building have been approved and figures will be called for as soon as the drawings can be completed. The building will contain eight class rooms. The structure has been designed for a grammar school building. There will be a plenum system of heating. The exterior of the building will be faced with pressed brick.

Woodland, Yolo Co., Cal.—School, 2 story and base, reinforced concrete, \$90,000. Architect, W. H. Weeks, 251 Kearny St., S. F. Owners, Woodland School District. The architect has just been selected to prepare these plans and details cannot be given. The structure has been designed as a high school. There will be steam heat and ventilating. The exterior will probably be faced with cement plaster. Working drawings are being prepared.

Delano, Kern Co., Cal.—School, 2 story and base, brick. Cost not stated. Architects, A. C. Swartz & Son, Fresno. Owners, Delano School District. This work has been mentioned in these columns before. The plans are now complete and the Board of Trustees are calling for figures on the construction. Bids will be opened on February 19th. The building will contain eight class rooms, auditorium and principal's office. There will be a heating and ventilating system. The exterior of the building will be faced with pressed brick. There will be a vacuum cleaning system, program clock and bell system. Plans can be secured from the architects. For the official proposal see Sealed Proposals in this issue.

San Francisco—School work. Cost not stated. City Architect, Alfred I. Coffey, 1204 David Hewes Bldg., S. F. Owners, City and County of San Francisco. Bids will be opened on February 7th for the installation of a program clock and bell system in the Lowell High School, and on January 31st for the heating and ventilating of the Girls' High School. Plans at the City Architect's office.

San Francisco—School, 3 story and base. Class A construction, \$500,000. City Architect, Alfred I. Coffey, 1204 David Hewes Bldg., S. F. Owners, City and County of San Francisco. The plans for the general construction of the new Polytechnic High School buildings will shortly be completed by the Architectural Department and put out for figures. The plans provide for one of the largest school buildings west of Chicago. The construction throughout will be fireproof. There will be a number of special features. Complete details of this work

will be published in these columns when bids are called.

San Gabriel, Los Angeles Co., Cal.—School, 1 story and base, brick, \$11,000. Architect, Paul V. Tuttle. Delta Bldg., L. A. Owners, San Gabriel School District. The building will be 100x90 feet, and will contain four standard class rooms, besides the play rooms and furnace rooms which will be located in the basement. There will be furnace heat and a modern system of ventilation. The design is in the Mission style and the exterior will be faced with cement plaster. There will be a clay tile roof. The working drawings are complete and figures are being taken.

Vashon Island, Wash.—School, 2 story and base, frame, \$15,000. Architects, Heath & Gore, Tacoma. Owners, Vashon Island School District. This work has been mentioned here before when the architects were first commissioned to prepare the plans. The working drawings are now complete and figures are being taken.

Contracts Awarded.

Stockton, San Joaquin Co., Cal.—School, 2 story and base, brick and steel, \$60,000. Architects, Stone & Wright, Oakland and Stockton. Owners, City of Stockton. Contractors, Hoyt Bros., Monadnock Bldg., S. F., general construction, contract price, \$50,000. Pacific Blower and Heating Co., heating and ventilating. Contract price not stated.

SEWERS, STREET WORK AND WATER SYSTEMS.

Oxnard, Ventura Co., Cal.—Water system. Cost not stated. Engineers, O'mstead & Gillette, L. A. Owners, City of Oxnard. The engineers have had the plans for a complete municipal water system approved by the City Trustees, and the matter of bonding the city for the construction is to be voted upon at once. The plans provide for a concrete pumping station, a large amount of water mains, hydrants and all other appurtenances.

San Francisco—Incinerator construction. Cost not stated. City Engineer Marsden Manson, 1404 David Hewes Bldg., S. F. Owners, City and County of San Francisco. The plans for the grading of the site and for the construction of the foundation piers have been completed and bids will be opened by the Board of Public Works on January 31st.

San Francisco—Mechanical equipment for pumping station. Cost not stated. City Engineer Marsden Manson, 1404 David Hewes Bldg., S. F. Owners, City and County of San Francisco. Plans have been completed for the mechanical equipment of pumping plant No. 2. The date for opening the bids has been extended until January 31st.

Angel Island, San Francisco Bay—Reinforced concrete retaining wall, \$50,000. Engineer, Superintendent of Repairs Roberts, Postoffice Bldg., S. F. Owner, U. S. Government. The wall will be 1100 feet long and 17 feet in height. Reinforcing will be used throughout. The plans for this work are being prepared.

San Francisco—Park entrance, concrete, stone and steel, \$100,000. Architects, MacDonald & Applegarth, Cal Bldg., S. F. Owners, City and County of San Francisco (Golden Gate Park Commissioners in charge). The struc-

ture will be 210 feet high enclosing an opening 500 feet wide. There will be two colonnades with a tall monument structure in the center. The material used will be cream colored stone. There will be ornamental bronze work. The structure is the gift of Mrs. Honora Sharpe to the city. Funds are now available. The work will probably be handled through the offices of the Park Commissioners. The architects have been instructed to proceed with the working drawings and bids will be called for in the course of two months.

Contracts Awarded.

San Francisco—Pumping plant No. 2. Cost not stated. City Engineer Marsden Manson, 1404 David Hewes Bldg., S. F. Owners, City and County of San Francisco. Bids were opened for the general construction of this building and for the structural steel, for a complete list of the bidders see under City Bids Opened, San Francisco, in this issue.

STORES & OFFICE BUILDINGS.

San Francisco—Stores and lofts, 4 story and base, brick and steel, \$20,000. Architect, Rudolph J. Patcha. Bldg., S. F. Owners, City and County of San Francisco. The building has been arranged for stores on the first floor and lofts above. There will also be some living apartments. There will be plumbing and electric work. The exterior of the building will be faced with cement plaster. There will be some marble wainscoting. The plans are complete and the architect is taking figures on the work.

San Francisco—Stores, 1 story and base, frame. Cost not stated. Architect, Herman Barth, 12 Geary St., S. F. Owners, Mrs. M. Shannon. The building will be erected in the Hayes Valley. There will be two large retail stores with plate glass windows. The exterior of the building will be covered with rustic and shiplap. The plans are complete and the architect is taking figures on the construction.

San Francisco—Stores and lofts, 2 story and base, concrete and brick, \$10,000. Architect, none. Owners, Schneider Bros. & Co., 1055-59 Grant Ave., S. F. The building will be erected at the corner of Pacific street and Grant avenue. There will be one large store on the first floor and lofts above. There will be plate glass windows. Sidewalk doors and lights are called for in the specifications. The exterior of the building will be faced with cement plaster. The plans are in the hands of the owners and the work will be done by Day Labor.

San Francisco, Marin Co., Cal.—Cafe, 1 story, frame. Cost not stated. Architect, M. Mattandvich, Pacific Bldg., S. F. Owners, Mirona Cafe Co. This building will replace the structure recently destroyed by fire. The building will cover a large area and is to be carried on a pile foundation. There will be a large dining room, private rooms, sleeping apartments, lobby, kitchen, etc. The exterior will be covered with shiplap. A hot air heating system will be installed. The plans are complete and figures are being taken by the architect.

Fresno, Fresno Co., Cal.—Offices, 3 story and base, brick and steel, \$60,000. Architect not selected. Owners, Pacific States Tel. and Tel. Co., S. F.

The building will be designed for the exclusive use of the telephone company. There will be a large general office and apparatus room on the first floor, operating room on the second floor and office on the third floor. The building will be heated by a steam system. The exterior will be faced with pressed brick and terra cotta. The plans will be prepared at once.

Whittier, Los Angeles Co., Cal.—Stores and lodge hall, 2 story and base, brick. Cost not stated. Architects, Elsen & Son, Wilcox Bldg., L. A. Owner, Mrs. St. John. The building will be six stories. There will be four store rooms on the first floor and lodge hall and offices on the second floor. The exterior of the building will be faced with pressed brick. The plans are complete and the architects are taking figures on the work.

Contracts Awarded.

Portland, Ore.—Stores and offices, 2 story and base, brick, \$16,000. Architects, Parkey & Banfield, Portland. Owners, Strowbridge Hardware and Paint Co. Contractors, Parkey & Banfield, Portland. Contract price, \$15,000.

Portland, Ore.—Stores and offices, 12 story and base. Class A construction. Cost not stated. Architects, Reid Bros., Call Bldg., S. F. Owners, Journal Publishing Co., Portland. Contractors, Dinwiddie Construction Co., Portland. Contract price not stated. The general contractors have awarded the following sub-contracts on the building: The structural steel contract was secured by Milliken Bros.; the granite will be supplied by the McCann Stone Co., who will furnish Raymond granite; the marble contract went to the Vermont Marble Co., and the terra cotta is to be furnished by the Western Clay Co.; the millwork is to be turned out by the Paredius Manufacturing Co., and the ornamental iron will be supplied by the Rudegar Merle Co. of San Francisco; the excavation work was done by J. C. Cook & Co. Figures are being taken for the heating, plumbing, wiring painting, plastering and miscellaneous contracts, and bids on these will close from time to time.

Seattle, Wash.—Stores, 3 story and base, brick, \$50,000. Architect, Harlan Thomas, Elfers Bldg., Seattle. Owner, William Thaanum. Contractor, Alexander Dow, 1145 11th Ave., Seattle. Contract price, \$50,000.

THEATRES.

Modesto, Stanislaus Co., Cal.—Theatre and stores, 3 story and base, brick and steel, \$10,000. Architect, Ralph P. Morrell, Yosemite Theatre Bldg., Stockton. Owner, Mr. Mensinger, Modesto. The building will be erected on 10th street, between I and J streets, and will give to the city of Modesto its first high class show shop. The structure will be constructed of 6x14 lumber. There will be several stores on the first floor besides the theatre proper, its entrance and lobby. The construction throughout will be high class with considerable structural steel used. There will be a conduit system of wiring, a modern heating plant and system of ventilation. Adequate fire escapes have been provided. The exterior of the building will be faced with pressed brick and cement plaster. The architect has the working drawings well advanced and figures will be called for shortly.

SEALED PROPOSALS.

PROPOSALS FOR EXCAVATING.

(Bids close Feb. 15.)

EXCAVATING.—U. S. Engineer Office, Seattle, Wash.—Sealed proposals for dredging and excavating in Lake Washington Canal right of way will be received at this office until 12 m. February 15, 1912, and then publicly opened. Information on application. J. B. CAVANAUGH, major, engineers, agent for the State of Washington and King County, Wash.

PROPOSALS FOR CANAL SUPPLIES.

(Bids close Feb. 15.)

CANAL CIRCULAR 675—Proposals for the Necessary Lifting Trusses, Lifting Mechanism, Electrical Equipment, Signals, Etc., for the complete construction and erection of a single-track, single-leaf bascule, same to be installed by the commission on the 102½-foot steel girders now on hand at bridge 140, relocated line, Panama Railroad.—Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washington, D. C. until 10:30 a. m. February 15, 1912, at which time they will be opened in public, for furnishing the above-mentioned articles. Blanks and general information relating to this circular (No. 675) may be obtained from this office or the office of the assistant purchasing agent, 1086 North Point street, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

PROPOSALS FOR BRUSH AND POLES.

(Bids close Jan. 31.)

POLE AND BRUSH.—U. S. Engineer Office, Seattle, Wash.—Sealed proposals for furnishing and delivering brush facies, and grilling and grillage poles at Gray's Harbor, Wash., will be received here until 12 m. January 31, 1912, and then publicly opened. Information on application. J. B. CAVANAUGH, major, engineers.

CONSTRUCTING BUILDING.

(Bids close March 1.)

SEALED proposals will be received at this office until 2 o'clock p. m. on the 1st day of March, 1912, and then opened, for the construction (including plumbing, gas piping, heating apparatus, electric conduits, wiring, and interior lighting fixtures) of the United States post office at Olympia, Wash. The building is to be approximately 5,500 square feet in ground area, two stories and attic, with granite facing to the first floor, limestone or sandstone above, and tin roof; the first floor only is of fireproof construction. Drawings and specifications may be had from the custodian of site at Olympia, Wash., or at this office, at the discretion of the supervising Architect, JAMES KNOX TAYLOR, Supervising Architect.

CONSTRUCTING STEEL BREDGE.

(Bids close Feb. 29.)

STEEL BRIDGE.—U. S. Engineer Office, 502 Couch Building, Portland, Ore.—Sealed proposals for constructing steel spanning section bridge Colonel P. S. Michie will be received here until 12 m. February 29, 1912, and then publicly opened. Information on

application. JAY J. MORROW, major, engineers.

CONSTRUCTING BUILDING.

(Bids close Feb. 17.)

BUILDING—Sealed proposals for the "Proposals for Shell House" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. February 17, 1912, and then there publicly opened, for a shell house at the United States naval magazine, Mare Island, Cal. Plans and specifications can be obtained on application to the bureau or to the commandant of the navy yard, Mare Island, Cal. R. C. HOLLYDAY, chief of bureau.

PROPOSALS FOR CLOCK SYSTEM.

(Bids close Feb. 7.)

OFFICE of the Board of Public Works of the City and County of San Francisco.—Sealed proposals will be received at the office of the said Board of Public Works, tenth floor, David Hewes Building, 995 Market street, between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 7th day of February, 1912, for doing the following work, to wit:

The installation of a clock and program bell system in the Lowell High School Building.

CONSTRUCTING BUILDING.

(Bids close Feb. 19.)

THE Board of Trustees of the Delano Joint Union High School District will receive sealed proposals at the "Delano Hotel", in the town of Delano, county of Kern, State of California, until 1 o'clock p. m. of the 19th day of February, 1912, for the construction of a brick school building for the said school district and for installing a heating and ventilating system therein and for doing certain other work, all as required to be done by the plans and specifications prepared by A. C. Swartz & Son, architects, which plans and specifications have been adopted by the said trustees.

Each proposal for the construction of the building must be accompanied by a certified check in the amount of Two Thousand (\$2,000) dollars upon some solvent bank, payable to Frank Panero, Clerk of the Board of Trustees, as liquidated damages should the proposal be accepted and the bidder should fail to enter into a lawful contract for the construction of the building for the amount of his bid and to give an approval bond as required by law within ten days after the acceptance of the bid and the awarding of the contract by the trustees. The contractor must agree to complete the construction of the building within 150 working days after the execution of the contract. Bids must be put upon the form furnished by the clerk.

The proposals for the heating and ventilating will be separate from the proposals for the construction of the building and bidders for the heating and ventilating must accompany their bids with a certified check in the amount of One Thousand (\$1,000) dollars on the same conditions as above stated.

Plans, specifications and further information may be had from the Clerk at Delano, from the architects, Fliske & Filling, Fresno, from the Contractor and Builder, Los Angeles, or from the County Superintendents of Schools,

Bakersfield and Visalia.

The trustees reserve the right to reject any and all bids.

Proposals must be addressed to Frank Panero, Delano, California, and marked "Proposal for the Construction," or "for the Heating and Ventilating of the Delano Joint Union High School Building."

By order of the Board of Trustees, dated January 15, 1912.

FRANK PANERO, Clerk.

PROPOSALS FOR MARBLE WORK.

(Bids close Jan. 31.)

OFFICE of the Board of Public Works of the City and County of San Francisco.—Sealed proposals will be received at the office of the said Board of Public Works, tenth floor, David Hewes Building, 995 Market street, between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 31st day of January, 1912, for doing the following work, to wit:

The interior marble work of the San Francisco Hospital.

CONSTRUCTING BUILDING.

(Bids close Feb. 15.)

THE Trustees of the San Gabriel School District will receive sealed bids until 3 o'clock Saturday, February 17, 1912, for the erection and completion of a brick school building in accordance with plans and specifications as prepared by Paul V. Tuttle.

Bids will be received for the erection of the entire building complete, as per plans and specifications, and separately as follows:

First—For the heating and ventilating.

Second—For the painting.

Third—For the plumbing.

The plans may be seen at Cuneo's Store, at San Gabriel, or at the office of Paul V. Tuttle, 616 Delta Bldg., Los Angeles.

Sealed bids shall be delivered to A. J. Cuneo, Clerk, on or before 3 o'clock February 17, 1912, at which time the bids will be opened in public.

A certified or cashier's check in the amount of 5% shall accompany the bids, made payable to A. J. Cuneo, Clerk. This check is intended as a guaranty that the bidder, if awarded the contract, will within five days furnish satisfactory bonds and will enter into a written contract.

The Board of Trustees reserves the right to reject any or all bids.

By order of the Board of Trustees of the San Gabriel School District.

A. J. CUNEO, Clerk.

FURNISHING CANAL SUPPLIES.

(Bids close Feb. 7.)

CANAL CIRCULAR 673—Proposals for Lumber, Monkey Wrenches, Nails, Nuts, Pig Lead, Manila Rope, Gasoline and Sal Soda.—Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washington, D. C. until 10:30 a. m. February 7, 1912, at which time they will be opened in public, for furnishing the above-mentioned articles. Blanks and general information relating to this circular (No. 673) may be obtained from this office or the office of the assistant purchasing agent, 1086 North Point street, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

Apartment House—3 story and base, frame, \$15,000. San Francisco. Architect, J. F. Dunn, Monadnock Bldg., S. F. Owner, W. W. Yager. The building will be 35x124 feet, and has been designed to contain 18 apartments of two and three rooms each with baths. The interior trim will be of pine with some hardwood floors. There will be steam heat, elevator service and wall beds. The plans are complete and the work will be done by Day Labor.

Apartment House—5 story and base, brick and steel, \$50,000. San Francisco. Architect, J. Bernard Joseph, First National Bank Bldg., S. F. Owner, Ray Levin. The building will contain a large number of two and three room apartments with connecting baths. There will be steam heat and elevator service. The trim will be of pine. The exterior of the building will be faced with white Medusa cement. The plans are complete and figures will be called for shortly.

Apartment House—5 story and base, reinforced concrete, \$70,000. San Francisco. Architects, O'Brien & Werner, Foxcroft Bldg., S. F. Owner, S. G. Swortwagner. This work has been mentioned here before when the plans were first put out for figures. There will be in the neighborhood of 120 rooms in the building arranged in suites of two, three and four rooms each with connecting baths. There will be steam heat, elevator service, wall beds and a vacuum cleaning system. The exterior of the building will be faced with cement plaster. The plans are now being revised and new figures will be called for at once.

Apartment House—5 story and base, brick and steel, \$42,000. San Francisco. Architect, William Beasley, 127 Montgomery St., S. F. Owner, Walter H. Yorston, 501 Green St., S. F. The building will contain 68 rooms arranged in suites of two and three rooms each with baths. There will be steam heat and wall beds. The trim will be of pine. The exterior of the building will be faced with pressed brick. The plans are complete and in the hands of the owner and the work will be done by Day Labor.

Apartment House—5 story and base, reinforced concrete, \$40,000. San Francisco. Architects, C. M. and A. F. Bousseau, Monadnock Bldg., S. F. Owner's name withheld. The building has been designed to contain twenty-five apartments arranged in two and three room suites with connecting baths. There will be steam heat, elevators and wall beds. A vacuum cleaning system will be installed. The exterior of the building will be faced with cement plaster. The plans are being prepared and will be ready for figures in three weeks.

Apartment House—3 story and base, frame, \$12,000. San Francisco. Architect, C. O. Claussen, Phelan Bldg., S. F. Owner, Louis D. Stoff. The building will contain six apartments of three and four rooms each with connecting baths. The interior trim will be of pine with hardwood floors. There

will be wall beds and central heating system. The exterior of the building will be covered with brick veneer and shiplap. The plans are complete and the work will be done by Day Labor.

Flats—2 story and base, frame, \$2,000. San Francisco. Architect, none. Owner, Ole M. Engelson, 755 Elizabeth St., S. F. The building will be 25x25 and has been arranged for two flats of four and five rooms each with baths. The interior trim will be of pine throughout. There will be gas grates. The exterior of the building will be covered with shiplap. The plans are complete and the owner will do the work by Day Labor.

Flats—2 story and base, frame, \$16,000. San Francisco. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owner, Dr. Adelaide. The building is being designed for large residential flats. The architecture is in the Spanish style. The interior will be handsomely finished in pine and hardwood with oak floors throughout. There will be a warm air heating system. There will be coal grates and brick mantels. The exterior of the building will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Flats—3 story and base, frame, \$4,000. San Francisco. Architect, none. Owner, C. Bartold, 1106 36th Ave., S. F. The building is being designed to accommodate three small flats of five and six rooms each. There will be baths in connection and modern plumbing throughout. The interior trim will be of pine. There will be coal grates. The exterior will be covered with rustic. The owner is preparing the plans and when these are complete the work will be done by Day Labor.

Flats—2 story and base, frame, \$4,000. San Francisco. Architect, none. Owner, B. B. Wickersham, 52 Harriet St., S. F. The building will contain four flats of five and six rooms each. There will be pine trim, open fire places and tile mantels. The plans are in the hands of the owner and the work will be done by Day Labor.

Hotel—7 story and base. Class A construction, \$200,000. San Francisco. Architect, Frederick H. Meyer, Humboldt Bank Bldg., S. F. Owner, M. Feishacker. This work has been mentioned here several times before. The big structure will be erected at the corner of Grant Ave. and Bush St. The plans for the general construction will be complete within a few days and figures will be taken. The contract for the structural steel work has been awarded to the Pacific Rolling Mills.

Hotel—4 story and base, brick and steel, \$25,000. San Francisco. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner's name withheld. The building will be erected in the district south of Market street and will contain 56 rooms and a number of baths. There will be steam heat and elevator service. The exterior will be faced with pressed brick. There will be stores on the first floor. The plans are complete and figures will be called for shortly.

Hotel and Stores—3 story and base, brick, \$12,000. Architect, Joseph Cahen, 45 Kearny St., S. F. Owner, Isidore Rosenberd. The building has been designed with stores on the first floor and a number of hotel rooms above. There will be no heat in the building. The trim will be of pine throughout. The exterior will be faced with pressed brick. The plans are complete and figures are being taken.

Residences—2, 2 story and base, frame, \$3,500 each. San Francisco. Architects, Banks & Copeland, 333 Kearny St., S. F. Owner, William Linden. The dwellings will be erected on Dolores street. Each will contain seven rooms and bath. The interior trim will be of pine with hardwood floors in the principal rooms. There will be open fire places with attractive mantels. There will be some terrazzo work. The exteriors of the dwellings will be covered with shingles and cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$2,500. San Francisco. Architect, none. Owner, Thomas Thornton, 225 N. Lawton St., S. F. The dwelling has been designed for a six-room house with bath. The interior trim will be of pine throughout. There will be some hardwood floors. There will be open fire places and tile mantels. The exterior of the house will be covered with cement plaster and brick veneer. The work will be done by Day Labor. The plans are complete.

Residences—2, 2 story and base, frame, \$5,000 each. San Francisco. Architect, none. Owner, E. N. Fritz, 1401 Masonic Ave., S. F. These dwellings have been designed for eight-rooms houses with baths. The interior trim will be of pine with some hardwood. The floors will be of oak. There will be furnace heat and open fire places. The mantels will be of brick. There will be tile in the baths. The exterior of the dwellings will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Bungalow—1½ story and base, frame, \$2,500. San Francisco. Architect, none. Owner, E. L. Moody, 4184 24th St., S. F. The bungalow will contain seven rooms and bath. The interior trim will be largely of pine with some hardwood floors. There will be a large brick mantel and open fire place in the living room. The exterior of the dwelling will be covered with shingles. The plans are complete and the work will be done by Day Labor.

Harbor Improvements—\$4,000,000. San Francisco. Engineer, Saph. As State Engineer, Harry Slips and new piers, State of California. Harbor Commissioner, J. J. Dwyer, speaking at the weekly luncheon of the Home Industry League, outlined the preliminary plans for the next important work to be done by his Commission on the San Francisco water front. These improvements will call for an expenditure of about \$4,000,000 of the total of \$9,000,000, and will all be made on the front south of the Ferry Bldg. Preliminary plans have been draughted for six new ferry slips and new piers. The piers will be 800 feet long by 200 feet wide, and will be equipped with special loading machinery. Mr. Dwyer could not state when these

plans would be ready, but said the work would be rushed with all possible speed.

Hospital Work—Cost not stated. San Francisco. City Architect Alfred I. Coffey, 1204 David Hewes Bldg., S. F. Owners, City and County of San Francisco. The plans for the interior marble work at the San Francisco Hospital buildings have been completed, and bids for the same will be opened by the Board of Public Works on January 31.

Incinerator Construction—Cost not stated. San Francisco. City Engineer Marsden Manson, 1404 David Hewes Bldg., S. F. Owners, City and County of San Francisco. The plans for the grading of the site and for the construction of the foundation piers have been completed, and bids will be opened by the Board of Public Works on January 31st.

Mechanical Equipment for Pumping Station—Cost not stated. San Francisco. City Engineer Marsden Manson, 1404 David Hewes Bldg., S. F. Owners, City and County of San Francisco. Plans have been completed for the mechanical equipment of pumping plant No. 2. The date for opening the bids has been extended until January 31st.

Reinforced Concrete Retaining Wall—\$50,000. Angel Island, San Francisco Bay. Engineer, Superintendent of Repairs Roberts, Postoffice Bldg., S. F. Owner, U. S. Government. The wall will be 100 feet long and 17 feet in height. Reinforcing will be used throughout. The plans for this work are being prepared.

School Work—Cost not stated. San Francisco. City Architect Alfred I. Coffey, 1204 David Hewes Bldg., S. F. Owners, City and County of San Francisco. Bids will be opened on February 15th for the installation of a program clock and bell system in the Lowell High School, and on January 31st for the heating and ventilating of the Girls' High School. Plans at the City Architect's office.

School—2 story and base. Class A construction, \$500,000. San Francisco. City Architect Alfred I. Coffey, 1204 David Hewes Bldg., S. F. Owners, City and County of San Francisco. The plans for the general construction of the new Polytechnic High School buildings will shortly be completed by the Architectural Department and put out for figures. The plans provide for one of the largest school buildings west of Chicago. The construction throughout will be fireproof. There will be a number of special features. Complete details of this work will be published in these columns when bids are called.

Stores and Lofts—1 story and base, brick and steel, \$20,000. San Francisco. Architect, Rudolph J. Patcha, Phelan Bldg., S. F. Owners, Tong King Chong and Jung Sang. The building has been arranged for stores on the first floor and lofts above. There will also be some living apartments. There will be plumbing and electric work. The exterior of the building will be faced with cement plaster. There will be some marble wainscoting. The plans are complete and the architect is taking figures on the work.

Stores—1 story and base, frame. Cost not stated. San Francisco. Architect, Herman Barth, 12 Geary St., S. F. Owner, Mrs. M. Shannon. The building will be erected in the Hayes Valley

District. There will be two large retail stores with plate glass windows. The exterior of the building will be covered with rustic and shiplap. The plans are complete and the architect is taking figures on the construction.

Stores and Lofts—2 story and base, concrete and brick, \$100,000. San Francisco. Architect, none. Owners, Schneider Bros & Co., 1955-59 Grant Ave., S. F. The building will be erected at the corner of Pacific street and Grant avenue. There will be one large store on the first floor and lofts above. There will be plate glass windows. Sidewalk doors and lights are called for in the specifications. The exterior of the building will be faced with cement plaster. The plans are in the hands of the owners and the work will be done by Day Labor.

Park Entrance—Concrete, stone and steel, \$100,000. San Francisco. Architects, Macdonald & Applegraph, Call Bldg., S. F. Owners, City and County of San Francisco (Golden Gate Park Commissioners in charge). The structure will be 210 feet high enclosing an opening 500 feet wide. There will be two colonnades with a tall monumental structure in the center. The material used will be cream colored stone. There will be ornamental bronze work. The structure is the gift of Mrs. Honora Sharpe to the city. Funds are now available. The work will probably be handled through the offices of the Park Commissioners. The architects have been instructed to proceed with the working drawings and bids will be called for in the course of two months.

Contracts Awarded.

Pumping Plant No. 2—Cost not stated. City Engineer Marsden Manson, 1404 David Hewes Bldg., S. F. Owners, City and County of San Francisco. Bids were opened for the general construction of this building and for the structural steel. For a complete list of the bidders see under City Bids Opened, San Francisco, in this issue.

OAKLAND AND ALAMEDA COUNTY.

Apartment House—2 story and base, frame, \$50,000. Oakland, Cal. Architect, Houghton Sawyer, Shreve Bldg. S. F. Owners, Buckingham Court Co. This is the second building of the same nature erected this year by the Buckingham Court Co. The structure will contain a large number of two, three and four room apartments with baths. There will be a central system of heating, wall beds and other modern conveniences. The trim will be of pine and hardwoods. The exterior of the building will be covered with cement plaster. The plans are complete and figures are being taken.

Apartment House—3 story and base, frame, \$15,000. Oakland, Cal. Architects, T. D. Newson & Son, 306 Broadway, Oakland. Owner, R. Asher. The building will contain 34 rooms arranged in suites of two and three rooms each. There will be no private baths. The interior trim will be of pine throughout. The exterior of the building will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Bungalow—2, 1 story and base, frame, \$5,250. Berkeley, Alameda Co. Cal. Architect, A. J. Hassee, Y. M. C. A. Bldg., Berkeley. Owners, Patrick Nelson Co. The bungalows will each

contain six rooms and bath. The interior trim will be of pine. There will be hardwood floors in the principal rooms. There will be open fire places. The sum of \$100 has been allowed for mantels. The exterior of the bungalows will be covered with cement plaster on metal lath. The plans are out for figures and bids will be opened on February 1st.

Bungalow—1½ story and base, frame, \$7,500. Berkeley, Alameda Co. Cal. Architect, none. Owner, C. L. Cooper, 123 Prince St., Berkeley. The dwelling will contain six rooms and bath. The interior trim will be of pine and redwood. There will be some hardwood floors. There will be open fire places and tile or brick mantels. The exterior of the dwelling will be covered with shingles. The plans are in the hands of the owner who is taking figures on the work.

Bungalow—1 story and base, frame, \$3,000. Oakland, Cal. Architect, none. Owner, C. E. Carlson, 1512 Grove St., Oakland. The dwelling has been designed for a six-room cottage with bath. The interior trim will be of pine with hardwood floors. There will be open fire places with brick or tile mantels. The exterior will be covered with rustic. The plans are complete and the owner is taking figures on the work.

Bungalow—1½ story and base, frame, \$2,500. Oakland, Cal. Architect, none. Owner, E. R. Dexter, 1606 Grove St., Oakland. The dwelling has been designed for a six-room house with bath. The interior trim will be of pine with some oak floors. There will be a large open fire place in the living room with a tile mantel. The exterior of the dwelling will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$6,000. Piedmont, Alameda Co. Cal. Architect, William Knowles, Central Bank Bldg., Oakland. Owner, S. J. Taylor. The dwelling has been designed for an eight-room dwelling with baths. The interior trim will be of pine and hardwoods and white enamel. There will be hardwood floors in the principal rooms. Tile will be used in the baths. There will be open fire places and brick or tile mantels. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Residence—2 story and base, frame, \$6,000. Oakland, Cal. Architect, A. C. Smith, 1004 Broadway, Oakland. Owner, C. H. Johnson. The dwelling will contain eight rooms and baths. The interior trim will be of pine, oak and white enamel. There will be oak floors throughout. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the baths. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Bungalow—1 story and base, frame, \$2,000. Oakland, Cal. Architect, none. Owners, Realty Syndicate, Syndicate Bldg., Oakland. The dwelling will contain six rooms and bath. The trim will be of pine throughout. There will be tile mantels and open fire places. The exterior of the dwelling will be

covered with rustic. The plans are complete and figures are being taken.

Residence—2 story, attic and base, reinforced concrete, \$100,000. Berkeley, Alameda Co. Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, Mr. Spaulding. The dwelling will be erected in the Thousand Oaks Tract. The design is in the classic style. There will be a large number of living rooms, several baths and servants' quarters. There will be a steam heating system, vacuum cleaning and other modern features. The interior trim will be largely of hardwoods. There will be hardwood and tile floors. The exterior of the dwelling will be faced with cement plaster. The owner of the dwelling is the President of the Spring Construction Co., First National Bank Bldg., Berkeley. Figures are now being taken on certain parts of the work.

Bungalow—7, 1 story and base, frame, \$2,000. Oak, Oakland, Cal. Architect, none. Owner, E. A. Stewart, 618 41st St., Oakland. The dwellings have been designed for 5 rooms each and baths. The interior trim will be of pine throughout. There will be open fire places with attractive tile and brick mantels. The exteriors of the bungalows will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$5,000. Oakland, Cal. Architect, Al. J. Mazurette, Bacon Bldg., Oakland. Owner, Roger Colt. The dwelling will contain eight rooms and baths. The interior trim will be of pine with hardwood floors in the principal rooms. There will be furnace heat and open fire places. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the architect is taking figures on the work.

Bungalow—1 story and base, frame, \$2,500. Oakland, Cal. Architect, Olin S. Grove, 2911 Telegraph Ave., Berkeley. Owner, August Wenell. The dwelling has been designed for a seven-room house with bath. There will be pine and hardwood finish, open fire places and tile mantels. The floors will be of oak. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the architect is taking figures on the work.

Residence—2 story and base, frame, \$5,000. Oakland, Cal. Architect, A. W. Smith, 1004 Broadway, Oakland. Owner, Robert Bende. The dwelling has been designed for an eight-room house with two conveniences. The interior trim will be of pine, redwood and white enamel. There will be hardwood floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick. The exterior of the house will be covered with cement plaster on metal lath. The plans are complete and the architect is taking figures.

Residence—2 story and base, frame, \$5,000. Oakland, Cal. Architect, none. Owners, Home Building Co., College and Lawton Aves., Berkeley. The dwelling will contain seven rooms and baths. The interior trim will be of pine and hardwood. The floors of the principal rooms will be of oak. There will be furnace heat and open fire places. The mantels will be of tile.

The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are in the hands of the owners and the work will be done by Day Labor.

Bungalow—1 story and base, frame, \$2,000. Berkeley, Alameda Co., Cal. Architect, none. Owner, J. T. Owens, 1705 Virginia St., Berkeley. The dwelling will contain five rooms and bath. The interior trim will be of pine with some hardwood floors. There will be open fire places and tile mantels. The exterior of the dwelling will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$3,300. Oakland, Cal. Architect, Ivan Satterlee, 817 35th St., Oakland. Owner, C. M. McGregor. The dwelling will contain six rooms and bath. The trim will be of pine with some oak floors on the first floor. There will be furnace heat and open fire places. The mantels will be of brick or tile. The exterior of the dwelling will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Garage—1 story and base, frame and concrete, \$1,000. Oakland, Cal. Architect, none. Owner, William McKinnon, 22nd and San Pablo Ave., Oakland. The building will be used as a commercial garage. There will be large sales rooms and machine shop. The exterior of the building will be covered with cement plaster on metal lath. The roof will be of tin. The plans are complete and the owner is taking figures.

City Bids Opened.

SAN FRANCISCO COUNTY.

CONSTRUCTION OF PUMPING STATION NO. 2 ONLY LARGE CONSTRUCTION WORK CONSIDERED. CONSIDERABLE PAVING WORK.

The Board of Public Works opened four bids on the general construction of Pumping Plant No. 2, which is to be erected at Fort Mason. The figures on this work ran close, \$111,515 being the lowest figure submitted and \$143,000 the highest. Seven firms submitted figures for the structural steel work on this building; the figures ranging for \$9000 to \$14,600. The opening of the bids for the mechanical equipment of the pumping plant was postponed until the next meeting of the Board which is to be held on January 31st. But one bid, that of Robert C. Storrie & Co., was received for the laying of pipe in Powell, Market, Francisco and Bay streets. This work is the completion of Contract No. 44.

The following is a complete list of the figures submitted:

General Construction Pumping Plant No. 2, Fort Mason.

1	Healy-Thibbitts Constr. Co.	\$143,000
2	Charles C. Moore & Co.	128,900
3	Caldwell & Co.	110,000
4	Lang & Bergstrom.	111,515

Steel Work Pumping Plant No. 2, Fort Mason.

1	W. R. Kyle.	\$ 9,990
2	Ralston Iron Works.	10,450
3	Western Iron Works.	15,200
4	Pacific Rolling Mills Co.	14,500
5	Berkeley Steel Co.	9,800
6	Dyer Bros.	10,493
7	Charles C. Moore Co.	9,000

SAN JOSE AND SANTA CLARA VALLEY.

Bungalow—1 story and base, frame and concrete, \$12,600. Fair Oaks, San Mateo Co., Cal. Architect, Le Baron R. Olive, Redwood City. Owner, Mr. Fitzgerald. The dwelling will contain in the neighborhood of twelve rooms and three baths. The interior trim will be of pine, hardwood and white enamel. There will be furnace heat and open fire places. The mantels will be of brick or tile. There will be tile floors in the baths. The exterior of the dwelling will be covered with cement plaster on metal lath. There will be five finished rooms in the basement. The plans are complete and figures will be taken at once.

Residence—1½ story and base, frame, \$7,500. Fair Oaks, San Mateo Co., Cal. Architect, Roy Chelvers, Cross Bldg., S. F. Owner, Harry E. Pickett. The dwelling will contain nine rooms and two baths. The interior will be finished in pine and hardwoods with hardwood floors throughout. There will be furnace heat and open fire places. The mantels will be of brick and terra cotta. The exterior of the dwelling will be covered with shingles and cement plaster. The work is being done by Day Labor.

Pier—Reinforced concrete and wood, \$500,000. Santa Cruz, Santa Cruz Co., Cal. Engineering Dept. Santa Cruz Portland Cement Co., Crocker Bldg., S. F. Owners, Santa Cruz Portland Cement Co. The company has just secured a franchise from the city authorities to construct a large pier on the water front. The preliminary plans only have been prepared and considerable change may be made. The project under consideration is the construction of a reinforced concrete structure similar to the one at Santa Monica. The project will probably be brought to a focus within the next three months.

Contracts Awarded.

Apartment House—2 story and base, brick and steel, \$35,000. Monterey, Monterey Co., Cal. Architect, William H. Weeks, 251 Kearny St., S. F. Owner, A. R. Underwood, Monterey. Contractor, Robert Tread, 2610 Howard St., S. F. Contract price, \$32,775.

MARIN, CONTRA COSTA AND SONOMA COUNTIES.

Library—1 story and base, brick, \$12,000. Dixon, Solano Co., Cal. Architects, Parken & Kenyon, 244 Kearny St., S. F. Owners, City of Dixon. The building has been designed in the classic style of architecture. There will be a large public room, reading rooms, rack room and office for the librarian and assistants. There will

be furnace heat. The exterior of the building will be faced with cement plaster. The plans will be complete in one week and figures will be called for.

School—2 story and base, reinforced concrete, \$70,000. Richmond, Contra Costa Co., Cal. Architect, Louis S. Stone, Bacon Bldg., Oakland. Owners, City of Richmond. The architect has just been commissioned to prepare the plans for this building and complete details of the work cannot be given at this time. The plans provide for one of the most modern school buildings in the State. The design is in the classic style. The exterior will probably be faced with cement plaster. There will be a complete system of steam heating and ventilation. There will be a large auditorium, library, principal's office, and twelve class rooms. A vacuum cleaning system, program clock system and other special features will be installed. The plans will be completed as soon as possible and construction will be started within three months.

Cafe—1 story, frame. Cost not stated. Sausalito, Marin Co., Cal. Architect, M. Mattanovich, Pacific Bldg., S. F. Owners, Miromia Cafe Co. This building will replace the structure recently destroyed by fire. The building will cover a large area and is to be carried on a pile foundation. There will be a large dining room, private rooms, sleeping apartments, lobby, kitchen, etc. The exterior will be covered with shiplap. A hot air heating system will be installed. The plans are complete and figures are being taken by the architect.

Passenger Depot—2 story and base, reinforced concrete. Cost not stated. Petaluma, Sonoma Co., Cal. Architect, Engineering Dept. Northwestern Pacific R. R. Co., S. F. Owners, Northwestern Pacific R. R. Co. The company is now having plans prepared by the engineering department for the construction of a new passenger depot, freight shed and round house. All of this work will be of the reinforced concrete type of construction. Bids will be called for in the course of the next few weeks.

FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA.

Bank and Offices—6 story and basement. Class A construction. \$250,000. Fresno, Fresno Co., Cal. Architect, Edward T. Boulkes, Crocker Bldg. S. P. Owners, Howell-Chandler Co. This work was mentioned here before when the selection of an architect was first made public. The building will have a complete steel frame with the exterior walls faced with pressed brick and terra cotta. There will be elaborate banking rooms on the first floor and modern offices above. There will be steam heat and elevator service. The interior partitions will be of terra cotta, the floor of concrete. There will be meta' trim, oak, mahogany and marble. Plans for the steel work are complete and figures will be taken at once. All of the work will be segregated.

School—2 story and base, brick. Cost not stated. Delano, Kern Co., Cal. Architects, A. C. Swartz & Son, Fresno. Owners, Delano School District. This work has been mentioned in these columns before. The plans are now complete and the Board of Trustees are calling for figures on the construction. Bids will be opened on February 19th. The building will contain eight class rooms, auditorium and principals office. There will be a heating and ventilating system. The exterior of the building will be faced with pressed brick. There will be a vacuum cleaning system, program clock and bell system. Plans can be secured from the architects. For the official proposal see Sealed Proposals in this issue.

Theatre and Stores—3 story and base, brick and steel, \$10,000. Modesto, Stanislaus Co., Cal. Architect, Ralph P. Morrell, Yosemite Theatre Bldg., Stockton. Owner, Mr. Mensinger, Modesto. The building will be erected on 10th street, between I and J streets, and will give to the city of Modesto its first high class show shop. The structure will cover an area of 65x144 feet. There will be several stores on the first floor besides the theatre proper, its entrance and lobby. The construction throughout will be high class with considerable structural steel used. There will be a conduit system of wiring, a modern heating plant and system of ventilation. Adequate fire escapes have been provided. The exterior of the building will be faced with pressed brick and cement plaster. The architect has the working drawings well advanced and figures will be called for shortly.

Offices—2 story and base, brick and steel, \$60,000. Fresno, Fresno Co., Cal. Architect not selected. Owners, Pacific States Tel. and Tel. Co. S. P. The building will be designed for the exclusive use of the telephone company. There will be a large general office and apparatus room on the first floor, operating room on the second floor and office on the third floor. The building will be heated by a steam system. The exterior will be faced with pressed brick and terra cotta. The plans will be prepared at once.

SACRAMENTO, STOCKTON & NORTHERN CALIFORNIA.

Apartment House and Stores—3 story and base, brick and steel, \$20,000. Stockton, San Joaquin Co., Cal. Architect, Ralph P. Morrell, Yosemite Theatre Bldg., Stockton. Owner, L. Griffiths. This building was mentioned here when the plans were first started. The working drawings have been completed and the architect is now taking figures on the construction. The building will be the most modern apartment house in the city of Stockton. There will be a steam heating system. The exterior of the structure will be faced with pressed brick. Considerable structural iron will be used.

Bank—1 story and base, reinforced concrete, \$15,000. Princeton, Colusa Co., Cal. Architects, Parker & Kenyon, 244 Kearny St., S. P. Owners, Bank of Princeton. The building will be 75x30 feet and has been designed as a monumental structure. The entire building will be occupied by the bank. There will be a large public room, banking offices and offices for the president and other officials. Fire and burglar proof coin and safety deposit vaults have been provided. There will be steam heat. The interior of the banking rooms and the offices will be handsomely finished in hardwood, marble and plate glass. The exterior will be faced with white cement plaster. There will be a tile roof. The plans have just been started and it will be some time before figures can be taken.

Hotel Adams—Cost not stated. Oakdale, San Joaquin Co., Cal. Architect, Ralph P. Morrell, Yosemite Theatre Bldg., Stockton. Owner's name withheld. The plans for this work provide for extensive alterations and additions to the present brick building. The interior will be rearranged and a number of rooms added. There

will be new plumbing, including several bath rooms, electric work, plastering, interior finish and painting. The exterior work will consist of some structural steel, pressed brick and terra cotta work and sheet metal. The plans are being prepared.

Residence—2 story and base, frame, \$6,500. Stockton, San Joaquin Co., Cal. Architect, Ralph P. Morrell, Yosemite Theatre Bldg., Stockton. Owner, Mr. Morris. The dwelling will contain all of the modern conveniences. The exterior of the dwelling is of an attractive design and will be covered with shiplap. The porches will be of Klinker brick veneer. The interior trim will be of pine with hardwood floors. There will be furnace heat and open fire places. The mantels will be of tile. The tile will also be used in the baths. The architect has completed the plans and figures are now being taken for the construction.

Lodge Hall—3 story and base, brick and steel, \$30,000. Nevada City, Nevada Co., Cal. Architects, Parker & Kenyon, 244 Kearny St., S. F. Owners, Elks' Hall Association, Nevada City. The building will be arranged for stores on the first floor, large lodge rooms on the upper floors, social hall, banquet room and kitchens. There will be steam heating. The interior will be finished in pine and hardwood. The exterior of the building will be faced with pressed brick. The architects have just received the commission to prepare the plans, and working drawings have not been started.

School—2 story and base, brick, \$30,000. North Stockton, San Joaquin Co., Cal. Architects, Stone & Wright, Oakland and Stockton. Owners, North Stockton School District. The architects' plans for this building have been approved and figures will be called for as soon as the drawings can be completed. The building will contain eight class rooms. The structure has been designed for a grammar school building. There will be a plenum system of heating. The exterior of the building will be faced with pressed brick.

School—2 story and base, reinforced concrete, \$90,000. Woodland, Yolo Co., Cal. Architect, W. H. Weeks, 251 Kearny St., S. F. Owners, Woodland School District. The architect has just been selected to prepare these plans and details cannot be given. The structure has been designed as a high school. There will be steam heat and ventilating. The exterior will probably be faced with cement plaster. Working drawings are being prepared.

LOS ANGELES AND SOUTHERN CALIFORNIA.

Post Office—2 story and base, brick and concrete. Cost not stated. Corpus Christi, Tex. Architect, James Knox Taylor, Washington, D. C. Owner, U. S. Government. The building will cover a ground area of approximately 1.00 square feet. The exterior will be faced with cement plaster. The bids for the construction will be

opened at Washington, D. C., on March 2. See official proposal in this issue.

Residence—1 story and base, frame. Cost not stated. Pomona, Los Angeles Co., Cal. Architect, C. E. Wolfe, Pomona. Owner, T. Furlong. The dwelling is to be designed with a cobbles stone porch and rustic exterior. The interior will be finished in slashed Oregon pine. There will be open fire places with attractive mantels. The bath room will be handsomely finished. The plumbing throughout will be Standard. The architect is now preparing the plans.

Water System—Cost not stated. Oxnard, Ventura Co., Cal. Engineers, Olmsted & Gillellan, L. A. Owners, City of Oxnard. The engineers have had the plans for a complete municipal water system approved by the City Trustees, and the matter of bonding the city for the construction is to be voted upon at once. The plans provide for a concrete pumping station, a large amount of water mains, hydrants and all other appurtenances.

Apartment House—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, Robert M. Taylor, Douglas Bldg., L. A. Owner, Marcos Landsberg. The building will be 48x148, and will contain 84 rooms arranged in 36 apartments of from two to three rooms each with baths connecting. There will be steam heat, wall and disappearing beds, elevator service and a vacuum cleaning system. The exterior of the building will be faced with enameled brick. The plans are complete and figures are being taken.

Apartment House—3 story and base, frame. Cost not stated. Los Angeles, Cal. Architect, O. M. Warner, 739 Temple St., L. A. Owner, Ralph Gussy. The building will be 42x151, and has been arranged for 36 suites of two rooms and bath each. There will be steam heat, wall beds and oak floors. The exterior of the building will be covered with blue brick veneer and cement plaster. The architect is preparing the plans.

Apartment House—2 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, E. J. Borgmeyer, Stinson Bldg., L. A. Owner, E. W. Lowell. The building will be 47x120. The interior will be divided into 60 rooms, arranged in apartments of two and three rooms each with connecting baths, wall beds and other modern conveniences. There will be steam heat and a vacuum cleaning plant. The exterior of the building will be faced with cream and red pressed brick. The architect is ready to receive figures on the work.

Apartment House—2 story and base, frame, \$10,000. Venice, Los Angeles Co., Cal. Architect, Robert H. Walker, Coulter Bldg., L. A. Owner, Mrs. E. Lawrence. The building will contain 16 suites of two and three rooms each. There will be wall beds. The exterior of the building will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Sea Wall—Reinforced concrete, \$75,000. Coronado, San Diego Co., Cal. City Engineer Coronado, Coronado. Owners, City of Coronado. Bonds will be voted upon on March 5th to the sum of \$155,000 for the construction of a sea wall and the paving of Orange avenue from A avenue to First street. Plans for both of these pro-

jects have been prepared. There is little doubt but that the bonds will carry.

Church Addition—1 story and base, frame, \$110,000. Santa Ana, Orange Co., Cal. Architect, Norman F. Marsh. Broadway Central Bldg., L. A. Owners, First Methodist Church of Santa Ana. The work will consist of a two-story addition. There will be an entire new heating system installed. The plans may be obtained from the architect or from 114 West Fourth St., Santa Ana. Bids for this work will be opened on February 12th. The exterior of the building will be faced with rustic.

Church—2 story and base, brick and concrete, \$75,000. Riverside, Riverside Co., Cal. Architect, Myron Hunt, Union Trust Bldg., L. A. Owners, First Congregational Church of Riverside. The building will be 88x160 feet. There will be a main auditorium and Sunday School rooms. The main auditorium will have a seating capacity of 800 and the Sunday School room of 500. There will be a porte cochere, rector's study, kitchens, study rooms and 16 class rooms. The exterior of the building will be faced with cement plaster. The roof will be of red clay tile. The plans are complete and figures are being called for now.

Warehouse—5 story and base, reinforced concrete, \$35,000. Los Angeles, Cal. Architect, A. C. Martin, Higgins Bldg., L. A. Owners, Peck & Hills Co. This work has been mentioned here several times before. The plans are now out for figures and bids will be opened on Tuesday for the general construction. The building has been designed for a wholesale furniture warehouse.

Hotel—8 story and base. Class A construction. Cost, not stated. Los Angeles, Cal. Architect, W. J. Saunders. Wright and Callender Bldg., L. A. Owner, F. W. Braum. The building will contain a lobby and ladies' parlor in the first story; cafe, kitchen, etc. In the basement; twenty-four rooms and sixteen bath rooms on each of the upper floors; and a roof garden and sun porch on the roof. There will be a total of 184 guest rooms and 125 bath rooms. The interior finish will be in mahogany throughout. It will have a tile and marble entrance, freight elevators, vacuum cleaning system, steam heat, recessed water-plumbing in each room, hot and cold water-plumbing, metal window frames and wire glass, fire escapes, etc. The construction throughout will be of reinforced concrete, the cantilever system being used. The plans are complete and figures are now being taken by the architect.

Library Addition—2 story and base, brick, \$115,000. Pomona, Los Angeles Co., Cal. Architect, Robert H. Orr, Pomona. Owners, City of Pomona. Contractor, F. L. Somers, Security Bldg., L. A. Contract price, \$115,000. Note: This work has been mentioned here before when the bids were advertised for and the contract has been taken on the percentage basis.

Residence—2 story and base, frame, \$10,000. Montecito, Santa Barbara Co., Cal. Architect, A. B. Benton, 114 North Spring St., L. A. Owner, E. A. Danielson. The dwelling has been designed for a nine-room house with three bath rooms. There will be pine and hardwood trim, furnace heat and

open fire places. The baths will be finished in tile or brick. The exterior of the dwelling will be covered with cement plaster on metal lath. The architect has taken figures on the work.

School—1 story and base, brick, \$11,000. San Gabriel, Los Angeles Co., Cal. Architect, Paul V. Tuttle, Delta Bldg., L. A. Owners, San Gabriel School District. The building will be 100x39 feet and will contain four standard class rooms, besides the play rooms and furnace room, which will be located in the basement. There will be furnace heat and a modern system of ventilation. The design is in the Mission style and the exterior will be faced with cement plaster. There will be a clay tile roof. The working drawings are complete and figures are being taken.

Stores and Lodge Hall—2 story and base, brick. Cost not stated. Whittier, Los Angeles Co., Cal. Architects, Eisen & Son, Wilcox Bldg., L. A. Owner, Mrs. St. John. The building will be 80x80. There will be four stores on the first floor and lodge hall and offices on the second floor. The exterior of the building will be faced with pressed brick. The plans are complete and the architects are taking figures on the work.

Contracts Awarded.

Apartment House—8 story and base, reinforced concrete, \$250,000. Los Angeles, Cal. Architect, Paul C. Pape, Union League Bldg., L. A. Owners, F. O. Engstrom Co., Fifth and Seaton streets, L. A. Contractors, F. O. Engstrom Co. Contract price, \$250,000. Construction is to be started at once.

SEATTLE AND WASHINGTON.

Post Office—2 story, attic and base, steel, stone and brick. Cost not stated. Architect, James Knox Taylor, Washington, D. C. owner, United States Government. Sealed proposals will be received at this office until 3 o'clock p. m. on the 1st day of March, 1912, and then opened, for the construction (including plumbing, gas piping, heating apparatus, electric conduits, wiring and interior lighting fixtures) of the United States post office at Olympia, Wash. The building is to be approximately 5,500 square feet in ground area, two stories and attic, with granite facing to the first floor, limestone or sandstone above, and tin roof; the first floor only is of fireproof construction. Drawings and specifications may be had from the custodian of site at Olympia, Wash., or at the office of the Supervising Architect. See official proposal in this issue.

Apartment House—3 story and base, brick and steel, \$75,000. Victoria, B. C. Architect, Robert Knipe, Henry Bldg., Seattle. Owners, Lindsay & Roberts. The building will be 80x39 feet, and will contain 24 large apartments. There will be steam heat, elevator service, wall beds and other modern conveniences. The exterior will be faced with pressed brick and terra cotta. The plans are complete and figures are being taken.

Apartment House—3 story and base,

reinforced concrete, \$25,000. Seattle, Wash. Architect, V. W. Voonhees, Elliot Bldg., Seattle. Owner, G. Havers. The building will be 60x60. The interior has been arranged for two-room apartments with connecting baths. There will be steam heat, wall beds and a vacuum cleaning system. The exterior of the building will be faced with cement plaster. The architect is now preparing the working drawings.

Library—1 story and base, brick and steel, \$15,000. Centralia, Wash. Architect, Watson Vernon Aberdeen, Wash. Owners, City of Centralia. The building has been designed in the classic style with a large reading room, rack room and office for the librarian and assistants. There will be a steam heating plant installed. The exterior of the building will be faced with pressed brick. The architect is now completing the working drawings and bids will be called for within the next few weeks.

Railroad Construction—\$450,000. Tacoma, Wash. Engineers, Northern Pacific R. R. Co., Tacoma. Owners, Northern Pacific Railroad Co. The bids which will be opened in February will cover the project in three sections, the first 37 miles long, from Tenino to Ruston, including grading, the construction of a sea wall and building of bridges. The second section includes the construction of a 4,000-foot tunnel and the third section between Ruston and Tacoma business section. Bids are being taken by the Tacoma office of the Northern Pacific Railway.

School—2 story and base, frame, \$15,000. Vashon Island, Wash. Architects, Heath & Gore, Tacoma. Owners, Vashon Island School District. This work has been mentioned here before when the architects were first commissioned to prepare the plans. The working drawings are now complete and figures are being taken.

Stores—3 story and base, brick, \$50,000. Seattle, Wash. Architect, Harlan Thomas, Eilers Bldg., Seattle. Owner, William Thannum. Contractor, Alexander Dow, 1115 11th Ave., Seattle. Contract price, \$50,000.

Contract Awarded.

Bridge—Steel and concrete, \$30,000. Seattle, Wash. Engineers, Bowerman & McCloy, Central Bldg., Seattle. Owners, City of Seattle. Contractor, E. M. Stevenson, Portland. Contract price, \$29,494.

Garage—2 story and base, brick and steel, \$26,000. Seattle, Wash. Architect, Charles Haynes, Melhorn Bldg., Seattle. Owner, John Mathies. Contractor, William McInerney, 11th Ave., Seattle. Contract price, \$26,000.

Postoffice—2 story and base, brick, stone and steel. Cost, \$120,000. Walla Walla, Wash. Architect, James Knox Taylor, Washington, D. C. Owners, U. S. Government. Contractors, Dieter & Wentzel, Wichita, Kans. Contract price, \$119,484. Other bidders were as follows: Sound Construction Co., Seattle, \$128,500; King Lumber Co., Charlestonville, Va., \$137,680 or \$140,000; Camphren Building Co., Salt Lake City, \$121,640; J. S. Wise, Omaha, \$137,260.

PORTLAND AND OREGON.

Hotel—4 story and base, brick and steel. Cost not stated. Portland, Ore. Architects, MacNaughton & Raymond. Portland. Owners, Crown Trust Co. The building will cover a ground area of 50x200. There will be stores on the first floor as well as the office and lobby of the hotel proper. The upper floors will be divided into 96 large guest rooms with connecting baths. There will be steam heat and elevator service. The exterior of the building will be faced with pressed brick and terra cotta. The architects are now completing the working drawings.

Factory Building—2, 1 story and base, reinforced concrete. Cost not stated. Linton, Ore. Architect, Edward T. Root, Portland. Owners, Johnson-Bradford Safe Co. There will be two one-story and basement buildings, one designed for a foundry building and the other for the general office and machine shop. The exterior of each will be faced with cement plaster. The architect is now preparing the plans and bids will be called for at once.

Residence—2 story and base, frame, \$12,000. Portland, Ore., Architect, Edward T. Root, Portland. Owner, E. Brown. The dwelling will contain ten rooms and three baths. The interior will be finished in pine, oak and mahogany. There will be furnace heat, open fire places and brick mantels. The baths will be finished in tile. The exterior of the dwelling will be covered with cement plaster on metal lath and klinker brick veneer. The plans are complete and figures are being taken.

Bungalow—1½ story and base, frame, \$10,000. Oswego, Ore. Architect, Edward T. Root, Portland. Owner, Robert Kennedy. The dwelling will contain nine rooms and two baths. The interior trim will be of pine, hardwoods and white enamel. There will be furnace heat and open fire places. The mantels will be of brick. The baths will be finished in tile. The exterior of the dwelling will be covered with cement plaster on metal lath. The architect is preparing plans for this work.

Residence—2 story, attic and base, frame, \$14,000. Portland, Ore. Architects, Krtz & Dole, Portland. Owner, A. W. Osobock. The dwelling has been designed for a fourteen-room house with several bath rooms. The interior trim will be of pine, oak and mahogany. There will be steam heat and open fire places. The baths will be finished in tile. The mantels will be of brick. The exterior of the dwelling will be covered with brick veneer and shingles. The plans are complete and figures are being taken.

Stores and Offices—12 story and base. Class A construction. Cost not stated. Portland, Ore. Architects, Reid Bros., Call Bldg., S. F. Owners, Journal Publishing Co., Portland. Contractors, Pinckville Construction Co., Portland. The contract price not stated. The general contractors have awarded the following sub-contracts on the building: The structural steel contract was secured by Milliken Bros.; the granite will be supplied by the McCann Stone Co., who will furnish Raymond granite; the marble contract went to the Vermont Marble Co., and the terra cotta is to be furnished by

the Western Clay Co.; the millwork is to be turned out by the Parcellus Manufacturing Co., and the ornamental iron will be supplied by the Rudgers Metal Co. of San Francisco; the excavation work was done by J. C. Cook & Co. Figures are being taken for the heating, plumbing, wiring, painting, plastering and miscellaneous contracts, and bids on these will close from time to time.

Contracts Awarded.

Bridge—Steel and reinforced concrete, \$700,000. Portland, Ore. Engineer, Ralph Modjeski, Chicago. Owners, City of Portland. Contractors, Pennsylvania Steel Co. Contract price, \$699,000.

Church—2 story, stone and steel, \$65,000. Portland, Ore. Architect, Ellis F. Lawrence, Portland.

Worshiper Presbyterial Church. Contractor, Thomas Burkyne, Portland. Contract price, \$39,590. General construction. Pullman & Walker, plumbing. Contract price not stated.

Garage—2 story and base, brick and steel. Cost not stated. Portland, Ore. Architects, Claussen & Claussen, Portland. Owners, Winton Auto Co. Contractors, Alvan E. Construction Co., Portland. Contract price not stated.

Garage—2 story and base, mill construction. Cost not stated. Portland, Ore. Architect, none. Owners, Ballou & Wright. Contractors, Camp & Co., Portland. Contract price not stated.

Stores and Offices—2 story and base, brick, \$16,000. Portland, Ore. Architects, Parker & Banfield, Portland. Owners, Stroubridge Hardware and Paint Co. Contractors, Parker & Banfield, Portland. Contract price, \$16,000.

CONTRACTOR W. B. ANDERSON DOES NOT LIKE TELEGRAPH HILL.

Calls It a Wart on the Face of Fair San Francisco.

Contractor W. B. Anderson has addressed the following communication to the Board of Supervisors which was by them referred to a committee. Here is the letter in full:

San Francisco, Cal., Jan. 13, 1912

To the Honorable,

The Board of Supervisors, San Francisco, Cal.

Gentlemen:

Judging from your earnest preliminary meetings, it is your desire to do great and enduring things for San Francisco. You are her chosen few, in whom great confidence is reposed, and from whom great things are expected, and while you may possess sufficient wisdom to successfully perform the enormous work expected of you, yet, I think you should receive, and welcome suggestions from time to time, from people who, chose you as their representatives, and upon whom devolve the task of providing the shew of war. Of the many great enterprises confronting you, and for which the people demand an early accomplishment, such as the tunneling of Clackson street hill, the extension of Market street, straight by tunnel, through and under the Twin Peaks, thereby bringing close in, and opening up a vast territory for settlement, now wholly inaccessible, the establishment of a permanent "Civic Center," the building of a City Hall, suitable for all requirements, and of such architectural beauty as will comport

with this, the great city to be, for all time to come, the tunneling of Fillmore street hill, the building of two grand road exits to the County line, the extension of West Mission street, straight to Market and Twelfth streets, etc., along with your portion of the work of the great Panama Exposition, now under consideration and formation, thus making your duties great, almost beyond the possibilities of mere man. But with all this to be undertaken and accomplished, yet it is not all, there is another great work to be performed for the good of this city, and now comes my first suggestion. It is the removal of Telegraph Hill; that ugly wart on "Miss San Francisco's" otherwise beautiful face. Nature in a fit of anger produced it, and there for centuries it has stood in all its ugliness, a hindrance to progress. Man for many years has had to go round it, and shall the thousands now swarming at its base, have to go round this ugly heap forever! No! Cut it down! Why let it stand longer! In cutting it down, not an inch of territory would be lost or gained by any present possessor, and if so arranged each could hold title to his own.

About thirty years ago, a few nature fakirs thought they could see great beauty in this fog swept obstruction, and the writer erected at their expense a spacious pavilion on its seared summit, and the world was invited to come, see and enjoy this supposed beauty spot, and some rash minded persons did actually ascend its wind-swept slope once, but never again, and the undertaking was doomed. Not to be defeated, however, they next built a railroad to its top, and an invitation was again sent to the world and its friends to come and visit this wart, but the wise world said No again. And now as a last resort, "Old Vine and Young Women" were added to the list of attractions, but even these powerful magnets failed to attract to the hilltop, because both could be found in great quantities on the lower levels, and then Fire kindly swept the unfrequented castle from the hill. This is to show you that the people do not value it as a thing of beauty, and the hardship to reach its top to view the shores and hills of adjoining Counties, brings poor returns. Now as to possessing beauty itself, or as a view spot, it has no merit. It is only a hill, and does not possess the grandeur and majesty of the mountains. As to its value in its natural state, let us see. It is claimed by some to be a shield; that it protects the shipping in the bay from the wind, and it does really just about as much, as the Mills Building protects the people from the wind on Montgomery street. As a wind-break, it has no value. Taking the hill as a whole, the value of a twenty-five foot lot does not exceed two hundred dollars, and if the same lots were lowered to an easy grade for heavy hauling and warehouse purposes they would be worth ten thousand dollars. For many years, its northeasterly side was carted away in large quantities and used for ballast for ships, and in the last several years, a firm of enterprising brick and terra cotta manufacturers has purchased several lots and have by their skill and ability converted many tons of this impediment to mercantile progress, into very valuable building material, and for this

purpose this hill has great value, and this is all than can be said in its favor and every man who has reduced its bulk in anyway is deserving of commendation instead of vile villification. Yes! cut it down; make the necessary legal preparations for its ultimate reduction to a level plain, whether by purchase, condemnation or otherwise, the writer careth not, so long as its removal may be accomplished, as every dollar laid out in an attempt to beautify it would be just so many dollars sown to the western winds, and your partitioner will ever pray,

Respectfully,
W. B. ANDERSON.

ORGANIZATION TO FIGHT TUBERCULOSIS.

New Agencies Being Organized, Schools and Sanatoriums

Nearly 2000 organizations of various kinds were engaged in the fight against tuberculosis on January 1, 1912, and new agencies have been formed during the past year at the rate of about one a day, according to a statement issued recently by The National Association for the Study and Prevention of Tuberculosis.

These anti-tuberculosis societies include 618 associations and committees; 451 sanatoria, hospitals and camps; 366 dispensaries and clinics; and 91 open air schools. If to these were added 200 state and local boards of health and a number of other institutions, such as hospitals for the insane and penal institutions making special provision for tuberculosis cases, the total number of agencies engaged in tuberculosis work would be swelled to nearly 2000.

During the year 1911 the greatest percentage of increase among the different forms of tuberculosis work was among the open air schools for anaemic and tuberculous children. On January 1, 1911 there were only 29 open air schools in operation or provided for in the entire country. On January 1, 1912, there were 91, an increase of 214 per cent. Sixty-two new schools have been established or provided for this past year. This entire number of open air schools have been established since January 1, 1907.

On January 1, 1905, there were about 150 different agencies engaged in anti-tuberculosis work, of which number 111 were sanatoria. This increase to over 2000 agencies has emphasized, the National Association points out, the importance of the campaign for the prevention of consumption being carried on in all parts of the country.

AFRICA.

(From the Berliner Tageblatt.)

Great Motor Project.

Germany's new West African territory is to be linked up with its East African colony by a service of motor cars across the continent passing through the Belgian Congo. The connecting of different districts by a service of motor cars has already been tried with encouraging success in the Belgian Congo, and the German Government has decided to adopt the same means of communication. New roads will have to be cut through forest and hewn out of mountainous country; bridges will have to be constructed to span rivers, and a considerable amount of organization will be necessary be-

fore the scheme gets into working order; but already a number of German engineers and military officers are surveying the ground and studying the best route.

IRON ORE IN 1911.

Estimated Production According to United States Geological Survey.

Preliminary estimates of iron ore sold in 1911 were sent to the Geological Survey by 26 of the largest iron-mining companies in the United States at the close of the year. The combined output of these companies represents more than 80 per cent of the total production of the United States. From these returns it is estimated by E. F. Burchard, of the Survey, that the total quantity of iron ore marketed in the United States in 1911, not including stocks left at the mines, was between 43,000,000 and 46,000,000 long tons. This quantity represents a decrease of 22 to 24 per cent of the sales for 1910, which aggregated 56,889,734 long tons. The output for 1910 was the largest quantity of iron ore ever marketed in a single year in the United States, and according to the present estimate the quantity produced in the year 1911 will take fifth place, being exceeded by that of 1910, 1907, 1909 and 1906 in the order named. It is estimated that of the ore produced in 1911 between 39,250,000 and 42,000,000 long tons was red hematite, the remainder consisting of brown hematite, magnetite, and iron carbonate ores. According to the returns received the Lake Superior district, in Minnesota, Michigan, and Wisconsin, apparently produced between 32,000,000 and 35,000,000 long tons of red and specular hematite, which represents a decrease of 23 to 28 per cent compared with the production of 1910 46,328,743 long tons.

In the Birmingham district, Alabama, the second largest iron-mining center, the production of iron ore apparently decreased 18 to 20 per cent from that of 1910, the estimated production for 1911 being between 3,050,000 and 3,125,000 long tons, compared with 3,802,115 long tons in the preceding year. The ore mined in the Birmingham district consists of red and brown hematite in the proportion of about 4 to 1.

The production of iron ore in Tennessee and Virginia apparently decreased only about 16 per cent, according to reports from the principal producers in those States.

As the production of pig iron for 1911 may exceed 32,500,000 tons, a larger production of iron ore might appear to be required than has been estimated above, but it must be considered that at the close of 1910 there was 9,405,235 long tons of iron ore in stock at the mines in the United States, and that of this total 8,471,108 long tons was at the mines in the Lake Superior district. Just how heavily this surplus stock of ore was drawn upon in 1911 it is impossible to state at present, but owing to the increased activity in the manufacture of pig iron toward the close of 1911 it is probable that the 1910 surplus was in part cleaned up and that at the end of 1911 only a relatively small quantity of iron ore remained at the mines.

RANGERS MEET THEIR OWN RECORD.

Marked Increase in Fire Protection Efficiency.

Owing to several late fall fires, the District Headquarters of the Forest Service has been delayed in issuing its annual forest fire report.

This report for District No. 5 has just been compiled for the nineteen National Forests situated in California and Western Nevada, and it shows a long lead on the fire record of the District for 1910.

Although a total of 797 fires occurred this year as against 553 fires last, yet the total acreage burned over is decreased by nearly 75%, or 66,508 acres for 1911 as against 258,713 in 1910. This big difference in area burned is accounted for by the fact that 40% of all the fires occurring this year were sighted, reported, reached and controlled within an area of a few square rods. Last year only about 23% of the fires came within this class. This comparison represents remarkably well the increased efficiency of the patrol system and the tremendous advantage gained by additional patrol and field equipment during the past year.

Upon nearly all of the Forests, permanent lookout peaks were selected and manned. Telephone lines were constructed from these peaks to the Ranger's or Supervisor's headquarters. From each station the lookouts kept a constant watch for fires.

It is obvious that with a smaller area to cover from a lookout, greater accuracy of the location of each fire can be obtained, and the efficiency of any lookout station depends entirely upon the accuracy with which fires can be located. A large increase in the number of stations in operation is one cause of the splendid record this season.

Before another fire season begins, every National Forest Supervisor will go carefully over his fire protection plans which were in effect during the past season. Based upon a study of each fire, he will change certain patrol routes, add more fire guards in certain fire districts, and strengthen every weak spot of his operating scheme. The men in the Forests are going to try for even a better fire record for the coming year.

RUSSIA.

(Announcement of the official Commercial and Industrial Gazette, St. Petersburg.)

Proposed Port Improvement at Liban.

The Minister of Commerce has submitted to the Duma a bill providing for port improvements at Liban. This is almost the only Russia port open to navigation all the year round—an advantage which, especially in comparison with its rivals Königsberg and Danzig, is not fully utilized owing to defective port arrangements and accommodation generally, including insufficient depth, restricted port area, and unsatisfactory warehousing accommodation which especially adversely affect grain cargoes. The bill provides for quay extension and dredging at a cost of \$1,350,000 for the works and \$350,000 for the necessary equipment and appliances, etc.

THE CORBIN UNIT LOCK-SET

comes with all parts attached just as it will appear on your door. It is as secure and smooth in action as a Safe Lock. IT is found on the finest Office Buildings and Residences in the City. Why not on yours?

Have you considered the Corbin Unit Lock in connection with your new Building or Residence? Look into it. It will pay you

Editorial Comment.

The season of 1912 will in all probability be a record one for the canning industry in Alaska. It has been estimated that fully ten additional salmon canneries will be opened up there during the coming year. And with these in operation the output will be materially increased.

The fishing industry stands second in the list of Alaska's productive resources. The annual report of Walter L. Fisher, secretary of the Interior, estimates that 15,000 persons are employed in it, that the capital invested totals \$20,000,000 and that the finished product has an export value of \$10,000,000.

This is a trade worth having and one which San Francisco should look to get its share.

Secretary Fisher in his annual report calls the attention to Congress to recommendations of Governor Clark of Alaska concerning needed laws for the protection of the industry.

Among these one is asked permitting regulation of the number of salmon canneries. More immediately important, probably, is the request for a law forbidding the taking of herring for the manufacture of fertilizer and oil.

The recommendation that public fish hatcheries be maintained appears excellent and if such institutions are operated successfully, they should result in keeping the salmon industry up to its present stage and possibly even cause it to surpass the best output of the past.

The California Safe Deposit & Trust Company's affairs seem likely to go on for unlimited time. Every Tom, Dick and Harry that has an interest in the affair has some plan of his own and the objections and lawsuits are likely to tie up affairs until the assets are wasted and the poor devil who had their savings in the concern will lose it all or nearly all. That institution was certainly an instance of monumental gaff, criminality and incompetence. Lawyer Barnett was a visionary whose mental and moral balance seems hard to determine while J. Daizel Browne was a bulldozing faker of monumental gaff and a fit subject for the custody of the State's prison.

The assets of the institution should be thoroughly investigated and appraised by men competent to make the appraisal. Then sell the thing out and realize all that can be realized and wind it up. Otherwise endless lawsuits will eat up the resources, advantageous sales will be delayed and the depositors will die before they got any return. The thing to do is to think up some practical plan that

can be worked out and go ahead and do it.

In the case of the Market Street Bank the Bank Commissioners had allowed an irresponsible corporation to go into the bank and on the ground of reorganization get control of a majority of the depositors books. Yet with all these impediments the Receiver there appointed sold the assets and paid the depositors fifty cents on the dollar at the end of eight months. Something similar should be done in the case of the California Safe Deposit and Trust Company. As the Dutchman said, "A brick in the wall is worth ten in the face."

The world tourists on the Steamship Cleveland have had pleasant days to view San Francisco. With a latitude the same as that of New York City they have been able to view the sites of the city by the Golden Gate with all the comforts of the summertime. And of all the cities of the world that they will visit perhaps none present a more distinct individuality and has a greater interest than San Francisco. For it is distinctly a western type. Some of the glamour of the old days still lingers in re-bulldozed streets and places of amusements and its public park and uninvited seems will always remain to greet the traveler from whatever country he may come. For those of the travelers who have during the past few days viewed the city and its environment for the first time there is no doubt a pleasant surprise. They will spread the news that this place has unrivaled advantages for an exposition city and will no doubt be among the first to come when the fair is opened to the world.

The Tracing of Food from grower to consumer is the comprehensive work planned by Secretary Charles Nagel, of the Department of Commerce and Labor.

The vast undertaking, which will have as its object an inquiry into the increased cost of living, will be under the personal direction of Charles F. Neill, Commissioner of Labor.

The inquiry will be sweeping. It will be broader in scope and effect than any like effort ever made in this country or any other nation.

To trace the food products from producer to consumer, seeing just where the cost is added on will certainly be of benefit to the public at large. Some where in the line there is a big addition. Whether it be one or many will have to be determined. For the price received on the farm and the price paid by the ultimate consumer is sometimes widely different. The middleman's profit will be determined and when production and distribution are controlled by a corporation the amount received can be ascertained. There is a reason for the high cost of living and the only way to find it is to investigate the subject from top to nosh.

Brick and Pottery Making In the Philippines. An Account Of the Industry As It Exists Today.

Since the day when Admiral Dewey gave the world an object lesson in American marksmanship at Manila nearly fifteen years ago, much has been written about the Philippine Islands, so I may not tell the readers of this journal a great deal that they do not know about this far-away possession of the United States, but what little I do tell will be from personal observation, information gained in a year's residence in and near Manila. That I tarried there so long is an indication that life is quite bearable there, for I was on a pleasure trip. Originally I meant to stop but a short time, but became interested in school work and remained until the call of family affections brought me back to Hoesierdom.

Though a tropical country, several of the islands—there are more than two thousand of them all told—afford a very comfortable living. The coolest months of the year are December, January and February, when the thermometer ranges from 60 to 80 in the shade, rather a remarkable contrast to the zero weather which now prevails throughout the northern states. The other nine months of the year "two degrees in the shade" is not a mere form of speech. On the contrary the temperature is usually higher than that. Nevertheless by seeking quiet and rest during the midday hours when the heat is most oppressive, one may engage in most any ordinary work with little discomfort, especially if protected from the direct rays of the sun. The evenings are usually quite pleasant, generally a cool breeze prevails, especially after sunset, and makes a stroll through the well shaded thoroughfares enjoyable.

Manila, the chief city, now has some 250,000 people, many of whom are Americans, government officials and soldiers predominating, of course, but with them a goodly number of globe-trotters who, like myself, not infrequently prolong their stay because of the inviting surroundings. Were it not so far away from the United States, these islands would become popular pleasure resorts, but as it takes from four to six weeks to make the boat trip from San Francisco to Manila, pleasure trips there will not become a pastime. The Government now runs transports once a month each way, so that, as a rule, one can figure on getting mail within five or six weeks after it is posted. Those who have time, means and the inclination for such a lengthy journey will find it an attractive one, especially if they are in quest of rest and health.

I was asked to tell the readers of The Clay-Worker something of brick and pottery work in the Philippines. The story will have one merit. It will be brief. Manila is an ancient city compared with those in America, and there remains in and about it some interesting relics of olden time of much interest to sight-seers. Among the most enduring of which is a great

stone and brick wall, which was built around the old city hundreds of years ago, and yet stands a monument to the skill of the Spanish builders of those days. The wall is some twenty feet wide, thirty feet high, and extends from near the old water front, or beach, up and about the ancient part of the city. Evidently, it was intended as a measure of protection from invading forces of marauders, and was built at various times commencing with the reign of Philip the Second, for whom the islands were named.

There is an abundance of raw material, clay of a good quality being found on all the principal islands. There are two kinds of clay on the island of Luzon, to which my attention was called, one a reddish brown clay of which most of the brick are made, the other a black clay which is used for making pottery for household use, such as cooking pots, water jars, etc. This pottery is indispensable to the natives. Oftentimes it is the only possession of the native besides the mat on which he sleeps, and a very scant wardrobe which, among some of the tribes, is much abbreviated. Indeed, they cook their food in these pots and eat it out of them and, if any of it is left, they preserve it in them. These pots are their pantry and icebox combined, and it is really remarkable how cool water will keep in them, considering the tropical heat. The Filipino is very dependent on this kind of pottery. About the nearest thing the natives have to a stove is a peculiar shaped dish, into which they put a little charcoal for fuel. Needless to say, this native pottery is very cheap, the best of it costing but a few pennies ordinarily. For these reasons the pottery industry is permanent in character, but may not be sufficiently remunerative to justify an exodus of American potters. Few of them can afford to leave their happy homes to engage in the pottery business in the Philippines. From my observations, the business is carried on strictly from an utilitarian viewpoint. Only plain, crude ware is made. At any rate, I saw nothing that was meant to be artistic.

I am sorry to say that the brick industry is scarcely more inviting, for it seems to have been on the decline of recent years. In the old Spanish days, most of the good buildings were built of brick or stone, but in the last few years, since the Americans have been in charge and have directed most of the building, they have introduced concrete into general use. This may not continue, for much of the concrete work has proven defective and unsatisfactory, and not a little of it must be done over or repaired.

In the little town of San Pedro Macati (on the electric line between Manila and Port McKinley) a few miles from Manila, there were originally twelve brick manufacturing concerns, all but two of which have gone out of

business during the past two or three years. The same is true of all the brickmaking places near Manila; there is so little demand for brick that most of the brickmakers abandoned this work. Most of the brick that were made were made by hand, though a little machinery of a crude sort was used by some of the brick manufacturers. They have been making brick in this section for several hundred years, but the plant I visited, "La Olympia," started about twenty years ago, and ran until two or three years ago. It was the largest of the plants at San Pedro Macati. It was one of the so-called machine plants, and had a daily capacity of about 10,000 brick. As the climate is practically the same year around, bricks were made right through the year. Where brick were made by hand, the daily stint was 1,000 brick for one man.

One thing that struck me as being peculiar was that the brickmakers did not own the land from which they took their clay. The people here are extremely poor as a rule, and no one owns but a few acres of land at most. I was given to understand that the brickmakers were given the clay for the asking, for the reason, it was stated, that the land was more valuable after the top layer was removed because the principal grown is zacate, a green forage, which needs to be planted deep in the ground. So when a farmer wishes to plant zacate, he permits the brickmaker to take off the top soil and clay to a depth of two or three feet, and plants his zacate. I was told, though, that the clay extends down many feet in depth of practically the same quality, so, as I have said, there is no limit to the amount of raw material.

After digging the clay, it is hauled in wagons to the plants by carabos, the pack animal of the Philippines. This faithful but ugly creature is the salvation of the Filipino. The clay is first put into a square pit and several of the enormous carabos are put in the pit and tramp it until it is thoroughly mixed or tempered. Clay enough for 6,000 brick is usually tramped in four hours' time. It is then taken out by hand and molded into brick, after which the brick are placed on the ground about a quarter of an inch apart and left to dry. Some sort of covering is provided to protect the raw brick from the sun while drying. In the dry season, this process is accomplished in about a week, but in the wet season it sometimes takes a month or two. The plant referred to, the La Olympia, was operated by steam power, the machinery being imported from England. The brick I saw were 3½ inches long, 4½ inches wide and 2½ inches thick. The brick are hauled in small wagons from machine to kiln where they are set about one-quarter of an inch apart. The kiln I saw was divided into twelve compartments, each compartment large enough to contain six or

seven thousand brick. The fuel used is Australian charcoal, which costs about \$5.50 a ton, and is better and cheaper than other charcoal there. In many cases wood is used, which costs \$2.00 per cord, but I was told that it requires one cord to burn a thousand brick. It takes five days to water-smoke the brick and another eight days to finish the burn. Later in it is anticipated that coal will be used as a fuel. It is claimed that they have immense deposits of a good grade of coal on the islands which are only just being opened up.

It is hard to discuss the labor situation here with one who is used to American labor. The conditions are so different. It is hard to compare Oriental slowness and easy going ways with our modern habit of rush and strife. As Filipinos go, there seems to be no special trouble in getting and keeping labor, a strike is rarely heard of and they work steadily as a rule. They are hired in two ways, by the day and by the piece. That is, per thousand brick made. Where the latter rule prevails, they are paid by the thousand brick in the kiln, part of the wage being paid when they are put in the kiln, and the rest when they are taken out. The usual rate is \$2.00 per thousand. When day work is the rule, the average pay is 50 cents a day. This is twice what they were paid under Spanish rule, when the wage was 25 cents per day. In explaining the apparent difference in the scale of wages between day work and piece work, it is stated that in day work they work from 7:00 a. m. to 5:00 p. m., but when they are paid by the thousand, workmen often start in at 4:00 a. m. and work until 6:00 or 7:00 p. m., and work hard all the time.

The best brick sold for \$11 a thousand, and ordinary brick bring \$7.50. The brick plants are located on the Pasig river, and the brick are carried down to Manila in bancas, little native boats, at very low cost, about one-fourth the cost of hauling in wagons. There is one drain tile plant in this vicinity but it was not in operation at the time I was there, and may share the same fate as the brick plants. Much of the information I obtained was from a native brickmaker seventy years old, who said he had been a brickmaker all his life. At best, brickmaking in the Philippine Islands is like everything else there—it is primitive and far behind the age.

PANAMA CANAL.

(From Report of the Secretary of Isthmian Canal Commission.)

The entire length of the Canal from deep water in the Atlantic to deep water in the Pacific is about 50 miles. At Gatun a vessel will enter a series of three locks in flight and be lifted 85 feet to the level of Gatun Lake. It may steam at full speed through this lake for a distance of about 24 miles, where it will enter the Culebra Cut. It will pass through the Cut, a distance of about 9 miles, where it will enter a lock and be lowered 20-1-3 feet to a small lake, and will pass through this for about 1½ miles. There it will enter two locks in series and be lowered to sea level, passing out into the Pacific.

Gatun Lake will impound the waters of a basin comprising 1,320 square

miles. When the surface of the water is at 85 feet above sea level, the lake will have an area of about 141 square miles, and will contain about 300 billion cubic feet of water. Making due allowance for evaporation, seepage, leakage at the gates, and power consumption, this would be ample for 11 passages daily through the locks using them at full length.

The average number of lockages through the Sault Ste. Marie Canal on the American side was 37 per day in the season of navigation of 1909, which was about eight months long. The freight carried was more than 30,000,000 tons. The Suez Canal passed about 12 vessels per day, with a total tonnage for the year of about 12,500,000.

Electricity will be used to tow all vessels into and through the locks, and to operate all gates and valves, power being generated by water turbines from the head created by Gatun Lake. Vessels will not be permitted to enter or pass through the locks under their own power, but will be towed through by electric locomotives running on cog rails laid on the tops of the lock walls.

The average time of filling and emptying a lock will be about fifteen minutes, without opening the valves, so suddenly as to create disturbing currents in the locks or approaches. The time required to pass a vessel through all the locks is estimated at 3 hours; one hour and a half in the three locks at Gatun and about the same time in the three locks on the Pacific side. The time of passage of a vessel through the entire Canal is estimated as ranging from 10 to 12 hours, according to the size of the ship, and the rate of speed at which it can travel.

The Subsistence Department does a business of about \$7,500,000 per annum.

The Commissary system consists of 22 general stores in as many Canal Zone villages and camps. About 65,000 people are supplied daily with food, clothing and other necessities. The following plants are also operated: Cold storage, ice making, bakery, coffee roasting, ice cream and laundry.

The Hotel branch maintains the Hotel Tivoli at Ancon, and also 18 hotels along the line for white and colored employees, serving monthly about 200,000 meals for 50 cents each. There are 16 messes for European laborers, serving monthly about 270,000 meals at 40 cents per ration of three meals. There are also for the West Indian laborers 14 kitchens, serving monthly about 100,000 meals at 27 cents for 3 meals. The supplies for one month cost about \$85,000; labor and other expenses about \$17,500. The monthly receipts, exclusive of the revenue from the Hotel Tivoli, amount to about \$165,000.

The Canal Zone contains about 448 square miles, and extends for five miles on each side of the center line of the route of the Canal. It includes the group of islands in the Bay of Panama. The cities of Panama and Colon are excluded from the Zone, but the United States has the right to enforce sanitary ordinances in those cities, and to maintain public order in them in case the Republic of Panama should not be able, in the judgment of the United States, to do so.

STANDARD CONTRACT FORMS ISSUED BY THE AMERICAN INSTITUTE OF ARCHITECTS.

A new organization that has succeeded in accomplishing more reforms in contractual practice, both within and without its ranks than any other, the American Institute of Architects stands first. While contending with newer conditions and a less ethically developed people than that of Germany, France, Italy or England, it has successfully regulated many of what might be termed the business features of the profession and established rules thereby that have the support of the profession and interested public alike. While the establishment of a better government architecture through the passage of the Tarnsey Act, the appointment of a civic commission for the city of Washington, or the regulation of public competitions, being broadly to this general improvement of architectural practice and the betterment of design, it is the establishment of standard documents for the use of the architect in his dealings with the contractor and owner, and the contractor in his dealings with architect and owner, that the work of the Institute takes its most practical and beneficial form. For almost twenty years the uniform contract a standard form evolved and issued jointly by the National Association of Builders and the Institute, has been in general use to the practical abolition of disputes over obscure terms or lack of equity in contracts. Ever since this document was established committees of the Institute have been at work upon other standard forms, especially during the past ten years, and have reported reports and exhibited these documents have been issued. They comprise those forms currently used by architects, and the effort has been to improve them with a view to making them clear in thought and statement, equitable as between owner and contractor, applicable to work of almost all classes, binding in law and standard of good practice. The forms are six in number: "Invitation to bid," "Instructions to bidders," "Form of proposal," "Form of agreement," "Form of bond," "General conditions of the contract." These forms while intended for use in general practice, can be regarded as a form of reference representing the judgment of the Institute as to what constituted the best practice of the profession. It is in this latter phase that the Institute preserves its ethical integrity and at the same time gives to the users a readily understood form and a simply worded document that will bear legal inspection. The direct work was in the hands of the Institute Committee on Contracts and Specifications, of which A. B. Pond of Chicago, was chairman. To get its results, the committee studied with great care the forms in use by thirty well-known architects, and also the uniform contract. Tentative forms were first embodied in a first and second edition which were submitted to all the chapters of the Institute for criticism. As a result of all the criticisms thus obtained, careful revisions were made and embodied in a third edition. This in turn was submitted for criticism to engineers, contractors, and architects throughout the country. The results, with their

and base, brick and steel, \$50,000. Architect, J. S. Cote, Haight Bldg., Seattle. Owner's name withheld. The work has been mentioned here before when the architect was first instructed to prepare the plans. The working drawings are complete and bids will be called for next week for the superstructure. The exterior will be faced with pressed brick. There will be a complete steel frame, hot water heating system and a clay tile roof.

Contracts Awarded.

Long Beach, Los Angeles Co., Cal.—Hospital, 2 story and base, frame, \$14,000. Architect's name not given. Owners, Seaside Hospital Association. Contractor, C. A. Reed, 242 Atlantic Ave., Long Beach. Contract price, \$14,000.

HOTELS.

San Francisco—Hotel, 9 story and base, Class A construction, \$300,000. Architects, MacDonald & Applegarth, Cal. Bldg., S. F. Owners, Cliff Estate. The owners of the property at the northeast corner of Geary and Taylor streets have just announced the selection of the above mentioned firm of architects to prepare the plans for their new hotel structure. The building will cover a full Fifty Vara lot. The upper floors will be subdivided into about 320 rooms with connecting baths. The first floor will be devoted to the lobby of the hotel and the main office. There will be a large public dining room and smaller private dining rooms. The mechanical equipment of the building will be complete to the last detail. The steam heating plant will be of the oil burning type. There will be elevators and a vacuum cleaning system. The exterior of the building will be faced with pressed brick and terra cotta. The architects state that the working drawings will be complete within a month.

Sacramento, Sacramento Co., Cal.—Hotel and stores, 3 story and base, brick, \$20,000. Architect, E. C. Hemmings, 1005 K street, Sacramento. Owner, Fred T. Klitts. The building will be erected at the corner of Sixth street and Oak alley. There will be six stores on the first floor and a number of rooms above. The exterior of the building will be faced with pressed brick. The plans are complete and the architect is taking figures on the work.

Los Angeles, Cal.—Hotel, 8 story and base, reinforced concrete, \$100,000. Architects, Dennis & Farwell, Fay Bldg., L. A. Owners, Los Angeles syndicate, represented by Ira W. Byrnes. The building as planned will contain 462 guest rooms and 112 baths. There will be steam heat and elevator service, large lobby, dining rooms, stores and main lobby. The construction will be fire proof throughout. The exterior of the building will be faced with cement plaster. The architects have only completed the preliminary sketches. About one-third of the necessary capital has been secured.

San Francisco—Hotel and stores, 3 story and base, brick, \$15,000. Architect, Joseph Cahen, 45 Kearny St., S. F. Owner Isador Rosenberg. The building will be erected on Third street and will contain two stores on the first floor and rooms above. There will be baths and toilets on each of the upper two floors. The store fronts

will be of copper and plate glass. The exterior walls of the building will be faced with white cement plaster. The plans are complete and the work will be done by Day Labor.

Portland, Ore.—Hotel, 4 story and base, brick, \$35,000. Architects, Bennes & Hendricks, Portland. Owner, E. Hagedorn. The building will be 12x105 feet, and will contain 80 rooms besides the public and private baths. There will be steam heat and elevator service. The exterior of the building will be faced with pressed brick and terra cotta. The plans will be completed as rapidly as possible and figures will be taken.

San Francisco—Hotel, 12 or 14 story and base, Class A construction \$150,000 to \$250,000. Architects, MacDonald & Applegarth, Cal. Bldg., S. F. Owner, Charles Crocker. The building will occupy a site in the west line of Stockton street, between Post and Sutter streets. The plans provide for one of the best equipped hotel's in the west. The lot has a small street frontage, but extends back considerably over 150 feet. There will be a complete steel frame and exterior walls of reinforced concrete. The exterior will probably be faced with terra cotta. The interior will be handsomely finished in hardwoods and marble. There will be steam heat and elevator service. The building will contain in the neighborhood of 200 rooms, the greater number of which will have connecting baths. The plans will shortly be ready for figures.

San Francisco—Hotel and stores, 4 story and base, brick, \$50,000. Architect, Alfred Henry Jacobs, French Bank Bldg., S. F. Owner, Charles Schlusseringer. The building will cover a site 34x86 and will contain a number of stores on the first floor and about sixteen rooms to the floor on the upper three floors. There will be steam heat and elevator service. The interior trim will be of pine throughout. The exterior of the building will be faced with cement plaster. The architect is now preparing the plans.

Los Angeles, Cal.—Hotel and stores, 11 story and base, reinforced concrete. Cost not stated. Architects, R. B. Young & Son, Lankershim Bldg., L. A. Owners, Lacy Bros. The building will have a frontage of 42 feet 6 inches by a depth of 155 feet. The first story will contain one large store room and the hotel's entrance and lobby. The upper stories will contain 150 guest rooms with private baths, steam heat, etc. The construction will be of reinforced concrete, the Kahn system being used throughout. There will be plate glass windows, copper sash, prism transoms, tile and marble lobby, two passenger elevators, freight elevator, birch interior trim throughout, vacuum cleaning system, plumbing and electric fixtures. The architects have completed the plans and specifications and figures are now being taken.

San Francisco—Hotel and stores, 4 story and base, brick and steel, \$50,000. Architects, O'Brien Bros., Clunie Bldg., S. F. Owners, Dr. J. M. Kane and W. J. Yore. The building will be erected in the Oriental district, and has been designed for stores on the first floor and rooms or lofts above. The exterior of the building will be faced with pressed brick. The

architects have just received the commission to prepare the plans and the details of the construction have not been determined upon.

LIBRARY.

Dixon, Solano Co., Cal.—Library, 1 story and base, brick, \$12,000. Architects, Parker & Kenyon, 244 Kearny St., S. F. Owners, City of Dixon. This work was mentioned here last week when the working drawings were being prepared. The plans are now complete and the architects are receiving figures on the work. The building will be in the Mission style with the exterior walls faced with cement plaster and the roof of clay tile. There will be a warm air heating system.

Portland, Ore.—Library, 1 story and base, brick and steel. Cost not stated. Architect, Ellis F. Lawrence, Portland. Owners, City of Portland. The building will be 68x100 feet. In addition to the usual rooms found in libraries of this class there will be a large auditorium in the basement with a seating capacity of 300. There will be a warm air system of heating. The interior finish will be of oak. The exterior of the building will be faced with paving brick. The plans are out for figures and separate contracts will be let for the general construction, plumbing, electric work and heating.

POST OFFICES.

Santa Barbara, Santa Barbara Co., Cal.—Postoffice, 2 story and base, brick and steel, \$100,000. Architect, James Knox Taylor, Washington, D. C. Owners, U. S. Government. The following two bids were the lowest received for the general construction of this building. No contract has been awarded. A. W. Austin, of Albuquerque, N. M., submitted the lowest bid at \$104,500. The next lowest was that of the Southwestern Construction Company, Trust and Savings Bldg., L. A., at \$119,431.

RAILROAD CONSTRUCTION—STATIONS AND EQUIPMENT.

Chehalis, Wash.—Passenger depot, 2 story and base, brick and steel. Cost not stated. Architectural Department Northern Pacific R. R. Co., Tacoma. Owners, Northern Pacific Co. The company has announced that work will be started on this building within the next few weeks. The plans are complete and figures are being taken.

RESIDENCES.

San Francisco—Residence, 2 story and base, frame, \$2,000. Architect, none. Owner, L. U. Brant, 721 Post St., S. F. The dwelling has been designed for a six-room house with bath. The interior trim will be of pine with hardwood floors in the principal rooms. There will be furnace heat and open fire places. The exterior of the dwelling will be covered with shingles. The plans are in the hands of the owner and the work will be done by Day Labor.

Alameda, Alameda Co., Cal.—Bungalow, 1 story and base, frame, \$2,000. Architect, none. Owner, V. N. Strang, 2015 13th Ave., Oakland. The cottage will contain six rooms and bath. The

interior trim will be of pine throughout. There will be some oak floors. The dwelling will have a large open fire places in the living room with a brick mantel. The exterior will be covered with rustic. The plans are complete and the work will be done by Day Labor.

San Francisco—Residence, 2 story and base, frame, \$2,000. Architect, E. J. Spencer, 515 12th Ave., S. F. Owner, A. Sundberg, 531 21st Ave. The dwelling will contain six rooms and bath. The trim will be of pine throughout. There will be open fire places with tile mantels. The exterior of the house will be covered with shiplap. The work will be done by Day Labor.

Oakland, Cal.—Residence, 2 story and base, frame, \$8,000. Architect, R. A. Hutchison, 460 13th St., Oakland. Owner's name withheld. The dwelling has been designed for a ten-room house with two bath rooms. The interior finish will be of pine and hardwood with oak floors throughout. There will be furnace heat and open fire places. The mantels will be of tile or brick. The bath will be finished in tile. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

San Francisco—Residence, 2 story, attic and basement, brick and frame, \$40,000. Architects, J. E. Kraft & Sons, Phelan Bldg., S. F. Owner, Milton Getz. This work was mentioned here when the plans were first started. The working drawings are now complete and the architects will call for figures shortly. The dwelling will contain in the neighborhood of fourteen rooms and several bath rooms. The interior trim will be largely of hardwoods and white enamel. There will be steam heat. There will be open fire places in a number of the rooms. The mantels will be of brick and tile. Tile will be used extensively in the bath rooms. The exterior of the dwelling will be covered with veneered pressed brick. There will be hardwood floors throughout. A vacuum cleaning system will be installed.

Oakland, Cal.—Bungalow, 1½ story and base, frame, \$2,000. Architect, R. A. Hutchison, 460 13th St., Oakland. Owner's name withheld. The dwelling will contain six rooms and bath. The interior finish will be of pine with hardwood floors throughout. There will be furnace heat and open fire places. The mantels will be of tile. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the architect is now taking figures.

San Francisco—Residence, 2 story and base, frame, \$1,500. Architect, A. W. Hutchison, 2567 Mission St., S. F. Owner, Gust R. Nelson. The dwelling has been designed for an eight-room home with furnace heat, open fire places, tile mantels, hardwood floors and pine trim. There will be one large bath room finished in tile. The exterior of the dwelling will be covered with rustic and cement plaster. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Residence, 2 story and base, frame, \$1,000. Architect, C. Reginald, 3211 Garfield Ave., Alameda. Owner, C. R. Cullup. The dwelling has been designed for a seven-room

house with bath. The interior finish will be largely of pine. There will be oak floors throughout the first story. The dwelling will be heated by warm air. There will be open fire places. The mantels will be of tile or brick. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

San Francisco—Residence, 2 story and base, frame, \$1,000. Architect, none. Owner, Thomas Scoble. The dwelling has been designed for an eight-room house with two bath rooms. The interior finish will be of pine and oak. There will be oak floors throughout the first story. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the bath rooms. The exterior of the dwelling will be covered with cement plaster on metal lath. The owner will construct the building under the Day Labor system.

Oakland, Cal.—Bungalow, 1½ story and base, frame, \$2,000. Architect, none. Owner, W. E. McCherney, 2605 Elgin St., Oakland. The dwelling will contain five rooms and bath. The trim will be of pine throughout. There will be coal grates with tile mantels. The exterior of the dwelling will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Bungalow, 1 story and base, frame, \$2,000. Architect, none. Owner, Conrad Maturson, 1609 Grant St., Berkeley. The dwelling will contain five rooms and bath. The interior trim will be of pine throughout. There will be an oak floor in the living room. The dwelling will be heated by open fire places. The mantels will be of tile. The exterior of the dwelling will be covered with rustic. The plans are complete and the work will be done by Day Labor.

San Francisco—Residences, 2, 2 story and base, frame, \$6,000 each. Architect, none. Owners, S. A. Born Building Co., 656 Market St., S. F. These dwellings will each contain 5 rooms and baths. The interior trim will be of pine, oak and white enamel. There will be hardwood floors. The dwellings will be heated by a warm air furnace and open fire places. The mantels will be of brick or tile. The exteriors will be covered with brick veneer and cement plaster. The owners are now purchasing all materials.

Berkeley, Alameda Co., Cal.—Bungalow, 1 story and base, frame, \$2,400. Architect, none. Owner, Gus Erickson, Alston Way and McGee St., Berkeley. The dwelling has been designed for a five-room house with bath. The interior trim will be of pine. There will be open fire places with brick mantels. The exterior of the dwelling will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Bungalow, 1½ story and base, frame, \$2,500. Architect, D. A. Batsford, 319 Kales Ave., Oakland. Owners, Mr. and Mrs. C. Batsford. The dwelling will contain six rooms and bath. The interior trim will be of pine and white enamel. There will be furnace heat and an open fire place in the living room. The mantel will be of tile or brick. There will be oak floors throughout the principal rooms. The bath will be finished in tile. The exterior of the dwelling will be covered

with shingles. The plans are complete and figures are being taken.

Pomona, Los Angeles Co., Cal.—Bungalow, 1 story and base, frame, \$2,000. Architect, C. E. Wolfe, Pomona. Owner, W. H. Styles, Pomona. The dwelling will contain a number of large light rooms and a fire bath. The interior trim will be of pine. There will be open fire places and tile mantels. The exterior of the dwelling will be finished with a cobblestone foundation and rustic siding. The architect is now preparing the working drawings and will shortly be ready to receive figures on the work.

Oakland, Cal.—Cottage, 1 story and base, frame, \$2,500. Architect, none. Owner, C. M. Johnson, 2317 Carlton Ave., Berkeley. The dwelling will contain six rooms and bath. The trim will be of pine throughout. There will be open fire places. The mantels will be of tile or brick. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Campton, San Joaquin Co., Cal.—Bungalow, 1½ story and base, frame, \$1,000. Architect, Walter King, Elks' Bldg., Stockton. Owner, J. H. Small. The dwelling will contain the usual number of living rooms and baths. The interior finish will be of pine. There will be tile used in the baths and kitchen. There will be open fire places. The exterior of the dwelling will be covered with rustic. The plans are being prepared.

Oakland, Cal.—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, J. J. Oakes, 1328 East 24th St., Oakland. The dwelling has been designed for a nine-room house with baths. The trim will be of pine throughout. There will be some oak floors. The dwelling will be heated by a warm air furnace. There will be open fire places. The mantels will be of tile. The exterior of the house will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Marine, Contra Costa Co., Cal.—Bungalow, 1½ story and base, Cost not stated. Architect, J. E. Carr, Cal. Bldg. S. F. Owner, S. Hoffman. The dwelling has been designed for a six-room house with bath. The interior finish will be of pine and white enamel. There will be furnace heat. The exterior of the bungalow will be covered with rustic. The plans are complete and figures will be taken at once.

Oakland, Cal.—Residence, 2 story and base, frame, \$3,200. Architect, none. Owner, G. Palange, Oakland. The dwelling will contain nine rooms and bath. The interior trim will be of pine throughout. There will be two bath rooms. The dwelling will be heated by open fire places. There will be brick mantels. The exterior of the house will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Ceres, Stanislaus Co., Cal.—Residence, 2 story and base, frame. Cost not stated. Architect, Walter King, Elks' Bldg., Stockton. Owner, Mr. Whitmore. The dwelling will contain seven rooms and bath. The interior trim will be of pine with some hardwood floors. There will be furnace heat and open fire places. The mantels will be of tile or brick. There

will be tile used in the bath and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. The architect is preparing the plans.

Berkeley, Alameda Co., Cal.—Bungalow, 1 story and base, frame, \$2,000. Architect, A. J. Mazurette, 1522 Broadway, Oakland. Owner, A. M. Peterson. The dwelling will contain five rooms and bath. The interior finish will be of pine throughout. There will be an open fire place in the living room. The mantel will be of tile. The exterior of the dwelling will be covered with shingles. The plans are complete and the work will be done by Day Labor.

Stockton, San Joaquin Co., Cal.—Residence, 2 story and base, frame, \$5,000. Architect, W. J. Wright, Stockton. Owner, Mrs. P. W. Stroud, 249 East Flora St., Stockton. The dwelling will contain eight rooms and baths. The interior trim will be of pine and white enamel. There will be some oak floors. There will be furnace heat and open fire places. The mantels will be of tile or brick. There will be tile used in the bath and kitchen. The exterior of the dwelling will be covered with rustic. The architect has completed the working drawings.

Oakland, Cal.—Residence, 2 story and base, frame, \$5,250. Architect, A. J. Hassel, Y. M. C. A. Bldg., Berkeley. Owners, Patrick Nelson Co. The dwelling has been designed for an eight-room house with baths. The interior finish will be largely of pine. There will be oak floors in the principal rooms. The dwelling will be heated by a furnace and open fire places. The mantels will be of tile or brick. There will be tile used in the baths and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are now out for figures and bids will be opened on February 10th.

Oakland, Cal.—Residence, 2 story and base, frame. Cost not stated. Architect, A. W. Smith, 1040 Broadway, Oakland. Owner, Mr. Hammond. The dwelling will contain 8 rooms and baths. The interior finish will be of pine and white enamel. There will be furnace heat and open fire places. The bath rooms and kitchen will be finished in tile. There will be oak floors and tile or brick mantels. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the architect is taking figures for the construction.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, Theodore C. W. Peterson, 2415 Roosevelt Ave., Berkeley. The dwelling has been designed for an eight-room house with baths. The interior trim will be of pine and white enamel. There will be furnace heat and open fire places. The mantels will be of tile. There will also be considerable tile used in the baths and kitchen. The exterior of the dwelling will be covered with rustic and shingles. The plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Bungalows, 2, 1 story and base, frame, \$5,000. Architect, A. J. Hassel, Y. M. C. A. Bldg., Berkeley. Owners, Warren Cheney Co. The dwellings will each contain five rooms and baths. There will be pine interior trim

throughout and some oak floors. There will be open fire places with tile mantels. The exteriors of the dwellings will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Residences, 2, 2 story and base, frame, \$3,500 each. Architect, A. J. Hassel, Y. M. C. A. Bldg., Berkeley. The dwellings will each contain seven rooms and bath. The interior finish will be of pine and redwood. There will be some oak floors. There will be furnace heat and open fire places. The mantels will be of tile. The exteriors of the dwellings will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

San Francisco—Bungalows, 3, 1½ story and base, frame, \$2,000 each. Architect, none. Owners, MacArthur Bros., 1560 Fell St., S. F. The dwellings will be built for sale and each will contain six rooms and bath. The interior trim will be of pine with some oak floors. There will be open fire places and attractive tile of brick mantels. The exteriors of the bungalows will be covered with shiplap and shingles. The plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, \$4,000. Architect, Leland Lewis, 6543 Dana St., Oakland. Owner, Mrs. R. C. Belden. The dwelling will contain seven rooms and bath. The interior trim will be of pine and hardwood with oak floors throughout the first floor. There will be furnace heat and open fire places. The mantels will be of tile. The exterior of the dwelling will be covered with rustic and cement plaster. The plans are complete and figures are being taken.

Oakland, Cal.—Residences, 2, 2 story and base, frame, \$3,000 each. Architect, none. Owner, J. A. McCarl, 522 Telegraph Ave., Oakland. The dwellings will each contain eight rooms and bath. The interior finish will be of pine throughout. There will be hardwood floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the baths and kitchens. The exteriors of the dwellings will be covered with shingles. The plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Bungalow, 1 story and base, frame, \$2,000. Architect, none. Owners, Peake-Munroe Co., 2035 Shattuck Ave., Berkeley. The dwelling has been designed for a five-room cottage with bath. The interior trim will be of pine throughout. There will be some oak floors. There will be open fire places and tile mantels. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, \$4,000. Architect, none. Owner, E. E. Spitzer, 2154 Ashby Ave., Berkeley. The dwelling will contain eight rooms and baths. The interior finish will be of pine with hardwood floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of tile or brick. Tile will be used in the bath rooms and kitchen. The exterior of the dwelling will be covered with shingles. The plans are complete and

the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Bungalow, 1 story and base, frame, \$2,500. Architect, none. Owners, Peake-Munroe Co., 2035 Shattuck Ave., Berkeley. The dwelling has been designed for a five-room cottage, and will be erected for sale. The interior trim will be of pine throughout. There will be some oak floors. The dwelling will be heated by open fire places. The mantels will be of tile. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

SCHOOLS.

San Francisco—School heating and ventilating. Cost not stated. City architect, Alfred I. Coffey, 1204 Divisadero Bldg., S. F. Owners, City and County of San Francisco. The following bids were received by the Board of Public Works for the heating and ventilating of the Girls' high School:

1 Mangrum & Otter Co. \$31,852
2 Wittman, Lyman & Co. 33,600

Berkeley, Alameda Co., Cal.—School, 2 story and base, frame, \$25,000. Architect, Joseph T. Carter, Call Bldg., S. F. Owners, St. Joseph School (Dr. Morrison in charge). The building will be 54½ feet and will contain six classrooms on the first floor besides the office. The second floor will contain a large lecture hall and gymnasium. The basement has been designed for the mechanical equipment and a large swimming tank. There will be a warm air system of heating. The exterior of the building will be covered with shiplap. The plans are complete and the work will be done by Day Labor.

North Stockton, San Joaquin Co., Cal.—School, 2 story and base, brick \$20,000. Architects, Stone & Wright, Stockton and Oakland. Owners, City of Stockton. This work has been mentioned here before. The plans are now complete and the owners are advertising for figures for the construction. Plans may be secured from either the architects or the Clerk of the Board of Education.

El Centro, Imperial Co., Cal.—School buildings, 3, 1 story and base, reinforced concrete, \$60,000. Architect, F. T. Harris, Redlands. Owners, El Centro School District. This work has been mentioned here before when the architect was first commissioned to prepare the plans. The working drawings are complete and bids are to be opened on February 13th. Plans and specifications can be obtained from the architect.

Ellensburg, Wash.—School, 2 story and base, reinforced concrete, \$65,000. Architects, Stephen & Stephen, New York Bldg., Seattle. Owners, City of Ellensburg. The revised plans for this building have been completed and the new call for figures has been published. The bids will be opened on February 10th. This is the second time that this work has been out for figures.

Ontario, Los Angeles Co., Cal.—School buildings, two 2 story and one 1 story, brick and reinforced concrete. Cost not stated. Architects, Austin & Penell, Wright and Callender Bldg., L. A. Owners, Ontario School District. There will be three new buildings, the administration building and science building, each two stories in height, and the manual arts building which

is one story. The construction will be of brick and concrete, with reinforced concrete half's and stairways, birch floors, pine trim, plastered exterior walls, composition and clay tile roofs, cement floors in the laboratories, galvanized iron skylights, plenum system of heating, bubbling drinking water, electric lighting. The official cover for bids will be issued during the coming week. The plans may be obtained from the architects after Monday, February 5, 1912.

SEWERS, STREET WORK AND WATER SYSTEMS.

San Francisco—Pumping plant, 2 story and base. Class A construction. Cost not stated. City Engineer Marsden, Munson, 1104 David Hewes Bldg., S. F. Owners, City and County of San Francisco. Bids were opened for this work at the last meeting of the Board of Public Works. For a complete list of all City Bids opened see under San Francisco pages in this issue.

STORES AND OFFICES.

San Francisco—Stores, 1 story and base, brick, \$20,000. Architects, Ross & Burgen, 222 Kearny St., S. F. Owner, O. D. Baldwin. The building will cover a large lot and will contain a number of stores designed for the retail business. There will be large plate glass display windows. The exterior will be faced with pressed brick. The architects are preparing the plans.

Seattle, Wash.—Stores, etc., 3 story and base, frame, \$40,000. Architects, Saunders and Lawton, Alaska Bldg., Seattle. Owners, Bonney-Watson Undertaking Co. The building will be 100x125 feet and will be devoted to the exclusive use of the undertakers. There will be office, reception room, receiving vaults, chapel, parlors and dressing rooms. The exterior of the building will be covered with cement plaster. The plans are complete and figures are being taken.

San Diego, Cal.—Stores and offices, 11 story and base. Class A construction, \$500,000. Architect, Harrison Albright, Los Angeles. Owner, John Brockman. The building will be 68x134, and is to be located at the corner of Grand avenue and 7th street. It will be a strictly modern structure with tile and marble entrance and corridors, plate glass windows, mahogany finish, freight and passenger elevators, steam heat, vacuum cleaning, plumbing, etc. The first story will be arranged for six store rooms and entrance to the building. The ten upper stories will contain 27 offices each or a total of 270. Each will have stationary lavatory and will be supplied with hot and cold water. The basement will contain a grill room 50x80 feet, kitchen 32x94 feet, barber shop 23x36 feet, billiard room 30x50 feet, toilet rooms, machinery room, etc. Heat, light and power will be obtained from the huge mechanical plant to be installed in the department store to be erected at the southwest corner of 7th street and Grand avenue by the same owner. The estimated cost of the building is \$500,000. The architect is completing the working drawings.

Stockton, San Joaquin Co., Cal.—Stores and rooms, 2 story and base, brick and steel. Cost not stated. Architect, Walter King, Elks' Bldg., Stockton. Owner, I. L. McCoy. The building will contain stores on the first floor and rooms above. There will be considerable structural steel used. The exterior will be faced with pressed brick. The plans are complete and bids will be opened by the architect on February 7th.

Richmond, Contra Costa Co., Cal.—Store and offices, 2 story and base, brick, \$10,000. Architect, J. B. Ogborne, 611 McDonald Ave., Richmond. Owner, C. H. Bates. The building will contain one small store on the first floor and offices above. The exterior of the building will be faced with cement plaster. The plans are complete and figures are now being taken by the architect.

San Francisco—Stores and lofts, 4 story and base, brick and steel, \$10,000. Architect, Lewis P. Hobart, Crocker Bldg., S. F. Owners, White Investment Co. The building will be erected in the heart of the financial district. The first floor will be occupied by stores and the upper three floors will be divided into loft space. There will be a pile foundation, considerable structural steel, brick exterior walls, faced with pressed brick. There will be steam heat and elevator service. The plans are being prepared and a contract will be let shortly.

Oakland, Cal.—Store additions and alterations, \$5,000. Architects, Hart & Boehrer, Deiger Bldg., Oakland. Owner, Mr. Fluhsh. The work will consist of the addition of one story to the present one-story concrete building. There will be electric work, plumbing and plastering. The plans are complete and figures are being taken by the architects.

San Francisco—Stores and offices, 26 story and base. Class A construction, \$1,500,000. Architects, MacDonald & Applegate, Call Bldg., S. F. Owner's name withheld. The architects have announced that a well-known business man has interested a number of his associates in the construction of a 26-story and basement, Class A office building on one of the prominent corners in the financial district. The architects have prepared sketches for the big structure at his suggestion, and have placed the estimate for its construction at \$1,500,000. At this time the enterprise has all the appearance of becoming a success.

Oakland, Cal.—Stores, 1 story and base, brick. Cost not stated. Architects, Haar & Davis, Central Bank Bldg., Oakland. Owner, Edward Fougery. The building has been designed for several small stores. There will be plate glass windows and patent store fronts. The exterior of the building will be faced with pressed brick. The plans are complete and figures are being taken.

San Francisco—Stores and offices, 6 story and base. Class A construction, \$100,000. Architects, Paff & Baur, Merchants' Exchange Bldg., S. F. Owner, A. B. McCreery. The building will be erected on lower Pine street. The first floor is to be arranged for the office of a large insurance company. The upper five floors will be divided into modern offices. There will be steam heat and elevator service. terra cotta interior partitions, concrete floors and a vacuum cleaning

system. The exterior walls will be of brick and concrete faced with pressed brick and terra cotta. The working drawings are nearly complete and separate bids will be called for shortly.

Oakland, Cal.—Stores and offices, 5 story and base, reinforced concrete, \$75,000. Architect, A. W. Smith, 1064 Broadway, Oakland. Owner, H. J. Pavert. This work has been mentioned here before when the architect was first commissioned to prepare the plans. The working drawings have now been completed and are out for figures. The site of the building is at the corner of 15th and Jefferson streets. The first floor will be occupied by several stores. The exterior will be faced with cement plaster. There will be steam heat and elevator service.

San Francisco—Stores, apartments and social hall, 5 story and base, brick, \$45,000. Architects, Ross & Burgen, 222 Kearny St., S. F. Owners, Master Plumbers Association. The building will be arranged for stores on the first floor, 21 apartments on the upper floors and a large social hall. There will be steam heat. The interior finish will be of pine and hardwood. The exterior of the building will be faced with pressed brick. The plans are complete and contracts will be let at once.

San Francisco—Stores and lofts, 6 story and base, brick and steel, \$80,000. Architects, William Curlett & Son, Phelan Bldg., S. F. Owner, James D. Phelan. The preliminary plans for this work have been prepared for some time, but now the working drawings have been completed and contracts for the construction will be let at once. The building will have a steel frame and the Class B type of interior construction. The first floor will be occupied by retail stores. The upper floors will be subdivided into large lofts. There will be elevator service and steam heat. The exterior will be faced with pressed brick. Contracts will be let at once.

Vancouver, B. C.—Stores and offices, 10 story and base. Class A construction, \$500,000. Architects, Russell, Babcock & Rice, Metropolitan Bldg., Vancouver. Owner's name withheld. This work has been mentioned here before. The working drawings have been completed and the architects will take figures on the different parts of the work commencing this week.

Contracts Awarded.

Tacoma, Wash.—Stores and offices, 4 story and base, reinforced concrete. Cost not stated. Architect's name not given. Owner, John B. Agen, Tacoma Contractors, Johnson Bros., 4315 Thackeray place, Seattle. Contract price not stated.

Los Angeles, Cal.—Stores and offices, 11 story and base, reinforced concrete, \$370,000. Architects, Edman & Barnett, Blanchard Bldg., L. A. Owners, Black Building Co. Contractor, A. Harman, 1924 Western Ave., L. A. General construction, \$160,000.

Seattle, Wash.—Stores and offices, 9 story and base, brick and steel, \$250,000. Architect's name withheld. Owners, British North American Co. Contractors, Ferro Concrete Co., Seattle. concrete work. Contract price not stated. Note: The general contract for this building has not been let as yet.

THEATRES.

Sno. Francisco—Opera house and hotel, 10 story and base. Class A construction, \$500,000. Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owners, Metropolitan Opera Co. The preliminary plans for this building have been completed and approved by the owners. The site on Sutter street, near Powell, has been secured and now the company are arranging the financial part of the transaction. The structure will house one of the finest opera houses west of Chicago. It is the intention of the owners to use the upper floors for a modern hotel. The building will be fire proof in construction. The exterior walls will be of reinforced concrete. There will be steam heat and all other modern improvements. As soon as the financial matters are settled the architect will be instructed to proceed with the working drawings.

Contracts Awarded.

Los Angeles, Cal.—Theatre and offices, 11 story and base. Class A construction, \$500,000. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owner, William Garland. Contractors, National Fireproofing Co., Central Bldg., L. A. general construction, contract price, \$250,000. Separate contracts will be let for the elevators, heating and ventilating, plumbing and electric work.

PROPOSALS FOR STREET WORK.
(Bids close Feb. 7.)

OFFICE of the Board of Public Works of the City and County of San Francisco—Sealed proposals will be received at the office of the said Board of Public Works, tenth floor, David Hewes Building, 955 Market street, between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 7th day of February, 1912, for doing the following street work, to wit:

That the crossing of Twenty-fifth street and Treat avenue be improved by resetting to official line and grade the existing stone curbs that are not already at official line and grade by constructing brick cesspools (catch-basins) with cast iron frames, gratings and traps and 10-inch, vitrified, salt-glazed, iron stone pipe culverts on the northwesterly and southwesterly angular corners thereof; by constructing a 10-inch, vitrified, salt-glazed, iron stone pipe sewer with one brick manhole with cast iron frame and cover and galvanized wrought iron steps along the center line of Twenty-fifth street, between the center and westerly lines of Treat avenue; by constructing an 18-inch, vitrified, salt-glazed, iron stone pipe sewer along the center line of Treat avenue, between the center and southerly lines of Twenty-fifth street, and by paving the roadway thereof with an asphalt pavement consisting of a 6-inch concrete foundation and a 2-inch asphaltic wearing surface.

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

Stores and Offices—6 story and base, Class A construction, \$100,000. San Francisco. Architects, Paff & Bair, Merchants' Exchange Bldg., S. F. Owner, A. B. McCreery. The building will be erected on lower Pine street. The first floor is to be arranged for the offices of a large insurance company. The upper five floors will be divided into modern offices. There will be steam heat and elevator service, terra cotta interior partitions, concrete floors and a vacuum cleaning system. The exterior walls will be faced with pressed brick and terra cotta. The working drawings are nearly complete and separate bids will be called for shortly.

Residence—2 story and base, frame, \$2,000. San Francisco. Architect, none. Owner, L. U. Brant, 721 Post St., S. F. The dwelling has been designed for a six-room house with bath. The interior trim will be of pine with hardwood floors in the principal rooms. There will be furnace heat and open fire places. The exterior of the dwelling will be covered with shingles.

The plans are in the hands of the owner and the work will be done by Day Labor.

Hospital Work—Cost not stated. San Francisco. City Architect, Alfred I. Coffey, David Hewes Bldg., S. F. Owners, City and County of San Francisco. The following bids for the interior marble work of the San Francisco Hospital buildings were received at the last meeting of the Board of Public Works:

1. Columbia Marble Co.	\$17,400
2. Jos. Musto Sons Keenan Co.	17,450
3. Vermont Marble	17,400
4. McSheehy Bros.	26,742

School Heating and Ventilating—Cost not stated. San Francisco. City Architect Alfred I. Coffey, 1204 David Hewes Bldg., S. F. Owners, City and County of San Francisco. The following bids were received by the Board of Public Works for the heating and ventilating of the Girls' High School:

1. Mangrum & Otter Co.	\$32,852
2. Witterman, Lyman & Co.	33,600

Flats—2 story and base, frame, \$1,000. San Francisco. Architect, none. Owner, John McCulloch, 80 Alvarado St., S. F. The building will contain

two flats of five and six rooms each with baths. The interior trim will be of pine. There will be gas grates. The exterior of the building will be covered with cement plaster on metal lath. The plans are in the hands of the owner and the work will be done by Day Labor.

Residence—2, 2 story and base, frame, \$6,000 each, San Francisco. Architect, none. Owners, S. A. Born Bldg. Co., 636 Market St., S. F. These dwellings will each contain eight rooms and baths. The interior trim will be of pine, oak and white enamel. There will be hardwood floors. The dwellings will be heated by warm air furnace and open fire places. The mantels will be of brick or tile. The exteriors will be covered with brick veneer and cement plaster. The owners are now purchasing all materials.

Garage—1 story and base, reinforced concrete, cost not stated, San Francisco. Architect, Sylvain Schnaitacher, First National Bank Bldg., S. F. Owners, Vampire Realty Co. The building has been designed for a retail automobile show room. There will be a tile or concrete floor, large plate glass display windows and hardwood interior finish. The exterior of the building will be faced with cement plaster. The plans are complete and the architect will take figures on the work at once.

Hotel—9 story and base, Class A construction, \$300,000, San Francisco. Architects, MacDonald & Applegarth, Cal. Bldg., S. F. Owners, Cliff Estate. The owners of the property at the northeast corner of Geary and Taylor streets have just announced the selection of the above mentioned firm of architects to prepare the plans for their new hotel structure. The building will cover a full Fifty Vara lot. The upper floors will be subdivided into about 320 rooms with connecting baths. The first floor will be devoted to the lobby of the hotel and the main office. There will be a large public dining room and smaller private dining rooms. The mechanical equipment of the building will be complete to the last detail. The steam heating plant will be of the oil burning type. There will be elevators and a vacuum cleaning system. The exterior of the building will be faced with pressed brick and terra cotta. The architects state that the working drawings will be complete within a month.

Residence—2 story and base, frame, \$4,500, San Francisco. Architect, A. W. Richardson, 2567 Mission St., S. F. Owner, Gunst R. Nelson. The dwelling has been designed for an eight-room house with furnace heat, open fire places, tile mantels, hardwood floors and pine trim. There will be one large bath room finished in tile. The exterior of the dwelling will be covered with rustic and cement plaster. The plans are complete and the work will be done by Day Labor.

Apartment House—8 story and base, Class A construction, \$400,000, San Francisco. Architects, MacDonald & Applegarth, Cal. Bldg., S. F. Owner's name withheld. The architects have just announced that preliminary plans have been started for one of the 'largest' houses west of New York. The project is being handled by a number of local investors who have been making a specialty of this kind of building. The site has been secured at the crest of Nob Hill. The building

will cover a large area and will be arranged for suites of from four to ten rooms each. There will be every modern convenience installed. The interior finish will be of hardwoods, marble, tile and glass. The complete details of the work cannot be given at this time as the plans have not advanced beyond the preliminary stage. The architects state that actual construction work will be started by this summer.

Factory—2 story and base, brick and steel, \$15,000, San Francisco. Architect, Theo. Lenzen, Humboldt Bank Bldg., S. F. Owners, Old Home-land Lumber Co. This building will complete the extensive improvements recently undertaken by this company in the construction of their new plant. The building will be used as an oven house and will contain seven new ovens of special design. The floors and roofs will be of reinforced concrete and will be carried on steel trusses. The exterior of the building will be faced with pressed brick. The plans are complete and figures on all parts of the work are being taken.

Residence—2 story and base, frame, \$4,000, San Francisco. Architect, none. Owner, Thomas Scoble. The dwelling has been designed for an eight-room house with two bath rooms. The interior finish will be of pine and oak. There will be oak floors throughout the first story. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the bath rooms. The exterior of the dwelling will be covered with cement plaster on metal lath. The owner will construct the building under the Day Labor system.

Apartment House—6 story and base, brick and steel, \$75,000, San Francisco. Architects, Welsh and Carey, Metropolis Bank Bldg., S. F. Owners, Sheely Estate. This work has been mentioned here several times before, when the plans were being prepared and figures were being taken. The result of the bids has shown the construction costing more than the owners care to put into the improvement. New plans will be prepared at once and figures will be called for again as soon as the revision is complete.

Hotel—12 or 14 story and base, Class A construction, \$150,000 to \$250,000, San Francisco. Architects MacDonald & Applegarth, Cal. Bldg., S. F. Owner, Charles Crocker. The building will occupy a site in the west line of Stockton street, between Post and Sutter streets. The plans provide for one of the best equipped hotels in the west. The lot has a small street frontage, but extends back considerably over 150 feet. There will be a complete steel frame and exterior walls of reinforced concrete. The exterior will probably be faced with terra cotta. The interior will be handsomely finished in hardwoods and marble. There will be steam heat and elevator service. The building will contain in the neighborhood of 200 rooms, the greater number of which will have connecting baths. The plans will shortly be ready for figures.

Residence—2 story and base, frame, \$2,000, San Francisco. Architect, E. J. Spencer, 315 12th Ave., S. F. Owner, A. Sundberg, 575 21st Ave. The dwelling will contain six rooms and bath. The trim will be of pine throughout. There will be open fire places with

tile mantels. The exterior of the house will be covered with ship-lap. The work will be done by Day Labor.

Stores and offices—36 story and base, Class A construction, \$1,500,000, San Francisco. Architects, MacDonald & Applegarth, Cal. Bldg., S. F. Owner's name withheld. The architects have announced that a well-known business man has interested a number of his associates in the construction of a 26-story and basement, Class A office building on one of the prominent corners in the financial district. The architects have prepared sketches for the big structure at his suggestion, and have placed the estimate for its construction at \$1,500,000. At this time the enterprise has all the appearance of becoming a success.

Hotel and Store—3 story and base, brick, \$15,000, San Francisco. Architect, Joseph Cahen, 45 Kearny St., S. F. Owner, Isidor Rosenberg. The building will be erected on Third street and will contain two stores on the first floor and rooms above. There will be baths and toilets on each of the upper two floors. The store fronts will be of copper and plate glass. The exterior walls of the building will be faced with white cement plaster. The plans are complete and the work will be done by Day Labor.

Opera House and Hotel—10 story and base, Class A construction, \$500,000, San Francisco. Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owner, Metropolitan Opera Co. The preliminary plans for this building have been completed and approved by the owners. The site on Sutter street, near Powell, has been secured, and now the company are arranging the financial part of the transaction. The structure will house one of the finest opera houses west of Chicago. It is the intention of the owners to use the upper floors for a modern hotel. The building will be fire proof in construction. The exterior treatment has not been fully decided upon. The exterior walls will be of reinforced concrete. There will be steam heat and all other modern improvements. As soon as the financial matters are settled the architect will be instructed to proceed with the working drawings.

Bungalows—3, 1½ story and base, frame, \$2,000 each, San Francisco. Architect, none. Owners, MacArthur Bros., 1560 Fell St., S. F. The dwellings will be built for sale and each will contain six rooms and bath. The interior trim will be of pine with some oak floors. There will be open fire places and attractive tile or brick mantels. The exteriors of the bungalows will be covered with ship-lap and shingles. The plans are complete and the work will be done by Day Labor.

Store—1 story and base, brick, \$20,000, San Francisco. Architects, Ross & Burgen, 22 Kearny St., S. F. Owner, O. D. Baldwin. The building will cover a large lot and will contain a number of stores designed for retail business. There will be large plate glass display windows. The exterior will be faced with pressed brick. The architects are preparing the plans.

Hotel and Store—4 story and base, brick and stone, \$50,000, San Francisco. Architects, O'Brien Bros., Clinton Bldg., S. F. Owners, Dr. J. M. Kane and W. J. York. The building will be erected in the Oriental district

and has been designed for stores on the first floor and rooms or lofts above. The exterior of the building will be faced with pressed brick. The architects have just received the commission to prepare the plans and the details of the construction have not been determined upon.

Residence—2 story, attic and basement, brick and frame, \$10,000. San Francisco. Architects, J. E. Kraft & Sons, Phelan Bldg., S. P. Owner, Milton Getz. This work was mentioned here when the plans were first started. The working drawings are now complete and the architects will call for figures shortly. The dwelling will contain in the neighborhood of fourteen rooms and several bath rooms. The interior trim will be largely of hardwoods and white enamel. There will be steam heat. There will be open fire places in a number of the rooms. The masonry will be of brick and tile. Tile will be used extensively in the bath rooms. The exterior of the dwelling will be covered with veneered pressed brick. There will be hardwood floors throughout. A vacuum cleaning system will be installed.

Stores and Lofts—6 story and base, brick and steel, \$30,000. San Francisco. Architects, William Curlett & Son, Phelan Bldg., S. P. Owner, James D. Phelan. The preliminary plans for this work have been prepared for some time, but now the working drawings have been completed and contracts for the construction will be let at once. The building will have a steel frame and the Class B type of interior construction. The first floor will be occupied by retail stores. The upper floors will be subdivided into large lofts. There will be elevator service and steam heat. The exterior will be faced with pressed brick. Contracts will be let at once.

Hotel and Store—1 story and base, brick, \$30,000. San Francisco. Architect, Alfred Henry Jacobs, French Bank Bldg., S. P. Owner, Charles Schlessinger. The building will cover a site 31x56 and will contain a number of stores on the first floor and about sixteen rooms to the floor on the upper three floors. There will be steam heat and elevator service. The interior trim will be of pine throughout. The exterior of the building will be faced with cement plaster. The architect is now preparing the plans.

Stores, Apartments and Social Hall—3 story and base, brick, \$15,000. San Francisco. Architects, Ross & Burgren, 222 Kearny St., S. P. Owners, Master Plumbers Association. The building will be arranged for stores on the first floor, 21 apartments on the upper floors and a large social hall. There will be steam heat. The interior finish will be of pine and hardwood. The exterior of the building will be faced with pressed brick. The plans are complete and contracts will be let at once.

Flats—2 story and base, frame, \$3,000. San Francisco. Architect, none. Owner, P. Prasse, 320 Lombard St., S. P. The building will contain three small flats with baths. The interior trim will be of pine throughout. There will be gas grates. The exterior of the building will be covered

with shiplap. The plans are complete and the work will be done by Day Labor.

Stores and Lofts—1 story and base, brick and steel, \$10,000. San Francisco. Architect, Lewis P. Hobart, Crocker Bldg., S. P. Owners, White Investment Co. The building will be erected in the heart of the financial district. The first floor will be occupied by stores and the upper three floors will be subdivided into loft space. There will be a pile foundation, considerable structural steel, brick exterior walls, faced with pressed brick. There will be steam heat and elevator service. The plans are being prepared and a contract will be let shortly.

City Bids Opened.

HIG CONTRACT FOR THE EQUIPMENT OF PUMPING PLANT NO. 2 BRINGS WIDE RANGE OF FIGURES.

Bids were opened Wednesday afternoon by the Board of Public Works for the mechanical equipment of the Pumping Plant No. 2, for the grading and concrete foundation work for the Islais Creek Incinerator, for the heating and ventilating of the Girls' High School and for the interior marble work on the San Francisco Hospital buildings. The bids for the marble work were very close with one exception. Bids for the mechanical equipment of the pumping plant showed a wide range of figures. Bids on the other contracts were about as usual. The heating and ventilating work of the Girls' High School failed to attract the usual number of bidders. The Union Iron Works, who asked an extension of time in which to put in a figure on the mechanical equipment of the pumping plant, failed to figure on the work. The following is a complete list of all bids received:

Mechanical Equipment Pumping Plant No. 2, Fort Mason.

1 Central California Construction Co. (1) \$181,000; (2) \$182,500.	
2 Chas. C. Moore & Co. (1) \$142,500; (2) \$140,000.	
3 Moore & Scott (1) \$199,585; (2) \$197,550.	
4 John G. Sutton Co. (1) \$144,300; (2) \$149,900.	

Foundation Work, Etc., Incinerator, Islais Creek.

1 Willett & Burr.....	\$12,950.50
2 C. Rouse.....	14,887.00
3 P. J. Lechner.....	17,247.00
4 Healy-Thibbitts Constr Co.....	18,856.00
5 J. F. O'Brien.....	20,900.00
6 Mercer-Fraser Co.....	12,429.00
7 J. H. O'Brien.....	17,405.00
8 Lange & Bergstrom.....	17,915.00
9 E. M. Huie & Co.....	15,000.00
10 John Daniel.....	17,500.00

Marble Work San Francisco Hospital.

1 Columbia Marble Co.....	\$17,400
2 Joseph Musto Sons-Keenan Co.....	17,450
3 Vermont Marble Wks.....	17,400
4 McSheehy Bros.....	26,742

Heating and Ventilating Girls' High School.

1 Mangrum & Otter Co.....	\$32,852.
2 Whitman-Lyman & Co.....	\$33,600;
	\$33,440.

OAKLAND AND ALAMEDA COUNTY.

Bungatow—1 story and base, frame,
 \$2,000. Alameda, Alameda Co, Cal.
 Architect, none. Owner V. N. Strang,
 2015 13th Ave, Oakland. The cottage
 will contain six rooms and bath.
 The interior trim will be of pine through-
 out. There will be some oak floors.
 The dwelling will have a large open
 fire place in the living room with a
 brick mantel. The exterior will be
 covered with rustic. The plans are
 complete and the work will be done
 by Day Labor.

School—2 story and base, frame,
 \$25,000. Berkeley, Alameda Co, Cal.
 Architect, Joseph T. Carter, Cal Bldg,
 S. F. Owners, St. Joseph School (Dr.
 Morrison in charge). The building
 will be 54x95 feet and will contain
 six class rooms on the first floor be-
 sides the office. The second floor will
 contain a large lecture hall and gymna-
 sium. The basement has been de-
 signed for the mechanical equipment
 and a large swimming tank. There
 will be a warm air system of heating.
 The exterior of the building will be
 covered with shiplap. The plans are
 complete and the work will be done
 by Day Labor.

Bungatow—1½ story and base, frame,
 \$3,000. Oakland, Cal. Archi-
 tect, R. A. Hutchison, 460 13th St.,
 Oakland. Owner's name withheld.
 The dwelling will contain six rooms
 and bath. The interior finish will be
 of pine with hardwood floors through-
 out. There will be furnace heat and
 open fire places. The mantels will be
 of tile. The exterior of the dwelling
 will be covered with cement plaster
 on metal bath. The plans are com-
 plete and the architect is now taking
 figures.

Church—1 story and base, frame,
 \$7,500. Berkeley, Alameda Co, Cal.
 Architect, E. J. Aalto, 1531 California
 St., Berkeley. Owners, Finnish Evan-
 gelical Lutheran Church of Berkeley.
 The plans for a one-story building,
 containing a main auditorium and
 class rooms, have been completed.
 There will be a warm air heating sys-
 tem and other modern features. The
 interior finish will be of pine. There
 will be some leaded glass used. The

 bridge has been designed to accom-
 modate both the railroad and wagon
 traffic. The piers and abutments will
 be of reinforced concrete. The bridge
 proper will be of steel. The plans are
 now being prepared and bids will be
 called for shortly.

Hotel and Stores—2 story and base,
 brick, \$20,000. Sacramento, Sacra-
 mento Co., Cal. Architect, E. C. Hem-
 mings 1005 K St., Sacramento. Own-
 er, Fred T. Kitts. The building will
 be erected at the corner of Sixth
 street and Oak alley. There will be
 six stores on the first floor and a
 number of rooms above. The exterior
 of the building will be faced with
 pressed brick. The plans are com-
 plete and the architect is taking fig-
 ures on the work.

Bungalow—1½ story and base,
 frame, \$4,500. Campton, San Joaquin
 Co., Cal. Architect, Walter King,
 Elks' Bldg., Stockton. Owner, J. H.
 Small. The dwelling will contain the
 usual number of living rooms and
 baths. The interior finish will be of
 pine. There will be tile used in the
 bath and kitchen. There will be open
 fire places. The exterior of the dwell-
 ing will be covered with rustic tile.
 The plans are being prepared.

Stores and Rooms—2 story and base,
 brick and steel. Cost not stated.
 Stockton, San Joaquin Co., Cal. Archi-
 tect, Walter King, Elks' Bldg., Stock-
 ton. Owner, L. L. McCoy. The build-
 ing will contain stores on the first
 floor and rooms above. There will be
 considerable structural steel used. The
 exterior will be faced with pressed
 brick. The plans are complete and
 bids will be opened by the architect

on February 7th.

School—2 story and base, brick,
 \$20,000. North Stockton, San Joaquin
 Co., Cal. Architects, Stone & Wright,
 Stockton and Oakland. Owners, City
 of Stockton. This work has been
 mentioned here before. The plans are
 now complete and the owners are ad-
 vertising for figures for the construc-
 tion. Plans may be secured from
 either the architects or the Clerk of
 the Board of Education.

**LOS ANGELES AND SOUTH
 ERN CALIFORNIA.**

Bungalow—1 story and base, frame,
 \$2,000. Pomona, Los Angeles Co., Cal.
 Architect C. E. Wolfe, Pomona. Own-
 er W. H. Stiles, Pomona. The dwell-
 ing will contain a number of large
 light rooms and a fine bath. The in-
 terior trim will be of pine. There will
 be open fire places and tile mantels.
 The exterior of the dwelling will be
 finished with a cobble stone founda-
 tion and rustic siding. The archi-
 tect is now preparing the working
 drawings and will shortly be ready
 to receive figures on the work.

Apartment House—Additions and
 alterations, \$1,000. Pomona, Los An-
 geles Co., Cal. Architect, C. E. Wolfe,
 Pomona. Owner, W. Guy Thompson.
 The work will consist of the altera-
 tion of a 1½ story frame building
 containing 19 rooms into a modern
 apartment house. The suits will
 range from two to five rooms. There
 will be connecting baths. There will
 be complete new plumbing, painting,
 electric work and interior partitions.
 The exterior of the building will be
 covered with shiplap. The plans are
 complete and figures are being taken.

Church—2 story and base, brick and
 reinforced concrete. Cost not stated.
 Los Angeles, Cal. Architect, Elmer
 Grey, Wright and Callender Bldg., L. A.
 Owners, First Church of Christ,
 Scientist, Los Angeles. The style of
 architecture will be Italian Roman-
 esque. The building will be 178x144
 feet. The first floor will contain the
 main auditorium which will seat 1050,
 balcony seating 250, reception room,
 committee room, choir and ushers'
 room, organ loft, etc. There will be
 a Sunday school room seating 950
 people in a story beneath the first

which, on account of the contour of the lot, will have an entrance on a level with the street. It will also contain storage and furnace rooms, check room and lavatories. The construction will be of reinforced concrete for the basement and first floor, brick exterior walls, tapestry brick facing, terra cotta trim, columns and cornices, steel roof trusses, clay tile roof, leaded glass windows, plumbing, electric wiring and heating system. The architect is completing the working drawings.

Factory Additions—Brick and reinforced concrete, \$20,000. Los Angeles, Cal. Architect, W. J. Saunders, Wright and Callender Bldg., L. A. Owners, Troy Laundry Co. The work will consist of the extension of their plant and the construction of a new boiler house and stacks. The architect has mentioned here before. Plans are now complete and figures are being taken.

Apartment House—2 story and base, frame. Cost not stated. Los Angeles, Cal. Architect, Frank M. Tyler, Union Trust Bldg., L. A. Owner, Mrs. W. E. Staley. The building will contain 26 rooms and 12 bath rooms. The suites will be arranged in two and three room apartments. There will be wall beds and steam heat. The exterior of the building will be faced with cement plaster. The architect has completed the working drawings.

Stores and Offices—1 story and base, Class A construction, \$500,000. San Diego, Cal. Architect, Harrison Albright, Los Angeles. Owner, John Brockman. The building will be 65x134, and is to be located at the corner of Grand avenue and Seventh street. It will be a strictly modern structure with tile and marble entrance and corridors, plate glass windows, mahogany finish, freight and passenger elevators, steam heat, vacuum cleaning, plumbing, etc. The first story will be arranged for six store rooms and entrance to the building. The ten upper stories will contain twenty-seven offices each or a total of 270. Each will have a stationary lavatory and will be supplied with hot and cold water. The basement will contain a grill room 50x80 feet, kitchen 32x94 feet, barber shop 23x36 feet, billiard room 30x50 feet, toilet rooms, machinery room, etc. Heat, light and power will be obtained from the huge mechanical plant to be installed in the basement area to be erected at the southwest corner of Seventh street and Grand avenue by the same owner. The estimated cost of the building is \$500,000. The architect is completing the working drawings.

Church Addition—1 story, frame. Cost not stated. Pomona, Los Angeles Co., Cal. Architect, A. B. Benton, 114 North Spring St., L. A. Owners, First Church of Christ, Scientist, Pomona. The work will consist of the addition of a one-story wing, similar in design to the present architecture, and covered with shingles. The addition will double the present seating capacity. The plans are being prepared.

Apartment House—3 story and base, frame. Cost not stated. Los Angeles, Cal. Architects, Le Claire & Pitzer, 413 1/2 South Hill St., L. A. Owner, R. P. Tucker. The building will be 41x122 feet and will contain 32 apartments of two, three and four rooms each with baths. There will be steam

heat and wall beds. The exterior of the building will be covered with cement plaster. The plans will be ready for houses in two weeks.

Warehouses—1 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architects, Mayberry & Parker, Pacific Electric Bldg., L. A. Owner, Los Angeles Public Market Co. The building will cover an area of 55x190 feet. There will be two elevators, automatic sprinkler system and sidewalk elevators. The construction throughout will be fire proof. The exterior of the building will be faced with cement plaster. The plans are complete and figures are being taken.

Garage and Rooms—2 story and base, frame. Cost not stated. Beverly Hills, Los Angeles Co., Cal. Architect, Elmer Gray, Wright and Callender Bldg., L. A. Owner, Rodon Land and Water Co. This work has been mentioned here before. There will be accommodations for a large number of machines on the first floor and living apartments for 22 chauffeurs on the upper floor. The exterior of the building will be covered with cement plaster. The plans are complete and figures are being taken.

Hotel and Stores—11 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architects, R. B. Young & Son, Lenkenheim Bldg., L. A. Owners, Leo Bros. The building will have a frontage of 12 feet 6 inches by a depth of 155 feet. The first story will contain one large store room and the hotel entrance and lobby. The upper stories will contain 150 guest rooms with private baths, steam heat, etc. The construction will be of reinforced concrete, the Kahn system being used throughout. There will be plate glass windows, copper sash, prism transoms, tile and marble lobby, two passenger elevators, freight elevator, birch interior trim throughout, vacuum cleaning system, plumbing and electric fixtures. The architects have completed the plans and specifications and figures are now being taken.

Postoffice—2 story and base, brick and steel, \$100,000. Santa Barbara, Santa Barbara Co., Cal. Architect, James Knox Taylor, Washington, D. C. Owners, U. S. Government. The following two bids were the lowest received for the general construction of this building. No contract has been awarded. A. J. Austin, of Albuquerque, N. M., submitted the lowest bid at \$104,500. The next lowest was that of the Southwestern Construction Company, Trust and Savings Bldg., L. A., at \$119,431.

Apartment House—2 story and base, frame. Cost not stated. Los Angeles, Cal. Architect, Albert C. Martin, Higgins Bldg., L. A. Owner, John W. Burke. The architect has just been commissioned to prepare plans for this building and no details of the construction are obtainable at this time.

School Buildings—2, 2 story and 1, 1 story, brick and reinforced concrete. Cost not stated. Ontario, Los Angeles Co., Cal. Architects, Austin & Pennell, Wright and Callender Bldg., L. A. Owners, Ontario School District. There will be three new buildings, the administration building and science building, each two stories in height, and the manual arts

building, each one story. The construction will be of brick and concrete with reinforced concrete halls and stairways, birch doors, pine trim, plastered exterior walls, composition and clay tile roofs, cement floors in laboratories, galvanized iron skylights, plenum system of heating, building drinking cups, electric lighting. The official call for bids will be issued during the coming week. The plans may be obtained from the architects after Monday, February 5, 1912.

Hotel—8 story and base, reinforced concrete, \$100,000. Los Angeles, Cal. Architects, Dennis & Farwell, Fay Bldg., L. A. Owners, Los Angeles syndicate, represented by Ira W. Byrnes. The building as planned will contain 462 guest rooms and 112 baths. There will be steam heat and elevator service, large lobby, dining rooms, stores and main lobby. The construction will be fire proof throughout. The exterior of the building will be faced with cement plaster. The architects have only completed the preliminary sketches. About one-third of the necessary capital has been secured.

School Buildings—3, 1 story and base, reinforced concrete, \$60,000. El Centro, Imperial Co., Cal. Architect, F. T. Harris, Redlands. Owners, El Centro School District. This work has been mentioned here before when the architect was first commissioned to prepare the plans. The working drawings are complete and bids are to be opened on February 13th. Plans and specifications can be obtained from the architect.

Apartment and Stores—2 story and base, brick, \$30,000. Long Beach, Los Angeles Co., Cal. Architects, Austin & Sedgwick, 18 Locust Ave., Long Beach. Owner, Thomas Lovell. This work has been mentioned here before. The plans will be completed next week and figures will be called for at once. The structure will be 75x75 feet. The first floor will contain three stores. The upper two floors will be arranged for apartments. The exterior will be faced with cement plaster.

Mission House—1 story and base, frame. Cost not stated. East Los Angeles, Cal. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owner, Southern California Baptist Association. The building will contain the chapel, Sunday school rooms and living rooms for the missionary and his wife. The exterior of the building will be covered with cement plaster. The roof will be of tile. The plans are being prepared.

Warehouse—1 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architects, Edelman & Barnett, Blanchard Bldg., L. A. Owners, Isaac Bros. This work has been mentioned here before when the plans were being prepared. The working drawings are now complete and figures will be taken at once. The excavating contract has been awarded to J. A. Hill.

Contracts Awarded.

Hospital—2 story and base, frame, \$14,000. Long Beach, Los Angeles Co., Cal. Architect's name not given. Owners, Seaside Hospital Association. Contractor, C. A. Reed, 242 Atlantic Ave., Long Beach. Contract price, \$170,000.

Stores and Offices—1 story and base, reinforced concrete, \$340,000. Los Angeles, Cal. Architects, Edelman

Editorial Comment.

One million dollars has been ap-
propriated by the directors of the
Panama-Pacific International Exposit-
tion for an auditorium to be erected at
the Civic Center of San Francisco.
This is a highly commendable act on
the part of the board and one that re-
giond to the credit of the City and
State. A convention hall or public
auditorium is needed in any city of
considerable size and especially one
like San Francisco so favorably situat-
ed and adapted for a convention city.
There the large concourses of people
and conventions which will meet dur-
ing the convention can be safely and
conveniently housed and where similar
conventions can meet during the years
to come. This sum of money to be used
in the construction of a building, ex-
clusive of the site, should furnish a
structure of enduring material and one
that will fit in architecturally with its
surroundings and be a monument to
the municipality.

Let the good work go on. If the
Kahn resolution goes through congress
providing an appropriation of three
million dollars for the improvement of
the Presidio there should be some
action taken in the very near future.

About all the preliminaries are over
now and there ought to be some speed
shown in getting to work. So far as
the Civic Center is concerned the
Mayor and Board of Supervisors have
done all that can be done in preparing
for the actual work and have shown
business expediency that is in the
highest degree commendable. Nothing
remains now but for the people to vote
the bond issue on March the 28th.

Some of our English brethren who
reside in our midst and still retain
their allegiance to the King are prone
to criticise the corruption of public
life in America and to hold up the
Tight Little Isle as a model in all
matters of government.

From all reports the United States,
or no other country for that matter,
has an entire monopoly of graft. A
noted British author, Mr. Hillary
Belloc, in a recent speech in London,
is reported to have said:

"I have seen a great amount of bribery,
but I know of no country where it
is as prevalent as in England."

I left Parliament because I was get-
ting sick of the vilest and dirtiest
system in which I have ever mixed in
my life."

So also a Canadian journal in speak-
ing of food adulterations prints the
following:

"The Medical Health Officer in Can-
ada is spared one adulteration which

has been recently discovered in the
course of a legal case in India. The
Indian Public Health and Municipal
Journal cites a case where the hooks
of a Mohammedan tallow merchant
were produced in court, and showed
that he had paid considerable money
for snakes of various kinds. Questions
revealed the reason for the purchase.
The snakes were boiled, and the fat
thus extracted was used as an adulter-
ant for the lard sold for human con-
sumption."

We have cotton seed oil in this
country but so far as known we have
not been imposed upon with snake
lard. It doesn't always follow that a
thing is pure because it is English, ye
know.

Relative to the discussion of the
failure of the Austin Concrete dam
Mr. E. T. Tannatt former professor of
Engineering in the Montana State Col-
lege, in an article in the Engineering
Record, suggests that a contributory
cause of the failure of some concrete
dams has been the destructive effect of
alkali present in the water.

He states that while engaged in the
study of this subject he investigated a
considerable number of concrete fail-
ures among them being that of a large
concrete dam. Examination of part
of the structure that remained gave
definite indication of the disintegrat-
ing effect of the alkali for a consider-
able distance. As a result of his ex-
amination he was led to the con-
clusions,—first, that where seepage,
capillary action and evaporation can
unite to produce a concentrated alkali
solution in concrete, the cement
will be destroyed, even if the percent-
age of alkali carried by the impound-
ed water is very small indeed. When
a stream contains alkali, or when the
soil is impregnated with alkali, any
seepage through the dam will carry
alkali in solution to the downstream
side, which is exposed to the air. Here
evaporation will increase the strength
of the alkali solution, and there will
be maximum destructive action at
that point. Secondly in cases where
it is not possible to remove this satu-
rated solution as it accumulates, we
may look for very rapid disintegration
of the concrete. Thirdly, when in the
construction of a dam there is faulty
joining of successive layers of con-
crete the water seeping through the
dam will tend to follow these natural
lines of cleavage, and destructive ac-
tion from the alkali may be looked
for."

Government investigations have
proved that alkali is destructive to
Portland cement. As this agent is
present in the arid regions generally
and the waters of the west it is some-
thing to be taken account of by en-
gineers in the construction of dams
and all structures that are subject to
the action of water.

President Ponds' Address At The Forty-Fifth Annual Convention Of the American Institute Of Architects.

The American Institute of Architects is assembled once again in convention. It is the function of this assemblage through pronouncements and carefully considered enactments to minister to the welfare of the Institute, and incidentally, in so doing minister to the well-being of the profession at large, for the status of the entire architectural profession in America is determined by the pulse beat of the American Institute of Architects. A realization of this fact must fill the Institute members with a certain sense of responsibility.

Let us hope that the deliberations of the forty-fifth convention may be conducted with the same idea of advancing ethical and aesthetic standards and in the same spirit of mutual concession and harmony which prevailed in San Francisco last year. Animated and forceful debates are to be welcomed for their invigorating and clarifying qualities, but the manifold problems which are liable to seek solution at this time should be discussed altogether upon their merits, without personal animus, and respectful consideration should be paid any idea which is advanced for the general good. Ideas and not individuals or committees rule in the American Institute of Architects. Too often when the activities of the Institute have been under consideration, both in convention and in public and private discussion, it has been assumed that the officers or the board or the committees were trying out some special scheme of their own, whereas in fact they were endeavoring solely to carry out the instructions of the convention. Although the by-laws give the Board of Directors almost unlimited authority to act for the Institute between conventions it is reality seldom act in other than its executive and judicial capacity. Officers, boards and committees find sufficient exercise for their powers in performing the duties prescribed in constitution and by-laws, and in trying to carry out the expressed will of the Institute. In short, officers, boards or committees do not make laws or rules, and officers, boards or committees endeavor to put them into execution.

Let this be remembered in discussing the questions which arise or in commenting on the activities of any executive branch of the Institute.

The committees of the Institute deserve the most grateful recognition. The time and energy spent by many committees in carrying out the will of the Institute is exceedingly great, and only the initiated can appreciate the continuing sacrifice. The committee chairman of necessity bear the brunt, but their labors may be lightened by sympathetic support within the committee. Therefore for the good of the cause, may your president suggest that hereafter any committeeman who feels the shroud of apathy drawing around him, or one who, by ill health, is incapacitated, or one who for any reason cannot come to his task with clean

hands, should resign and let active, one filled fill the place.

Under our expanding conditions committee work is bound to become more and more complicated and burdensome to the individual, and therefore it seems to your president that the office of the secretary not only, and as feasible as possible, should be put upon a modern business basis, but should be equipped to be the center of committee operations, all material being gathered by subordinates in the office, formulated and disposed under the direction of the various committee heads. This means increased expenditure, but in no other manner, it would seem, can the growing committee work be prosecuted to the relief of the individual and the welfare of the Institute. It seems desirable at this time to reaffirm certain of the principles for which the Institute stands, that the willing pervasion of many and the ignorance of few, make the office of the secretary, through sometimes within the organization, may not serve to lessen the good influence the Institute seeks to exert.

The American Institute of Architects stands as guardian of the interests of the client and the community quite as much as the welfare of the individual practitioner and the profession generally. Its code is to protect the client as well as the architect. Its fundamental ethical principle is based upon the idea of justice and fair dealing as between man and man, be they architect and client or architect and architect.—upon a recognition of individual rights and individual duties. If schedules are established, it is not that the architect may have a lever with which to pry loose undeserved money from the client—but that both client and architect may have an authoritative basis on which to compute values. If codes of ethics are formulated, it is that the unthinking and morally untutored may know what always instinctively has guided the actions of unselfish and fair-minded men—and themselves be guided.

If competition codes have been put into effect it is not that the rights of the client be interfered with, or the liberty of the architect be limited, but that the duties of each under the premises may be made manifest and if the schedule and canon of ethics are incorporated in the competition code, it again is not to curtail the right of the client but to suggest to him that under the rule of common decency he has no right to play one architect as a pawn against another, or seek to command the highest technical and professional skill at a price at which the scintilla and most indifferent service could be given honestly.

The operations of the code to date would seem to indicate that the public recognizes their worth and inherent justice to a wider extent than does the profession even, for in a multitude of instances clients, upon seeing the code, have voluntarily modified their program, while in more than one in-

stance an "unprofessional" competition has been conducted because the architect involved did not attempt to familiarize the client with the code, or because the architect involved did not wish a fair competition, relying on "personality" and "pull" to land the prize.

Another principle on which the Institute firmly rests is that in its membership shall be included only men of the noblest moral and intellectual stature—men who will not betray their client, men who will not try to deceive themselves, men who hold the welfare of the community paramount to their own or their clients' individual interest, men who know the value of beauty and decency as a communal asset and are willing to make sacrifices for the ideal, men who know that the relationship between personal morality and the power to create ideal beauty in the individual is very intimate, men who know that the capacity to appreciate ideal beauty rests upon a groundwork of broad culture and deep sentiment rather than upon commercial success. The defection from its ranks of men wanting in the above qualities cannot permanently or long, if at all, cripple the work of the Institute, even though in popular estimation they hold an exalted place in the profession. The strength of the American Institute of Architects lies not in the number but in the moral and artistic calibre of its members.

Personally, your president would had the time when the correct apprehension and application of the ethics of business and of competitions and of the set rule shall be as a matter of subconscious performance in the mind of the practitioner and the period of the Institute reunions be given up to the cultivation of the social amenities and the development of the sociological, ethical and aesthetic plans of architectural art. Personally, your president would rather in this, his annual address, consider the aspect of our American civilization and the possibilities of its adequate expression in architecture, but the reports from various committees of the board indicate that certain ethical questions are ripe for discussion and cannot be ignored by the president at this time, and he, therefore, without arguing the case, suggests, and he hopes needlessly, that the convention consider seriously, unimpassionately and impersonally all phases of the matter before changing radically the essential ideas underlying the code of the Institute. Considering carefully if a backward moral step will result from the change; consider if in any sense just relations between man and man will be impaired. Whatever has tendered to impede beautiful action may well be cut away, but consider carefully before touching the vital parts.

If any phases of the competition code, so-called, comes under consideration, please remember that individuals, many of them, and chapters even, have come into the Institute knowing the full meaning and bearing of that code

and intending to live up to it, and let this fact have weight with the older members. Remember, too, that great municipalities are favorable to it, one at least having introduced it into its charter.

Remember that great corporations and institutions have considered it favorably, and that only politics and ignorance have condemned it in principle—and let this fact count in your deliberations. Clear up ambiguities in all the codes but maintain all standards of fairness and justice in personal dealing.

Some little time since the American Institute of Architects was jocularly denominated a "gigantic trust." In some quarters this "soft impeachment" was regarded seriously—so seriously, indeed, that your president was asked to refute the charge in print. Certain it is that the American Institute of Architects is not a monopoly, for it does not contain all the commercially-minded and technically skilled members of the profession. Indeed, there are many outsiders who consider themselves ethically and aesthetically superior to any individual and collective exhibit the Institute can make. The aesthetic phase may be ignored now, but how do they square the ethical? Their position seems to be that of one who rises early, surreptitiously reads his neighbor's newspaper and returns it properly folded to the door step, enjoying the fruits of his neighbor's toil without sharing the cost. Less than one-fifth of the number of active practicing architects of the United States are in the Institute, and this little one-fifth asks to be permitted to turn over to the big four-fifths the work of any client who does not desire to play fair. At the same time the Institute in no way presumes to interfere with right of individual contract on the part of one of its members. This attitude hardly snacks of monopoly or of trade unionism. The Institute is not unfair when it suggests—yes, insists—that at least the minimum rate prevail in competitions. Ignoring the great economic waste involved in competitions, for which the client can never compensate, the minimum rate is none too large for the service of men of Institute calibre, whether in the Institute or not, and it is fully within the province of the Institute as an altruistic body to aid a man in the establishment of his right and in the accomplishment of his duties. A man may have a legal right to sell himself for less than the value his creator intended should be placed upon him—but he has no moral right, and no body of morally-minded men is going to organize to aid and abet him in his self-prostitution. The Institute has saved many a man from himself. Your president deplores again the seeming necessity for referring to these matters of professional ethics which should long ago have stirred minds and consciences to subconscious activity and have not.

Your president had the honor to represent the Institute at the Ninth International Congress of Architects in Rome—being also one of those delegated to represent the United States. Matters pertaining to the congress are fully set forth in the committee reports. It also was the good fortune of your president to be present at the Council dinner and at the opening session of the Royal Institute of British

Architects—where he had the honor to second the vote of thanks to President Leonard Stokes for his excellent inaugural address. The cordial reception of your president shows the high esteem in which your Institute is held. Messages of kindest regard were given to your president—to transmit to this body. The problems which the Royal Institute of British Architects are called upon to solve much resemble our own, and every forward step we take aids them, as every advance they make reacts as direct benefit to us.

Your president cannot refrain from referring at this time to the loss which not only he personally, but the whole Institute, sustained in the untimely death of John M. Carrere. Especial mention of Carrere's enthusiastic work and unselfish service to the Institute was made in the president's address one short year ago. Today he is not with us, but his gentle spirit is upon us as a benediction. The Institute has lost a power, and every member has lost a friend.

The program is so full that your president refrains from further intruding upon the time of the convention.

REPORT OF THE COMMITTEE ON EDUCATION, A. I. A.

Ralph Adams Cram, Chairman.

Some four or five years ago this committee began a systematic study of educational conditions in America as these apply to architecture; in the beginning it devoted itself to the discovery of what, with unflinching assurance, perhaps may be called a philosophy of architectural education; then it initiated a more careful scrutiny of scholastic facts and a preliminary effort to make these facts fit its theories, or, when such correspondence seemed impossible, to modify the facts themselves rather than abandon its preconceived and tenderly cherished opinions. During the past year more than ever before it has applied itself to correspondence and investigation, and in this process it has had borne in upon itself two facts of no slight significance: first, that while definite steps have been taken in at least one university toward making the more strictly architectural training a graduate course, many degrees in architecture still represent courses that embrace too little training in those branches of study that tend to the broader development of the students, and in many localities the colleges apparently fail to appreciate the importance not only of a complete architectural department, but also of general courses in the fine arts for the whole undergraduate body. Second, that there is apparently a very complete lack of interest among architects as to the kind and quantity of education that is or may be offered by the recognized schools or other agencies of training.

On the other hand, 't is to be said at once that both these statements must be qualified by testimony of an encouraging nature; in no case are any of the organized schools of architecture found to be hide-bound or unfriendly, all are ready to receive suggestions and to act on them when they justify themselves or when such action is materially possible, while the cold and almost unbroken silence that was the sole reply received by the commit-

tee to its circular letter sent to every member of the Institute, and the response from the presidents of chapters to the letter sent them to response cordial only by contrast, were mitigated by the enthusiastic and grateful letters received from one or two unanticipated sources, and by the active interest that has developed at several widely isolated points.

In spite of this, however, we are still impressed with the loss that follows from too great individualism in education and the singularly languid interest in educational matters that marks the profession as a whole, and this year we are about to try an experiment, nothing less, indeed, than an educational conference on the first evening of this convention, to which we have asked each chapter to send a delegate, in the hope that so we may take a first step toward co-ordinating the educational interests of the country, eliciting direct statements from the several sections as to conditions, desires and possibilities, and stimulating interest in this fundamental and vastly important consideration.

We believe the result of this conference may be of interest, but they can be available only for the use of the committee of next year, and since the conference itself may safely serve as a safety-valve for the theories of this committee and its conferees, it is not necessary this year for us to burden the convention with them, rather we may pass at once to a categorical consideration of the concrete facts that we have to report to this Institute.

And first as to the circular letters emitted by this committee; these were considered both eloquent and stimulating (by the committee itself), yet four responses only were received to the letter to members one from Seattle, one from South Carolina (very appreciative and encouraging) and two from Philadelphia, one from without the Institute being a request for information in regard to facilities for architectural study in that city. The letter to presidents of chapters has been fully answered by Philadelphia, Washington, D. C., Los Angeles and Pittsburgh—Boston, New York and Detroit being also fully reported on by members of this committee. It has been acknowledged and referred to committees by Colorado and Illinois. "The rest is silence."

It may be remembered that from our report of last year that Columbia College was the first to accept our suggestions and establish definite courses for extra-collegiate students in applied mathematics, construction, history, ornament and design. These were given under university auspices in the building of the Society of Engineers downtown, and were surprisingly successful, except in the case of the history course, which acquired no popularity whatever. This committee was convinced that extension work, to fulfill all its possibilities, should be downtown, near the architectural offices, but the cost was very great and, as a matter of fact, the many students saw no objection to going uptown to University Heights, therefore this year the courses are being given at Columbia, and are as last year except that the general course in history has been omitted and its place taken by detailed historical courses in ancient architecture this season, to be fol-

are other types which do nothing of the kind, and unfortunately our own appear to belong to this latter class. How far we can fight an established type of civilization, imposing on it from without a new set of ideas, is a debatable question. We have tried the experiment and after many modes with, it must be confessed, rather indifferent results. Our municipal and State governments seem to be generally averse to artistic ideals in any form, except in one or two singularly favored communities. Our colleges and churches are indeed seeing a new light, but the great financial powers are, if anything, following a retrograde course. Everywhere the architect finds himself engaged in a preliminary—and sometimes losing—battle in defense of the simplest principles of artistic integrity and professional dignity and rectitude. Is it not clear, therefore, that to restore the balance, something more should be done towards general education of the public? In many of the great State universities that are such an enormous power in this country, there are evidences of a movement towards the establishment of schools of architecture. Instead of giving this movement a general approval, let us rather urge efficient and comprehensive departments of the Fine Arts, not for the benefit of specialists, but for the general student body. Let us use such influence as we have towards ensuring the inclusion in this broader curriculum of a proper study of the Fine Arts, not as in themselves examples of intensive specialization, but as an essential part of all civilization, past, present and future; not as technical and historical courses, but in the light of that true philosophy of aesthetics that sees art as an essential part of a well rounded man and of the civilization he creates; as one of the truest tests and exemplars of the history of any people, and as a cultural study that cannot be eliminated from any adequate education. With this as a foundation in any college, the step towards a professional school of architecture would be easy, but in the meantime the good that could be done in the building up of a few centers of artistic appreciation amongst the people would be incalculable, and we cannot too strongly insist on the point that schools of architecture, however good, fail of their full effect unless the men they train find themselves when they graduate and begin to practice, in touch, not with scoffing or indifferent materialists but with a people needing art to express a best that is really in them, and clamorous for artists of all kinds to do the work; not, in a word, with barbarians, but with civilized men.

APARTMENT HOUSES.

San Francisco.—Apartment house, 3 story and base, frame, \$10,000. Architect, none. Owner, Edward Steward, 315 Lombard St., S. F. The building has been designed for six apartments of four rooms and bath each. There will be pine trim and wall beds. The exterior of the building will be covered with shiplap. The structure will cover an area of 25x65 feet. The plans are complete and the work will be done by Day Labor.

Portland, Ore.—Apartment house, 4

Firms desiring news on special classes of buildings such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

story and base brick and steel, \$50,000. Architect, W. H. Cowen, Portland, Ore. Owner, M. E. Lee. The building will be 50x140 feet. There will be 56 apartments of three rooms each and baths. There will be steam heat and elevator service. A vacuum cleaning plant will be installed. The exterior of the building will be faced with pressed brick and terra cotta. The plans are complete and figures are being taken. Bids will close April 1st.

Stockton, San Joaquin Co., Cal.—Apartment house, 2 story and base, frame, \$10,000. Architect, Ralph P. Morrell, Yosemite Theatre Bldg., Stockton. Owners, P. W. Owen and R. Coleman. The building will contain 8 apartments and baths. The trim will be of pine. There will be some oak floors. The exterior will be covered with rustic, slungles and cement plaster. The architect is now preparing the plans.

Los Angeles, Cal.—Apartment house, 3 story and base, brick. Cost not stated. Architects, Hudson & Munsell, Stinson Bldg., L. A. Owner, Mrs. Mary J. Hegman. The building will be 42x93 and will be arranged for four stores on the first floor and 24 apartments of two and three rooms each on the two upper floors. There will be steam heat and wall beds. The exterior will be faced with pressed brick. The architects are preparing the plans.

San Francisco.—Apartment house, 6 story and base, reinforced concrete, \$15,000. Architects, Nighetti & Headman, Pielan Bldg., S. F. Owner, Dr. Crowley. The building has been mentioned here before when the architects first started the working drawings. There will be in the neighborhood of seventy rooms in the house arranged in two and three room suites with connecting baths. There will be steam heat, wall beds and elevator service. The exterior of the building will be faced with cement plaster. The plans are complete and figures are being taken. Bids will close next week.

Ingleswood, Los Angeles Co., Cal.—Apartment house, 2 story and base, brick. Cost not stated. Architects, Dennis & Farwell, Fay Bldg., L. A. The building will be 50x100 feet. The first floor will be occupied by four stores. The upper floor will contain seven apartments with wall beds. There will be steam heat. The exterior will be faced with pressed brick. The plans are complete and figures will be taken at once.

San Francisco.—Apartment house, 3 story and base, frame, \$10,000. Architect, C. O. Clausen, Pielan Bldg., S. F. Owner, E. A. Janssen, Hearst Bldg., S. F. The building has been designed to contain four three-room apartments and one five-room apartment. There will be pine trim and open fire places. The exterior will be covered with shiplap. The plans are in the hands of the owner and he is now purchasing a materials.

Los Angeles, Cal.—Apartment house, 4 story and base, brick. Cost not stated. Architects, Garrett & Pixley, Currier Bldg., L. A. Owner, J. P. Solomon. The building will contain sixty rooms arranged in two and three room apart-

ments with connecting baths. There will be steam heat, wall beds and vacuum cleaning system and pine and hardwood trim. The exterior of the building will be finished in pressed brick. There will be tile and marble used in the entrance. The plans are being prepared.

San Francisco.—Apartment house, 3 story and base, frame, \$14,000. Architect, Henry Shermond, Mills Bldg., S. F. Owner, Charles L. Hamshar. The building will be erected on Pacific street, between Powell and Mason streets, and will contain in the neighborhood of 14 apartments with private baths. The interior trim will be of pine and redwood with some oak floors. The exterior of the building will be covered with shiplap and rustic. The plans are complete and figures will be opened for the construction on February 15th.

Los Angeles, Cal.—Apartment house, 3 story and base, frame. Cost not stated. Architect, Carl Escherich, 1753 West 46th St., L. A. Owner, John F. Foley. The building will be 41x155 and will contain 60 rooms arranged in 24 apartments with connecting baths. There will be steam heat and wall beds. The exterior of the building will be covered with rustic. The plans will be complete within the next week.

San Francisco.—Apartment house, 3 story and base, frame, \$20,000. Architects, Fabre & Bearwald, Metropolis Bank Bldg., S. F. Owners, Albert & Esmiel, Stockton. The building will be 40x45 and will contain 19 apartments of two and three rooms each with connecting baths. There will be steam heat. The interior trim will be of pine and there will be some oak floors. The exterior will be covered with shiplap and brick veneer. The plans are being prepared.

San Francisco.—Apartment house, 5 story and base, reinforced concrete, \$25,000. Architects, Rhodes & Gaspart, Pacific Bldg., S. F. Owner, Mrs. Julia Cronan. The building will be 32x123 feet and will contain seventy rooms and baths. The apartments will be arranged in two-room suites. There will be steam heat, wall beds, mail and garbage chutes and a vacuum cleaning system. The exterior of the building will be faced with stone and pressed brick. The plans are complete and figures will be called for at once.

San Francisco.—Apartment house, 2 story and base, brick and frame, \$35,000. Architects, C. M. and A. F. Rousseau, Monnock Bldg., S. F. Owner, Theo. Ruff. The building will contain 24 apartments arranged in suites of two, three and four rooms each with connecting baths. There will be steam heat and elevator service and wall beds. The interior finish will be of pine with oak floors. The exterior of the building will be faced with pressed brick veneer and cement plaster. The plans are complete and the architects are taking figures on the work.

Portland, Ore.—Apartment house, 3 story and base, brick and steel, \$75,000. Architects, MacNaughton & Raymond, Portland, Ore. Owner, M. Olson. The building will cover an area of 100x100 feet and will be arranged for

two, three and four room apartments. There will be steam heat, elevator service and a vacuum cleaning plant. The exterior of the building will be faced with pressed brick. The architects have just been commissioned to prepare the plans and further details can not be given at this time.

San Diego, Cal.—Apartment house, 3 story and base, brick and steel \$10,000. Architect, Dell W. Harris, Timken Bldg., San Diego. Owner, Mrs. Sarah E. Sinks. The building will be 100x100 feet. The first floor will contain six stores. The upper floors will be arranged for hotel and apartment house rooms. There will be steam heat and elevator service. The exterior of the building will be faced with pressed brick. The plans are being prepared.

San Francisco—Apartment house, 2 story and base, frame, 12,000. Architect, Alfred Schroeder, Foxcroft Bldg., S. F. Owner, Mrs. Galvin. The building will be erected in the Richmond District and will contain six large apartments equipped with every modern convenience. There will be open fire places and wall beds. The exterior of the building will be covered with ship lap and cement plaster. The architect is taking figures on the work.

BANKS.

Chula Vista, San Diego Co., Cal.—Bank, 1 story and base, reinforced concrete, \$10,000. Architect, Dell W. Harris, Timken Bldg., San Diego. Owner, Peoples State Bank. The building will be 25x115 feet. There will be a large public room with marble floor. The banking office will be finished in mahogany and marble. There will be coin and safe deposit vaults. The exterior of the building will be faced with cement plaster. The architect is preparing the plans.

San Pedro, Los Angeles Co., Cal.—Bank, 1 story and base, brick and steel, \$20,000. Architects, Edelman & Barnett, Blanchard Bldg., L. A. Owner, State Bank of San Pedro. The architect has decided not to erect a four-story structure as was first planned and have instructed the architects to prepare plans for a one story monumental building. The building will be for the exclusive use of the bank. The plans will be ready for figures within two or three weeks.

BRIDGES, DAMS AND HARBOR WORK.

Stockton, San Joaquin Co., Cal.—Wharf shed, concrete and frame, \$10,000. Architect, William B. Thomas, Main and Commercial Sts., Stockton. Owner, City of Stockton. The building will have a brick and reinforced concrete foundation and exterior walls covered with corrugated iron. The roof will also be of corrugated iron. The plans are being prepared.

Randall, Wash.—Bridge, steel and concrete. Cost not stated. Engineer, County Surveyor, Chehalis. Owners, Lewis County. The plans for the steel work on this bridge have been completed and the Board of Supervisors will open figures for the same on February 20th. Contracts for the other parts of the bridge will be let shortly.

Tillamook, Ore.—Harbor work, dredging and docks, \$150,000. Engineer's name not given. Owners, State of Oregon. The State Supreme

Court has declared Tillamook a legal Harbor, and the Port Commission is to proceed at once with the dredging the bonds for harbor improvements.

COURT HOUSES.

Contracts Awarded.

Ventura, Ventura Co., Cal.—Court house, 2 story and base, reinforced concrete and stone. Cost not stated. Architect, A. C. Martin, Higgins Bldg., L. A. Owners Ventura County. The following sub-contracts have been awarded on this building by the Los Angeles Planting Mill Co., who have the general contract: Granite to S. Allison & Son, terra cotta to Gladding-McBean & Co., and copper work to the California Cornice Works.

CHURCHES.

Anaheim, Orange Co., Cal.—Church additions, brick and steel. Cost not stated. Architect, A. C. Martin, Higgins Bldg., L. A. Owners, Calvary Church of Anaheim. The addition will be 70x55 feet. The architect's plans will correspond with the present building. There will be a central heating plant. The architect is now preparing the working drawings.

Tulare, Tulare Co., Cal.—Church, 2 story and base, brick, \$20,000. Architects Walker & Vawter, Wright and Callender Bldg., L. A. Owners, Tulare Methodist Church. The architect has just been commissioned to prepare these plans and no details of the construction can be given at this time. The building will be faced with pressed brick and there will probably be a central heating system. Working drawings are now being made.

College Place, Wash.—Church, 1 story and base, frame, \$1,000. Architect, Guy C. Manning, Portland. Owners, Seventh Day Adventists. The building will be 50x52 feet and will have a seating capacity of 700 people. There will be steam heating and a system of ventilation. The exterior of the building will be covered with rustic. The plans are complete and figures are being taken by the architect.

FACTORIES & WAREHOUSES.

Los Angeles, Cal.—Cold storage building, 5 story and base, steel and reinforced concrete, \$30,000. Architects, Mayberry & Furker, Pacific Electric Bldg., L. A. Owners, Calumet Packing Co. The engineering plans for this work have been prepared in the company's offices. The architectural work is now being done in Los Angeles. The building will be absolutely fire proof throughout. The exterior will be faced with terra cotta. There will be no interior finish. The cost given is understood to be exclusive of the cold storage apparatus. Figures will be called for shortly.

Honolulu, Hawaii—Factory, 1 story and base, reinforced concrete, \$50,000. Architects, Engineering Dept. Hawaiian Pineapple Co. Market St., S. F. Owners, Hawaiian Pineapple Co. Plans are complete for one of the largest cannery buildings yet erected in the Islands. There will be considerable structural steel, plumbing and electric work. The exterior will be faced with cement plaster. The plans are now in the hands of contractors for figures. A general contract will be awarded.

Los Angeles, Cal.—2 story and base, steel and concrete, 100x150 feet. Architect, S. P. Clinton. The building will be 100x150 feet. The first floor will be arranged for six stores. The upper floors will be arranged for hotel and apartment house rooms. There will be steam heat and elevator service. The exterior of the building will be faced with pressed brick. The plans are being prepared.

Contracts Awarded.

San Pedro, Los Angeles Co., Cal.—Gran Elevator, concrete and frame, \$50,000. Architect, none. Owners, Grain and Milling Co. Contractors, R. H. Neustadt Construction Co. Wright and Callender Bldg., L. A. Contract price, \$20,000.

FLATS.

San Francisco—Flats, 2 story and base, brick and steel, 100x150 feet. Architect, S. P. Clinton. The building will be 100x150 feet. The first floor will be arranged for six stores. The upper floors will be arranged for hotel and apartment house rooms. There will be steam heat and elevator service. The exterior of the building will be faced with pressed brick. The plans are being prepared.

Oakland, Cal.—Flats, 2 story and base, brick and steel, 100x150 feet. Architect, none. Owners, S. P. Clinton. The building will be 100x150 feet. The first floor will be arranged for six stores. The upper floors will be arranged for hotel and apartment house rooms. There will be steam heat and elevator service. The exterior of the building will be faced with pressed brick. The plans are being prepared.

San Francisco—Flats, 2 story and base, brick and steel, 100x150 feet. Architect, none. Owners, S. P. Clinton. The building will be 100x150 feet. The first floor will be arranged for six stores. The upper floors will be arranged for hotel and apartment house rooms. There will be steam heat and elevator service. The exterior of the building will be faced with pressed brick. The plans are being prepared.

San Francisco—Flats, 2 story and base, brick and steel, 100x150 feet. Architect, none. Owners, S. P. Clinton. The building will be 100x150 feet. The first floor will be arranged for six stores. The upper floors will be arranged for hotel and apartment house rooms. There will be steam heat and elevator service. The exterior of the building will be faced with pressed brick. The plans are being prepared.

San Francisco—Flats, 2 story and base, brick and steel, 100x150 feet. Architect, none. Owners, S. P. Clinton. The building will be 100x150 feet. The first floor will be arranged for six stores. The upper floors will be arranged for hotel and apartment house rooms. There will be steam heat and elevator service. The exterior of the building will be faced with pressed brick. The plans are being prepared.

San Francisco—Flats, 2 story and base, brick and steel, 100x150 feet. Architect, none. Owners, S. P. Clinton. The building will be 100x150 feet. The first floor will be arranged for six stores. The upper floors will be arranged for hotel and apartment house rooms. There will be steam heat and elevator service. The exterior of the building will be faced with pressed brick. The plans are being prepared.

floors in the principal rooms will be of oak. There will be furnace heat and open fire places. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Lodi, San Joaquin Co., Cal.—Bungalow, 1 story and base, frame, \$2,000. Architect, O. A. Schroeder, 401 West 17th St., Lodi. Owner, G. Mann. The dwelling has been designed for a five-room house with bath. The interior trim will be of pine and redwood. There will be open fire places with tile mantels. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are being prepared.

Oakland, Cal.—Emmal A., 1 story and base, frame, \$2,500. Architect, none. Owner, John A. Pliskin, 1533 Channing Way, Berkeley. The dwelling has been designed for a five-room house with bath. The interior trim will be of pine and redwood. There will be open fire places with tile or brick mantels. The floors of the principal rooms will be of oak. The exterior of the bungalow will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Lodi, San Joaquin Co., Cal.—Bungalow, 1 story and base, frame, \$2,000. Architect, O. A. Schroeder, 401 West Elm St., Lodi. Owner, R. Spooner. The dwelling will contain five rooms and bath. The interior trim will be of pine throughout. There will be tile used in the bath. There will be open fire places and tile mantels. The exterior of the dwelling will be covered with rustic. The plans are now out for figures.

Oakland, Cal.—Residence, 2 story and base, frame, \$1,000. Architect, none. Owner, J. M. Wilson, Oakland. The dwelling will contain six rooms and bath. The interior finish will be of pine with some oak panels. There will be tile used in the bath room and kitchen. The floors will be of oak in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick. The exterior of the residence will be covered with rustic. The plans are in the hands of the owner and he is now taking figures on the work.

San Mateo, San Mateo Co., Cal.—Bungalow, 1½ story and base, \$5,000. Architect, W. L. Schmolle, Whitell Bldg., S. F. Owner, John S. Van Winkle. The dwelling will contain eight rooms and two baths. The interior trim will be of pine and hardwood with oak floors throughout the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick. There will be tile in the bath and kitchen. The exterior of the dwelling will be covered with shingles. The plans are being prepared.

Oakland, Cal.—Bungalow, 1 story and base, frame, \$2,000. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, C. M. Johnson. The dwelling will contain six rooms and bath. The interior finish will be of pine with oak floors throughout. There will be open fire places with attractive tile or brick mantels. The exterior of the bungalow will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Richmond, Contra Costa Co., Cal.—Bungalow, 1 story and base, frame,

\$2,000. Architect, none. Owners, G. A. Wilkinson Co., Richmond. The dwelling has been designed for a five-room house with bath. The interior trim will be of pine with some oak floors. There will be open fire places and tile mantels. The exterior of the dwelling will be covered with shingles. The plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Bungalow 1 story and base, frame, \$2,000. Architect, none. Owner, J. T. Owen, 1535 Cedar St., Berkeley. The dwelling has been designed for a five-room house. There will be one bath. The interior trim will be of pine and redwood. There will be oak floors and open fire places. The mantels will be of tile. The exterior of the dwelling will be covered with shingles. The plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Bungalow 1 story and base, frame, \$2,000. Architect, none. Owner, Charles A. Warner, 2312 9th St., Berkeley. The dwelling will contain five rooms and bath. The interior trim will be of pine throughout. There will be open fire places with tile mantels. The exterior of the dwelling will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, \$6,000. Architect, Noble Newsom, 2610 Durant St., Berkeley. Owner, H. H. Glessner. The dwelling has been designed for an eight-room house with two bath rooms. The interior finish will be of pine, redwood and oak. There will be oak floors. There will be furnace heat and open fire places. The mantels will be of brick. There will be tile in the bath and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the architect is taking figures.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, \$4,000. Architect, W. H. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owner, Miss Eliza Palache. The dwelling will contain seven rooms and bath. The interior finish will be largely of pine with oak floors throughout the first story. There will be furnace heat and open fire places. The mantels will be of tile or brick. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the architect is taking figures.

San Francisco—Residence, 2 story and base, frame, \$4,000. Architect, Joseph A. Leonard, Phelan Bldg., S. F. Owners, Urban Realty Co. The dwelling will be erected in a new tract recently opened up by this company. The building has been designed for a seven-room house with bath. The interior trim will be of pine, redwood and oak. There will be hardwood floors. There will be furnace heat and open fire places. The mantels will be of brick. The exterior of the dwelling will be covered with shingles and klinker brick veneer. The plans are complete and the architect is purchasing all materials. The work will be done by Day Labor.

Oakland, Cal.—Residence, 2 story and base, frame, \$1,000. Architect, none. Owner, H. N. Terrell, Oakland. The dwelling has been designed for an eight-room house with bath. The interior trim will be of pine throughout,

The floors of the principal rooms will be of oak. There will be furnace heat and open fire places. The mantels will be of tile. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

SCHOOLS.

Walnut Creek, Contra Costa Co., Cal.—School, 2 story and base, frame, \$20,000. Architect, Louis A. Stone, Bacon Block, Oakland. Owners, Walnut Creek School District. This work was mentioned here when the architect was first selected to prepare the plans. The building will contain six class rooms and offices, toilet room, furnace room and assembly hall. There will be a warm air system of heating. The exterior of the building will be covered with cement plaster on metal lath. The plans are complete and the School Board are receiving figures on the work.

Salem, Ore.—Schools, 2 story and base, brick, \$25,000 each. Architect, Fred A. Leger, Portland. Owners, City of Salem. The buildings will be identical in design, and will each cover an area of 68x93 feet. There will be eight class rooms. A plenum heating system will be used. The exterior will be faced with pressed brick. Bids for the construction will be opened February 17th.

Berkeley, Alameda Co., Cal.—Training school, 2 story and base, brick and steel, \$60,000. State Architect, D. G. Sacramento, Owners, State of California. Bids for this work have been opened in the State Engineer's office. For a complete list of the bidders see under Oakland and Alameda County in this issue.

Oak Grove, Sacramento Co., Cal.—School, 2 story and base, brick, \$8,000. Architects, Stone & Wright, Stockton and Oakland. Owners Oak Grove School District. The architects have recently been commissioned to prepare the plans for this work. The building will contain a number of class rooms, assembly hall, principals' office, library besides the usual rooms found in buildings of this class. There will be steam heat and a vacuum cleaning plant. The exterior of the building will be faced with pressed brick. Working drawings are being prepared.

San Francisco—School project clock system. Cost not stated. Architect, Alfred I. Coffey, 1204 Clay. Hewes Bldg., S. F. Owners, City and County of San Francisco. Bids for this work have been opened by the Board of Public Works. For a complete list of bidders see under San Francisco in this issue.

Salt Lake, Wash.—School, 1 story and base, reinforced concrete, \$15,000. Architect, Harlan Thomas, Eilers Bldg., Seattle. Owners, Salt Lake School District. The plans for this building which has been designed for a grammar school, are complete but the architect reports that bids will not be taken until an irregularity in the issue has been corrected.

Portland, Ore.—Parish School, 2 story and base, brick and steel, cost not stated. Architects, Jacobson Smith, Portland. Owners, Holy Trinity Parish. The building will be of brick and will contain four class rooms, the first floor and a large auditorium.

in the basement. The walls will be heavy enough to carry additional stories if needed. There will be steam heat. The exterior will be faced with pressed brick. The architects are preparing the plans.

SEWERS, STREET WORK AND WATER SYSTEMS.

San Francisco—Steel work for pumping plant. Cost not stated. City Engineer Mursden Nelson, 1101 David Hayes Bldg., S. F. Owners, City and County of San Francisco. The plans for this work have been completed and placed in the hands of the Board of Public Works for figures. Bids will be opened for the same on February 21st.

Bakersfield, Kern Co., Cal.—Pumping plant, 1 story reinforced concrete. Cost not stated. Architect, none. Owners Bakersfield Water Co., Bakersfield. The building will replace an old frame structure now in use. There will be a complete new mechanical equipment. Plans for the work are complete and bids will be called for shortly.

Orange, Orange Co., Cal.—Reservoir, reinforced concrete. Cost not stated. Engineers, Mayberry & Parker, Pacific Electric Bldg., L. A. Owners, City of Orange. The reservoir will complete a part of the city's fire protection system. The reservoir will have a capacity of 600,000 gallons and will be 30 feet in diameter and 12½ feet deep. There will be a reinforced concrete roof. Plans are being prepared.

San Bernardino, San Bernardino Co., Cal.—Water system improvements, \$25,000. City Engineer, San Bernardino. Owners, City of San Bernardino. The work will be in the nature of extensions to the present system. Plans are already complete.

STORES AND OFFICES.

San Francisco—Stores and lofts, 3 story and base, brick and steel, \$20,000. Architect, Herman Barth, 12 Geary St., S. F. Owner, Alex. Wolfen. The building will be located in the "Wholesale District" and has been designed for stores on the first floor and lofts above. There will be considerable structural steel used. The exterior walls will be of brick, faced with pressed brick. There will be plate glass store fronts. The plans are complete and figures are being taken.

Stockton, San Joaquin Co., Cal.—Stores and rooms, 2 story and base, frame, \$10,000. Architect, Walter King, Elks' Bldg., Stockton. Owner, A. L. Franch. The building has been designed for stores on the first floor and living apartments above. The exterior will be covered with rustic. The plans are being prepared.

Cuenamaca, San Bernardino Co., Cal.—Stores and hall, 2 story and base, brick. Cost not stated. Architect, Scott Quintin, Story Bldg., L. A. Owner, John Klingler. The building will be 35x75 feet. The first floor will be arranged for stores. There will be a large hall on the upper floor. The exterior of the building will be faced with cement plaster. The plans are being prepared.

Redonda, Los Angeles Co., Cal.—Stores, 2 story and base, brick. Cost not stated. Architect, L. B. Pember-

ton, Auditorium Bldg., L. A. Owner, P. C. Ridgely. The building will be 25x120 and will contain stores on the first floor and offices and living rooms above. The exterior of the building will be faced with pressed brick. The plans are complete and figures are to be taken at once.

Seattle, Wash.—Stores, 2 story and base, reinforced concrete, \$20,000. Architect, J. P. Dean, 1551 50th St., Seattle. Owner, G. S. Kreschner. The building will be 13x60 and will contain several stores on the first floor and storage space above. The exterior of the building will be faced with cement plaster. The plans are complete and figures are being taken.

Contract Awarded.

San Francisco—Stores and offices, 9 story and base, Class A construction, \$250,000. Architect, George William Kelham, Crocker Bldg., S. F. Owners, Sharon Estate Contractors, Lange & Bergstrom, Monathock Bldg., S. F. Contract price not stated.

THEATRES.

San Francisco—Theatre and hotel, 10 story and base, Class A construction, \$500,000 or more. Architect, Edward T. Foukes, Crocker Bldg., S. F. Owners, San Francisco syndicate headed by E. Patrizi. This work was mentioned briefly in the last issue of the Building and Industrial News. More complete details are now obtainable and are given below:

The architect's plans show that the seating capacity can be obtained without sacrificing the artistic appearance of the interior or eliminating any of the conveniences. By putting the balcony and gallery farther back than usual every person in the parquet, it is planned, will be permitted a clear view of the horseshoe shaped box tiers and of the decorations which will adorn the boxes, loges and the parapet of the gallery. The balcony and gallery will be amply sufficient, but both will extend back further than in the average opera house. The main entrance will have paneled walls in Caen stone and with vaulted ceiling. A grand foyer located directly over the entrance vestibule and within easy access to the parquet and boxes is designed in the period of French renaissance architecture with polished walnut parquet floor and walls of rare Italian marble, with panels of subdued mural decorations, all in harmony and proportion. Adjacent to this foyer, it is planned, will be the retiring rooms, smoking and cloak rooms, florist confectionery and other similar accommodations. A system of concealed lighting has been decided upon.

The question of automobile accommodations, an important one in these days, has not been overlooked in the plans. Under the theatre, beneath the ground floor there will be a large space where as many as thirty automobiles can be accommodated at one time. It is planned to have the automobile entrance and exit on Powell street and so arranged as to permit a continuous line of machines to enter and leave. A grand staircase above would make them easily accessible to the opera patrons. Another planned feature of the opera house is a large rock garden, magnificently

located and covered with glass, this to be used as a cafe, and possibly as a place of entertainment. The stage, it is planned, will be 99x112 feet, thus allowing operative production on the most elaborate scale possible. The building itself will be of reinforced concrete and absolutely fire proof.

San Francisco—Theatre, 2 story and base, Class A construction, \$50,000. Architect, W. H. Young, 145 Kearny St., S. F. Owners, Wigwam Theatre Co. This work has been mentioned here several times before. The plans have been revised and new figures are now being taken. The building has been designed for the exclusive use of vaudeville. The seating capacity will be in the neighborhood of 2,500 people. The construction will be absolutely fire proof. The exterior walls will be of reinforced concrete faced with cement plaster.

SEALED PROPOSALS.

FURNISHING CANAL SUPPLIES.

(Bids close March 1.)

CANAL CIRCULAR, 679—Proposals for general Control Apparatus for the Lock Machinery, including Starting Panels for all Motors, which are to be controlled from a Remote Point; Limit Switches, Commutating Switches Used in the Mitre-Gate Control, Auxiliary Cut out Switches for Mitre-Gate Strut, Handrail Controllers, Miscellaneous Remote Indicators and Indicator Controllers, Control Switchboards for All Locks and Spillways and Control and Indicating Apparatus for the Chain Fenders. Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washington, D. C., until 10:30 a. m. March 1, 1912, at which time they will be opened in public, for furnishing the above-mentioned articles. Bids and general information relating to this Circular (No. 679) may be obtained from this office or the office of the assistant purchasing agent, 1086 North Point street, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash., Los Angeles, Cal.; F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

PROPOSALS FOR DREDGING.

(Bids close Feb. 20.)

DREDGING—U. S. Engineer Office, 491 Custom House, San Francisco, Cal.—Sealed proposals for dredging in Suisun Channel, Cal., will be received here until 11 o'clock a. m. February 20, 1912. Information on application, THOMAS H. REES, lieutenant colonel, engineers.

PROPOSALS FOR CRUSHER.

(Bids close March 1.)

ROCK CRUSHER—Department of the Interior, United States Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service, Boise, Idaho, until 2 o'clock p. m. March 1, 1912, for furnishing a rock crusher, ball mills, tube mills, a rotary dryer and a mixing and weighing machine for a sand-cement plant on the Boise project, Idaho. For particulars address the U. S. Reclamation Service, Boise, Idaho, or Washington, D. C. F. H. NEWELL, director.

PROPOSALS FOR STEEL WORK.

(Bids close Feb. 21.)

OFFICE of the Board of Public Works of the City and County of San Francisco.—Sealed proposals will be received at the office of the said Board of Public Works, tenth floor, David Hewes Building, 995 Market street, between the hours of 2 o'clock p. m. and 3 o'clock p. m., on Wednesday, the 21st day of February, 1912, for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit:

The structural steel and iron work of a class "A" building to be located in Fort Mason Military Reservation, for the Auxiliary Water Supply System for Fire Protection.

PROPOSALS FOR SECOND-HAND MACHINERY.

(Bids close Feb. 15.)

OFFICE of Constructing Quartermaster, Honolulu, H. T.—Sealed proposals, in duplicate, will be received here until February 15, 1912, and then opened for furnishing the following new or used machinery: 1 1-yard mixer, with power; 1 1/2-yard mixer, with power; 1 15,000-gallon tank; 1 15-20 h. p. portable boiler; 1 10-h. p. portable boiler; 20,000 feet steel rails; 2 D. D. hoisting engines, steam; 1 stiff-leg derrick, 50-foot boom; 1 Worthington pump, 5 1/4"x14; 1 band saw; 1 emery wheel; 2 bottom-dump concrete buckets; 5,000 feet 3-inch galv. pipe; 6 side-dump cars; 12 sheaves, single, 1-inch and 2-inch cable, 12-inch-18-inch diameter; 1 light power turning machine; 56 pairs car wheels, spikes and fish plates; 1600 feet traveling cableway; 1 power pipe threader, 1/2-3 inch 1 sand screen; 6 3-yard dump wagons; 1 cableway engine; 2,000 feet 1/2-inch hoisting cable. Bidders must give full particulars as to condition of articles that have been used. Prices to be quoted f. o. b. San Francisco or Honolulu. Blank proposals may be obtained upon application to this office or to Depot Quartermaster, San Francisco. FRANK B. EDWARDS, Capt. and Q. M.

PROPOSALS FOR STREET WORK.

(Bids close Feb. 21.)

OFFICE of the Board of Public Works of the City and County of San Francisco.—Sealed proposals will be received at the office of the said Board of Public Works, tenth floor, David Hewes Building, 995 Market street, between the hours of 2 o'clock p. m. and 3 o'clock p. m., on Wednesday, the 21st day of February, 1912 for doing the following street work, including the furnishing of the necessary labor and materials therefor, to wit:

That Bryant street, between Ninth and Tenth streets, be improved by constructing artificial stone sidewalks of the full official width, where artificial stone or lithumious rock sidewalks of the full official width are not already constructed.

PROPOSALS FOR SEWERS.

(Bids close Feb. 21.)

OFFICE of the Board of Public Works of the City and County of San Francisco.—Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m., on Wednesday, the 21st day of February, 1912, for doing the following street work, including the furnishing of the necessary labor and materials therefor, to wit:

That an eight (8) inch, vitrified, salt-glazed, iron-stone pipe sewer be constructed along the center line of Alvarado street between the center and westerly lines of Castro street; and that an eight (8) inch, vitrified, salt-glazed, iron-stone pipe sewer with four (4) Y branches, one (1) brick manhole with cast-iron frame and

cover and galvanized wrought-iron steps, and one (1) vitrified, salt-glazed, iron-stone pipe lamp-hole with cast-iron frame and cover be constructed along the center line of Alvarado street from Castro street to a point one hundred and thirty (130) feet westerly therefrom.

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

Theatre and Hotel—10 story and base. Class A construction, \$500,000 or more. San Francisco. Architect Edward T. Foulkes, Crocker Bldg., S. F. Owners, San Francisco syndicate headed by E. Patrizi. This work was mentioned briefly in the last issue of the Building and Industrial News. More complete details are now obtainable and are given below:

The architect's plans show that the seating capacity can be obtained without sacrificing the artistic appearance of the interior or eliminating any of the conveniences. By putting the balcony and gallery farther back than usual every person in the parquet, it is planned, will be permitted a clear view of the horseshoe shaped box tiers and of the decorations which will adorn the boxes, loges and the parapet of the gallery. The balcony and gallery will be amply sufficient, but both will extend back further than in the average opera house. Main entrance will have paneled walls in Caen stone and with vaulted ceiling. A grand foyer located directly over the entrance vestibule and within easy access to the period of French renaissance architecture, with polished walnut parquet floor and walls of rare Italian marble, with panels of subdued mural decorations, all in harmony and proportion. Adjacent to this foyer, it is planned, will be the retiring rooms, smoking and cloak rooms, florist, confectionery and other similar accommodations. A system of concealed lighting has been decided upon.

The question of automobile accommodations, an important one in these days, has not been overlooked in the plans. Under the theatre, beneath the ground floor there will be a large space where as many as thirty automobiles can be accommodated at one time. It is planned to have the automobile entrance and exit on Powell street and so arranged as to permit a continuous line of machines to enter and leave. A grand staircase from above would make them easily accessible to the opera patrons. Another planned feature of the opera house is a large roof garden, magnificently decorated and covered with glass, this is to be used as a cafe, and possibly as a place of entertainment. The stage, it is planned, will be 99x112 feet, this allowing operatic production on the most elaborate scale possible. The building itself will be of reinforced concrete and absolutely fire proof.

Apartment House—3 story and base, brick and frame, \$25,000. San Francisco. Architects, C. M. and A. F.

Rousseau, Monadnock Bldg., S. F. Owner, Theo. Rulfs. The building will contain 24 apartments arranged in suites of two, three and four rooms each with connecting baths. There will be steam heat and elevator service and wall beds. The interior finish will be of pine with oak floors. The exterior of the building will be faced with pressed brick veneer and cement plaster. The plans are complete and the architects are taking figures on the work.

Flats—3 story and base, frame, 7,000. San Francisco. Architects, Rhodes & Gaspard, Pacific Bldg., S. F. Owner, Mike O'Connor. The building has been designed to contain three five-room flats with baths. There will be pine and elm trim. There will be open fire places and tile mantels. A garage will be built in the basement. The exterior will be of brick veneer and ship-lap. The plans are complete and the work will be done by Day Labor.

Stores and Lofts—3 story and base, brick and steel, \$20,000. San Francisco. Architect, Herman Barth, 12 Geary St., S. F. Owner, Alex. Wolfen. The building will be located in the "Wholesale District" and has been designed for stores on the first floor and lofts above. There will be considerable structural steel used. The exterior walls will be of brick faced with pressed brick. There will be plate glass store fronts. The plans are complete and figures are being taken.

Apartment House—3 story and base, frame, \$20,000. San Francisco. Architects, Fabre & Bearwald, Metropolitan Bank Bldg., S. F. Owners, Allibert & Esmol, Stockton. The building will be 40x48, and will contain 19 apartments of two and three rooms each with connecting baths. There will be steam heat. The interior trim will be of pine. There will be some oak floors. The exterior will be covered with ship-lap and brick veneer. The plans are being prepared.

Theatre—2 story and base. Class A construction, \$80,000. San Francisco. Architect, W. H. Crim, 425 Kearny St., S. F. Owners, Wigwam Theatre Co. This work has been mentioned here several times before. The plans have been revised and new figures are now being taken. The building has been designed for the exclusive use of vaudeville. The seating capacity will be in the neighborhood of 2,500 people. The construction will be absolutely fire proof. The exterior walls will be of reinforced concrete faced with cement plaster.

Flats—3 story and base, frame, \$3,500. San Francisco. Architect, C. Fantoni, 4 Columbus Ave., S. F. Owner, Gioacchino Greco. The building will be 30x56 and has been designed to con-

 San Francisco

tain six flats of five and six rooms each and baths. The interior trim will be of pine throughout. There will be open fire places. The exterior will be covered with shiplap. The plans are complete and figures are being taken by the architect.

Apartment House—3 story and base, frame, \$10,000. San Francisco. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner, E. A. Janssen, Hearst Bldg., S. F. The building has been designed to contain four three-room apartments and one five-room apartment. There will be pine trim and open places. The exterior will be covered with shiplap. The plans are in the hands of the owner and he is now purchasing all materials.

Flats—2 story and base, frame, \$4,000. San Francisco. Architect, none. Owner, Mrs. E. Schneider, 62 Lyon St., S. F. The building has been designed to contain four flats of five and six rooms each with baths. The interior finish will be of pine with some hardwood floors. There will be gas grates. The exterior of the building will be covered with shiplap and brick veneer. The plans are complete and the work will be done by Day Labor.

Apartment House—3 story and base, frame, \$12,000. San Francisco. Architect, Alfred Schroepfer, Foxcroft Bldg., S. F. Owner, Mrs. Calvin. The building will be erected in the Richmond District and will contain six large apartments equipped with every modern convenience. There will be open fire places and wall beds. The exterior of the building will be covered with shiplap and cement plaster. The architect is taking figures on the work.

Residence—2 story and base, frame, \$4,000. San Francisco. Architect, Joseph A. Leonard, Phelan Bldg., S. F. Owners, Urban Realty Co. The dwelling will be erected in a new tract recently opened by this company. The building has been designed for a seven-room house with bath. The interior trim will be of pine, redwood and oak. There will be hardwood floors. There will be furnace heat and open fire places. The mantels will be of brick. The exterior of the dwelling will be covered with shingles and klinker brick veneer. The plans are complete and the architect is purchasing all materials. The work will be done by Day Labor.

Society Building—3 story and base, brick and steel. Cost not stated. San Francisco. Architect, Italo Zanolini, 604 Montgomery St., S. F. Owners, Casa Colonial Fugassi. This work has been mentioned here before. The plans were recently out for figures but all bids were found to be in excess of the amount available for construction. The plans are now being revised and new figures will be called for shortly.

Apartment House—3 story and base, frame, \$14,000. San Francisco. Architect, Henry Sherman, Mills Bldg., S. F. Owner, Caroline L. Hamshar. The building will be erected on Pacific street, between Powell and Mason streets, and will contain in the neighborhood of 14 apartments with private baths. The interior trim will be of pine and redwood with some oak floors. The exterior of the building will be covered with shiplap and rustic. The plans are complete and figures will be opened for the construction on February 17th.

Residence—3, 2 story and base, frame, \$2,000 each. San Francisco. Architect, none. Owner, A. Harrington, 1261 4th Ave., S. F. The dwellings will each consist of six rooms and baths. The interior finish will be of pine throughout. There will be open fire places with attractive tile mantels. The exteriors of the dwellings will be covered with shingles and brick veneer. The plans are complete and the work will be done by Day Labor.

Hotel—5 story and base, brick and steel, \$40,000. San Francisco. Architect, Earl B. Scott, Humboldt Bank Bldg., S. F. Owner's name withheld. The building will be erected in the heart of the downtown hotel district. There will be stores on the first floor and a handsome entrance. The upper floors will contain in the neighborhood of sixty rooms a large percentage of which will have connecting baths. There will be steam heat and elevator service. The exterior of the building will be faced with pressed brick. The plans are being prepared and figures will be called for shortly.

Apartment House—5 story and base, reinforced concrete, \$55,000. San Francisco. Architects, Rhodes & Gaspard, Pacific Bldg., S. F. Owner, Mrs. Julia Cronan. The building will be 32x123 feet and will contain 70 rooms and baths. The apartments will be arranged in two-room suites. There will be steam heat, wall beds, mail and garbage chutes and a vacuum cleaning system. The exterior of the building will be faced with stone and pressed brick. The plans are complete and figures will be called for once.

Residence—2 story, attic and base, frame, \$15,000. San Francisco. Architects, Ward & Blohme, Alaska Commercial Bldg., S. F. Owner, Frederick Knight. The dwelling will be erected in the Marine View District and will contain 12 rooms and 2 baths. The interior finish will be of pine, oak and white enamel. The bath rooms will be finished in tile. There will be furnace heat and open fire places. The mantels will be of brick or tile. There will be hardwood floors throughout. A vacuum cleaning plant will be installed. The exterior of the dwelling will be covered with cement plaster on metal lath. A garage will be built in connection. The plans are complete and figures are being taken.

Hotel—3 story and base. Class A construction, \$200,000. San Francisco. Architects, McDonald & Applegarth, Call Bldg., S. F. Owners, Cliff Estate. This work has been mentioned here before when the plans were first started. The building will contain in the neighborhood of 250 rooms and a large number of private baths. The construction will be fire proof throughout. There will be steam heat, elevator service, vacuum cleaning system, mail chutes and all other conveniences. The exterior of the building will be faced with cement plaster. Preliminary figures are being taken.

Apartment House—3 story and base, frame, \$10,000. San Francisco. Architect, none. Owner, Edward Steward, 215 Lombard St., S. F. The building has been designed for six apartments of four rooms and bath each. There will be pine trim and wall beds. The exterior of the building will be covered with shiplap. The structure will cover an area of 25x68 feet. The plans are complete and the work will be done by Day Labor.

Flats—3 story and base, frame, \$4,000. San Francisco. Architect, none. Owner, Joseph Menard, 153 Clinton Park, S. F. The building will be 31x62 and has been arranged for six small flats of four and five rooms each. There will be baths. The trim will be of pine. There will be gas grates. The exterior of the building will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Hotel and Stores—3 story and base, brick, \$20,000. San Francisco. Architect, Joseph Cohen, 45 Kearny St., S. F. Owner, Louis Friedman. The building will contain three stores on the first floor and 36 rooms above. There will be some structural steel used. The interior trim will be of pine. There will be running water in all rooms. The exterior of the building will be faced with cement plaster. The plans are complete and the architect is taking figures on the work.

Apartment House—6 story and base, reinforced concrete, \$45,000. San Francisco. Architects, Rightt & Headman, Phelan Bldg., S. F. Owner, Dr. Crowley. The building has been mentioned here before when the architects first started the working drawings. There will be in the neighborhood of seventy rooms in the house arranged in two and three room suites with connecting baths. There will be steam heat, wall beds and elevator service. The exterior of the building will be faced with cement plaster. The plans are complete and figures are being taken. Bids will close next week.

Hotel—3 story and base, reinforced concrete, \$30,000. San Francisco. Architect, David Coleman, Metropolitan Bank Bldg., S. F. Owner, M. Fisher, Pacific Bldg. The work has been mentioned here before when the plans were first started. There will be steam heat and elevator service. The building covers a small lot in the Fifty Year District. The owner is a well known builder and the work will be done under his personal direction. He is now purchasing all supplies. The exterior will be faced with cement plaster.

Flats—3 story and base, frame, \$3,000. San Francisco. Architect, none. Owner, C. Grunig, 1469 46th Ave., S. F. The building has been arranged for three flats of four and five rooms each and baths. The interior trim will be of pine throughout. There will be gas grates. The exterior will be covered with rustic. The plans are complete and in the hands of the owner and the work will be done by Day Labor.

Residence—3 story and base, frame, \$5,000. San Francisco. Architects, Milwain Bros., Delger Block, Oakland. Owner, J. W. Marshall. The dwelling will contain eight rooms and baths. The interior trim will be of pine and hardwood. The floors will be of oak. There will be tile used in the baths and kitchen. There will be furnace heat and open fire places. The exterior of the dwelling will be covered with shingles. The plans are complete and figures are being taken.

Steel Work for Pumping Plant—Cost not stated. San Francisco. City Engineer Marsden Manson, 1404 David Hewes Bldg., S. F. Owners City and County of San Francisco. The plans for this work have been completed and placed in the hands of the Board of Public Works for figures. Bids will be opened for the same on February 21st.

Plums—3 story and base, frame, \$7,000. San Francisco. Architect, C. Pantoni, 4 Columbus Ave., S. F. Owner, Antonio Calderoni. The building will contain six flats of four and five rooms each and baths. There will be pine trim throughout. There will be gas grates and tile mantels. The exterior of the building will be covered with shiplap and brick veneer. The plans are complete and figures are now being taken by the architect.

Plums—2 story and base, frame, \$1,000. San Francisco. Architect, none. Owner, Patrick McDonald, 1649 Treat Ave., S. F. The building will cover an area of 28.50 feet and will contain two flats of five and six rooms each with baths. The interior trim will be of pine with some hardwood floors. There will be open fire places and attractive mantels. The exterior of the building will be covered with cement plaster on metal lath. The plans are in the hands of the owner and the work will be done by Day Labor.

Factory—1 story and base, reinforced concrete, \$30,000. Honolulu, Hawaii. Architects, Engineering Department Hawaiian Pineapple Co., Market St., S. F. Owners Hawaiian Pineapple Co. Plans are complete for one of the largest cannery buildings yet erected in the islands. There will be considerable structural steel, plumbing and electric work. The exterior will be faced with cement plaster. The plans are now in the hands of contractors for figures. A general contract will be awarded.

Contracts Awarded.

Stores and Offices—3 story and base. Class A construction, \$250,000. San Francisco. Architect, George William Kelham, Crocker Bldg., S. F. Owners, Sharon Estate Contractors, Lange & Ferguson, Monahock Bldg., S. F. Contract price not stated.

OAKLAND AND ALAMEDA COUNTY.

Flint—2 story and base, frame, \$5,000. Oakland, Cal. Architect, none. Owner, Mrs. F. B. Menon, 103 East 22nd St., Oakland. The building will contain three modern five-room flats with baths. There will be open fire places and tile mantels. The interior trim will be of pine with some oak floors. The exterior of the building will be covered with shingle and cement plaster. The plans are in the hands of the owner who is taking figures on the construction.

Flint—2 story and base, frame, \$5,000. Oakland, Cal. Architect, A. W. Smith, 1001 Broadway, Oakland. Owner, Wilbur D. Whit. The building will contain four modern five-room flats. The interior trim will be of pine with

oak floors in the principal rooms. There will be open fire places and tile or brick mantels. The exterior of the building will be covered with cement plaster on metal lath. The plans are complete and the architect is taking figures.

Residence—2 story and base, frame, \$6,000. Oakland, Cal. Architects, Reed & Meyer, Oakland Bank of Savings, Oakland. Owner, D. W. Clark. The dwelling has been designed for an eight-room house with all modern conveniences. The interior trim will be of pine and hardwoods. There will be two baths finished in tile. The floors will be of oak. There will be furnace heat and open fire places. The mantels will be of brick or tile. The exterior of the building will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Residence—2 story and base, frame, \$1,500 each. Oakland, Cal. Architect, Carl A. Henne, Oak Bldg., S. P. Owner, N. Truebeck. The dwelling will contain eight rooms and baths. The interior finish will be largely of pine and redwood. The floors in the principal rooms will be of oak. There will be furnace heat and open fire places. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$5,000. Oakland, Cal. Architect, none. Owners, Taylor Bros. & Co., 1235 Broadway, Oakland. The dwelling will contain eight rooms and bath. The interior trim will be of pine with oak floors in the principal rooms. There will be furnace heat and open fire places. The sum of \$150 has been allowed for mantels. There will be tile in the bath and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are in the hands of the owners and the work will be done by Day Labor.

Bungalow—1½ story and base, \$2,000. Oakland, Cal. Architects, Wild & Schaefer, Albany Bldg., Oakland. Owner, Guy W. Smith. The dwelling has been designed for a seven-room house with furnace heat and open fire places. The interior trim will be of pine and oak with oak floors throughout. The mantels will be of brick. Tile will be used in the bath and kitchen. The exterior of the dwelling will be covered with rustic. The plans are complete and figures are being taken.

Bungalow—1 story and base, frame, \$2,500. Oakland, Cal. Architect, none. Owner, John A. Bischoff, 1353 Channing Way, Berkeley. The dwelling has been designed for a five room house with bath. The interior trim will be of pine and redwood. There will be open fire places with tile or brick mantels. The floors of the principal rooms will be of oak. The exterior of the bungalow will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$1,000. Oakland, Cal. Architect, none. Owner, J. M. Wilson, Oakland. The dwelling will contain six rooms and bath. The interior finish will be of pine with some oak panels. There will be tile used in the bath room and kitchen. The floors will be of oak in

the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick. The exterior of the residence will be covered with rustic. The plans are in the hands of the owner and he is now taking figures on the work.

Residence—2 story and base, frame, \$6,000. Berkeley, Alameda Co., Cal. Architect, Noble Newson, 2919 Durant St., Berkeley. Owner, H. H. Glossner. The dwelling has been designed for an eight-room house with two bath rooms. The interior finish will be of pine, redwood and oak. There will be oak floors. There will be furnace heat and open fire places. The mantels will be of brick. There will be tile in the bath and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the architect is taking figures.

Residence—2 story and base, frame, \$1,000. Berkeley, Alameda Co., Cal. Architect, W. H. Ritchie, Jr., First National Bank Bldg., Berkeley. Owner, Mrs. Elgin Partridge. The dwelling will contain seven rooms and bath. The interior finish will be largely of pine with oak floors throughout the first story. There will be furnace heat and open fire places. The mantels will be of tile or brick. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the architect is taking figures.

Residence—2 story and base, frame, \$1,000. Oakland, Cal. Architect, none. Owner, H. N. Terrell, Oakland. The dwelling has been designed for an eight-room house with bath. The interior trim will be of pine throughout. The floors of the principal rooms will be of oak. There will be furnace heat and open fire places. The mantels will be of tile. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Bungalow—1 story and base, frame, \$2,500. Oakland, Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, C. M. Johnson. The dwelling will contain six rooms and bath. The interior finish will be of pine with oak floors throughout. There will be open fire places with attractive tile or brick mantels. The exterior of the bungalow will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Bungalow—1 story and base, frame, \$2,000. Berkeley, Alameda Co., Cal. Architect, none. Owner, Charles A. Warner, 2315 9th St., Berkeley. The dwelling will contain five rooms and bath. The interior trim will be of pine throughout. There will be open fire places with tile mantels. The exterior of the dwelling will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Depot—2 story and base, brick. Cost not stated. Berkeley, Alameda Co., Cal. Architect, Washington J. Miller, 45 Kearny St., S. P. Owners, San Francisco, Oakland and San Jose R. R. Co. The plans for a new passenger station have been completed and figures will be called for shortly. The new building is the first of several new stations which are to be erected by the company at various points along their line. There will be two waiting rooms, steam heat and elec-

tric work. The exterior will be faced with pressed brick.

Hampden—1 story and base, frame, \$2,000. Berkeley, Alameda Co. Cal. Architect none. Owner, J. T. Owen, 1936 Cedar St., Berkeley. The dwelling has been designed for a five-room house. There will be one bath. The interior trim will be of pine and redwood. There will be oak floors and open fire places. The mantels will be of tile. The exterior of the dwelling will be covered with shingles. The plans are complete and the work will be done by Day Labor.

SACRAMENTO, STOCKTON & NORTHERN CALIFORNIA.

Stores and Rooms—2 story and base, frame, \$10,000. Stockton, San Joaquin Co., Cal. Architect, Walter King, Elks' Bldg., Stockton. Owner, A. L. Branch. The building has been designed for

stores on the first floor and living apartments above. The exterior will be covered with rustic. The plans are being prepared.

School—2 story and base, brick, \$6,000. Oak Grove, Sacramento Co., Cal. Architects, Stone & Wright Stockton and Oakland. Owners, Oak Grove School District.

The Architects have recently been commissioned to prepare the plans for this work. The building will contain a number of class rooms, assembly hall, principal's office and a library besides the usual rooms found in buildings of this class. There will be steam heat and a vacuum cleaning plant. The exterior of the building will be faced with pressed brick. Working drawings are being prepared.

Apartment House—2 story and base, frame, \$10,000. Stockton, San Joaquin Co., Cal. Architect, Ralph P. Morrell, Yosemite Theatre Bldg., Stockton. Owners, P. W. Owen and R. C. Coeman. The building will contain eight apartments and baths. The trim will be of pine. There will be some oak floors. The exterior will be covered with rustic, shingles and cement plaster. The architect is now preparing the plans.

Flat—2 story and base, frame, \$5,500. Stockton, San Joaquin Co., Cal. Architect, Ralph P. Morrell, Yosemite Theatre Bldg., Stockton. Owner, Mr. Lester. The building has been designed to contain two modern flats of five and six rooms each. There will be baths and modern plumbing. There will be open fire places and tile mantels. Tile will also be used in the bath rooms and in the kitchens. There will be a vacuum cleaning system. The exterior of the building will be covered with rustic. The architect is preparing the plans.

Wharf Shed—Concrete and frame, \$10,000. Stockton, San Joaquin Co., Cal. Architect, William B. Thomas, Main and Commercial streets, Stockton. Owners, City of Stockton. The building will have a brick and reinforced concrete foundation and exterior walls covered with corrugated iron. The roof will also be of corrugated iron. The plans are being prepared.

Bungalow—1 story and base, frame, \$2,000. Lodi, San Joaquin Co., Cal. Architect, O. A. Schroeder, 601 Elm St., Lodi. Owner, R. Spooner. The dwelling will contain five rooms and bath. The interior trim will be of pine throughout. There will be tile used in the bath. There will be open fire places and tile mantels. The exterior of the dwelling will be covered with rustic. The plans are now out for figures.

Hotel—2 story and base, frame, \$5,000. Stockton, San Joaquin Co., Cal. Architect, R. P. Morrell, Yosemite Theatre Bldg., Stockton. Owner, A. Eickoff. The building is being designed for a small rooming house. The interior finish will be of pine throughout. There will be running water in each room. The exterior of the building will be covered with rustic. The plans are being prepared.

Bungalow—1 story and base, frame, \$2,000. Lodi, San Joaquin Co., Cal. Architect, O. A. Schroeder, 601 Elm St., Lodi. Owner, G. Mundy. The dwelling has been designed for a five-room house with bath. The interior trim will be of pine and redwood. There will be open fire places with tile man-

FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA.

Church—2 story and base, brick, \$20,000. Tulare, Tulare Co., Cal. Architects, Walker & Vawter, Wright and Callender Bldg., L. A. Owners, Tulare Methodist Church. The architects have just been commissioned to prepare these plans and no details of the construction can be given at this time. The building will be faced with pressed brick and there will probably be a central heating system. Working drawings are now being made.

Labor Hall—3 story and base, brick and steel. Cost not stated. Bakersfield, Kern Co., Cal. Architect, E. Demus, Bakersfield. Owners, Carpenters' Hall Association. The building will be 50x100 feet. The first floor will contain stores, the second a large

tels. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are being prepared.

Lodge Hall and Stores—3 story and base, brick and steel, \$10,000. Eureka, Humboldt Co., Cal. Architects, Ackerman & Reese, Eureka. Owners, Eureka Aerle of Eagles. The building has been designed for stores on the first floor and lodge halls, banquet rooms, offices and living apartments on the upper floors. There will be steam heat and elevator service. The exterior will be faced with pressed brick. The plans have been approved by the building committee and working drawings are now being prepared.

Residence—2 story and base, frame, \$12,000. Stockton, San Joaquin Co., Cal. Architect, C. B. Brown, Yosemite Theatre Bldg., Stockton. Owner, L. Rankenheimer. The dwelling will contain ten rooms and baths. The interior trim will be of pine and some hardwoods. There will be hardwood floors on the first story. There will be furnace heat or perhaps a hot water system. The living room, library and dining room will have open fire places and tile or brick mantels. There will be tile used in the bath and kitchen. The exterior of the dwelling will be covered with rustic. The plans are complete and figures are being taken.

LOS ANGELES AND SOUTH-EARN CALIFORNIA.

Apartment House—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Hudson & Mansell, Stimson Bldg., L. A. Owner, Mrs. Mary K. Regan. The building will be 42x93 feet and will be arranged for four stores on the first floor and 24 apartments of two and three rooms each on the two upper floors. There will be steam heat and wall beds. The exterior will be faced with pressed brick. The architects are preparing the plans.

Residence—2 story and base, frame. Cost not stated. Los Angeles, Cal. Architect, J. Mortyn Haenke, Central Bldg., L. A. Owner, C. B. Eyer. The dwelling has been designed for a fourteen-room house with four bath rooms. The interior trim will be of hardwood throughout. The floors will be of oak. There will be furnace heat and four open fire places. The mantels will be of tile. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and figures will be taken at once.

Apartment House—2 story and base, brick. Cost not stated. Inglewood, Los Angeles Co., Cal. Architects, Dennis & Farwell, Pay Bldg., L. A. The building will be 50x100 feet. The first floor will be occupied by stores. The upper floor will contain seven apartments with wall beds. There will be steam heat. The exterior will be faced with pressed brick. The plans are complete and figures will be taken at once.

Cold Storage Building—5 story and base, steel and reinforced concrete, \$50,000. Los Angeles, Cal. Architects, Mayberry & Parker, Pacific Electric Bldg., L. A. Owners, Cudahy Packing Co. The engineering plans for this work have been prepared in the company's offices. The architectural work is now being done in Los Angeles. The building will be absolutely fire proof throughout. The exterior will be faced with terra cotta. There will be no

interior finish. The cost given is understood to be exclusive of the cold storage apparatus. Figures will be called for shortly.

Apartment House—3 story and base, frame. Cost not stated. Los Angeles, Cal. Architect, Carl Escherich, 1753 West 16th St., L. A. Owner, John E. Fisher. The building will be 41x135 and will contain sixty rooms arranged on 24 apartments with connecting baths. There will be steam heat and wall beds. The exterior of the building will be covered with rustic. The plans will be complete within the next week.

Bank—1 story and base, reinforced concrete, \$10,000. Chula Vista, San Diego Co., Cal. Architect, Dell W. Harris, Timken Bldg., San Diego. Owner, People's State Bank. The building will be 25x115 feet. There will be a large public room with marble floor. The banking offices will be finished in mahogany and marble. There will be coin and safe deposit vaults. The exterior of the building will be faced with cement plaster. The architect is preparing the plans.

Residence—2 story and base, brick and frame. Cost not stated. Los Angeles, Cal. Architect, Frank T. Keger, Jr., Consolidated Realty Bldg., L. A. Owner, Mrs. T. F. Mahar. The dwelling will contain 13 rooms and 3 baths. The interior trim will be of oak and birch with hardwood floors throughout. There will be furnace heat and open fire places. The mantels will be of brick. The exterior of shingles and ruffled brick veneer. The plans are complete.

Apartment House—3 story and base, brick and steel, \$10,000. San Diego, Cal. Architect, Dell W. Harris, Timken Bldg., San Diego. Owner, Mrs. Sarah E. Sinks. The building will be 100x100 feet. The first floor will contain six stores. The upper floors will be arranged for hotel and apartment house rooms. There will be steam heat and elevator service. The exterior of the building will be faced with pressed brick. The plans are being prepared.

Church Additions—Brick and concrete. Cost not stated. Anaheim, Orange Co., Cal. Architect, A. C. Martin, Higgins Bldg., L. A. Owners, Catholic Church of Anaheim. The addition will be 70x55 feet. The architecture will correspond with the present building. There will be a central heating plant. The architect is now preparing the working drawings.

Factory—1 and 2 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architect, Scott Quintin, Story Bldg., L. A. Owners, American Can Co. The building will be 137x150 feet. One-half of the structure will be two stories and the other half one story in height. The exterior will be faced with pressed brick. The plans are complete and the contract for the foundation work has been awarded to H. Whitaker. The other parts of the work will be let at once.

Garage—1 story and base, brick, \$10,000. Los Angeles Cal. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owner, Grover T. Garland. The building will be 60x120 feet. There will be a cement floor covering the entire area. The exterior will be faced with pressed brick. The architects are now completing the working drawings.

Hotel—2 story and base, frame. Cost not stated. Cucamonga, San Bernardino Co., Cal. Architect, Scott Quintin, Story Bldg., L. A. Owner, Carl Forrester. The building will contain twenty rooms, dining room, kitchen and public lobby. The exterior of the building will be covered with rustic and ship-lap. The plans are being prepared.

Bank—1 story and base, brick and steel, \$20,000. San Pedro, Los Angeles Co., Cal. Architects, Edelman & Earnest, Panchard Bldg., L. A. Owner, State Bank of San Pedro. The officials have decided not to erect a four-story structure as was first planned and have instructed the architects to prepare plans for a one-story monumental building. The building will be for the exclusive use of the bank. The plans will be ready for figures within two or three weeks.

Garage—2 story and base, frame. Cost not stated. Los Angeles, Cal. Architect, Fred Eren, Broadway Central Bldg., L. A. Owner, J. E. Landen. The building has been designed for a private garage and will cover an area of 29x225 feet. There will be a cement floor, gasoline tank and pumps. The second floor will be arranged for living quarters. The exterior of the building will be covered with rustic. The architect is preparing plans.

Apartment House—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Garrett & Bixby, Currier Bldg., L. A. Owner, J. B. Solomon. The building will contain sixty rooms arranged in two and three room apartments with connecting baths. There will be steam heat, wall beds, vacuum cleaning system and pine and hardwood trim. The exterior of the building will be finished in pressed brick. There will be tile and marble used in the entrance. The plans are being prepared.

Residence—2 story and base, frame. Cost not stated. Los Angeles, Cal. Architect, J. Mortyn Haenke, Central Bldg., L. A. Owner, B. Scott. The dwelling has been arranged for sixteen rooms and five baths. The interior trim will be of pine, hardwood and white enamel. The baths will be finished in tile. There will be furnace heat and open fire places. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Reservoir—Reinforced concrete. Cost not stated. Orange, Orange Co., Cal. Engineers, Mayberry & Parker, Pacific Electric Bldg., L. A. Owners, City of Orange. The reservoir will complete a part of the city's fire protection system. The reservoir will have a capacity of 600,000 gallons, and will be 50 feet in diameter and 12½ feet deep. There will be a reinforced concrete roof. Plans are being prepared.

Water System Improvements—\$25,000. San Bernardino, San Bernardino Co., Cal. City Engineer San Bernardino. Owners, City of San Bernardino. The work will be in the nature of extensions to the present system. Plans are already complete.

Stores and Hall—2 story and base, brick. Cost not stated. Cucamonga, San Bernardino Co., Cal. Architect, Scott Quintin, Story Bldg., L. A. Owner, John Klingner. The building will be 35x75 feet. The first floor will be arranged for stores. There will be a large hall on the upper floor. The ex-

terior of the building will be faced with cement plaster. The plans are being prepared.

Stores—2 story and base, brick. Cost not stated. Redondo, Los Angeles Co., Cal. Architect, L. B. Pemberton, Auditorium Bldg., L. A. Owner, P. C. Kilday. The building will be 25x120 and will contain stores on the first floor and offices and living rooms above. The exterior of the building will be faced with pressed brick. The plans are complete and figures are to be taken at once.

Hotel and Stores—3 story and base, brick, \$10,000. San Bernardino, San Bernardino Co., Cal. Architect, F. T. Harris, Redlands National Bank Bldg., Redlands. Owner, Jos. Bucher. The building will be 75x100 feet and has been designed for six stores on the ground floor and 100 hotel rooms on the upper two floors. There will be steam heat. The exterior of the building will be faced with pressed brick. The architect is preparing the plans.

Residence—2 story and base, frame. Cost not stated. Los Angeles, Cal. Architect, J. Martyn Haenke, Central Bldg., L. A. Owner, C. B. Eyer. The dwelling has been designed for a 14 room house with 4 bath rooms. The interior trim will be of hardwood throughout. The floors will be of oak. There will be furnace heat and four open fire places. The mantels will be of tile. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and figures will be taken at once.

Hotel—8 story and base. Class A construction. Cost not stated. Los Angeles, Cal. Architect, W. J. Saunders, Wright & Callender Bldg., L. A. Owner, F. W. Braun. This work has been mentioned here before when the plans were first started. The architect has completed the working drawings and has awarded a contract for the removal of the present frame buildings. There will be a total of 184 guest rooms and 125 baths on the upper seven stories. The exterior of the building will be faced with cement plaster and terra cotta. The architect is now taking figures on the general construction.

Residence—2 story and base, frame. Cost not stated. Los Angeles, Cal. Architect, J. Martyn Haenke, Central Bldg., L. A. Owner, B. Scott. The dwelling has been arranged for 16 rooms and 5 baths. The interior trim will be of pine, hardwood and white enamel. The baths will be finished in tile. There will be furnace heat and open fire places. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Contracts Awarded.

Court House—2 story and base, reinforced concrete and stone. Cost not stated. Ventura, Ventura Co., Cal. Architect, A. C. Martin, Higgins Bldg., L. A. Owners, Ventura County. The following sub-contracts have been awarded on this building by the Los Angeles Planning Mill Co., who have the general contract. Granite to S. Allison & Son; terra cotta to Gladling-McBean & Co.; and copper work to the California Corncise Works.

Grain Elevator—Concrete and frame, \$36,000. San Pedro, Los Angeles Co., Cal. Architect, none. Owners, Globe Grain and Milling Co. Contractors,

Richards-Neustadt Construction Co., Wright and Callender Bldg., L. A. Contract price, \$30,000.

Garage—1 story and base, brick, \$10,000. Los Angeles, Cal. Architects Morgan, Walls & Morgan, Story Bldg., L. A. Owner, Mrs. Helen A. Sanborn. Contractors, Alta Planning Mill Co., 830 McGarry St., L. A. Contract price, \$10,000.

Hotel—1 story and base, brick and steel, \$50,000. Los Angeles, Cal. Architect, none. Owner, V. C. Lewis. Contractor, Frank Jean, 530 South Flower St., L. A. Contract price, \$50,000.

SEATTLE AND WASHINGTON.

Bridge—Steel and concrete. Cost not stated. Randle, Wash. Engineer, County Surveyor, Chualar. Owners, Lewis County. The plans for the steel work on this bridge have been completed and the Board of Supervisors will open figures for the same on February 20th. Contracts for the other parts of the work will be let shortly.

Church—1 story and base, frame, \$10,000. College Place, Wash. Architect, Guy C. Manning, Portland. Owners, Seventh Day Adventists. The building will be 80x92 feet and will have a seating capacity of 700 people. There will be steam heating and a system of ventilation. The exterior of the building will be covered with rustic. The plans are complete and figures are being taken by the architect.

Association Building—8 story and base. Class A construction, \$400,000. Seattle, Wash., Architects, Gould & Champney, American Bank Bldg., Seattle. Owners, Young Women's Christian Association. This work has been mentioned here before when the architects were first selected to prepare the plans. The working drawings will be completed within the next two months. Bids will be called for about April 1st.

School—1 story and base, reinforced concrete, \$15,000. Sultan, Wash. Architect, Harlan Thomas, Eilers Bldg., Seattle. Owners, Sultan School District. The plans for this building, which has been designed for a grammar school, are complete but the architect reports that bids will not be taken until an irregularity in the bond issue has been corrected.

Store—2 story and base, reinforced concrete, \$20,000. Seattle, Wash. Architect, J. P. Dean, 1551 West 50th St., Seattle. Owner, L. S. Kerschner. The building will be 42x60 and will contain several stores on the first floor and storage space above. The exterior of the building will be faced with cement plaster. The plans are complete and figures are being taken.

Depot—2 story and base, brick and steel, \$55,000. Aberdeen, Wash. Architectural Department Oregon-Washington Railroad and Navigation Company, Tacoma. Owners, Oregon-Washington Railroad and Navigation Co. It was stated in the building and Industrial News last week that the plans for this building were complete and that figures were being taken. This statement was a mistake as the plans will not be completed until February 15th, and bids will be called for shortly after.

PORTLAND AND OREGON.

Apartment House—3 story and base,

cost not stated, \$75,000. Portland, Ore. Architects, McNaughton & Raymond, Portland. Owner, M. Olson. The building will cover an area of one-half acre and will be arranged for two floors of four room apartments. There will be steam heat, elevator service and a vacuum cleaning plant. The exterior of the building will be faced with pressed brick. The architects have just been commissioned to prepare the plans and further details cannot be given at this time.

Harbor Work—Building and docks, \$150,000. Engineer's name not given. Tillamook, Ore. Owners, State of Oregon. The State Supreme Court has declared Tillamook a legal harbor and the Port Commission is to proceed at once with the issuing of the bonds for harbor improvements.

Hotel—1 story and base, brick and steel. Cost not stated. Portland, Ore. Architects, McNaughton & Raymond, Portland. Owners, Crown Trust Co. This work has been mentioned here before when the announcement was first made of the selection of the architects. The contract for the foundation work has been awarded to J. C. Winters & Co., and plans are complete for the balance of the work. Bids will be taken on the general construction at once.

Parish School—1 story and base, brick and steel. Cost not stated. Portland, Ore. Architects, Jacobberger & Smith, Portland. Owners, Holy Cross Parish. The building will be 63x77 and will contain four class rooms on the first floor and a large auditorium in the basement. The walls will be heavy enough to carry additional stories if needed. There will be steam heat. The exterior will be faced with pressed brick. The architects are preparing the plans.

Library—1 story and base, brick, \$12,500. Albany, Ore. Architects, Tobey & Mills, Portland. Owners, Albany Library Association. This work was mentioned here when the architects were first commissioned to prepare plans for the building. The working drawings have been forwarded to Carnegie and have met with its approval. The architects are now completing the working drawings and bids will be called for at once. The building will have a steam heating system. There will be an auditorium, public rooms, reading rooms and rack rooms. The exterior of the building will be faced with glinker brick.

Schools—2, 2 story and base, brick, \$25,000 each. Salem, Ore. Architect, Fred A. Legge, Portland. Owners, City of Salem. The buildings will be identical in design, and will each cover an area of 63x93 feet. There will be eight class rooms. A plenum heating system will be used. The exteriors will be faced with pressed brick. Bids for the construction will be opened on February 17th.

Apartment House—1 story and base, brick and steel, \$80,000. Portland, Ore. Architect, W. H. Cowen, Portland. Owner, M. E. Lee. The building will be 50x140 feet. There will be 56 apartments of three rooms each and baths. There will be steam heat and elevator service. A vacuum cleaning plant will be installed. The exterior of the building will be faced with pressed brick and terra cotta. The plans are complete and figures are being taken. Bids will close April 1st.

Editorial Comment.

The report is published that a new railroad company has been incorporated to build an air line road from San Francisco to Los Angeles, the distance being 450 miles. As usual there are a lot of rumors about as to who may be backing the enterprise, reports having it that Hill and Gould and other magnates of the railroad world are behind the enterprise.

A great number of railroads have been incorporated to build within this State during the last year or two. Likewise a vast number of power companies have been given charters to develop power from the streams of the mountains. These seem to be becoming absorbed into a few great companies which dominate the field. Whether or not the railroad companies will be absorbed into one great system remains to be seen. In any case the State is the winner for roads and means of traffic of any sort means development. A new era has dawned for California. No longer does the Southern Pacific Company dominate absolutely the traffic by land and sea and the line of ships that now travel between here and the south have established a real competition.

The construction of another and shorter railroad will establish a shorter time card to the south. This means cheaper rates and shorter time of traffic, all of which aids the producer and cheapens the cost of living.

One by one the legal objections and the lawsuits over the water rights in the Hetch-Hetchy district are being swept away and there at last seems to be reasonable hope that the present generation will see a water supply secured from the Sierra. The latest thing is the decision of the department of Agriculture that defeats any claim that the National Park Electric Power Company has to water rights in Cherry Creek where these lands are situated or whatever right he had was lately purchased from William Ham Hall.

The city proposes to use the same water for power purposes that the private company proposes to use and Secretary Wilson decided that the City has the paramount right. In addition to saying that the Power Company had abandoned whatever rights it had to the water the Secretary goes on to say that the city proposes to use the power for public uses. And in commenting on this fact says:

"These uses are, in my judgment, so essential to the main purpose of furnishing the city with an adequate supply of water that they partake of the same character. I, therefore, conclude

and recommend that they be considered as standing upon the same plane with such use of the water. Of course, the Federal Government does not undertake to control the uses of water; but if the use of water for municipal purposes is a higher use than that for creating electric power for commercial sale, it follows that the use of the land which the Government does control and own is also of a higher use, because the land must necessarily be utilized as a means of conveyance of the water."

This is a sound view and the one that should have been taken a long time ago. Under such a statement the protest of the so-called "nature lovers" and the other thousand and one objections would have had little standing.

Oregon is talking of spending forty million dollars in road building. That is a good way to spend money and one that brings greater returns than any other perhaps. With the protracted rains of Oregon there is urgent need of permanent road construction.

The eighteen million dollar bond issue of California has been an example for the western states. Inasmuch as these bond issues cover a long period of time and require interest payments a plan has been suggested to raise one million dollars a year by taxation. This would not all right but whether or not it would work to get funds available to use in the best way is a question to be determined. The tax might be levied and the proceeds invested for five or ten years and then sufficient headway would be gained for planning and completing public highways on an extensive scale.

Dr. Sun Yat Sen has resigned the presidency of the Chinese republic to Yuan Shi Kai, the premier of the dynasty of Manchus now deposed. This action would seem to settle the fate of political affairs in China and make the success of the republic assured. For some years to come there must still be a ruling class in China for the great mass of the people are absolutely ignorant and unteachably poor. The "strong man" is now at the head of affairs and he has the united support of all the intelligent classes. The revolution has been accomplished quickly and with comparatively little loss of life. It is one of the strangest spectacles in political history that have been enacted within the last year, the change of the oldest nation on the earth into a republic, the overturning of the philosophy and traditions of untold centuries. It is the old social machinery being replaced by modern improvements, adapted to present needs and capable of keeping step with the times.

Concrete Construction Considered Scientifically In Its Relation To Building Materials.

Abstract of a Paper Read Before the Montreal Builders' Exchange by E. Brown, Professor of Applied Mechanics and Hydraulics at McGill University.

Concrete construction has many followers, ranging from the rabid enthusiast who will assert that it is the thing for almost every kind of building, to the more modest and perhaps more effective advocate who realizes at one and the same time its advantages and its limitations. There was a day when it had its opponents, but its record of actual achievement in the past few years has established its claim to being one of the principal forms of construction at the present day. The opponents have become friendly critics or even converts, and I imagine there are now very few who are so blind as to ignore the facts of the situation. There are, however, some who seem to think that a designer in reinforced concrete is drawing on his imagination (shall I say) to a much greater extent than a designer of steel work. Some steel designers, at all events until recently, would almost give you the impression that their work was calculated to such a nicety as compared with that possible in reinforced concrete work, that the latter by comparison had very little claims to exactitude. I am not here advocating one form of construction as against another nor any particular type of either form, but I do say that if we set down the exact conditions of the problem confronting a designer in these rival forms of construction, there is not much to choose in the matter of exactitude. I am not here concerned with any considerations of actual construction. We can have good and bad work in any kind of construction. I am speaking of the conditions of design. The problem is always this, no matter whether it is a design for a huge bridge or for an office building or store.

(1) To make some estimate more or less exact, of the forces which will probably be brought to bear on the structure considered. Floor loads, wind loads, etc.

(2) By some theory, more or less exact, to determine the forces which the above estimated loads will produce in the component parts of the structure.

(3) From our knowledge, more or less exact, of the physical characteristics of the materials employed in the various parts of the structure, to so proportion those parts that they may withstand successfully for an indefinite period, the forces which are estimated to come upon them.

After that it is necessary to have the work carried out in strict conformity to the designs by efficient labor, under the best supervision. In the matter of the first two processes above, designers of steel work and of reinforced concrete work are on the same footing.

As regards the third point, our knowledge of the properties of concrete, and of the effects of changes in its composition is now of considerable extent, and I do not think that a conservative designer need have any anxiety in regard to the behaviour of his structure if reasonable, sound principles

are lived up to. Steel designers, in recent years, have come to consider much more carefully than heretofore, the probable effects of eccentricity in some of their details, and in this, reinforced concrete designers, can learn from them. In the particular case of columns consisting of angle and other sections latticed together, we are only in the early stage of finding out how they really act. I could show you experimentally the actual conditions of stress in such a member as a tie bar made up of two angles, back to back, connected by a plate at their ends, and separated at intervals by distance pieces—one of the commonest forms of construction imaginable. Experiments of a very interesting character are being made by one of our staff at McGill on this matter, and all I need say to emphasize the point I am now making, is that any steel designer who thinks that even such a simple built up member acts as one piece has another "think" coming to him. No, gentlemen, we are all engaged in "estimating" something. Formulae expressing the complex action which is going on in either a steel structure, or in one of reinforced concrete may be forthcoming, but of this I have grave doubts, and even if they are, we shall, for practical purposes, make such modifications of them as will eliminate from them any complexities which are due to effects which are either of small magnitude, or which can be allowed for in a simpler manner.

A survey of the development of our professional work generally will show that whenever and in so far as it has been possible to exalt any branch of that work to the rank of a science, the progress has been due to the gradual but certain development of a few fundamental ideas. Our great electrical industries of today have developed by applications of the great principle discovered by Faraday when he found that a closed coil of wire moved across a magnetic field generated an electric current. And while few of our branches of engineering science are as scientifically exact as the one I have just mentioned, in all or most of them there is such a mass of practical experience and of results of tests to couple with some simple fundamental ideas expressing actual conditions but inadequately, that we can go ahead with our designs with complete confidence in the results. The science of hydraulics is an instance of this place of the work of our profession.

So that while I for one would not be prepared to admit that the steel designer can figure the actualities to a much finer degree of accuracy than the reinforced concrete designer, I do think that the latter depends to a tremendous extent on the honesty and sincerity with which his plans are carried out. Structural mild steel is manufactured in our steel mills under reasonably uniform conditions, and speaking broadly of course, an engineer buys it in the open market with considerable confidence in its physical properties. If

he knows that he can figure safely on 16,000 pounds per square inch in tension, and that if he is cutting his sections as keenly as possible, he may reduce them by say 10 per cent and increase his unit stress accordingly. The properties of his material are not altered. He is not taking an unknown risk.

But in concrete construction the material by which the compressive forces in the structure are carried is made and laid on the spot and is liable to such variations in mixing as may occur in practice quite apart from any variations in quality due to change of composition. If we reduce cement by say, 10 per cent, use an inferior sand, or change the nature of the aggregate without definite knowledge of the effects of this change—if we do all or any of these things we are altering to an uncertain extent the physical properties of our concrete. We are taking an unknown risk, and one which to my mind is entirely different in character from that involved in a cut of a definite per cent on steel sections. We know from experience that certain expectations in the properties of mild steel will almost certainly be lived up to, and it is in the power of those engaged in reinforced concrete work to produce a concrete equally uniform and reliable. A successful designer has always in mind certain possible differences between assumed and actual conditions, and it is in a proper realization of such differences, and in the capacity of the designer to appreciate the extent of their influence, that reliance must be placed. If for any reason he may fear that the concrete will only stand a compression stress of 400 pounds per square inch instead of perhaps 600, his opportunities to make both a successful and economical design are at once limited. Poor concrete is much the same weight per cubic foot as good concrete, and if the concrete is poor, and only capable of safely carrying a small compressive stress, more is required to sustain a given compression load, and hence, more steel is required to carry the extra dead load necessitated. But we can get uniformly high grade concrete if proper care is exercised. At the same time the calculation of a designer can be relieved of little avail if the actual work is not carried out in a thoroughly conscientious manner.

Any theory of reinforced beams starts from the assumption that the several layers of the beam are lengthened or shortened by an amount proportional to their distance from the plane separating tension and compression areas. Careful experiment shows while this is not rigidly true in all cases, it is conformed to with reasonable accuracy in most cases. Accepting it as true we shall get different results for the bending moment which the beam can carry according as we assume.

(a) Variable modulus following assigned law.

(b) Modulus uniform during loading.

(c) Different values for the uniform modulus.

Assume a rectangular beam 10 inches deep with, say, one per cent reinforcement. Then, taking average concrete, one should find that under working loads the distance from the steel line to the point in the section where the resulting compression acts is about

Eight feet six inches if we assume variable modulus with the definite law of variation.

Eight feet eight inches if we assume uniform modulus of 3x10 pounds per square inch.

The safe bending moment on the beam is the product of the allowable stress in the steel and one or other of the above numbers. It is evident that the difference shown in the safe bending moments is only some 2½ per cent, and any attempt to figure to such a degree of supposed accuracy is foolish. In practice, may easily be displaced by an amount affecting strength calculations far more than do these different theories.

These figures neglect concrete tension and their differences indicate the extent to which different methods of calculation affect the broad features of design. Under the specifications adopted by the American Society for testing materials, the American Society of Civil Engineers, and the Maintenance of Ways Association, all concrete is now taken to have the same modulus, a great change since the days when under concrete, rock concrete, gravel concrete, etc., were all supposed to have different moduli, and following a different law of variation as the load increased. It has been amply demonstrated that all these were unnecessary refinements and the standard specifications recently drawn up have swept them away. Similar simple specifications were drawn up earlier by the Royal Institute of British Architects, and I would urge the adoption of some such standards here. I do not believe you have any such standards at present. When in Toronto a couple of years ago attending the Cement Association Congress I learned that their building by-laws prohibited a designer from figuring any continuity in reinforced concrete floor systems, and I believe that foolish and unjustifiable prohibition still stands. It seems to me to eliminate competition to a great extent and to leave a clear field for the steel construction. Here, in Montreal, I do not think you are hampered by any by-laws on such matters—it is more of a go as you please. You are more familiar than I can be with the results of this, but unless something miraculous happens, the usual result of such conditions is to find one design called for according to one set of specific ions, another design according to another set, and so on. Now, even if all these varied specifications are beyond reasonable criticism—which is questionable—it would it not be better to have a working standard? Our railroad bridges and highway bridges are built under standard specifications, and it seems to me desirable that there should be some standards in this matter also. I am sure it would be advantageous to have something of the kind, whether the architect prepares the plans in his own office or has them prepared independently by an outside firm.

Firms desiring news on special classes of buildings such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

San Francisco.—Apartment house, 6 story and base, Class A construction, \$100,000. Architect, Houghton Sawyer. Shore Bldg., S. F. Owners, Clay M. Frances, M. William Green and Usula Green Sawyer. This building has been mentioned here before. The plans have been out for figures but have been called in and will be revised. The construction was to have been of the Class C type but will be made Class A. There will be a complete steel frame, steam heat, wall beds, elevator service and some metal trim. The exterior walls will be faced with pressed brick and terra cotta. Plans will be out for figures again shortly.

San Francisco.—Apartment house, 5 story and base, steel and brick, \$100,000. Architect, W. G. Hind, Humboldt Bank Bldg., S. F. Owner, Dr. Redmond W. Payne. The building will be arranged for stores on the first floor and 10 apartments of two and three rooms each on the upper four floors. There will be two stories. There will be steam heat and elevator service and wall beds. The exterior of the building will be faced with pressed brick. The plans are complete and figures are being taken.

San Francisco.—Apartment house, 3 story and base, frame, \$13,000. Architect, S. W. Sexton, Chronicle Bldg., S. F. Owner, Charles Rothchild. The building will contain fourteen apartments of two and three rooms each with connecting baths. There will be steam heat, gas grates and elevator service. The interior trim will be of pine and hardwood. The exterior of the building will be covered with shiplap and rustic. The plans are complete and figures are being taken.

San Francisco.—Apartment house, 3 story and base, frame, \$22,000. Architect, Charles J. Rousseau, Phelan Bldg., S. F. Owner, Carrie B. Rousseau. The building will be 21x73 feet and will contain twelve apartments of two and three rooms each with connecting baths. The interior trim will be of pine and hardwoods. There will be steam heat and wall beds. The entrance will be finished in marble and tile. The exterior of the building will be covered with shiplap and brick veneer. The plans are out for figures.

San Francisco.—Apartment house, 2 story and base, frame, \$10,000. Architect, none. Owners, C. J. and W. J. Keenan, 300 Webster St., S. F. The building will be 27x50 feet and will contain twelve small apartments with connecting baths. There will be gas grates and wall beds. The interior trim will be of pine. The exterior of the building will be covered with brick veneer and shiplap. The plans are complete and the work will be done by Day Labor.

San Francisco.—Apartment house, 5 story and base, reinforced concrete, \$55,000. Architect, W. S. Rhodes, 3272 16th St., S. F. Owner, Mrs. Julia Croan. This work was mentioned here before when the plans were first prepared. The plans are now complete and the architect is taking figures on

the work. The building will contain in the neighborhood of thirty-five apartments all with connecting baths. There will be steam heat, elevator service, mail and garbage chutes and other modern improvements. The exterior of the building will be faced with stone and cement plaster.

Sacramento, Sacramento Co., Cal.—Apartment house, 2 story and base, frame, \$7,000. Architect, James T. Nabrett, Sacramento. Owner, H. G. Trumpler. The building will contain a number of modern apartments with connecting baths. There will be a warm air heating system. The interior will be handsomely finished. There will be a terrazzo entrance. The exterior of the building will be covered with cement plaster on metal lath. The plans are complete and a contract is to be awarded at once.

Sacramento, Sacramento Co., Cal.—Apartment house, 1 story and base, brick, \$30,000. Architect, James T. Nabrett, Sacramento. Owner, W. D. McKoy, Sacramento. The building will be arranged for two and three room apartments with private baths. There will be steam heat and elevator service. The interior trim will be of pine. The exterior of the building will be faced with pressed brick and cement plaster. The plans are in the hands of the owner and he is now taking figures on the work.

Oakland, Cal.—Apartment house, 3 story and base, frame, \$10,000. Architect, none. Owners, Sommarstrom Bros., 1055 16th St., Oakland. The building will contain eighteen rooms arranged in two and three room suites with connecting baths. There will be wall beds. The interior trim will be of pine and redwood. The exterior of the building will be covered with cement plaster on metal lath. The plans are complete and in the hands of the owners who will do the work under the Day Labor system.

Los Angeles, Cal.—Apartment house, 5 story and base, brick and steel, Cost not stated. Architects, Train & Williams, Exchange Bldg., L. A. Owner, P. L. Auten. The building will cover an area of 145x115 and will contain 227 rooms arranged in 50 suites of two, three and four rooms each. There will be private baths, steam heat, elevator service, wall beds, vacuum cleaning system and birch interior trim. The plans have been out for figures and are now being revised. New figures will be called for shortly.

Los Angeles, Cal.—Apartment house, 3 story and base, frame, \$25,000. Architect, O. M. Warner, 739 Temple St., L. A. Owner, A. Gilman. The building will contain 58 rooms divided into two and three room apartments with private baths. There will be steam heat and wall beds. The interior trim will be of pine throughout. The exterior of the building will be faced with cement plaster on metal lath. The architect is now preparing the working drawings.

Ocean Park, Los Angeles Co., Cal.—Apartment house, 2 story and base, brick. Cost not stated. Architect, B. M. Morris, Grosse Bldg., L. A. Owner, John Stein. The building will be 45x

116 feet and will contain 60 rooms arranged in two and three room suites with connecting baths. There will be steam heat, elevator service and wall beds. The exterior of the building will be faced with artificial stone. The plans are being prepared.

Los Angeles, Cal.—Apartment house, 3 story and base, brick. Cost not stated. Architect, A. L. Haley. Higgins Bldg., L. A. Owner, R. L. Horton. The building will be 40x115 feet and will contain 27 apartments arranged in suites of two and three rooms each with private baths. There will be steam heat, elevator service and wall beds. The exterior of the building will be faced with blue pressed brick. The plans are complete and figures will be taken at once.

Los Angeles, Cal.—Apartments and stores, 3 story and base, brick. Cost not stated. Architect, W. J. Blieneser. Laughlin Bldg., L. A. Owner, Max Hoffman. The building will be 50x125 feet. The first floor will contain two store rooms. The upper floors will be divided into 28 two-room apartments. There will be steam heat and wall beds. The exterior will be faced with pressed brick. The plans are complete and the work will probably be done by Jay Labor.

Los Angeles, Cal.—Apartments and stores, 2 story and base, brick. Cost not stated. Architect, F. M. Tyler. Union Trust Bldg., L. A. Owner, J. D. Womer. The building will be 57x50 feet. There will be three stories on the first floor and 10 rooms on the upper floor. There will be private baths. The exterior of the building will be faced with pressed brick. The plans are complete and figures will be taken at once.

Portland, Ore.—Apartment house, 3 story and base, brick. Cost not stated. Architects, Claussen & Claussen. Portland Owner's name withheld. The building will be 50x100 feet and will contain 28 suites of two and three rooms each and baths. There will be steam heat and wall beds. The exterior of the building will be faced with pressed brick. The architects are now preparing the working drawings and more complete details will be given later.

Portland, Ore.—Apartment house, 4 story and base, brick and steel. Cost not stated. Architects, MacNaughton & Raymond. Portland Owner, M. Olsen. The building will be 100x100 feet. There will be 46 apartments arranged in suites of two and three rooms each with connecting baths. There will be steam heat, automatic elevators, vacuum cleaning system, disappearing beds and refrigerating plant. The interior trim will be of oak and hardwood floors will be used throughout. The exterior of the building will be faced with red pressed brick, trimmed with sandstone. The plans will be completed within a few weeks and figures will be called.

Seattle, Wash.—Apartment house, 3 story and base, brick, \$75,000. Architects, Quandt & Creutzler. Haight Bldg., Seattle. Owner, John L. Lang. The building will contain 15 apartments arranged in suites of five rooms each. There will be steam heat. The exterior of the building will be faced with pressed brick. The plans are complete and a contract will be let at once.

Seattle, Wash.—Apartment house, 4 story and base, brick and steel, \$60,-

000. Architects, Quandt & Creutzler. Haight Bldg., Seattle. Owner, Charles, Schell. The building will be 110x98 feet. There will be in the neighborhood of 80 rooms arranged in small apartments of from two to four rooms each with connecting baths. There will be steam heat, elevator service, wall beds and a vacuum cleaning system. The exterior of the building will be faced with pressed brick. The plans will be completed within a few days and figures will be called.

Contracts Awarded.

San Francisco.—Apartment house, 5 story and base, reinforced concrete. Cost not stated. Architects, Welsh & Carey. Metropolis Bank Bldg., S. F. Owners, Scheby Estate. Contractor, William Martin, 1012 Buchanan St., S. F. Contract price not stated.

San Francisco.—Apartment house, 3 story and base, frame, \$22,000. Architect, Theo. W. Lenzen. Humboldt Bank Bldg., S. F. Owners, Braum Realty Co. Contractor's name not given. The general contract has been awarded, but figures are now being taken for the electric work, plumbing, light fixtures, shades and wall beds.

Los Angeles, Cal.—Apartment house, 3 story and base, frame, \$22,000. Architect, Clyde Cheney. Story Bldg., L. A. Owners, Mr. and Mrs. O'Keefe. Contractors Architectural Construction Co., Story Bldg., L. A. Contract price, \$22,000.

Los Angeles, Cal.—Apartment house, 3 story and base, brick. Cost not stated. Architect, E. J. Borgmeyer. Stimson Bldg., L. A. Owner, Dr. J. T. Miller. Contractor, M. Hurwitz. 212 North Main St., L. A. Contract price not stated.

Los Angeles, Cal.—Apartment house, 3 story and base, frame, \$26,000. Architects, Lawrence B. Burk Co., 142 South Spring St., L. A. Owner, Lawrence B. Burk Contractors. Lawrence B. Burk Co., 142 South Spring St., L. A. Contract price, \$26,000.

BANKS.

Philomath, Ore.—Bank, 1 story and base, reinforced concrete. Cost not stated. Architects, R. N. Hockenberry & Co., Portland. Owners, Philomath State Bank. The building will be 22x50 feet. There will be steam heat. There will be safety and coin vaults. The exterior of the building will be faced with cement plaster. The plans are being prepared and figures will be taken shortly.

BRIDGES, DAMS AND HARBOR WORK.

San Bernardino, San Bernardino Co., Cal.—Bridge, concrete and wood. Cost not stated. Engineer, County Surveyor, San Bernardino. Owners, San Bernardino Co. The bridge will be 295 feet long and will rest on concrete piers. The plans are complete and bids will be opened by the Board of Supervisors on April 8th. Charles Post is Clerk of the Board.

Contracts Awarded.

Spokane, Wash.—Bridges, steel and concrete. Cost not stated. Engineer, County Surveyor, Spokane. Owners, Spokane County. Contractors, No. 4 on L'yle Road across Spokane River; No. 10 on Latah Creek road across Latah Creek; No. 13 on Roberts road across Latah Creek, all to Omaha

Structural Works, Omaha, Neb., at \$15,500; \$5,600; \$5,400 respectively. Bridge No. 126 on Boston Road across Peone Creek to Portland Bridge & Iron Co., of Portland, at \$26,588.

CHURCHES.

Santa Barbara, Santa Barbara Co., Cal.—Church, brick and steel construction, \$40,000. Architects, Frohman & Martin, Slavin Bldg., Pasadena. Owners, Trinity Church of Santa Barbara. The building will be designed in the Gothic style. There will be considerable structural steel used. There will be a main auditorium, Sunday school rooms, study and parlors. There will be a central system of heating and ventilation. The exterior of the building will be faced with pressed brick. The plans are complete and bids will be taken next week. Separate bids will be called for the cement and artificial stone work, heating system and for all other work outside of these contracts. Bids will be taken by J. F. Flagg, Secretary of the Building Committee, Anacapa St., Santa Barbara.

Oroville, Butte Co., Cal.—Church, 2 story and base, brick, \$20,000. Architect, C. H. Russell. Humboldt Bank Bldg., S. F. Owners, Congregational Church of Oroville. This work has been mentioned here a number of time before when the plans were first started. Revised plans have been made and bids will be opened on February 23th. There will be a central heating system. The exterior of the building will be faced with pressed brick. Plans may be secured from the architect or from the Pastor of the church.

San Francisco.—Mission house, 3 story and base, brick, \$12,000. Architect, H. H. Meyers. Kohl Bldg., S. F. Owners, Chinese Mission of San Francisco. The building will be erected in the Chinese district and will contain school rooms, living apartments and meeting rooms. The exterior of the building will be faced with pressed brick. The plans are complete and figures are being taken.

Orange, Orange Co., Cal.—Church, brick and frame construction, \$15,000. Architect, H. M. Patterson. O. T. Johnson Bldg., L. A. Owners, Presbyterian Church of Orange. The building will have a seating capacity of 500 people in the main auditorium. There will be Sunday school rooms and a pastor's study. There will be furnace heat. The exterior of the building will be covered with brick veneer and shingles. The plans are being prepared.

San Diego, Cal.—Church, 2 story and tower, brick and steel. Cost not stated. Architects, W. S. Hebbard & Carleton W. Winslow. Grant Bldg., San Diego. Owners, All Saints Church. The building has been designed in the Spanish Colonial style. There will be a main auditorium with a seating capacity of 450. Sunday school rooms, choir loft and study. The exterior of the building will be faced with pressed brick. The architects have completed the plans and are taking figures on the work.

Contracts Awarded.

Los Angeles, Cal.—Church, brick and frame construction, \$40,000. Architect, Elmar Meinardus, Higgins Bldg., L. A. Owners, German Lutheran Evangelical Trinity Church of Los Angeles. Contractor, Herman Haase,

1831 New England Ave., L. A. Contract price, \$37,000.

FACTORIES & WAREHOUSES.

Los Angeles, Cal.—Warehouse, 3 story and base, reinforced concrete. Cost not given. Architect, A. C. Martin, Higgins Bldg., L. A. Owner, C. C. Colyear. The building will be 56x250 feet and has been designed for an eight-story structure, three stories and a mezzanine floor to be erected at once. The first floor will be for the offices of the owner and the upper floors will be divided into small compartments about 5x10 feet. The construction will be fireproof throughout. The exterior of the building will be faced with cement plaster. The architect is completing the working drawings.

Berkeley, Alameda Co., Cal.—Warehouse, 1 story, frame, \$2,000. Architect, none. Owners, Monarch Oil Refining Co., 60 California St., S. F. The building will contain two store rooms. The exterior will be covered with corrugated iron. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Stables, 2 story and base, reinforced concrete, \$14,000. Architect, none. Owners, Excelsior Laundry Co., 1540 West St., Oakland. The building will be used as a stable for the company's teams and a storage place. The interior will not be finished. The exterior will be faced with cement plaster. The plans are in the hands of the owners and the work will be done by Day Labor.

Los Angeles, Cal.—Hay storage building, 3 story and base, reinforced concrete. Cost not stated. Architect, S. Tilden. Norton, Title Insurance Bldg., L. A. Owners, Pioneer Truck and Transfer Co. The building will cover an area of 100x120 feet. The first and second floors will be arranged for the accommodation of teams. The third floor for the storage of hay. The building will be nearly fire proof. The exterior will be faced with cement plaster. The architect is preparing the plans.

Hentton, Wash.—Factory building, 1 and 2 story frame and brick, \$250,000. Engineer, James Anderson, 77 West Washington St., Seattle. Owners, Pacific Coast Fuel Co. The buildings will be a part of a large plant which is to be erected at this site. The plans for the work are now underway and figures will be called for as soon as the working drawings can be completed.

Contracts Awarded.

Bakersfield, Kern Co., Cal.—Factory, 1 story and base, brick and frame. Cost not stated. Architect, Orville L. Clark, Brower Bldg., Bakersfield. Owners, Bakersfield United Brick and Tile Co. Contractor, Fred L. Gribble, 912 Truxton St., Bakersfield. Contract price not stated.

FIRE HOUSES.

Pasadena, Los Angeles Co., Cal.—Fire house, 2 story and base, brick. Cost not stated. Architect, C. F. Driscoll, Chamber of Commerce Bldg., Pasadena. Owners, City of Pasadena. The plans for a two-story building arranged for fire house quarters on the first floor and dormitories on the second floor have been completed and figures will be opened on

February 27th for the construction of the building. The exterior will be faced with cement plaster. Plans may be had from either the architect or from City Clerk Herman Dyer.

FLATS.

San Francisco—Flats, 2 story and base, frame, \$4,600. Architect, none. Owner, Antonio Filippio, 17 Georgia St., S. F. The building has been designed for a store on the first floor and living apartments on the second. The interior trim will be of pine throughout. The exterior will be covered with shiplap and rustic. The plans are in the hands of the owner and the work will be done by Day Labor.

San Francisco—Flats, 3 story and base, frame, \$8,000. Architect, none. Owner, J. C. Kirby, 3923 18th St., S. F. The building will be 25x70 and has been designed for six flats of five and six rooms each and baths. The interior trim will be of pine throughout. There will be some oak floors. There will be gas grates. The exterior of the building will be covered with brick veneer and shiplap. The plans are in the hands of the owner and the work will be done by Day Labor.

Oakland, Cal.—Flats, 3 story and base, frame, \$5,000. Architect, none. Owner, Mrs. Fabiano, 807 26th St., Oakland. The building has been designed for two flats of five rooms and bath each. The interior trim will be of pine with some oak floors. There will be open fire places with the mantels. The exterior of the building will be covered with shingles. The plans are complete and in the hands of the owner who is taking figures on the work.

San Francisco—Flats, 2 story and base, frame, \$5,000. Architect, W. S. Rhodes, 3372 16th St., S. F. Owner, Michael O'Connor, 733 Page St., S. F. The building will contain three flats of five and six rooms each and baths. The interior finish will be of pine and elm. There will be open fire places. The mantels will be of tile. The exterior of the building will be covered with brick veneer and shiplap. The plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Flats, 2 story and base, frame, \$5,000. Architect, none. Owner, A. W. Wachtel, Otis and Ashby Sts., Berkeley. The building has been arranged for a store on the first floor and flats above. The interior trim of the second floor will be of pine and redwood. There will be open fire places. The store will have plate glass windows. The exterior of the building will be covered with rustic. The plans are in the hands of the owner and the work will be done by Day Labor.

Oakland, Cal.—Flats, 2 story and base, frame, \$2,000. Architect, none. Owner, L. L. Nichols, 1672 11th Ave., Oakland. The building has been arranged for two modern flats of five and six rooms each with baths. The interior trim will be of pine and redwood. There will be open fire places with the mantels. The exterior of the building will be covered with rustic and shiplap. The plans are complete and the owner will do the work under the Day Labor system.

Oakland, Cal.—Flats, 2 story and base, frame, \$5,000. Architect, none. Owner, Mr. Silverstein, 666 4th St., Oakland. There will be two flats, one of nine rooms and bath and the other

considerably smaller. The interior trim will be of pine throughout. There will be open fire places. The exterior of the building will be covered with cement plaster on metal lath. The plans are in the hands of the owner who is now taking figures on the work.

Berkeley, Alameda Co., Cal.—Flats, 2 story and base, frame, \$4,000. Architect, none. Owner, Lyman H. Congdon, 2235 Fulton St., Berkeley. This work will consist of the alteration of a two-story and basement frame residence into modern flats of five and six rooms each with baths. The interior trim will be of pine. There will be gas grates. The exterior of the building will be covered with rustic. The plans are in the hands of the owner and figures are being taken.

Bellingham, Wash.—Hotel annex, 4 story and base, brick and steel, \$200,000. Architect, Alfred Bretlung, Walker Bldg., Seattle. Owner, Leopold Schmitt. This work will be in addition to the completion of the two-story addition to the Byron Hotel which is to cost \$50,000, and for which the same architect has completed plans. The new annex will contain 200 guest rooms and a large number of baths. The equipment will be modern throughout. Plans will be completed as rapidly as possible.

GARAGES.

San Francisco—Garage and lofts, 3 story and base, reinforced concrete, \$60,000. Architects, O'Brien & Werner, Piscoff Bldg., S. F. Owner, S. G. Sworffuer, 2010 Broadway. This work has been mentioned here before when the architects had plans out for an apartment building on this site. The plans have now been changed and a modern garage and lofts will be erected. There will be cement floors and elevator service. The exterior of the building will be faced with cement plaster. The plans are now complete and figures are being taken.

Los Angeles, Cal.—Garage 1 story and base, brick. Cost not stated. Architects, R. B. Young & Son, Lankershim Bldg., L. A. Owner, H. W. Petteborn. The building will be 50x155 feet. There will be a cement floor over the entire area. The exterior will be faced with pressed brick. The architects have completed the working drawings and a contract will be let at once.

GOVERNMENT WORK AND SUPPLIES.

The contract for the erection of a brick dormitory and the installation of a central steam heating and power plant at the Rapid City Indian School, S. Dak., has been awarded to Lawrence A. Kythe & J. J. Hutton, Rapid City, S. Dak., at \$19,400 and Jos. T. Garland & Thos. B. Hashy, Rapid City, S. Dak., at \$9,874, respectively.

As previously reported in these columns, it has been recommended that the contract for commanding officers' quarters, barrack building, and two double sets junior officers' quarters for the U. S. Marine Corps to be constructed at Pearl Harbor, H. T., be awarded to the Spalding Construction Co., of Portland, Ore. The Secretary of the Navy, however, has not yet taken final action regarding the award for this work.

The contract for the construction of

the U. S. public building at Walla Walla, Wash., has been awarded to Dieter & Wenzel Construction Co., Wichita, Kan., at \$119,484; less for alternate E, simplified exterior treatment of second-story windows, \$340; net amount, \$119,144.

HALLS & SOCIETY BLDGS.

Santa Monica, Los Angeles Co., Cal.—Lodge hall, 2 story and base, brick. Cost not stated. Architect, H. C. Hollwedel, 952 4th St., Santa Monica. Owned by Santa Monica Masonic Temple Association. The building will be designed for stores on the first floor and a large lodge hall, offices and auditorium on the second floor. The exterior of the building will be faced with pressed brick or cement plaster. The architect has just been commissioned to prepare the plans and further details of the construction will be given later.

Berkeley, Alameda Co., Cal.—Lodge hall, 2 story and base, frame, \$4,000. Architect, none. Owners, Ladies Auxiliary, Order of Owls, 1729 California St., Berkeley. The building will contain a large meeting room, parlors and kitchen. There will be pine finish and some hardwood floors. The exterior of the building will be covered with rustic. The plans are complete and figures are being taken.

Seattle, Wash.—Club house, 1, 2 or 3 story and base, brick. Cost not stated. Architects, Howells & Stokes, Henry Bldg., Seattle. Owners, College Club. The architects have been instructed to prepare plans for this building, the cost of which has not been determined upon. The architects will submit three sketches to the Board of Directors and a selection will be made next week. Further details will be given then.

Walla Walla, Wash.—Lodge hall, 5 story and base, brick and steel, \$75,000. Associated architects, Carl L. Linde, Portland and Richard H. Ullrich, Pacific Block, Seattle. Owners, Walla Walla Elks' Hall Association. The building will be 60x110 feet. There will be considerable structural steel, with exterior walls of brick, faced with pressed brick trimmed with terra cotta. There will be a hot water heating system, elevators and a vacuum cleaning system. The first floor will be occupied by stores. There will be living apartments on the second floor, lodge rooms, auditorium, banquet hall, smoking and reading rooms and offices on the other floors. The architects have just been selected to prepare the plans and working drawings will be completed as rapidly as possible.

HOSPITALS.

Seattle, Wash.—Hospital, 3 story and base, brick, \$30,000. Architect, J. S. Cote, Haight Bldg., Seattle. Owner, Dr. E. M. Rinkler. The building will cover an area of 66x120 feet. There will be steam heat and other modern improvements. The exterior of the building will be faced with pressed brick. The plans for this work are complete and the architect is now taking figures on the construction.

HOTELS.

San Francisco—Hotel, 5 story and base, reinforced concrete, \$100,000.

Architects, Riglietti & Headman, Pheasant Bldg., S. F. Owners, George B. and Eva Metcalf. This work has been mentioned here before when the architects first started the plans. The working drawings have been completed and figures are now being taken. The plans provide for a building containing in the neighborhood of 120 rooms, a large percentage of which will have connecting baths. There will be steam heat and elevator service. The exterior of the building will be faced with terra cotta. There will be a vacuum cleaning system, sidewalk lights, doors and lifts. A contract will be awarded this week.

San Francisco—Hotel and stores, 4 story and base, brick and steel, \$30,000. Architect, E. P. Antonovich, 333 Kearny St., S. F. Owner's name withheld. The building will be arranged for stores on the first floor and single rooms above. There will be steam heat and elevator service. The exterior of the building will be faced with cement plaster. The architect has completed the plans and is now taking figures on the construction.

San Francisco—Hotel, 4 story and base, brick and frame, \$40,000. Architect, J. C. Plugger, Crocker Bldg., S. F. Owner, Robert, McMillan. The building will have exterior walls of brick, faced with pressed brick and cement plaster. The interior will be arranged for single rooms. There will be eight public bath rooms. There will be steam heat and elevator service. The plans are complete and figures will be called for shortly.

San Francisco—Hotel, 6 story and base, reinforced concrete, \$45,000. Architect, M. Matanovich, Pacific Bldg., S. F. Owner's name withheld. The building will be arranged for single rooms with connecting baths. The interior trim will be of pine. There will be steam heat and elevator service. The exterior will be faced with cement plaster. The plans are complete and the architect is now taking figures on the construction.

San Francisco—Hotel, 3 story and base, brick, \$20,000. Architect, Alfred Henry Jacobs, French Bank Bldg., S. F. Owner, Bert Schlessinger. The building will be erected on Pine street. There will be stores on the first floor and single rooms above. There will be several baths. There will be elevator service and steam heat. The exterior of the building will be faced with cement plaster. The plans are complete and figures are being taken by the architect.

San Francisco—Hotel and stores, 4 story and base, brick and steel, \$30,000. Architect, Albert Plassis, Flood Bldg., S. F. Owner, Mrs. Paul Husson. The building has been arranged for stores on the first floor and for a rooming house on the upper three floors. There will be steam heat and elevator service. The exterior walls of the building will be faced with pressed brick. The plans are complete and the architect is taking figures on the construction.

Modesto, Stanislaus Co., Cal.—Hotel and stores, 2 story and base, brick. Cost not stated. Architect, Ralph P. Morrell, Yosemite Theatre Bldg., Stockton. Owner, Mr. Auburn, Modesto. The building will contain stores on the first floor and hotel rooms above. The stores will have large plate glass windows. There will be several bath rooms. The interior trim will be of pine. terior of the building will be faced with pressed brick. The architect is now preparing the plans.

Modesto, Stanislaus Co., Cal.—Hotel, 4 story and base, brick and steel, \$80,000. Architect, Ralph P. Morrell, Yosemite Theatre Bldg., Stockton. Owner's name withheld. The building will be 140x140 and will contain in the neighborhood of 90 rooms and a large number of baths. There will be steam heat and elevator service. The exterior of the building will be faced with glazed pressed brick. The plans are as yet, in the preliminary stage, and further details of the construction will be given later.

LIBRARY.

Oroville, Butte Co., Cal.—Library, 1 story and base, reinforced concrete, \$12,000. Architect, W. H. Weeks, 251 Kearny St., S. F. Owners, City of Oroville. This work was mentioned here when the architect's plans were first selected. The working drawings have been approved and figures are now being called for. Bids for the construction will be opened within three weeks. There will be a warm air system of heating. The exterior of the building will be faced with cement plaster.

POST OFFICES.

Del Rio, Texas—Postoffice, 3 story and base, brick and stone. Cost not stated. Architect, James Knox Taylor, Washington, D. C. Owners, U. S. Government. The building is of three stories, basement and unfinished attic. It has a ground area of approximately 5,300 square feet, non-fireproof construction throughout, stone, terra cotta and stucco facing, wood cornice and copper gutters, tile and tin roof. Drawings and specifications may be obtained from the custodian of site at Del Rio, Tex., or at this office, at the discretion of the Supervising Architect.

Santa Barbara, Santa Barbara Co., Cal.—Post office, 2 story and base, brick and steel, \$110,000. Architect, James Knox Taylor, Washington, D. C. Owner, U. S. Government. Contractor, A. W. Anson, Albuquerque, N. M. The contractor who submitted the lowest figure on this work, \$104,000, now claims that his bid should have read \$114,000. It is understood that the Government will retain the contractor's check of \$2,000 unless he signs a contract.

RAILROAD CONSTRUCTION—STATIONS AND EQUIPMENT.

Contracts Awarded.

Tacoma to Terminal, Wash.—Railroad construction, \$5,000,000. Engineers Northern Pacific Co. Owners, Northern Pacific Co. Contractors, Porter Bros., Portland. Contract price not stated.

Tacoma to Terminal, Wash.—Tunnel work, \$500,000. Engineers, Northern Pacific Co. Owners, Northern Pacific Co. Contractor, Nelson Bennett, 505 South C St., Seattle. Contract price, \$500,000.

RESIDENCES.

San Francisco—Bungalow, 1½ story and base, frame, \$2,500. Architect, none. Owner, S. Malmberg, 2994 23rd St., S. F. The dwelling will contain seven rooms and bath. The interior trim will be of pine and redwood with some hardwood floors. There will be open fire places and tile or brick mantels. The exterior of the building will be covered with rustic. The plans are complete and the work will be done by Day Labor.

San Francisco—Residence, 2 story and base, frame, \$4,000. Architect, none. Owner, O. E. Anderson, 2374 Fulton St., S. F. The dwelling has been designed for an eight-room house with bath. There will be furnace heat and open fire places. The interior finish will be of pine with oak floors in the principal rooms. There will be open fire places with tile or brick mantels. The exterior of the dwelling will be covered with cement plaster on metal lath and with klinker brick veneer. The plans are complete and the work will be done by Day Labor.

San Francisco—Residence, 2 story and base, frame, \$3,000. Architect, Frank Holland, 100 Haight St., S. F. Owner, P. Connell, 246 Diamond St., S. F. The dwelling has been designed to contain six rooms and bath. The interior trim will be of pine and redwood with oak floors in the principal rooms. There will be open fire places and attractive tile mantels. There will be tile used in the kitchen and bath. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

San Francisco—Residence, 1½, 2 story and base, frame, \$3,000. Architect, none. Owners, Pockman & Co., Mills Bldg., S. F. The dwellings will be erected for sale and are to be built on 13th avenue near Bathua street. Each house will contain seven rooms and bath. The interior trim will be largely of pine. There will be some hardwood floors. There will be open fire places and brick or tile mantels. Tile and terrazzo will be used. The exteriors will be of brick veneer, shingles and cement plaster on metal lath. The plans are in the hands of the owners and the work will be done by Day Labor.

Oakland, Cal.—Residence, 2 story and base, frame, \$5,000. Architect, none. Owner, C. A. Heinje, 879 Arlington Ave., Oakland. The dwelling will contain eight rooms and bath. The interior trim will be of pine and hardwood with some hardwood floors. There will be furnace heat and open fire places. The mantels will be of brick or tile. Tile will be used in the baths and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the owner is taking figures.

Berkeley, Alameda Co., Cal.—Bungalow, 1 story and base, frame, \$2,000. Architect, none. Owner, Walter Williams, 2335 Eunice St., Berkeley. The dwelling will contain six rooms and bath. The interior trim will be of pine throughout. There will be some hardwood floors. There will be open fire places and attractive tile mantels. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Bungalow, 1 story and base, frame, \$2,500. Architect, A. W. Smith, 1004 Broadway, Oakland. Owner, Charles Grass. The dwelling will contain six rooms and bath. The interior trim will be of pine with some hardwood floors. There will be furnace heat and open fire places. The mantels will be of brick. There will be tile used in the bath and kitchen. The exterior of the dwelling will be covered with rustic. The plans are complete and figures are being taken.

Berkeley, Alameda Co., Cal.—Bungalow, 1 story and base, frame, \$2,000. Architect, none. Owner, J. Rendahl, 2255 McKelley Ave., Berkeley. The dwelling will contain five rooms and bath. The interior trim will be of pine throughout. There will be some oak floors. There will be open fire places and tile or brick mantels. The exterior of the bungalow will be covered with shingles. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Residence, 2 story and base, frame, \$5,000. Architect, none. Owner, B. W. Reed, 1271 Harrison St., Oakland. The interior trim has been designed for an eight-room house with bath. The interior trim will be of pine and hardwood with oak floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the bath and kitchen. The exterior of the building will be covered with cement plaster on metal lath. The plans are in the hands of the owner and he is taking figures on the work.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, \$6,000. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, John M. Fay. The dwelling will contain in the neighborhood of ten rooms and bath. The interior finish will be of hardwoods. There will be hardwood floors throughout. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the baths and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. The architect is now preparing the plans.

San Francisco—Residence, 2 story and base, frame, \$2,500. Architect, none. Owner, George Chandler, 412 Kirkham St., S. F. The dwelling has been designed for a seven-room house with bath. The interior finish will be of pine with some hardwood floors. There will be open fire places with tile or brick mantels. The exterior of the dwelling will be covered with shiplap. The plans are complete and the work will be done by Day Labor.

San Francisco—Residence alterations, 2 story and base, frame, \$2,000. Architect, John Davis Hatch, Humboldt Bank Bldg., S. F. Owner's name withheld. The work will include interior plastering, electric work and new plumbing. There will also be considerable exterior alteration. The plans are complete and figures are being taken.

Berkeley, Alameda Co., Cal.—Bungalow, 1 story and base, frame, \$4,000. Architect, none. Owner, John B. Ward, 2838 Fulton St., Berkeley. The dwelling has been designed for a six-room house with bath. The interior trim will be of pine with hardwood floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be

used in the kitchen and bath. The exterior of the dwelling will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, \$3,500. Architect, none. Owner, Mrs. P. C. Mills, 261 62nd St., Oakland. The dwelling has been designed for a six-room house with bath. The interior finish will be of pine throughout. There will be open fire places with attractive tile or brick mantels. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are in the hands of the owner and he is now taking figures on the work.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, \$7,000. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, C. A. Ferrin. The dwelling will contain ten rooms and bath. The interior finish will be largely of hardwoods. The floors throughout the first story will be of oak. There will be furnace heat and open fire places. The mantels will be of brick or tile. Tile will be used in the baths and in the kitchen. There will be hot water heaters. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are now being prepared.

Oakland, Cal.—Bungalows, 6, 1 story and base, frame, \$2,000 each. Architect, none. Owners, Realty Syndicate, Syndicate Bldg., Oakland. The dwellings will each contain four rooms and bath. The interior trim will be of pine throughout. There will be some oak floors. There will be open fire places and tile mantels. The exteriors will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Bungalow, 1½ story and base, frame, \$3,500. Architect, C. S. Schwartz, Vandye Bldg., Haywards. Owner, Miss C. C. Dravilo. The bungalow will contain six rooms and bath. The interior trim will be of pine and hardwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the bath room and kitchen. The exterior of the bungalow will be covered with shingles. The plans are complete and figures are being taken.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, \$4,000. Architect, A. Merrill Bowser, 1003½ Broadway, Oakland. Owner, W. J. Mortimer. The dwelling has been designed for an eight-room house with two baths. The interior trim will be of pine and redwood. There will be some hardwood floors. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the bath and kitchen. The exterior of the residence will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, \$10,000. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, John P. Connors. The building has been designed for a ten-room house with several baths. The interior finish will be largely of hardwoods and white enamel. There will be furnace heat and open fire places. The mantels will be of tile or brick,

There will be hardwood floors throughout. Tile will be used extensively. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are now being prepared.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, \$6,000. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, James M. Hunt. The dwelling has been designed for a nine-room house and will contain two baths. The interior trim will be of pine, hardwood and white enamel. There will be furnace heat and open fire places with attractive tile or brick mantels. The exterior of the dwelling will be covered with cement plaster on metal lath. The architect is now completing the working drawings.

Oakland, Cal.—Residence, 2 story and base, frame, \$6,000. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, A. A. Don. The dwelling will contain eight rooms and baths. There will be furnace heat and open fire places. The interior trim will be largely of pine and white enamel. There will be hardwood floors in the principal rooms. The mantels will be of brick or tile. Tile will be used in the bath and kitchen. The exterior of the residence will be covered with cement plaster on metal lath. The architect is completing the working drawings.

Oakland, Cal.—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, E. L. Gray, Oakland. The dwelling will contain seven rooms and bath. The interior finish will be pine throughout. There will be hardwood floors. There will be furnace heat and open fire places. The mantels will be of tile. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Residence, 2 story and base, frame, \$3,200. Architect, none. Owner, C. M. MacGregor, 460 13th St., Oakland. The dwelling will contain six rooms and bath. The interior finish will be of pine with hardwood floors. There will be furnace heat and open fire places. The mantels will be of brick. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are in the hands of the owner and the work will be done by Day Labor.

Oakland, Cal.—Bungalow, 1 story and base, frame, \$2,500. Architect, none. Owner, B. R. Dexter, 1606 Grove St., Oakland. The dwelling has been designed for a six-room house with bath. The interior trim will be of pine throughout. There will be some hardwood floors. There will be open fire places and tile mantels. The exterior of the dwelling will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Bungalow, 1 story and base, frame, \$2,000. Architect, Clyde H. Brewer, 1738 35th Ave., Oakland. Owner, William F. Neary. The dwelling will contain five rooms and bath. The interior trim will be of pine throughout. There will be open fire places with attractive tile or brick mantels. The exterior of the dwelling will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Residence, 2 story

and base, frame, \$3,000. Architect, none. Owner, J. A. Britt, Oakland. The dwelling will contain six rooms and bath. The interior trim will be of pine and white enamel. There will be oak floors. There will be open fire places and tile or brick mantels. The exterior of the dwelling will be covered with cement plaster. The plans are complete and the work will be done by Day Labor.

Richmond, Contra Costa Co., Cal.—Residence, 2 story and base, frame, \$5,000. Architect, A. W. Smith, 1004 Broadway, Oakland. Owner, O. Olsen. The dwelling has been designed for a six-room house with bath. The interior finish will be of pine with some hardwood floors. There will be open fire places with tile or brick mantels. The exterior of the residence will be covered with rustic. The architect has completed the plans and is now taking figures on the work.

The interior trim will be entirely of pine with some oak floors. There will be open fire places with attractive tile mantels. The exterior of the residence will be covered with rustic. The plans are complete and figures are being taken.

Los Angeles, Cal.—Residence, 2 story and base, brick and frame. Cost not stated. Architect, Frank T. Kerley, Consolidated Realty Bldg., L. A. Owner, Mrs. T. F. Mahar. The dwelling will contain 13 rooms and three baths. The style of architecture is to be Old English. The interior trim will be of birch and oak. There will be hardwood floors throughout. There will be furnace heat and open fire places. The mantels will be of tile and brick. Tile will be used in the bath rooms. The exterior of the residence will be covered with ruffled brick and shingles. The plans are being prepared.

Los Angeles, Cal.—Residence, 2 story attic and base, brick and steel, \$10,000. Architects, Knapp & Woodward, Consolidated Realty Bldg., L. A. Owner, J. J. Hagerty. The building will be 91x94 feet. The style is to be 15th Century Norman Gothic. There will be hardwood trim throughout. The floors will be of hardwood. There will be three baths and a plunge. There will be a hot water heating system and vacuum cleaning. The exterior of the dwelling will be faced with stone and pressed brick. There will be a garage and bowling alleys in the basement. The plans are nearly complete and the work will be done by Day Labor.

Contracts Awarded.

San Francisco—Residence, 2 story, attic and base. Class A construction, \$300,000. Architects, Bliss & Paville, Balboa Bldg., S. F. Owner, James L. Flood. Contractors, Mahony Bros., Jr., Crocker Bldg., S. F. Contract price not stated. Note: This work has been taken on the percentage basis. The contractors are now letting sub-contracts.

SCHOOLS.

San Francisco—School, 2 story and base, steel and brick. Cost not stated. Architects, Shea & Lofquist, Bank of Italy Bldg., S. F. Owners, Sisters

of the Presentation. A site at the northeast corner of Pacific and Mason streets has been secured for this building and plans have been prepared. The building will cover a large area and will contain a large number of class rooms, living quarters for the Sisters and offices. The plans are as yet in the preliminary stage and complete details of the building cannot be given at this time.

San Francisco—School foundation work, etc. Cost not stated. City Architect, Alfred I. Coffey, 1204 David Hewes Bldg., S. F. Owners, City and County of San Francisco. The plans for the foundation work, grading and shoring for the Academic Building of the Polytechnic High School group of buildings have been completed. Bids will be opened by the Board of Public Works on February 21st.

Nevada City, Nevada Co., Cal.—School, 2 story and base, reinforced concrete. Cost not stated. Architects, Parker & Kenyon, 244 Kearny St., S. F. Owners, Nevada City School District. This building was mentioned here some time ago when the architects were first commissioned to prepare the plans. There will be six class rooms, offices and library. There will be a steam heating system. The exterior of the building will be faced with cement plaster. The plans are complete and bids are being taken.

Los Angeles, Cal.—Schools, four new buildings. Cost not stated. Architects as follows. Owners, City of Los Angeles.

Frank L. Stiff, 715 Gross Bldg., is the architect for a four-room frame bungalow to be erected at Rose Hill. On account of the concrete work required by the contour of the lot, this building will cost about \$10,000.

Architect W. J. Blesner, 529 Laughlin Bldg., has prepared plans for an addition containing four class rooms and an auditorium to be built at the Thirtieth Street school. It will be of frame construction, 106x75 feet, and will cost \$15,000.

Train & Williams, 226 Exchange Bldg., have prepared plans for an eight-room addition to be built at the Thirty-sixth Street school. It will be of frame construction, 70x91 feet.

Julius Krause, 3035 Foster St., is the architect of a five-room frame addition to be built to the Fifty-second Street School.

C. A. Faithful has prepared plans for a four-room frame addition to be built at the Custer Street School.

Wilmington, Los Angeles Co., Cal.—School, 2 story and base, brick and steel, \$50,000. Architects, Allison & Allison, Union Trust Bldg., L. A. Owners, Wilmington School District. This work has been mentioned here before. The architects have completed the working drawings and figures are now being taken. The building will be 184x65 feet and is designed for a combination grammar and high school. There will be steam heat and a system of ventilation. The exterior will be faced with pressed brick.

Oakland, San Bernardino Co., Cal.—High School group. Cost not stated. Architects, Austin & Pennell, Wright and Callender Bldg., L. A. Owners, Chafey Union High School District. This work has been mentioned here before. The plans are complete and bids will be opened by the Board of School Trustees on March 9th. The

Official proposal calls for separate figures on fifteen different parts of the work. Plans may be had from the architects or from the Clerk of the Board of School Trustees.

Vancouver, Wash.—School, 2 story and base, brick and reinforced concrete, \$100,000. Architects, Stephen & Stephen, New York Bldg., Seattle Owners, Vancouver School District. The building will be designed for a High School and will contain, besides the usual rooms, an auditorium and offices for the principal and superintendent. There will be steam heat, vacuum cleaning and laboratories. The exterior of the building will be faced with pressed brick. The plans will be complete about March 20th.

Contracts Awarded.

Ontario, San Bernardino Co., Cal.—School, 2 story and base, brick, \$45,000. Architects, Austin & Pennell, Wright and Callender Bldg., L. A. Owners, City of Ontario. Contractor, S. W. Upton, Pasadena. Contract price, \$32,500, general construction only.

Ellensburg, Wash.—School, 2 story and base, reinforced concrete, \$50,000. Architects, Stephen & Stephen, New York Bldg., Seattle Owners, City of Ellensburg. Contractor, G. H. Rush, Le Grande, Ore. Contract price, \$43,687, general construction only.

STORES AND OFFICES.

San Francisco.—Stores and lofts, 4 story and base, brick and steel. Cost not stated. Architect, Herman Barth, 12 Geary St., S. F. Owner's name withheld. The building will be arranged for stores on the first floor and three large, light lofts on the upper floors. There will be freight elevators. The exterior wall of the building will be faced with pressed brick. The architect is now preparing the plans.

Oakland, Cal.—Stores, 1 story and base, brick. Cost not stated. Architect, C. W. Dickey, Oakland Bank of Savings, Oakland. Owner, Mr. McHenry. The building will have a frontage of 116 feet on Broadway and will contain six stores. There will be plate glass windows and metal store fronts. There will be cement floors and pine interior trim. The exterior of the building will be faced with pressed brick. The architect is now completing the working drawings.

Stockton, San Joaquin Co., Cal.—Stores and offices, brick and steel. Cost not stated. Architect, Walter King, Elks' Bldg., Stockton. Owner, Charles Belding Estate. The building will be 50x100. There will be a number of stores on the first floor and offices above. There will be steam heat, elevator service, mail chutes and vacuum cleaning system. The exterior of the building will be faced with pressed brick and terra cotta. The architect is now completing the working drawings and figures will be called for shortly.

Tracy, San Joaquin Co., Cal.—Stores and offices, 2 story and base, brick, \$35,000. Architect, W. H. Weeks, 251 Kearny St., S. F. Owner, William Schmidt. The building will cover a large area and will be arranged for several stores on the first floor and modern offices above. The interior trim will be of pine. The exterior walls will be faced with pressed brick. The plans are complete and figures are being taken.

Stockton, San Joaquin Co., Cal.—Stores and offices, 4 story and base, steel and brick. Cost not stated. Architect, Ralph P. Morrell, Yosemite Theatre Bldg., Stockton. Owner, S. Sanguenetti. The architect has just started the working drawings for a modern store and office building which is to be erected on one of the prominent corners of Stockton. There will be a steel frame with brick exterior walls, faced with pressed brick. There will be steam heat and elevator service. The plans are now being prepared and more complete details will be given in the course of a few weeks.

Los Angeles, Cal.—Stores, 1 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Dennis & Farwell, Fay Bldg., L. A. Owners, F. P. Fay and J. G. Grant. The building will be 125x60 feet and will contain several stores with plate glass windows. The exterior of the building will be faced with pressed brick. The plans are complete and figures are being taken.

San Diego, Cal.—Stores and lofts, 6 story and base, reinforced concrete, \$150,000. Architects, Bristow & Lyman, Timken Bldg., San Diego. Owners, Prevett-Bledsoe Furniture Co. The building will cover an area 100 feet square. The construction will be fire proof throughout. There will be freight and passenger elevators. The exterior of the building will be faced with pressed brick and terra cotta. The plans are complete and figures are being taken.

Seattle, Wash.—Stores and offices, 3 or 5 story and base, reinforced concrete, \$50,000 to \$60,000. Architects, Bebb & Mendel, Denny Bldg., Seattle. Owner, George W. Elsher. The architects have just been commissioned to prepare plans for a building of three to five stories. The particulars can not be given at this time as the nature of the construction and the height have not been fully determined upon.

THEATRES.

San Francisco.—Theatre, 1 story and base, brick, \$20,000. Architects, Ross & Burgren, 222 Kearny St., S. F. Owner, O. D. Baldwin. The building has been designed for a modern moving picture house. There will be a system of heating and ventilation. The foundations will be heavy enough to support additional floors. The exterior of the building will be faced with pressed brick. The working drawings are being prepared.

Seattle, Wash.—Theatre alterations, 3 buildings, \$100,000. Architect, Max Umbrecht, Globe Bldg., Seattle. Owner, Melbourne Theatre Co. The architect has completed the plans for the alteration of the Lyceum Theatre, \$75,000, the Blackcat Theatre, \$25,000, and the Eugene Levy's Theatre, \$25,000. Work will be started on the first two buildings this week. All work will be done by Day Labor and the architect is now purchasing all materials.

Long Beach, Los Angeles Co., Cal.—Theatre, 2 story and base, steel and concrete, \$50,000. Architect's name not given. Owner, F. H. Wiswel, Boston Theatre, Long Beach. The owner states that he is now having plans prepared for a modern new theatre building and that the construction will be started as soon as the working

drawings can be completed. Further than the amount of the estimated cost of the building the owner will not give details.

February 26, 1912, for furnishing and delivering f. o. b. shipping point one electric power shovel. For further information address D. W. COLE, project engineer, Fallon, Nev.

PROPOSALS FOR BRIDGE. (Bids close March 6.)

HIGHWAY BRIDGE—Department of the Interior, United States Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service, Washington, D. C., until 2 o'clock p. m. March 6, 1912, for the manufacture, furnishing, hauling and erection of one 160-foot clear span, through truss, steel highway bridge for the Shoshone project, Wyoming. For particulars address the United States Reclamation Service, Washington, D. C.; Helena, Mont., or Powell, Wyo. F. H. NEWELL, director.

PROPOSALS FOR STREET WORK. (Bids close Feb. 21.)

OFFICE of the Board of Public Works of the City and County of San Francisco—Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 21st day of February, 1912, for doing the following street work, including the furnishing of the necessary labor and materials therefor, to wit:

(1) The improvement of O'Farrell street from the easterly line of Powell street to the westerly line of Jones street by constructing granite curbs, basalt block gutters, catchbasins and an asphalt pavement, excepting on the railroads' right of way.

(2) That Bryant street, between Ninth and Tenth streets, be improved by constructing artificial stone sidewalks of the full official width, where artificial stone or bituminous rock sidewalks of the full official width are not already constructed.

PROPOSALS FOR SEWERS. (Bids close Feb. 21.)

OFFICE of the Board of Public Works of the City and County of San Francisco—Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 21st day of February, 1912, for doing the following street work, including the furnishing of the necessary labor and materials therefor, to wit:

That an eight (8) inch, vitrified, salt-glazed, iron-stone pipe sewer be constructed along the center line of Alvarado street between the center and westerly lines of Castro street; and that an eight (8) inch, vitrified, salt-glazed, iron-stone pipe sewer with four (4) Y branches, one (1) brick manhole with cast-iron frame and cover and galvanized wrought-iron steps and one (1) vitrified, salt-glazed, iron-stone pipe lampole with cast-iron frame and cover be constructed along the center line of Alvarado street from Castro street to a point one hundred and thirty (130) feet westerly therefrom.

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

Theatre—1 story and base, brick, \$20,000. San Francisco, Architects, Ross & Burgen, 223 Kearny St. S. F. Owner, O. D. Baldwin. The building has been designed for a modern moving picture house. There will be a system of heating and ventilation. The foundations will be heavy enough to support additional floors. The exterior of the building will be faced with pressed brick. The working drawings are being prepared.

Stores and Lofts—1 story and base, brick and steel. Cost not stated. San Francisco, Architect, Herman Barth, 12 Geary St. S. F. Owner's name withheld. The building will be arranged for stores on the first floor and three large, light lofts on the upper floors. There will be freight elevators. The exterior walls of the building will be faced with pressed brick. The architect is now preparing the plans.

Garage and Lofts—3 story and base, reinforced concrete, \$60,000. San Francisco, Architects, O'Brien & Werner, Foxcroft Bldg., S. F. Owner, S. G. Swortfiger. The building has been mentioned here before when the architect had plans out for an apartment building on this site. The plans have now been changed and a modern garage and lofts will be erected. There will be cement floors and elevator service. The exterior of the building will be faced with cement plaster. The plans are now complete and figures are being taken.

Apartment House—6 story and base, Class A construction, \$100,000. San Francisco, Architect, Houghton Sawyer, Shreve Bldg., S. F. Owners, Clay M. Francis, M. William Green and Ursula Green Sawyer. This building has been mentioned here before. The plans have been out for figures but have been called in and will be revised. The construction was to be of the Class C type, but will be made Class A. There will be a complete steel frame, steam heat, wall beds, elevator service and some metal trim. The exterior walls will be faced with pressed brick and terra cotta. Plans will be out for figures shortly.

Apartment House—5 story and base, steel and brick, \$100,000. San Francisco, Architect, W. G. Hind, Humboldt Bank Bldg., S. F. Owner, Dr. Redmon W. Payne. The building will be arranged for stores on the first floor and forty apartments of two and three rooms each on the upper four floors. There will be two stores. There will be steam heat and elevator service and wall beds. The exterior of the building will be faced with pressed brick. The plans are complete and figures are being taken.

Apartment House—3 story and base, frame, \$12,000. San Francisco, Architect, N. W. Sexton, Chronicle Bldg., S. F. Owner, Charles Rothchild. The building will contain fourteen apartments of two and three rooms each with connecting baths. There will be steam heat, gas grates and elevator service. The interior trim will be of pine and hardwood. The exterior of

the building will be covered with shiplap and rustic. The plans are complete and figures are being taken.

Apartment House—3 story and base, frame, \$22,000. San Francisco, Architect, Charles J. Rousseau, Phelan Bldg., S. F. Owner, Carrie B. Rousseau. The building will be 31x73 feet and will contain twelve apartments of two and three rooms each with connecting baths. The interior trim will be of pine and hardwoods. There will be steam heat and wall beds. The entrance will be finished in marble and tile. The exterior of the building will be covered with shiplap and brick veneer. The plans are out for figures.

Apartment House—2 story and base, frame, \$10,000. San Francisco, Architect, none. Owners, C. J. and W. J. Keenan, 300 Webster St. S. F. The building will be 27x90 feet and will contain twelve small apartments with connecting baths. There will be gas grates and wall beds. The interior trim will be of pine. The exterior of the building will be covered with brick veneer and shiplap. The plans are complete and the work will be done by Day Labor.

Apartment House—5 story and base, reinforced concrete, \$55,000. San Francisco, Architect, W. S. Rhodes, 3272 16th St., S. F. Owners, Mrs. Julia Cronan. This work was mentioned here before when the plans were first prepared. The plans are now complete and the architect is taking figures on the work. The building will contain in the neighborhood of 35 apartments all with connecting baths. There will be steam heat, elevator service, mail and garbage chutes and other modern improvements. The exterior of the building will be faced with stone and cement plaster.

Residence—2 story and base, frame, \$3,000. San Francisco, Architect, Frank Holland, 100 Haibt St. S. F. Owner, P. O'Connell, 246 Diamond St. S. F. The dwelling has been designed to contain six rooms and bath. The interior trim will be of pine and redwood with oak floors in the principal rooms. There will be open fire places and attractive tile mantels. There will be tile used in the bath and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Residences—10, 2 story and base, frame, \$3,000 each. San Francisco, Architect, none. Owners, Pockman & Co., Mills Bldg., S. F. The dwellings will be erected for sale and are to be built on 13th Ave. near Balboa St. Each house will contain seven rooms and bath. The interior trim will be largely of pine. There will be some hardwood floors. There will be open fire places and brick or tile mantels. Tile and terrazzo will be used. The exteriors will be of brick veneer, shingles and cement plaster on metal lath. The plans are in the hands of the owners and the work will be done by Day Labor.

Residence—2 story and base, frame, \$1,000. San Francisco, Architect, none. Owner, O. E. Anderson, 2376 Fulton St., paup33p uo3q sup 23up3p aq3 'd 'S

for an eight-room house with bath. There will be furnace heat and open fire places. The interior finish will be of pine with oak floors in the principal rooms. There will be open fire places with tile or brick mantels. The exterior of the dwelling will be covered with cement plaster on metal lath and with blinder brick veneer. The plans are complete and the work will be done by Day Labor.

Bungalow—1½ story and base, frame, \$2,500. San Francisco. Architect, none. Owner, S. Almburg, 2944 23rd St., S. F. The dwelling will contain seven rooms and bath. The interior trim will be of pine and redwood with some hardwood floors. There will be open fire places and tile or brick mantels. The exterior of the building will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Mission House—3 story and base, brick, \$12,000. San Francisco. Architect, H. H. Meyers, Kohl Bldg., S. F. Owners, Chinese Mission of San Francisco. The building will be erected in the Chinese district and will contain school rooms, living apartments and meeting rooms. The exterior of the building will be faced with pressed brick. The plans are complete and figures are being taken.

Flats—2 story and base, frame, \$4,000. San Francisco. Architect, none. Owner, Antonio Filippio, 17 Georgia St., S. F. The building has been designed for a store on the first floor and living apartments on the second. The interior trim will be of pine throughout. The exterior will be covered with shiplap and rustic. The plans are in the hands of the owner and the work will be done by Day Labor.

Flats—3 story and base, frame, \$8,000. San Francisco. Architect, none. Owner, J. C. Kirby, 3923 18th St., S. F. The building will be 25x70 and has been designed for six flats of five and six rooms each and baths. The interior trim will be of pine throughout. There will be some oak floors. There will be gas grates. The exterior of the building will be covered with brick veneer and shiplap. The plans are in the hands of the owner and the work will be done by Day Labor.

Flats—3 story and base, frame, \$5,000. San Francisco. Architect, W. S. Rhodes, 3372 16th St., S. F. Owner, Michael O'Connor, 793 Page St., S. F. The building will contain three flats of five and six rooms each and baths. The interior finish will be of pine and elm. There will be open fire places. The exterior of the building will be covered with brick veneer and shiplap. The plans are complete and the work will be done by Day Labor.

Hotel—7 story and base, reinforced concrete, \$100,000. San Francisco. Architects, Rigthetti & Headman, Phelan Bldg., S. F. Owners, George B. and Eva Metcalf. This work has been mentioned here before when the architects first started the plans. The working drawings have been completed and figures are now being taken. The plans provide for a building containing in the neighborhood of 120 rooms, a large percentage of which will have connecting baths. There will be steam heat and elevator service. The exterior of the building will be faced with terra cotta. There will be a vacuum cleaning system, sidewalk lights, doors and lifts. A contract will be awarded this week.

Hotel and Stores—4 story and base, brick and steel, \$30,000. San Francisco. Architect, E. P. Antonovich, 233 Kearny St., S. F. Owner's name withheld. The building will be arranged for stores on the first floor and single rooms above. There will be steam heat and elevator service. The exterior of the building will be faced with cement plaster. The architect has completed the plans and is now taking figures on the construction.

Hotel—1 story and base, brick and frame, \$40,000. San Francisco. Architect, J. C. Flueger, Crocker Bldg., S. F. Owner, Robert. McMillan. The building will have exterior walls of brick, faced with pressed brick and cement plaster. The interior will be arranged for single rooms. There will be eight public bath rooms. There will be steam heat and elevator service. The plans are complete and figures will be called for shortly.

Hotel—3 story and base, reinforced concrete, \$15,000. San Francisco. Architect, M. Mattanovich, Pacific Bldg., S. F. Owner's name withheld. The building will be arranged for single rooms with connecting baths. The interior trim will be of pine. There will be steam heat and elevator service. The exterior will be faced with cement plaster. The plans are complete and the architect is now taking figures on the construction.

Hotel—3 story and base, brick, \$20,000. San Francisco. Architect, Alfred Henry Jacobs, French Bank Bldg., S. F. Owner, Bert Schlessinger. The building will be erected on Pine street. There will be stores on the first floor and single rooms above. There will be several baths. There will be elevator service and steam heat. The exterior of the building will be faced with cement plaster. The plans are complete and figures are being taken by the architect.

Hotel and Stores—4 story and base, brick and steel, \$30,000. San Francisco. Architect, Albert Pissis, Flood Bldg., S. F. Owner, Mrs. Paul Hesson. The building has been arranged for stores on the first floor and for a rooming house on the upper three floors. There will be steam heat and elevator service. The exterior walls of the building will be faced with pressed brick. The plans are complete and the architect is taking figures on the construction.

Residence—2 story and base, frame, \$2,500. San Francisco. Architect, none. Owner, George Chandler, 442 Kirkham St., S. F. The dwelling has been designed for a seven-room house with bath. The interior finish will be of elm with some hardwood floors. There will be open fire places with tile or brick mantels. The exterior of the dwelling will be covered with shiplap. The plans are complete and the work will be done by Day Labor.

Residence Alterations—2 story and base, frame, \$2,000. San Francisco. Architect, John Davis Hatch, Humboldt Bank Bldg., S. F. Owner's name withheld. The work will include interior plastering, electric work and new plumbing. There will also be considerable exterior alterations. The plans are complete and figures are being taken.

School—2 story and base, steel and brick. Cost not stated. San Francisco. Architects, Shea & Lofquist, Bank of Italy Bldg., S. F. Owners, Slaters of the Presentation. A site at the northeast corner of Pacific and Mason

streets has been secured for this building and plans have been prepared. The building will cover a large area and will contain a large number of class rooms, living quarters for the sisters and offices. The plans are as yet in the preliminary stage and complete details of the building cannot be given at this time.

School Foundation Work, Etc.—Cost not stated. San Francisco. City Architect, Alfred L. Cadby, 1204 David Hewes Bldg., S. F. Owners, City and County of San Francisco. The plans for the foundation work, grading and shoring for the Academic Building of the Polytechnic High School group of buildings have been completed. Bids will be opened by the Board of Public Works on February 21st.

Contracts Awarded.

Residence—2 story, attic and base. Class A construction, \$300,000. San Francisco. Architects, Bliss & Paville, Balboa Bldg., S. F. Owner, James L. Flood. Contractors, Mahony Bros., Jr., Crocker Bldg., S. F. Contract price not stated. Note: This work has been taken on the percentage basis. The contractors are now letting sub-contracts.

Apartment House—3 story and base, reinforced concrete. Cost not stated. San Francisco. Architects, Welsh & Carey, Metropolis Bank Bldg., S. F. Owners, Sheehy Estate. Contractor, William Martin, 1012 Buchanan St., S. F. Contract price not stated.

Apartment House—3 story nad base, frame, \$22,000. San Francisco. Architect, H. C. W. Lenzen, Humboldt Bank Bldg., S. F. Owners, Braun Realty Co. Contractor's name not given. The general contract has been awarded, but figures are now being taken for the electrical work, plumbing, light fixtures, shades and wall beds.

OAKLAND AND ALAMEDA COUNTY.

Warehouse—1 story frame, \$3,000. Berkeley, Alameda Co., Cal. Architect, none. Owners, Monarch Oil Refining Co., 60 California St., S. F. The building will contain two store rooms. The exterior will be covered with corrugated iron. The plans are complete and the work will be done by Day Labor.

Stables—2 story and base, reinforced concrete, \$4,000. Oakland, Cal. Architect, none. Owners, Excelsior Laundry Co., 1540 West St., Oakland. The building will be used as a stable for the company's teams and a storage place. The interior will not be finished. The exterior will be faced with cement plaster. The plans are in the hands of the owners and the work will be done by Day Labor.

Flats—2 story and base, frame, \$4,000. Berkeley, Alameda Co., Cal. Architect, none. Owner, Lyman H. Congdon, 2235 Fulton St., Berkeley. This work will consist of the alteration of a two-story and basement frame residence into modern flats of five and six rooms each with bath. The interior trim will be of pine. There will be gas grates. The exterior of the building will be covered with rustic. The plans are in the hands of the owner and figures are being taken.

Apartment House—3 story and base, frame, \$10,000. Oakland, Cal. Architect, none. Owners, Sommarstrom Bros., 1055 16th St., Oakland. The building will contain 18 rooms arranged in two and three room suites with connecting baths. There will be wall beds. The interior trim will be of pine and redwood. The exterior of the building will be covered with cement plaster on metal lath. The plans are complete and in the hands of the owners who will do the work under the Day Labor system.

Stores—1 story and base, brick. Cost not stated. Oakland, Cal. Architect, C. W. Dickey, Oakland Bank of Savings, Oakland. Owner, Mr. McHenry. The building will have a frontage of 116 feet on Broadway and will contain six stores. There will be plate glass windows and metal store fronts. There will be cement floors and pine interior trim. The exterior of the building will be faced with pressed brick. The architect is now completing the working drawings.

Lodge Hall—2 story and base, frame, \$1,000. Berkeley, Alameda Co., Cal. Architect, none. Owners, Ladies Auxiliary, Order of Owls, 1749 California St., Berkeley. The building will contain a large meeting room, parlors and kitchen. There will be pine finish and some hardwood floors. The exterior of the building will be covered with rustic. The plans are complete and figures are being taken.

Flats—2 story and base, frame, \$5,000. Oakland, Cal. Architect, none. Owner, Mrs. Pabiano, 867 36th St., Oakland. The building has been designed for two flats of five rooms and bath each. The interior trim will be of pine with some oak floors. There will be open fire places with tile mantels. The exterior of the building will be covered with shingles. The plans are complete and in the hands of the owner who is taking figures on the work.

Flats—2 story and base, frame, \$5,000. Berkeley, Alameda Co., Cal. Architect, none. Owner, A. Wachter, Griggs and Ashby Sts., Berkeley. The building has been arranged for a store on the first floor and flats above. The interior trim of the second floor will be of pine and redwood. There will be open fire places. The exterior of the building will be covered with rustic. The plans are in the hands of the owner and the work will be done by Day Labor.

Flats—2 story and base, frame, \$3,000. Oakland, Cal. Architect, none. Owner, L. L. Nichols, 1672 14th Ave., Oakland. The building has been arranged for two modern flats of five and six rooms each with bath. The interior trim will be of pine and redwood. There will be open fire places with tile mantels. The exterior of the building will be covered with rustic and ship lap. The plans are complete.

and the owner will do the work under Day Labor system.

Plans—2 story and base, frame, \$5,000. Oakland, Cal. Architect, none. Owner, Mr. Silverstein, 666 14th St., Oakland. There will be two flats, one of nine rooms and bath and the other considerably smaller. The interior trim will be of pine throughout. There will be open fire places. The exterior of the building will be covered with cement plaster on metal lath. The plans are in the hands of the owner who is now taking figures on the work.

Residence—2 story and base, frame, \$6,000. Oakland, Cal. Architect, none. Owner, C. A. Heinke, 879 Arlington Ave., Oakland. The dwelling will contain eight rooms and baths. The interior trim will be of pine and hardwood with some hardwood floors. There will be furnace heat and open fire places. The mantels will be of brick or tile. Tile will be used in the baths and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the owner is taking figures.

Bungalow—1 story and base, frame, \$6,000. Berkeley, Alameda Co., Cal. Architect, none. Owner, Walter Williams, 2335 Eunice St., Berkeley. The dwelling will contain six rooms and bath. The interior trim will be of pine throughout. There will be some hardwood floors. There will be open fire places and attractive tile mantels. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Bungalow—1 story and base, frame, \$5,000. Oakland, Cal. Architect, A. W. Smith, 1004 Broadway, Oakland. Owner, Charles Grass. The dwelling will contain six rooms and bath. The interior trim will be of pine with some hardwood floors. There will be furnace heat and open fire places. The mantels will be of brick. There will be tile in the bath and kitchen. The exterior of the dwelling will be covered with rustic. The plans are complete and figures are being taken.

Bungalow—1 story and base, frame, \$6,000. Berkeley, Alameda Co., Cal. Architect, none. Owner, J. Rendahl, 35 McKinley Ave., Berkeley. The dwelling will contain five rooms and bath. The interior trim will be of pine throughout. There will be some hardwood floors. There will be open fire places and tile or brick mantels. The exterior of the dwelling will be covered with shingles. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$6,000. Oakland, Cal. Architect, none. Owner, B. W. Reed, 1271 Harrison St., Oakland. The dwelling has been designed for an eight-room house with tile. The interior trim will be of pine and hardwood with oak floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the bath and kitchen. The exterior of the building will be covered with cement plaster on metal lath. The plans are in the hands of the owner and he is taking figures on the work.

Residence—2 story and base, frame, \$6,000. Berkeley, Alameda Co., Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner,

John H. Foy. The dwelling will contain in the neighborhood of ten rooms and baths. The interior finish will be of hardwoods. There will be hardwood floors throughout. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the baths and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. The architect is now preparing the plans.

Residence—2 story and base, frame, \$7,000. Berkeley, Alameda Co., Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, C. A. Perrin. The dwelling will contain ten rooms and baths. The interior finish will be largely of hardwoods. The floors throughout the first story will be of oak. There will be furnace heat and open fire places. The mantels will be of brick or tile. Tile will be used in the baths and in the kitchen. There will be hot water heaters. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are now being prepared.

Bungalow—6, 1 story and base frame, \$2,000 each. Oakland, Cal. Architect, none. Owners, Realty Syndicate, Syndicate Bldg., Oakland. The dwellings will each contain 4 rooms and bath. The interior trim will be of pine throughout. There will be some oak floors. There will be open fire places and tile mantels. The exteriors will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Bungalow—1 story and base, frame, \$4,000. Berkeley, Alameda Co., Cal. Architect, none. Owner, John B. Ward, 2838 Fulton St., Berkeley. The dwelling has been designed for a six-room house with bath. The interior trim will be of pine with hardwood floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the bath and kitchen. The exterior of the dwelling will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$3,500. Berkeley, Alameda Co., Cal. Architect, none. Owner, Mrs. P. C. Mills, 264 62nd St., Oakland. The dwelling has been designed for a six-room house with bath. The interior finish will be of pine throughout. There will be open fire places with attractive tile or brick mantels. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are in the hands of the owner and he is now taking figures on the work.

Bungalow—1½ story and base, frame, \$3,500. Oakland, Cal. Architect, C. S. Schwartz, Vandyke Bldg., Haywards. Owner, Miss C. C. Dravilo. The bungalow will contain six rooms and bath. The interior trim will be of pine and hardwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the bath room and kitchen. The exterior of the bungalow will be covered with shingles. The plans are complete and figures are being taken.

Residence—2 story and base, frame, \$4,000. Berkeley, Alameda Co., Cal. Architect, A. Merrill Bowser, 1003½ Broadway, Oakland. Owner, W. J.

Moutmer. The dwelling has been designed for an eight-room house with two baths. The interior trim will be of pine and redwood. There will be some hardwood floors. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the bath and kitchen. The exterior of the residence will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Residence—2 story and base, frame, \$10,000. Berkeley, Alameda Co., Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, John F. Connors. The building has been designed for a ten-room house with several baths. The interior finish will be largely of hardwoods and white enamel. There will be furnace heat and open fire places. The mantels will be of brick or tile. There will be hardwood floors throughout. Tile will be used extensively. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are being prepared.

Residence—2 story and base, frame, \$6,000. Berkeley, Alameda Co., Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, James M. Hunt. The dwelling has been designed for a nine-room house and will contain two baths. The interior trim will be of pine, hardwood and white enamel. There will be furnace heat and open fire places with attractive tile or brick mantels. The exterior of the dwelling will be covered with cement plaster on metal lath. The architect is now completing the working drawings.

Residence—2 story and base, frame, \$6,000. Oakland, Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, A. Don. The dwelling will contain eight rooms and baths. There will be furnace heat and open fire places. The interior trim will be largely of pine and white enamel. There will be hardwood floors in the principal rooms. The mantels will be of brick or tile. Tile will be used in the bath and kitchen. The exterior of the residence will be covered with cement plaster on metal lath. The architect is completing the working drawings.

The building has been designed in the Spanish Colonial style. There will be an auditorium with a seating capacity of 450, Sunday school rooms, a loft and study. The exterior of the building will be faced with red brick. The architects have completed the plans and are taking bids on the work.

Hotels—Four new buildings. Cost not stated. Los Angeles, Cal. Architects as follows. Owners, City of Los Angeles.

Hotel L. Stiff, 715 Gross Bldg., is architect for a four-room frame addition to be erected at Rose Hill. The amount of the concrete work required by the contour of the lot, this building will cost about \$10,000.

Hotel W. J. Blesner, 529 Main Bldg., has prepared plans in addition containing four class rooms and an auditorium to be built at Thirteenth Street school. It will be frame construction, 106x75 feet, will cost \$15,000.

Hotel W. Williams, 226 Exchange Bldg., have prepared plans for a four-room addition to be built at the sixteenth Street school. It will be frame construction, 76x91 feet, will cost \$15,000. Foster St., is architect of a five-room frame addition to be built to the Fifty-second School.

Hotel A. Faithful has prepared plans for a four-room frame addition to be built at the Custer Street School.

Hotel School Group—Cost not stated. Los Angeles, Cal. Architects, Austin & Pennell, Wright and Callender Bldg., L. A. Owners, Chaffey High School District. This work has been mentioned here before. The plans are complete and bids will be opened by the Board of School Trustees on March 9th. The official proposals for separate figures on different parts of the work. Plans have been had from the architect or from the clerk of the Board of School Trustees.

Hotel and Stores—2 story and base. Cost not stated. Modesto, Stanislaus Co., Cal. Architect, Ralph P. Yosemite Theatre Bldg., Stockton, Cal. Owner, Mr. Auburn, Modesto. The building will contain stores on the first floor and hotel rooms above. The plans will have large plate glass windows. There will be several bath rooms. The interior trim will be of oak. The exterior of the building will be faced with pressed brick. The architects are now preparing the plans.

Hotel—2 story and base, steel and concrete, \$50,000. Long Beach, Los Angeles, Cal. Architect's name not stated. Owner, F. H. Wiswell, Boston, Ore., Long Beach. The owner states that he is now having plans prepared for a modern new theatre

building and that the construction will be started as soon as the working drawings can be completed. Further than the amount of the estimated cost of the building the owner will not give details.

School—2 story and base, brick and steel, \$55,000. Wilmington, Los Angeles Co., Cal. Architects, Allison & Allison, Union Trust Bldg., L. A. Owners, Wilmington School District. This work has been mentioned here before. The architects have completed the working drawings and figures are now being taken. The building will be 184x65 feet and is designed for a combination grammar and high school. There will be steam heat and a system of ventilation. The exterior will be faced with pressed brick.

Contracts Awarded.

Apartment House—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, E. J. Borgmeyer, Stimson Bldg., L. A. Owner, Dr. J. T. Miller. Contractor, M. Horwitz, 212 North Main St., L. A. Contract price not stated.

Apartment House—2 story and base, frame, \$28,000. Los Angeles, Cal. Architect, Lawrence E. Burck Co., 142 South Spring St., L. A. Owner, Lawrence E. Burck, Contractors. Contractor, Lawrence E. Burck Co., 142 South Spring St., L. A. Contract price, \$26,000.

Apartment House—3 story and base, frame, \$22,000. Los Angeles, Cal. Architect, Clyde Cheney, Story Bldg., L. A. Owners, Mr. and Mrs. O'Keefe. Contractors Architectural Construction Co., Story Bldg., L. A. Contract price, \$22,000.

Church—Brick and frame construction, \$40,000. Los Angeles, Cal. Architect, Elmer E. Meinardus, Higgins Bldg., L. A. Owners, German Lutheran Evangelical Trinity Church of Los Angeles. Contractor, Herman Haase, 1831 New England Ave., L. A. Contract price \$37,000.

School—2 story and base, brick, \$45,000. Ontario, San Bernardino Co., Cal. Architects, Austin & Pennell, Wright and Callender Bldg., L. A. Owners, City of Ontario. Contractor, S. W. Upton, Pasadena. Contract price, \$32,000, general construction only.

PORTLAND AND OREGON.

Apartment House—3 story and base, brick. Cost not stated. Portland, Ore. Architects, Claussen & Claussen, Portland. Owner's name withheld. The building will be 50x100 feet, and will contain 28 suites of two and three rooms each and baths. There will be steam heat and wall beds. The exterior of the building will be faced with pressed brick. The architects are now preparing the working drawings and more complete details will be given later.

Bank—4 story and base, reinforced concrete. Cost not stated. Philomath, Ore. Architects, R. N. Hockenberry & Co., Portland. Owners, Philomath State Bank. The building will be 22x50 feet. There will be steam heat. There will be safety and coin vaults. The exterior of the building will be faced with cement plaster. The plans are being prepared and figures will be taken shortly.

Apartment House—1 story and base, brick and steel. Cost not stated. Portland, Ore. Architects, MacNaugh-

ton & Raymond, Portland. Owner, M. Olson. The building will be 100x100 feet. There will be 16 apartments arranged in suites of two and three rooms each with connecting baths. There will be steam heat, automatic elevators, vacuum cleaning system, disappearing beds and a refrigerating plant. The interior trim will be of oak and hardwood floors will be used throughout. The exterior of the building will be faced with pressed brick, trimmed with sandstone. The plans will be completed within a few weeks and figures will be called.

SEATTLE AND WASHINGTON.

Apartment House—3 story and base, brick, \$85,000. Seattle, Wash. Architects, Quandt & Creutzler, Haight Bldg., Seattle. Owner, John L. Lang. The building will contain 15 apartments arranged in suites of five rooms each. There will be steam heat. The exterior of the building will be faced with pressed brick. The plans are complete and a contract will be let at once.

Apartment House—4 story and base, brick and steel, \$60,000. Seattle, Wash. Architects, Quandt & Creutzler, Haight Bldg., Seattle. Owner, Charles Schell. The building will be 110x89 feet. There will be in the neighborhood of 80 rooms arranged in small apartments of from two to four rooms each with connecting baths. There will be steam heat, elevator service, wall beds and vacuum cleaning system. The exterior of the building will be faced with pressed brick. The plans will be completed within a few days and figures will be called.

School—2 story and base, reinforced concrete, \$50,000. Ellensburg, Wash. Architects, Stephen & Stephen, New York Bldg., Seattle. Owners, City of Ellensburg. Contractor, G. H. Rush, Le Grande, Ore. Contract price, \$43,687, general construction only.

Stores—1 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Dennis & Farwell, Flay Bldg., L. A. Owners, E. P. Fay and J. G. Grant. The building will be 125x60 feet and will contain several stores with plate glass windows. The exterior of the building will be faced with pressed brick. The plans are complete and figures are being taken.

Stores and Offices—3 or 5 story and base, reinforced concrete, \$50,000 or \$60,000. Seattle, Wash. Architects, Bebb & Mencl, Denny Bldg., Seattle. Owner, George W. Fiskler. The architects have just been commissioned to prepare plans for a building of three to five stories. The particulars cannot be given at this time as the nature of the construction and the height have not been fully determined upon.

School—2 story and base, brick and reinforced concrete, \$100,000. Vancouver, Wash. Architects, Stephen & Stephen, New York Bldg., Seattle. Owners, Vancouver School District. The building will be designed for a high school, and will contain, besides the usual rooms, an auditorium and offices for the principal and superintendent. There will be steam heat, vacuum cleaning and laboratories. The exterior of the building will be faced with pressed brick. The plans will be complete about March 29th.

Factory Building—1 and 2 story,

frame and brick, \$250,000. Renton, Wash. Engineer, James Anderson, 777 West Washington St., Seattle. Owners, Pacific Coast Fuel Co. The building will be a part of a large plant which is to be erected at this site. The plans for the work are now underway and figures will be called for as soon as the working drawings can be completed.

Hotel Annex—4 story and base, brick and steel, \$200,000. Bellingham, Wash. Architect, Alfred Breitung, Walker Bldg., Seattle. Owner, Leopold Schindler. This work will be in addition to the completion of the two-story addition to the Byron Hotel which is to cost \$50,000 and for which the same architect has completed plans. The new annex will contain 200 guest rooms and a large number of baths. The equipment will be modern throughout. Plans will be completed as rapidly as possible.

Hospital—3 story and base, brick, \$30,000. Seattle, Wash. Architect, J. S. Coto, Haight Bldg., Seattle. Owner, Dr. E. M. Riniger. The building will cover an area of 66x120 feet. There will be steam heat and other modern improvements. The exterior of the building will be faced with pressed brick. The plans for this work are complete and the architect is now taking figures on the construction.

Club House—1, 2 or 3 story and base, brick. Cost not stated. Seattle, Wash. Architects, Howells & Stokes, Henry Bldg., Seattle. Owners, College Club. The architects have been instructed to prepare plans for this building, the cost of which has not been determined upon. The architects will submit three sketches to the Board of Directors and a selection will be made next week. Further details will be given then.

Lodge Hall—3 story and base, brick and steel, \$75,000. Walla Walla, Wash. Associated architects, Carl L. Linde, Portland, and Richard H. Ulrick, Pacific Block, Seattle. Owners, Walla Walla Elks' Hall Association. The building will be 60x110 feet. There will be considerable structural steel, with exterior walls of brick, faced with pressed brick trimmed with terra cotta. There will be a hot water heating system, elevators and a vacuum cleaning system. The first floor will be occupied by stores. There will be living apartments on the second floor, lodge rooms, auditorium, banquet hall, smoking and reading rooms and offices on the other floors. The architects have just been selected to prepare the plans and working drawings will be completed as rapidly as possible.

Theatre Alterations—3 buildings, \$100,000. Seattle, Wash. Architect, Max Umbrecht, Globe Bldg., Seattle. Owners, Melbourne Theatre Co. The architect has completed the plans for the alteration of the Lyceum Theatre, \$75,000; the Blackcat Theatre, \$25,000, and the Eugene Levy's Theatre, \$25,000. Work will be started on the first two buildings this week. All work will be done by Day Labor and the architect is now purchasing all materials.

Contracts Awarded.

Bridges—Steel and concrete. Cost not stated. Spokane, Wash. Engineer, County Surveyor, Spokane. Owners, Spokane County. Contractors, No. 4 on Lyle Road across Spokane River;

No. 10 on Latah Creek Road across Latah Creek; No. 18 on Roberts Road across Latah Creek, all to Omaha Structural Works, Omaha, Neb., at \$15,500; \$5,600; \$5,400 respectively. Bridge No. 126 on Boston Road across Peone Creek to Portland Bridge & Iron Co., of Portland, at \$26,588. **Hulbrook Construction**—\$5,000,000. Tacoma to Terminal, Wash. Engineers, Northern Pacific Co. Owners, Northern Pacific Co. Contractors, Porter Bros., Portland. Contract price not stated.

Tunnel Work—\$800,000. Tacoma to Terminal, Wash. Engineers, Northern Pacific Co. Owners, Northern Pacific Co. Contractor, Nelson Bennett, 505 South C St., Seattle. Contract price, \$800,000.

TIME LIMIT FOR FILING LIENS.

The Provisions of the New Lien Law Explained by Mr. Henry A. Jacobs, Attorney-at-Law.

As there have been many inquiries by interested parties in regard to the time limit in which liens may be filed The California Building Law Association has asked their Attorney Mr. Henry A. Jacobs to explain the provisions of the law in regard to this necessary proceeding. The letter of Mr. Jacobs follows:

San Francisco, Jan 26, 1912.
California Building Law Association,
185 Stevenson St., San Francisco, Cal.
Gentlemen:

Replying to your communication with reference to the two queries under the new lien law; first, when does the thirty-five day payment become due, and secondly, within what time must all liens be filed. I will state.

Under the new lien law there is no provision made for a thirty-five day payment, and it is a matter of agreement absolutely between the owner and the contractor as to the time when the different payments become due thereunder.

The other question as to the time within which to file liens, is a very important one, and I would warn all material men, laborers and sub-contractors to be very careful and be sure their liens are filed within the proper time.

Any person claiming a lien, (other than the original contractor) has the option of filing his lien within thirty days after he has ceased labor, or has ceased furnishing materials, or both; or at his option within thirty days after completion of the original contract, if any, under which he was employed. It is a simple matter for the party claiming a lien to compute the time within which to file, if he should file his claim within thirty days after the last work has been performed, or the last material furnished. If however, the time should be overlooked, or the lien claimant should desire to wait, he has the option of filing within thirty days after the completion of the original contract under which he was employed.

In order that there may be no confusion as to the completion, the statute expressly provides what shall be deemed completion, so as to start the time running within which to file liens; among which is a notice of completion, or a notice of cessation to be

filed by the owner. In the event of filing such a notice, the lien claimant has thirty days after the filing of notice within which to file his lien. Should, however, the lien claimant neglect or fail to file his notice, the lien claimant must file his claim of lien within ninety days after the completion of the building, or the provisions of the new statute reference to the time of filing after the completion of the work are very similar to the provisions of the old statute, but are more in many ways.

Therefore, the lien claimant has no difficulty in ascertaining proper time within which to file his claim of lien.

Yours very truly,
HENRY A. JACOBS

OIL LANDS WITHDRAWN FROM ENTRY.

Federal Government Stops Acquisition of Title to Public Land Containing Deposits Pending Congressional Legislation.

Pending the enactment of legislation for the proper disposal of oil deposits on the public domain, because it seems desirable to retain these deposits for use by the American Navy, all public known or thought to contain deposits of oil or gas are withdrawn from all forms of disposal.

During the fiscal year 1910-11 the recommendation of the States Geological Survey, 640,600 of possible oil land in California Wyoming were withdrawn from and 1,232,719 acres in the same show by field examination to be lands, were reserved. All oil lands in Alaska, comprising an unknown were withdrawn during the year. The early part of the year the standing withdrawals, which have been made by the Secretary of the Interior, were ratified, confirmed, and continued in full force and effect by the President under the act of June 25, 1910.

THE WESTERNER'S IDEAL.

The Westerner's willingness to help his neighbors and old friends for the sake of a "claim" prairie is not sordid. His steady occupation with "getting ahead" part of his inherited passion for personal independence. I have seen a gray hue steal over the face of a settler when speaking of someone who had "lost his farm" and "went out by the day." For the earner's lot the true-born Westerner feels a dread quite incomprehensible to cities and to lod communers; he ruthlessly sacrifices comfort and culture, it is that he may win of his own and so call himself a master. Once he has cleared a mortgage, improved his place, gained a soothing sense of financial security, he will provide books, music lessons, travel and education for his children, even in the meantime his own capacity for joy has been atrophied.—From Edward Alsworth Ross's "The West" in the February Century

THE MULTNOMAH HOTEL.

Portland's Largest Hotel, Designed by J. B. S. Cahill, of Wright, Rushforth & Cahill of San Francisco.

The largest hotel in Portland "The Multnomah" (named after the County in which the City of Portland is situated), will be formally opened this week under the management of Mr. H. C. Bowers, late of the "Portland" Hotel and Mr. J. M. Brownell recently of the Palace Hotel, San Francisco.

Not only the management, but the whole enterprise is a joint product of the two cities.

The owners who have put nearly a million dollars into the structure alone are the H. R. Thompson Estate Company with headquarters in San Francisco.

The architect who laid out the plan of this, the largest reinforced concrete hotel in the northwest, is Mr. B. J. S. Cahill of the firm of Wright, Rushforth & Cahill. Mr. Cahill left San Francisco for Portland for this express purpose some two years ago.

The plan is worked out with the idea of securing simplicity of the room suits which are repeated between the columns in such a way as to secure a few distinct types of rooms, repeating each type as many times as possible. There are no enclosed light shafts. All rooms face on to a street or a 30-foot open court. The building occupies an entire block, has two floors below the street level, and nine floors above. Part of the basement, which is waterproofed, contains a large and lofty lobby and cafe. On the mezzanine floor are spacious accommodations for convention purposes including large banquet and assembly halls. The seventh floor is especially laid out for traveling salesmen. In all, there are 725 rooms, 300 with baths and a hundred sample rooms besides offices and stores on the main floor and one of the largest and loftiest foyers on the Coast.

TEMPORARY CITY HALL ILLUMINATION.

Invitations are being sent out to inspect the Exterior Electric Lighting of this building.

The illumination of the entire front was designed as a permanent feature of the facade and an integral part of its Architecture, (nearly 3,000 lamps are used for this purpose.)

The light will be turned on from seven to ten-thirty on the evenings of Friday and Saturday, February 9th and 10th, 1912.

The Architects, Wright, Rushforth & Cahill, are to be congratulated for insisting upon this scheme of illumination, which is a permanent addition to the building.

Here is a hint for other architects to take up.

WANTS HOME INDUSTRY PATRONIZED.

The Public Works Commissioners called Tuesday morning on Mayor Rolph at the latter's request to confer with him in regard to the conflicting claims of bidders for the contract of supplying the machinery equipment for pumping station No. 2, at Fort Mason. The lowest bid before the board is that

of the C. C. Moore Company, approximately \$140,000, but on behalf of John G. Sutton & Company, whose bid is about \$9000 higher. It is alleged that the work, if awarded to them, will be done by local labor. The contention is also made that if the Moore company secures the contract most, if not all, of the work will be done in Pennsylvania. This statement, however, is denied.

At a conference held the same day the Mayor and the Public Works Commissioners agreed upon a list of questions to be submitted to the competing bidders with the object of ascertaining just how much work each proposes to do here and how much elsewhere in the event of securing the contract. The Mayor invited the Commissioners to visit him again today, when the conference will be resumed.

The Home Industry League has shown much interest in the Sutton company's efforts to secure the contract as have also representatives of the Metal Trades and the Labor Council.

SEATTLE VOTE ON TERMINAL BOND ISSUE.

SEATTLE, Feb. 6.—The port of Seattle commission today voted to submit the Harbor island terminal bond issues, aggregating \$5,000,000 to the voters of Seattle March 5.

Two propositions cover the Harbor island terminal scheme. The first is an issue of \$3,000,000 of bonds to cover the cost of acquiring the necessary land on Harbor island by condemnation, estimated at \$2,000,000, and \$1,000,000 additional for the construction of the first concrete piers. The second proposition is a resolution providing for the issuance of an additional \$2,000,000 bond issue.

The land bought by the city is to be leased to a New York syndicate known as the Pacific Terminal company, which binds itself to build terminal warehouses of the style of the Bush Terminal Company, Brooklyn, New York.

NEW OIL COMPANY FORMED.

SACRAMENTO, Feb. 7.—The Pacific Pipe Line company, capitalized at \$10,000,000 and formed principally for the production and transportation of oil, has filed its articles of incorporation in Secretary of State Jordan's office.

The articles name, among the purposes of the company, the prospecting and boring for oil and the operation of oil wells and of tank steamers for its transportation. The principal office will be in Los Angeles.

The directors, all of Los Angeles, are: E. Fletcher Scott, Floyd Warring, Ira W. Byrnes, D. K. Gault, A. A. Kidder Jr., Harry Price, M. S. Pattison, Lenore Truman and Milton Dyer.

SPRING VALLEY TRANSFERS SANTA CLARA COUNTY LANDS.

SAN JOSE, February 14.—Notice of the transfer of thirteen sections of land along streams in the Mount Hamilton range in the northern part of Santa Clara county from the Spring Valley Water Works Company to the Spring Valley Water Company was filed in the County Recorder's office here yesterday. One who is supposed to be conversant with the affairs of the Spring Valley Water Company

said that the transfer is a necessary step in the sale of the water company to the city of San Francisco.

BOND ELECTION FOR SAN RAFAEL.
SAN RAFAEL, Feb. 15.—A resolution to bond the city for \$162,050 for the building of sewers, culverts, drains, curbing, grading and street improvements in general was passed by the city trustees tonight. Out of this it is intended to set aside \$25,000 for an open air municipal bathing establishment, to be surrounded by a pavilion with dance hall, refreshment booths and other concessions.

STATE BUILDERS' ORGANIZATION MEETING WITH SUCCESS.

Local Organizations Show Interest in the Proposed Association.

A lively interest is being manifested by local sub-contractors and material men in the state organization which will gather at Sacramento on March 7th, 8th and 9th. Representatives from all, or nearly all, the local bodies will attend and the object will be to unify the various organizations and do more effective work through this central body. Two days will be taken up with the work of the organization. The last day will be given over to pleasure and sight seeing.

GROWTH OF COPPER INDUSTRY.

United States Produces More Than All the Rest of the World.

The growth of the copper industry in the United States has been notable, according to the figures of the United States Geological Survey. In 1850 the production was 1,455,000 pounds; in 1870 it was 23,225,000 pounds; in 1890 it was 259,763,092 pounds; in 1900 it had increased to 606,117,166 pounds; in 1905 it was 901,907,843 pounds; and in 1909 it passed the billion mark with 1,092,351,624 pounds, decreasing in 1910, however, to 1,080,159,509 pounds. The price has decreased from over 46 cents a pound in Civil War times to an average of 12.7 cents a pound in 1910.

The United States is by far the largest copper producer in the world; in fact, we produced more than all the rest of the world together, the total world's production for 1910 being 1,903,297,003 pounds. A United States Geological Survey report by B. S. Butler, giving the statistics of copper, including 1910, contains an excellent map of the United States showing all the known copper deposits and the location and names of the reduction plants. A copy of the report may be obtained free on application to the Director of the Geological Survey, Washington, D. C.

PROBABLE COAL STRIKE IN ENGLAND.

LONDON, February 14.—The strike vote taken by 800,000 coal miners in the recent ballot was confirmed here Tuesday by representatives of the men, who issued a formal ultimatum setting February 23 as the date for beginning the national walkout unless the owners accept the principle of a minimum wage in the meantime. More than forty thousand colliers employed in Derbyshire Tuesday morning handed in their notices to quit work, and by February 15 all of the 800,000 men will have followed their example.

THE CORBIN UNIT LOCK-SET

comes with all parts attached just as it will appear on your door. It is as secure and smooth in action as a Safe Lock. IT is found on the finest Office Buildings and Residences in the City. Why not on yours?

Have you considered the Corbin Unit Lock in connection with your new Building or Residence? Look into it. It will pay you.

Editorial Comment.

The Architectural Commission has decided upon the general plan for the Exposition grounds and the general treatment of its architectural features. This we are told is to be something original and different from any other exposition heretofore held. This general plan embraces a main Court of Honor which faces on an esplanade that is bounded by the bay on the north and the south side is to be ornamented by a massive dome that will form a central feature. Smaller courts will connect with this central garden and form a basis around which the main architectural units will be grouped.

The Chicago Exposition did a great deal for architecture in this country. The World's Fair of Buffalo and St. Louis added to the list of achievements. And chiefly in adding color to the architecture and illuminations. So with these sources to draw from and the perfection of modern mechanics there should be erected on the shores of the bay a city of wonderful architecture and colored like the fantastical cities which adorn the canvas of de Ivanowski or Maxfield Parrish.

Speaking of color in architecture perhaps no country in the world has more of natural color, more shades and striking contrasts than California. The golden poppy that crowns the verdant hills is at once striking and symbolical. The old missions with their dove walls and red tile roofs are famous the world over. And the deep blue of California skies is famous in picture and poster wherever the railroad reaches or steamship travels and gives to this land an individuality and a distinction that puts it in a class by itself.

So no doubt in time there will grow up an architecture that is distinct and individual. Partly perhaps on account of the peculiarity of the climate and partly because of the possibility of color in building material which lends to the more permanent forms of architecture the possibilities of the artist's palette.

Of these building materials which are being used in color the most important is brick. As old as civilization itself brick work seems to be entering upon a "renaissance" of its own. And chiefly because architects and the general public are becoming educated to its possibilities of combination of color, its design in combination and contrasts in mortar and bond relations.

Brick is now made in almost every conceivable color and shade, and for that matter in any size or shape, so that the builder of today by a skillful use of color can add to his de-

sign that living touch which the painter gives to his painting.

The softer tones of gray and green and brown, the modest colors that harmonize and shade into one another, furnish material for artistic construction of residences that are unequalled. The use of mortar and design in the manner of laying the brick give great opportunity for the architect and the workman to display his skill in the craft. It is in reality a mosaic to be designed and constructed with the idea first for the use to which it is to be put and second as a thing of beauty to harmonize with the surroundings.

Stone has its natural hue and color. Concrete is painted to fit into its surroundings. But brick and burnt clay products are produced in all the shades of the potters' art and form integral units of construction that can be combined in infinite detail.

The coming exposition will no doubt develop color schemes that will be of permanent value to the builders of this State. And will teach the possibilities of color tones that will give to the architecture of California the polychrome tints that nature has bestowed upon her gems and skies.

At a recent meeting of the Health Boards of New York, Massachusetts, New Jersey, Pennsylvania and Rhode Island a National Health Bureau was urged as a substitute for the health protective activities of the several departments.

While this is not the first time that such a department has been suggested it seems now to receive more serious consideration than ever before and the time has come for some action along that line.

As a matter of fact this county is far behind most European countries in matters of sanitation. Action is taken and bureaus are organized to protect the products of the farm against dangerous disease germs and insects. Millions are spent for protection against the enemies of trees, animals and poultry but no systematic action is taken against the diseases of man.

One of the results to be expected from the establishment of such a bureau and improved sanitation would be a reduction of the death rate. The present rate is 16½ per 1000 as against 9½ per 1000 in New Zealand. In many cases these deaths are preventable by proper care just as accidents are preventable in industrial work. In the establishment of such a bureau especially qualified men would study living conditions, improve sanitation and suggest legislation.

The dissemination of information and the enactment of laws governing public health would enlighten the people and produce cleanliness and disease preventing conditions.

Efficiency Methods The Legitimate Means Of Money Making For Contractors.

Like every other business man in competition with others, the contractor aims to do the best work at the lowest price, and he knows this is the only way to build up a good business. In the long run reputation counts more than anything else; reputation for square dealing and efficiency. However much business conditions may vary in different towns, reputation stands first, and coupled to reputation with indisputable ties is efficiency—efficiency in getting work, as well as efficiency in doing it.

What is efficiency? Broad and butter depends directly on effort, and effort is only useful when it is well-directed effort. It has been discovered that modern contracting methods are not always so practical after all. In efficiency has frequently been found in place of efficiency and many contractors, unknowingly, are shouldering a load which might be made much easier and their business could be made more profitable by the introduction of a few more practical methods into the work of themselves and their men.

Every contractor of experience has adopted certain methods of executing work which he believes to be best. Years of careful and systematic supervision of the men working under him have developed customs of handling his work with as little friction as possible, longer of less lies in the fact that such methods of doing work are not always as efficient as more modern methods which some contractors, too busy, perhaps, to notice, ignore; such a contractor and his men may be in a rut while more progressive competitors force ahead under the pressure and prestige of modern efficiency systems.

The whole idea of increased efficiency in business is to produce better work, at an increased profit, with less labor. To no branch of contracting is modern efficiency more applicable than to the work of the mason contractor, and yet, strange to say, no branch of contracting has developed so slowly from thumb rule into scientific organization. Large contracting firms have recently given much attention to the improvement of operating methods, a practice which invariably brings about rigid changes in procedure to produce better work at more profit. Frank B. Gilbreath, himself a large employer of labor, has given much study to scientific management as regards such a commonplace trade as bricklaying. With the application of a little common sense he has so improved on old methods that the efficiency of his men is increased by a large percentage. The work is made easier for them and his own profit has been greatly increased. Ways of handling and laying brick in use for generations have been proved impractical, and now more practical methods are introduced.

When a business man takes over a new factory property, somewhat run down at the heels, the first thing he does is to make a careful analysis of the business, with a view to correcting

any existing waste caused by antiquated methods and poor equipment, in order that he may put the business on a correct economic basis. If he is wise he makes a scientific and comprehensive study of the work required to be done in that factory, and carefully considers ways and means to accomplish it with the least possible waste of time, material and labor.

What the manufacturer does the contractor must do if he expects to make a success of his business. He must carefully consider all existing methods, choosing those which are the most practical for him, regardless of his manner of doing work in the past, if he would increase the efficiency of himself and men and raise the percentage of his profit. Efficiency does not mean merely increased speed and consequently making it out of the man. On the contrary, efficiency means the elimination of all friction, the reduction of lost motion and consequent increase of effectiveness. This applies to the work of the contractor himself, as well as to the work of his men, for many contractors find that much of the tension and friction is in the work they do themselves. No work can be keyed up to a higher pitch than that of the master of the work himself, who is very apt to be taken as a model by those working under him.

In the rearrangement of the process of laying brick the motions of the brick mason have been reduced from eighteen to four motions. Any one can readily see that this means the saving of effort on the part of the bricklayer, with an increase of profit to the contractor. Take for instance, the old method of carrying brick in a hod and dumping them on the scaffolding for the bricklayers to pick up and use. In the same way mortar was carried in a hod and dumped down on the mortar board beside the masons. Following out this method of bricklaying, which has prevailed for centuries, it was found that the mason must turn around, stoop down to pick up a brick and handle it several times to examine the condition of its faces, he was obliged to stoop again to load his trowel with mortar. In bedding the brick it was always the custom for a bricklayer to set each brick carefully on the strip of mortar and force it down by careful taps of the trowel, the end of the brick having been previously "battered" with mortar to form the end joint. Of course, all these motions are rapid and apparently efficient to the casual observer, but the efficiency engineers were not satisfied with casual observation. They scientifically tested ordinarily methods of bricklaying, with the result that by introducing new ideas the motions necessary to lay brick have been reduced over 20 per cent.

The first change that was made was in the construction of the scaffolding. One form of effectual scaffolding is arranged with a platform on both sides of the uprights. The brackets supporting the platforms slide up and down in the grooves of the upright, so that they

may be raised as the wall goes up and the brackets pinned with steel pins. On one platform, set about knee high to the wall, the bricklayers stand. Behind them, about waist high, is the table which holds their brick and mortar. This table is kept supplied with material by helpers who mount the platform on the opposite side and dump their material on the table. The bricklayers are merely required to turn (without stooping), place them in the wall.

To save the lost motion of bricklayers caused by examining each brick to select its best face for the outside, helpers (at ordinary helpers' wages) select and stack bricks at the supply piles with the best faces toward the outside, just as they will subsequently lie in the wall. Each little pile of selected bricks is carried to the scaffolding on a wooden pallet and set down, pallet and all, on the table, where the bricklayer can reach it and put each brick into the wall without examination.

Even so small a matter as the mortar board has been carefully studied to see if improvements were possible. It has been found that the work of bricklayers is greatly facilitated by having helpers keep the mortar to just the right degree of stiffness so that each brick can be bedded by a single push. Mortar too light allows a brick to go far into its bed, and stiff mortar requires too much tapping. With mortar just right one gentle tap beds a brick at once, and no further manipulation is required. The helpers, therefore, are required to deliver at the mortar boards mortar of precisely the right consistency, and at each trip they stir up the material stacked on the board, adding more water if it is required.

Terra cotta hollow tile is handled in a similar way. Helpers stock them behind the masons, on edge, just as they are to go in the wall. Those tile setters who are at work on window and door jambs have in addition, a stack of jamb blocks, piled separately, so they can easily be reached. The mortar is kept to the right consistency for bedding by a helper, instead of by the tile setter, leaving the latter free to do nothing but set the tiles in the wall. It has been found necessary to increase the number of helpers on a hollow-tile job, as tiles go so much faster into the wall than brick it requires more help to keep the supply stacked up on the scaffolding. Every contractor knows it pays to have plenty of laborers, so that the high-priced masons can work with greatest facility. Just so soon as it is necessary for a mason to reach around for material, or wait for supplies, he is losing money for his employer.

Wide-awake contractors have discovered that they can build up their own efficiency by a little careful study of the conditions of their business. One contractor in a small town adopted the policy of working along with his men, trowel in hand. He took the lead at one end of the wall, with the idea that he could thus save one man's wages. The

architect on the job, who was a man of a very logical turn of mind, took the contractor aside one day, "John," said he, "If you will promise not to be offended I will show you where you can save money. You are not so fast on bricklaying as you were in your younger days," the architect went on, "and the consequence is you are slowing building up your lead. The man at the other end of the wall takes his pace from you, and the men in between work at the same rate. Thus," said the architect, "your whole job is slowed down. Now, if I were you," suggested the architect, "I would spend my time as a general superintendent on the job. Put your fastest men on the leads and you will find the work will go much quicker." The contractor took his advice, put a couple of strapping young fellows on the leads and spent his time chasing material and glazing up the men. The result was higher speed and more profit.

Every man must examine his own business and study its personal characteristics if he would secure increased efficiency. Remedy for one business will be of no use to another. As a contrast to the above-mentioned incident, where one contractor was losing money by working with the men, another, in a thriving city of the Middle West, found out that he could make more money by doing one branch of the work himself. His attention was attracted by so much talk about the newer efficiency methods applied to the contracting business that he began to study his own with a view to reducing friction. The first thing that he found out was that there was considerable delay on every job securing material well in advance of the need of the workmen. He chased up the mills, the brick and tile yards and other sources of supply but at best he could only cut down the delay a small fraction. So he bought a good-looking wagon, capable of hauling a fair-sized load of material, and now, with himself a driver, he drives to the mill, where he picks up what is required in short order and rushes it to the job. He finds it better for him to drive the wagon himself than to employ a less efficient man as it is all important that material shall be delivered promptly. His work as driver does not interfere with his direction of the details of the job, which are taken care of at each trip to the building. Thus he is master of both ends of his business the supply of material as well as execution of the work, and all through the mediocrity of a little common sense and a fair-sized horse and wagon. Other contractors are using wagons and small automobiles in like manner, and it is usually found that they increase the efficiency of their organization.

In delivering material from the supply piles on the sidewalk to the scaffolds many contractors have found they can cut down the number of helpers by using push carts or wheelbarrows. One man can handle it nicely, and where the haul is great enough it pays to use such a cart. For mortar the wheelbarrow is now used by many firms. One man can load it up with mortar of the right consistency, and one load will supply several mortar boards.

Efficiency methods like these not only save money for the contractor and make work easier for his men, but they

also produce better work for the owner. All forms of business are just now going through a period of careful analysis to put them on a basis of increased efficiency. Efficiency engineers are working out the problem for factories, stores, corporations and municipal services, and some of the smartest of them have given consideration to the contracting business. Any contractor can soon tell whether his business is on the right plane of efficiency by the size of his bank account. If his business is dwindling, if some competitor is walking away from him, he may reasonably guess that something is wrong with the details of his own organization, a screw loose somewhere or a condition below par which ought to be corrected. Some contractors wonder how a competitor can take work at such low figures and come out whole. It doesn't occur to them that possibly that competitor is able to do work at a lower price by reason of the increased efficiency of his organization.

It is up to every contractor who wants to make money to give careful consideration to every part of his business, not merely the work of his men but his own work as well. Is every man occupying just the right place? Does the supply of material come fast enough to each job? Are all false and needless motions eliminated in the execution of the work? The contracting game is just like a game of checkers. You can move this way or that, and the smartest player will get into the king row with fewest moves. Every mistake costs something and puts off ultimate success just that much. Lay out your campaign carefully with a view toward reducing waste, and you will find more money in the bank at the end of the year than you have ever had before. Increased efficiency brings an increase in business, also. When a contractor is a live wire, with his business well organized, his reputation spreads. Men of ability are given preference on work every day, in small as well as large towns. Owners and architects like to deal with concerns of known efficiency even at a larger price, and this helps the man whose organization is built to reap the benefit.—Charles E. White, Jr., in *Building Progress*.

PROBLEMS IN HEATING AND VENTILATION.

Abstract from a Lecture Delivered by Mr. Arthur H. Barker, B. A., B. Sc., at The University College, London, published in *The Architect*.

In Touching upon the question of economy of heat by thermo-dynamic methods, Mr. Barker suggested that the heat from the air outside a building, as used for warming the interior, although of a much lower temperature than that required for this purpose.

The thermo-dynamic method of producing heat consists of the simple operation of compressing a gas, which act is sufficient to raise its temperature in proportion to the amount of energy expended.

Heating engineers have yet to fully appreciate the enormous economy of such methods of heat production which rescue themselves into the provision of a cheap power supply; for it is necessary to have power before heat can be obtained from the air in this way. The provision of electrical energy without the consumption of fuel would be a

solution of the problem, although not within sight of realization at the moment.

Further in consideration of the possibilities of utilizing waste heat from industrial enterprises for warming inhabited buildings, Mr. Barker suggested several heads, which included—

(1) Heat applied in excess of requirements, and wasted in bringing about results obtainable by a much smaller expenditure of energy, if properly applied, (2) heat lost by conduction through inefficient non-conductive material or leaky pipe joints, (3) heat contained in exhaust steam or condenser water; and (4) that which found it way in the form of flue gases direct into the open air.

The heat lost under the first two heads could be regarded as irrecoverable, but there were certain possibilities in the utilization of waste energy of the nature of numbers three and four.

Other forms of energy, such as, when contained in coal and dynamite, or, better still, electricity, could be transferred from place to place, but the same operation with heat must always be impossible. It was part of its very nature to get lost, inasmuch as it imparted some of its warmth to anything in contact with it or through which it passed.

At present the only purpose which the heat in the flue gases served was to create a draught through the furnace, a wasteful process when it was remembered that this could be effected quite as efficiently by means of a fan.

The present cost of fuel, however, made the existing methods possible, and it was not thought to be commercially profitable to face the outlay necessary in order to save the heat wasted in this way.

Another factor was the probable distance of the factory or works, where the heat was generated, from the building to be warmed, a consideration which limited the possibilities of the idea. Here again it was at present found cheaper to burn fresh fuel at the point where the heat was required, and the price of this fuel was the root factor of the whole problem.

The waste heat, after being collected and transferred to some medium such as water would have to be pumped from the centre through pipes to the various houses. What system could be devised for charging the consumer for this heat supply? It would be difficult to register the quality of heat used, for although this would be simple in the case of the quantity of water which passed through the meter, it would also be necessary to take into account its temperature. The charges might be levied according to the area of radiating surface provided on the annual value of the house.

There were many difficulties in the way of adopting such a scheme which would probably prevent the practical consideration of the idea until there was either a rise in the price of fuel or a decrease in the cost of power. In our climate, where prolonged cold was unknown, the saving would be less, compared with parts of America and the Continent, where it might be worth while to incur the necessary capital outlay under present circumstances.

The possibilities of leakages from the pipes would render it necessary to construct subways, preferably of sufficient size to allow a man to walk along them. An expense of probably £5,000 per mile

would thus have to be faced at the start. If steam were the medium employed, the water produced by condensation would have to be returned, and any difficulty as to levels would require a system of pumps for this purpose.

Some solution of the problem as to the expansion of large pipes was required, and here there was need for an efficient invention, there being no really satisfactory point to provide against this.

The whole cost of a system would mean for a 1-inch pipe, 1500 per mile, rising to £1,200 per mile for a pipe 9 inches in diameter, to which must be added the cost of subways, say, at 20s. per foot run, and cost of maintenance, power, and interest.

The essential hard fact was that the cost of heat saved must be sufficient to render it commercially profitable to face this capital outlay.

He had made a careful calculation of the requirements of a small establishment such as his own, and he thought that at the outside the heat necessary to warm his house was 25,000,000 thermal units per annum. Taking a thousand houses of this size, which would represent a small town of from 7,000 to 8,000 people, say two miles from a manufacturing centre, the output would need to be 20,000,000 thermal units per hour. Allowing for cost of plant, interest, and depreciation, it would then be necessary to charge each household £15 per annum for his heat supply, and he did not think that, with coal at its present price, many people would be willing to pay this amount, when they could, with a separate plant, warm their premises at half the cost.

Added to this was the fact that in this country the prejudice in favor of the open fire was so deeply rooted as to be practically irradicable.

Construction Work In Foreign Countries.

CANADA.

(From Consul General John E. Jones, Winnipeg.)

New Freight Terminal.

The Canadian Pacific Railway is planning a new terminal for through freight which will cost about \$7,000,000. This line is said to have at Winnipeg the largest car yard in the world. There are 132 miles of track, with accommodation for upward of 2,000 cars. Although this yard was planned for both local and through freight, a new terminal for through freight is now necessary; engineers are making plans for a clearing yard with accommodations for 5,000 cars, which involves placing 50 miles additional trackage. Winnipeg is the clearing point for the Canadian West, the development of which has been so rapid that enormous freight-moving facilities are necessary. The double-track system inaugurated by the Canadian Pacific some years ago has advanced rapidly, and has greatly relieved the freight congestion. The main line will be tapped somewhere east of Winnipeg, possibly as far west as Portage in Prairie; the through freight will then be diverted either north or south of the city, and the tracks will join the main line east of the Red River.

Proposed Vancouver City Expenditures.

(From Consul General David F. Wilber, Vancouver.)

At the recent city election 24 of the 32 proposed expenditures were approved by the electorate and are to be the subject of immediate action by the local authorities. They cover many hundred thousands of dollars expenditure for schools, sewers, waterworks, streets, parks, municipal buildings, etc., as indicated in Daily Consular and Trade Reports for October 7, 1911. The by-laws covering the expenditures must, I understand, be drafted, submitted to the electorate, and approved by it before tenders are called for, which will occupy several months.

The Vancouver Daily Province of January 13 gives a list of the measures passed and defeated. American firms which may be interested in the expenditures provided for should take immediate steps to secure whatever share of the business or work they may desire, as there is none too much time for this purpose, although there may be some delay in connection with drafting satisfactory by-laws.

MEXICO.

State Subventions for Railroad Building.

(From Consul Wilbert L. Bonney, San Luis Potosi.)

A legislative enactment signed by the governor affords aid in building local railway lines, especially in the eastern part of the State, known as the Huasteca. As indicated in Daily Consular and Trade Reports for January 26, that region is the richest portion of the State, but its settlement has been retarded through lack of transportation. The governor is authorized to assist railroad building by a subvention not exceeding \$4,000 gold for each kilometre (0.62 mile) of standard gauge connecting towns with each other or with the National Railway lines. Narrow-gauge lines will be aided by \$3,000 for each kilometre constructed in the Huasteca and \$2,000 per kilometre in other parts of the State. Crossings of public roads or over State lands will be donated, and constructing companies will be given the right to condemn necessary right of way. At the expiration of the 99-year contracts provided for, the railroads contemplated by the act shall become the absolute property of the State upon payment to the owners of a determined valuation for rolling stock and movable property. Such railroads as shall be built under the act will be required to carry State property, State troops, and officers at half rates. The act further provides that railroads built under its terms shall be exempt from State and municipal taxes for 15 years.

CANADA.

Extensive Undertakings on Vancouver Island.

(From Consul Abraham E. Smith, Victoria, British Columbia.)

The Portland Cement Construction Co. of Canada, subsidiary to the Associated Portland Cement Manufacturers (Ltd.) of London, England, has purchased 100 acres on Spanish Arm, 10 miles north of Victoria, and will establish there a \$1,000,000 cement works with 2,000 barrels daily capacity. The equipment is enroute. The contract for

buildings has been let to the McAlpine-Robertson Construction Co., of Vancouver; a branch of Robert McAlpine & Sons, of Glasgow and London.

It is announced that the Cowichan Lake branch of the Esquimalt and Nanaimo Railway on this island, built for the Empire Lumber Co. (subsidiary to the \$7,500,000 American Securities Co. of New York), represented here by E. B. Kurtz, president, will be completed May 1. The company is now letting contracts for logging operations on 5,000-acre timber holdings, and a large sawmill at Osborne Bay, the shipping point. Logging camps are being established at various points. The sawmill will be built on the unit plan, with an ultimate annual capacity of 100,000,000 feet.

The American firm of Moore & Bethick has been awarded a contract for building the first 18 miles of the suburban extension of the British Columbia electric line north from Victoria, along the Spanish Peninsula. Work is to begin as soon as weather permits. The Esquimalt and Nanaimo Railway Co. (Canadian Pacific) is now clearing the right of way on the extension from McBride Junction to Union Bay; the right of way has already been cleared from Union Bay to Oyster River, on the projected northern line. The same companies have given notice of intention to establish a town site and docks at Duncan Bay, on east coast of Vancouver Island, and nearly opposite Seymour Narrows. Plans therefore have been filed in the provincial registry office, and show Duncan Bay to be a fine, spacious harbor lying just east of Discovery Passage. The line, which is to be built is officially described as the "Conax extension of the Esquimalt and Nanaimo Railway, from Black Creek to a point on Campbell River, from mile 59 to mile 72.3." It is said the intention is to make Duncan Bay a port of call for steamers from Prince Rupert, and also to be in readiness for the future bridge across Seymour Narrows, which, when completed, will enable trains to run direct from Vancouver Island and the mainland.

New Ottawa Theatre.

(From Montreal Gazette.)

A new \$75,000 theatre, to seat 1,500, will be built this spring in Ottawa by a company of which D. J. Driscoll, of Ottawa, and G. F. Driscoll, manager of the Orpheum, Montreal, will be the head men. Work on the new theatre will commence early in April, and it will be modern in every detail.

MEXICO.

(From Consul Clarence A. Miller, Tampico.)

Hotels, Flats, Office Buildings and Hospitals.

Plans are being made by Louis Fouts, new owner of the Southern Hotel, for a large modern addition. The present part will also be remodelled. Hotel accommodations in Tampico have been quite inadequate.

Sr. Angel Trapaga has completed a four-room apartment flat which was fully leased before completion. There is much building in progress in the city. It is reported that several rows of residences are to be built in to supply the great demand, houses being scarce and rents high.

The Santa Fe News Co. is planning the erection of a six-story office building on a site just purchased. No contracts have been yet made. Much concrete work will be used in the building.

Plans are being made for a three-story office and business block to replace the recently burned Bergen Building. Communications should be addressed in Spanish to Sra. Margaret Bergen, Vda., Tampico, Mexico.

A new railroad station is being urged, and it is said that the National Railway Co. is studying the problem. The rapid growth of the city makes the solution difficult.

Plans for a modern private hospital are being made by Dr. S. H. Hodgson. Tampico greatly needs such an institution. The Huastec Oil Co. has opened a modern hospital at its camp at Ebanio, San Luis Potosi; it is in charge of Dr. Fred A. Holladay.

Sugar Mill, Brewery (Roads, Etc.)

Water concessions are sought in the State of San Luis Potosi by a successful sugar planter of Hawaii and Porto Rico. He intends to raise sugar cane on a large scale, and has also made long-time contracts with large sugar planters in the vicinity for their entire cane production. A modern sugar mill and refinery will be installed at some point on the railroad. Address P. McLane, Hotel Southern, Tampico.

Plans have been completed for a brewery and cold-storage plant in Tampico. No machinery has yet been purchased. Communications should be addressed to E. L. De Camp and J. N. Gruhl, Hotel Southern, Tampico. They are from San Antonio, Tex., and Milwaukee, Wis., respectively.

It is believed that the municipal council will shortly consider the building of a seven-mile road to La Barra, for which there is much call. It would be of great service for automobiles.

The concessionaires for filling in Lake Carpintero are said to have asked for a time extension. The filling in of this lake will benefit Tampico in many ways.

The local custom house is being renovated, painted, etc.

CANADA.

(From Consul General John E. Jones, Winnipeg, Manitoba, Feb. 2.)

Many New Hotels in the West.

The Grand Trunk Pacific Railway will construct this year seven hotels along its lines from Winnipeg to the Pacific Coast.

Plans for a 150-room \$150,000 hotel at Edmonton, Alberta, have been completed, and the contract will be let within a few weeks. A similar hotel at Regina, Saskatchewan, plans for which are being prepared, will also be erected this year. In addition the company will place several first-class hotels in the mountain division, the first to be built at Miette Hot Springs, another at Mount Robson, and one at Prince Rupert. Work on the "Fort Garry Hotel" in Winnipeg is going ahead rapidly, and the excavation is now almost completed.

Government Expenditures for Vessels, Harbors, Etc.

The British Trade Commissioner for Canada reports that among the items of proposed expenditure in the estimates submitted to the Canadian Parliament at Ottawa at the recent open-

ing of the session are the following: Provision of two new vessels for the fisheries protection service on the British Columbian coast, \$275,000; harbor and pier improvements at Port Arthur and Port Wladimir, \$1,000,000; improvements of navigation on River St. Charles at Quebec Harbor, \$1,000,000; construction of Hudson Bay Railway, \$2,000,000; National Transcontinental Railway, \$25,000,000; survey of Welland Canal, \$50,000; works in connection with dredging the River St. Lawrence from Montreal to Father Point, \$727,000.

(From Consul Frederick M. Ryder, Rimouski.)

Ten Million Dollars for Good Roads.

If the present plans of the provincial government do not miscarry, the Province of Quebec will have an excellent system of macadamized highways.

As announced by the Minister of Public Works, it is proposed to issue \$10,000,000 in bonds, at 4 per cent, payable in 40 years. The roads are to be built by the municipalities, under strict Government supervision, the cost of construction to be paid out of the Government appropriation and charged to the several municipalities through which the roads are laid out; 2 per cent interest on this amount will be paid by the Government and an additional 1 per cent provided as a sinking fund for redemption of the bonds at expiration, the remaining 2 per cent to be paid by the municipality.

Nine of the most important highways have been selected for immediate rebuilding and work upon these will be commenced as soon as frost is out of the ground in the spring. In fact two Government engineers are now doing preliminary work on what is known as the "International Highway," between Montreal and Roussin Point.

There are four macadamized roads, between Montreal and Quebec (two on each side of the River St. Lawrence), one of these following the shore and the other inland; one from Montreal to Ottawa; one from Levis to the Vermont line, passing through Beauce and Sherbrooke; one from Montreal to Roussin Point; one from Levis to Rimouski and thence to Gaspe, following the shore on the north side of the peninsula and one from Quebec to Tadoussac. Two hundred miles of roads are to be constructed in the Lake St. John district and the roads in the vicinity of Montreal suburbs are also to be rebuilt. (A map showing the route of the proposed roads may be obtained from the Bureau of Manufactures.)

It is figured that the appropriation will be sufficient to improve and build 3,200 miles of up-to-date roads, based upon a cost of \$3,000 per mile. Contracts will specify the highest grade of materials and constructed upon the most approved methods. The cost of maintenance will devolve upon the municipalities through which the roads pass.

These improved highways will open up some attractive scenery and stimulate a more general use of automobiles throughout the province, as these can now be used only in and around Montreal with any degree of comfort.

This extensive work will necessitate a considerable outlay for modern road-building machinery, few parishes being equipped for doing this class of work.

(From the Montreal Gazette.)

Port Works—Water-Power Development—Street Car Lines.

The \$5,000,000 for Montreal's harbor improvements just voted at Ottawa is the second installment of \$18,000,000 which is necessary for carrying out the port works' program.

Plans for the 500-horsepower hydroelectric development on the St. Lawrence have now been arranged by the newly formed Cedar Rapids Manufacturing & Power Co. The mechanical details are being worked out by Chief Engineer Henry Holgate and a large staff in the Richelieu Building, Montreal. Tenders will probably be called for the dike and power house without much delay, as it is desired to begin active operations in early spring. The site is opposite St. Timothy in the county of Soulanges, where it is expected to have 1,000 men at work next summer. D. Lorne McGibbon, the head of the enterprise, is placing \$5,000,000 bonds, through New York bankers, with English investors. The company plans eventually to generate 100,000 horsepower.

The act of legislation under which the city of Toronto may construct street car lines went into effect on February 2. The citizens have already passed the by-law for the Danforth Avenue line.

MEXICO.

(From Daily Herald, Mexico City.)

Port Works — Railway Construction.

Ing. Manuel Uruquidí, Subsecretary of the Department of Communications and Public Works, is about to visit Pacific coast ports where some improvements will soon be undertaken. The port works at Progreso will not be carried out at present, as the expense would be about \$16,000,000 gold. The Government has granted a concession to Vicente Mistrella to construct a railway from Frontera along the Rio Saca, through the State of Tlaxcala, toward the boundary of Chiapas. This will open up a fertile country. J. Ignacio Shirley, who represents the concessionaire, says that the company will build a branch to San Juan Bautista and another branch north to the Santa Ana River country.

Work on the Mexican short line, Tampico to Mexico City, will be resumed shortly and pushed as rapidly as circumstances will permit. Large stocks of material have been accumulated near Tamas, and preparatory work for the giant bridge across the Panuco River is now under way.

Rev. R. J. Campbell, the noted English non-conformist divine, who recently returned to London after a trip through this State is reported as saying a good many complimentary things about California to a representative of the New York Times. Among other things he said:

"I liked California best of all. It has a magnificent climate, and the country is a paradise on earth. I have seen nothing to compare with it. London looks drear in comparison. I could have stayed in California forever. I fell right in love with it."

He also credited the people of this state with more intellectual eagerness, more brightness of mind and alertness than he found anywhere else. This should be good literature for the California Development Board.

Firms desiring news on special classes of buildings such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

San Francisco—Apartment house, 3 story and base, frame, \$15,000. Architects, C. M. and A. F. Rousseau, Monadnock Bldg., S. F. Owners, Rousseau Realty Co. The building will be erected on a corner and will cover an area of 32x25 feet. The building has been designed for twelve apartments of the three and four room variety. There will be steam heat and wall beds. The interior trim will be of Douglass Fir and some hardwood. There will be considerable tile and marble used. The exterior of the building will be covered with shiplap and brick veneer. The plans are complete and figures are being taken.

San Francisco—Apartment house, 3 story and base, reinforced concrete, \$25,000. Architects, Ross & Bergen, 222 Kearny St., S. F. Owner's name withheld. The building will contain a number of two and three room apartments arranged with connecting baths. There will be steam heat and wall beds. The interior trim will be of pine and hardwood. The exterior of the building will be faced with cement plaster. Figures are now being taken on the work.

San Francisco—Apartment house, 6 story and base, brick and steel, \$70,000. Architect, Edward G. Garden, Phelan Bldg., S. F. Owner's name withheld. The building will be erected on Mission street. There will be in the neighborhood of 120 rooms arranged in suites of from two to four rooms each with connecting baths. There will be steam heat and elevator service. The trim will be of pine. There will be stores on the first floor. The exterior of the building will be faced with pressed brick and terra cotta. The architect has started the working drawings and more complete details of the work will be given later.

San Francisco—Apartment house, 5 story and base, brick and steel, \$15,000. Architect, J. Bernard Joseph, First National Bank Bldg., S. F. Owner, Ray Levin. The building will be erected on Franklin street near California. The apartments will be arranged in suites of two, three and four rooms each with baths. The interior will be handsomely finished. There will be steam heat and wall beds. The exterior of the building will be faced with pressed brick. The plans will be completed within a month.

San Francisco—Apartment house, 4 story and base, reinforced concrete. Cost not stated. Architect, M. Mattanovich, Pacific Bldg., S. F. Owner's name withheld. The architect has completed plans for an apartment house building which is to contain 19 suites of two and three rooms each with baths. There will be steam heat, elevators and wall beds. The exterior of the building will be faced with cement plaster. The plans for the excavating are complete and figures are being taken. Plans for the balance of this work will be put out for figures shortly.

San Francisco—Apartment house addition and alterations, \$15,000. Archi-

tect, Henry H. Meyers, Kohl Bldg., S. F. Owners, Goldberg-Bowen Co. The work will consist of a two-story frame addition to the present one-story building on Haight street. The apartments will be arranged in three and four room suites with baths. There will be a heating system. The exterior of the building will be covered with cement plaster. Plans are being prepared.

Stockton, San Joaquin Co., Cal.—Apartment house, 2 story and base, brick, \$10,000. Architect, W. B. Thomas, San Joaquin Bldg., Stockton. Owner, J. A. McAfee. The building has been designed for stores on the first floor and living apartments on the upper floor. The interior trim will be of pine throughout. There will be modern plumbing. The exterior of the structure will be faced with pressed brick. The architect is now completing the working drawings.

Los Angeles, Cal.—Apartment house, 3 story and base, brick. Cost not stated. Architects, Hudson & Munsell, Stimson Bldg., L. A. Owner, Mrs. Mary E. Regan. The building will be 42x33 feet and has been designed to contain four stores on the first floor and 21 rooms on the upper floors. The apartments will be arranged in suites of two and three rooms each and baths. There will be steam heat and wall beds. The exterior of the building will be faced with pressed brick. The plans are complete and figures are being taken.

Oakland, Cal.—Apartment house, 2 story and base, frame. Cost not stated. Architects, Wilde and Schaefer, Albany Block, Oakland. Owner, C. S. Nielson. The building has been designed for several stores on the first floor and living apartments on the upper floor. The interior will be finished in pine. There will be connecting baths. The exterior of the building will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

San Francisco—Apartment house, 5 story and base, brick and steel, \$10,000. Architect, C. H. Burnett, 281 Bush St., S. F. Owner, J. H. Bollig. This work has been mentioned here before when the plans were first started. The building will contain about 210 rooms arranged in suites of from two to four rooms. All suites will have connecting baths. There will be steam heat, wall beds and elevator service. There will be a vacuum cleaning system. The exterior of the building will be faced with cement plaster. The plans are now complete and figures are being taken.

San Francisco—Apartment house, 2 story and base, frame, \$20,000. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner, S. M. Shaw. The building has been designed for 12 modern apartments arranged in suites of two, three and four rooms each with connecting baths. There will be steam heat and wall beds. The interior finish will be of pine. The exterior of the building will be covered with shiplap and brick veneer. The plans are to be completed at once and the owner will do the work by Day Labor.

Los Angeles, Cal.—Apartment house, 3

story and base, brick and steel, \$50,000 to \$70,000. Architect, Robert M. Taylor, Douglass Bldg., L. A. Owner, Marcos Landsberg. The plans for this building have been called in and the owner has instructed the architect to revise the same, making the structure considerably larger than at first intended. New plans will be placed on the market as soon as the work of revision can be completed.

Contract Awarded.

Seattle, Wash.—Apartment house, 3 story and base, brick, \$25,000. Architects, Quandt & Creutzler, Haight Bldg., Seattle. Owner, John L. Lang. Contractor, Philip Viehmann, 1321 4th Ave., West, Seattle. Contract price, \$35,900.

BANKS.

Fresno, Fresno Co., Cal.—Bank and offices, 6 story and base, Class A construction. Cost not stated. Architect, Edward T. Poole, Crocker Bldg., S. F. Owners, Rowell and Chandler. This work has been mentioned here a number of times before as the plans progressed. The figures have been taken for the excavation and a contract for the steel work has been awarded to the McClintic-Marshall Construction Co., Monadnock Bldg., S. F. Plans for the general construction are complete and figures will be called for at once.

Taft, Kern Co., Cal.—Bank, 1 story and base, brick and steel, \$12,000. Architect, W. H. Weeks, 251 Kearny St., S. F. Owners, First National Bank of Taft. The building will be designed for the exclusive use of the bank. There will be hardwoods and marble used in the trim of the banking room and offices. There will be coin and safety deposit vaults. The exterior of the building will be faced with pressed brick. The architect has opened figures for the construction and a contract will be awarded at once.

BRIDGES, DAMS AND HARBOR WORK.

Lockeford, San Joaquin Co., Cal.—Bridges, 2, concrete and frame. Cost not stated. Engineer, County Surveyor Quale, Stockton. Owners, San Joaquin County. Plans for two bridges in the Lockeford Road District have been completed and figures are now being taken. Bids will be opened by the Board of Supervisors on March 5th. Plans can be secured from the County Surveyor.

San Francisco—Sea wall rock construction. Cost not stated. Engineer, Director of Works, Panama Pacific Exposition, Exposition Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids for the construction of a sea wall and for one million feet of fill work were opened today in the offices of the Exposition Co. Awards of contract will be given in the next issue of the Building and Industrial News.

California City, Maricopa Co., Cal.—Dry Docks etc., \$4,000,000. Engineers, Department of Yards and Docks, Washington D. C. Owners, U. S. Government. The official announcement has been made of the selection of California City as the site for the two proposed new dry docks, which are the largest in the world. This will mean the construction of a large number of

other buildings. The plans for the work are now under way in Washington.

Hermosa Beach, Los Angeles Co., Cal.—Pier, reinforced concrete and wood, \$60,000. Engineer, City Engineer Hermosa Beach. Owners, City of Hermosa Beach. A bond election is to be called for at once for the construction of the new municipal pier. Preliminary estimates for the work have already been submitted by the Mercereau Bridge and Construction Co.

Pasadena, Los Angeles Co., Cal.—Bridge, reinforced concrete, \$200,000. Engineers, Waddell & Harrington, L. A. Owners, City of Pasadena. The City Trustees have approved the plans for this work. The plans provide for a structure 160 feet long with a bituminous roadway 28 feet wide and two five-foot sidewalks. Bids will be taken for the work as a whole and a contract will be let on March 26th. Plans can be secured from the City Clerk.

Contracts Awarded.

Portland, Ore.—Bridge, reinforced concrete, \$75,000. Engineer, City Engineer, Portland. Owners, City of Portland. Contractors, International Const. Co., Central B'dg., Seattle. Contract price, \$65,236. Note: This is the lowest figure submitted, and while the contract has not been awarded, it is generally accepted that the contract will be signed.

Seattle, Wash.—Canal construction. Cost not stated. Engineer, Major J. B. Cavanaugh, Burke Bldg., Seattle. Owners, U. S. Government. Contracts for the three sections of this work were awarded as follows: To Stillwell Bros., Henry Bldg., the contract for the third section of the Lake Washington Canal on their bid of \$140,000 and to the Puget Sound Bridge and Dredging Co., Central Bldg., the contract for section 1 at \$134,722. The contract for section 2 for which Holt & Jeffrey, Hinkley Block, bid low at \$94,170, has not as yet been awarded as the matter of disposal of earth to the best advantage of the city has not been decided. Section 1 involves 750,000 cubic yards, section 2, 430,000 cubic yards.

COURT HOUSES.

Olympia, Wash.—Temple of Justice 4 story and base. Class A construction, \$250,000. Architects, Wilder & White, New York City. Owners, State of Washington. This work has been mentioned here several times before. The bids were opened on February 26th and a contract will be awarded shortly. A complete list of the figures will be published here next week.

Contracts Awarded.

Pasco, Wash.—Court house, 2 story and base, brick and steel, \$150,000. Architect's name not given. Owners, Pasco County. Contractors, Misko & Grant, Globe Bldg., Seattle. Note: The contractors are now taking sug-figures on the steel, ornamental iron, face brick, lumber, terra cotta and sheet metal work.

CHURCHES.

Portland, Ore.—Church, steel and brick, \$100,000. Architect, Ellis F. Lawrence, Portland. Owners, Westminster Presbyterian Church. The plans for this work are now being checked over by the Building Inspec-

tor. The contract for the masonry work has been awarded to Thomas Burgoyne and the contract for the plumbing to the Foreman-Walker Co.

Contracts Awarded.

base, brick, \$10,000. Architect's name not given. Owners, Emanuel Lutheran Church. Contractors, Syllanzen & Sanda, Arcade Bldg., Seattle. Contract price, \$10,000.

FACTORIES & WAREHOUSES.

San Francisco.—Warehouse, 1 story and base, brick, \$4,000. Architect, none. Owner, James E. Cone, Golden Gate Ave. and Leavenworth St., S. F. The building has been designed for a shop and warehouse combined. There will be some structural steel. The exterior will be faced with stock brick. The plans are in the hands of the owner and the work will be done by Day Labor.

Inhonor Island, Wash.—Flour mill, 4 story and base, reinforced concrete, \$100,000. Architects, Bell and Mendell, Penny Bldg., Seattle. Owners, Charles H. Lilly Co. The building will be 60x100 and is to be the first unit of a large plant. The next work to be undertaken by the company will be the construction of two 2-story reinforced concrete warehouses. Plans for all of this work are now under way in the offices of the architects.

Seattle, Wash.—Warehouse, 1 story and base, steel and reinforced concrete, \$15,000. Architect none. Owner, J. M. Rutnick, 1711, 12th Ave., Seattle. The building will be 60x135 feet and will be used as a warehouse. The construction will be fireproof. The plans are in the hands of the owner and he is letting all contracts.

San Pedro, Los Angeles Co., Cal.—Grain elevators, reinforced concrete, \$15,000. Engineers, Richards-Neustadt Const. Co., Wright and Callender Bldg., L. A. Owners, Globe Grain and Milling Co. The engineers are now preparing new plans for this work as the construction has been changed to reinforced concrete. The revised plans will be ready for figures shortly.

FLATS.

San Francisco.—Flats, 3 story and base, frame, \$3,000. Architect, none. Owner, T. Tyndall, 31 Rausch St., S. F. The building has been designed for a three-flat building. Each flat will consist of five rooms and bath. There will be pine finish throughout. The exterior of the building will be covered with shiplap. The plans are complete and the work will be done by Day Labor.

San Francisco.—Flats, 2 story and base, frame, \$5,000. Architect, E. Rushmer, Whittell Bldg., S. F. Owner's name withheld. The building will contain four modern flats of five and six rooms each and bath. The interior finish will be of pine with some hardwood floors. There will be open fire places and tile or brick mantels. The exterior of the building will be covered with shiplap and veneer artificial stone. The plans are complete and figures are being taken.

San Francisco.—Flats, 3 story and base, frame, \$5,000. Architect, C. Fantoni, 4 Columbus Ave., S. F. Owner's name withheld. The building will contain three flats of five and six rooms each with baths. The interior trim will

be of pine throughout. There will be gas grates. Considerable marble and terrazzo will be used. The exterior of the building will be covered with shiplap and brick veneer. The plans are complete and the architect is taking figures.

GARAGES.

Los Angeles, Cal.—Garage, 1 story and base, brick and steel. Cost not stated. Architect, Frank M. Tyler, Union Trust Bldg., L. A. Owner, Robert Howland. The building will be 52x108 feet and has been designed for a commercial garage. There will be sales rooms as well as a machine shop. A cement floor will cover the entire area. The exterior of the building will be faced with cement plaster. The plans are complete and figures are being taken.

GOVERNMENT WORK AND SUPPLIES.

The contract for the construction, complete, of the U. S. post office at Bismark, N. D., has been awarded to John Lauritzen, Fergus Falls, Minn., at \$125,950.

A contract has been awarded by the Secretary of the Interior to the American Hoist and Derrick Co., of St. Paul, Minn., for furnishing four electric hoists and derricks for use in the work of construction on the Arrowrock dam, Boise irrigation project, Idaho. The price for this equipment is quoted by the successful bidder is \$14,336.91.

The quartermaster general's office is engaged on the plans of the new "concentrated" army post at Schofield Barracks, near Honolulu, where will be built barracks and quarters and other buildings to accommodate one regiment of cavalry in accordance with a plan which was a development by a special board in the War Department. The construction will be accomplished within the amount authorized by Congress, which is \$600,000, and the work will be pushed to completion as rapidly as possible. It is intended to purchase the material for these buildings by contract after competitive bidding, and to do the work of erection by hired labor. The bids for furnishing the material will be invited shortly. It will be necessary to purchase the steel in the east and the lumber on the Pacific Coast. The work of construction will be in general charge of Major B. Frank Cheatham, of the quartermaster's department, who was head of the board which recommended the plan for the new post and who will leave Washington for his new station at Honolulu on March 15. In addition to being constructing quartermaster, he will be chief quartermaster of the Department of Hawaii. He will be assisted in the supervision of the construction of the new post by Captain Frank B. Edwards, of the coast artillery corps, who is a detailed officer of the quartermaster's department, and who has been in Honolulu for some months.

A contract has been awarded by the Secretary of the Interior to Maney Bros. & Co., of Boise, Idaho, for the construction of 12 miles of the west canal, Uncompahgre Valley project, Colo., in the vicinity of Montrose. The work involves the excavation of about

210,000 cubic yards of material in open cut and 1,750 linear feet of tunnel. The price at which the work was awarded under the proposal of the successful bidder is \$78,362.

The additional estimate sent to Congress by the Secretary of War providing \$225,580 for barracks and quarters contemplates the following construction and repairs: Presidio of San Francisco, one field officer's quarters, \$10,000; two double company officers' quarters, \$26,250; two double non-commissioned officers' quarters, \$11,500; two field officers' quarters, \$20,000; repairing and remodeling old existing officers' quarters, \$35,920; repairing and remodeling quarters for non-commissioned officers, \$16,500; four cavalry stables, \$22,000; two quartermasters' stables, \$11,300; two wagon sheds, \$8,000; one equipment shed for signal corps, \$5,000; one general storehouse, \$20,000; one shop building, \$10,000. Fort Mason supply depot, Cal.: One stable and wagon shed for division headquarters, \$19,200.

The quartermaster general of the Army says: The buildings proposed for Presidio of San Francisco are necessary to provide reasonable and modern accommodations for the present authorized garrison, which consists of 1 regiment of infantry, 1 squadron of cavalry, 2 companies of signal corps, 1 company hospital corps, and a school for cooks and bakers, and this estimate contemplates remodeling and repairing existing officers' and non-commissioned officers' quarters so as to make them suitable and permanent. With the squadron barrack now estimated for under the appropriation "Military posts" the Presidio will be provided with sufficient accommodations for its authorized garrison. The stable and wagon shed contemplated at Fort Mason supply depot is required for division headquarters and for the depot quartermaster. The amount now called for was included in the estimates as originally submitted by the quartermaster general, but were omitted from the estimates which reached Congress. The items are resubmitted in accordance with instructions just received from the Secretary of War."

HALLS AND SOCIETY BUILDINGS.

Oakland, Cal.—"Club house, 1 story and base, frame. Cost not stated. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owners, Lake-side Canoe Club. The building will be erected at Lake Side Park in Oakland. There will be a storage place for boats, meeting room and social hall. The interior finish will be of pine. The exterior of the building will be covered with shingles. The plans are complete and the architect is taking figures on the work.

San Francisco—Armory, 4 story and base. Class A construction, \$500,000. Architect, State Architect Diggs, Sacramento. Owners, State of California. The new State Engineer, McClure, has notified the Mission Promotion League to the effect that the working drawings for this building are progressing rapidly and that figures will be taken by the end of March.

St. Johns, Ore.—Lodge hall, 2 story and base, brick. Cost not stated. Architect, Ernest Kroner, Portland. Owners, Lauri Lodge, No. 186 of the I.

O. O. F. of St. Johns. The building will be arranged for two stores on the first floor and a meeting hall and offices above. The exterior will be faced with cement plaster and trimmed with artificial stone. The plans are complete and figures are being taken.

HOSPITALS.

Los Angeles, Cal.—Ward building brick and frame. Cost not stated. Architect, Supt. of County Buildings, George Low, L. A. Owners, Los Angeles County. The building has been designed for a ward building for the fever patients, and will be 18x108 feet. There will be four wards, kitchens, dining rooms and toilets. The exterior will be faced with cement plaster. The plans are being prepared.

Contract Awarded.

Seattle, Wash.—Hospital, 3 story and base, brick, \$30,000. Architect, J. S. Cote, Haight Bldg., Seattle. Owner, Dr. E. M. Reinger. Contractor, Gust Eckloff, 625 East Lynn St., Seattle. Contract price, \$26,590, general construction. Heating and ventilating, Pacific Heater and Blower Co., \$6,110.

HOTELS.

San Francisco—Hotel, 7 story and base, brick and steel, \$75,000. Architect, George William Kelham, Crocker Bldg., S. F. Owner, Dr. G. W. Morton. This work has been mentioned here before when the plans were first started. The building will be designed for stores on the first floor and a large number of single rooms on the upper floors. There will be steam heat and elevator service. There will be considerable structural steel used. The exterior finish will be of pressed brick and terra cotta. The plans are now complete and the architect is taking figures.

San Francisco—Hotel, 3 story and base, frame, \$15,000. Architect, David C. Coleman, Metropolis Bank Bldg., S. F. Owner, Charles Katz. The building will be 36x118 feet. The first floor will be arranged for stores and the upper floors for a rooming house. The interior finish will be of pine throughout. There will be running water in all rooms. The exterior of the building will be covered with shiplap. The plans are complete and the work will be done by Day Labor.

Los Angeles, Cal.—Hotel, 10 story and base, reinforced concrete and steel, \$200,000. Architects, Noon & Kissel, Wright and Callender Bldg., L. A. Owners, Los Angeles Cemetery Association. The building will cover an area of 60x155 feet. There will be a complete steel frame and exterior walls and floors of reinforced concrete. The first floor will contain three stores and the main lobby. There will be 243 guest rooms with connecting baths on the upper floors. There will be steam heat, elevator service, vacuum cleaning system and mail chutes. There will be a large amount of marble, tile and scagliola work used. The exterior of the building will be faced with cement plaster. The building has been leased to Charles H. Stillwell. The plans are now being prepared.

Pomona, Los Angeles Co., Cal.—Hotel 5 story and base, reinforced concrete. Cost not stated. Architect, Jerome B. Legg, 764 North Garay Ave., Pomona. Owners, Avis Syndicate. The building

will be 66x105 feet. The first floor will contain stores, main lobby and a public dining room. The upper floors will be arranged for guest room ensuite and single with baths. There will be steam heat and elevator service. The exterior will be faced with cement plaster trimmed with artificial stone. The plans are complete and figures are being taken.

Los Angeles, Cal.—Hotel, 8 story and base, reinforced concrete. Cost not stated. Architect, W. J. Saunders, Wright and Callender Bldg., L. A. Owner, F. W. Braum. The owner states that new figures will be taken on this building at once. The Alhambra Const. Co. submitted the lowest figures on this work but have refused to sign up a contract.

Long Beach, Los Angeles Co., Cal.—Hotel, 5 story and base, reinforced concrete. Cost not stated. Architect, A. J. Daniels, 1050 South Bonnie Brue St., L. A. Owner, Scott Alexander. The building will be 50x50 feet. The first floor has been arranged for stores and a number of single rooms on the upper floors. There will be steam heat and elevator service. The exterior of the building will be faced with pressed brick. The plans are in the hands of the owner and he is now taking figures on the work.

RAILROAD CONSTRUCTION—STATIONS AND EQUIPMENT.

Aberdeen, Wash.—Depot, 2 story and base, brick and steel, \$60,000. Architect, Hulman, Union Depot, Seattle. Owners, Oregon-Washington Railroad and Navigation Co. The plans for this work, which has been mentioned here several times before, can now be had of the above mentioned architect. Bids for the construction will be opened on March 10th.

Hoquiam, Wash.—Depot, 2 story and base, concrete and brick, \$40,000. Engineering Dept. Northern Pacific Co., 2nd and Kings Sts., Seattle. Owners, Northern Pacific Co. The building will contain a ladies' and gentlemen's waiting room, offices for the agents and staff and toilets. There will be steam heat. The exterior of the building will be faced with pressed brick. The plans are complete and figures will be called for at once.

Contracts Awarded.

North Yakima, Wash.—Broad road extension, \$300,000. Engineering Dept. Yakima Valley Navigation Co., North Yakima. Owners, Yakima Valley Navigation Co. Contractor, W. L. Tibble, Commercial Hotel, North Yakima. Note This contract includes the construction of a steel and concrete bridge.

RESIDENCES.

San Francisco—Residence, 2 story and base, frame, \$8,000. Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owner, Mrs. C. M. Flickert. The dwelling has been designed for an eight-room house with baths. There will be furnace heat and open hearth places. The interior finish will be of pine and hardwood. The floor will be of oak in the principal rooms. The mantel will be of tile or brick. Tile will be used in the baths and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans

are now nearly complete. Figures will be taken by the architect.

San Francisco—Residence, 4, 2 story and base, frame, \$4,000 each. Architect, none. Owner, S. A. Horn, 636 Market St., S. F. The dwellings will be erected in the Marine View District. Each dwelling will contain eight rooms and bath. The interior trim will be of pine with hardwood floors in the principal rooms. There will be furnace heat and open fire places. The exterior of the dwellings will be covered with shingles, brick veneer and cement plaster. The plans will be completed shortly and the work will be done by Day Labor.

San Francisco—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, C. A. Hall, 1318 5th Ave., S. F. The dwelling will contain seven rooms and bath. The interior trim will be of pine throughout. Hardwood floors will be used in the principal rooms. There will be open fire places with brick mantels. The exterior of the dwelling will be covered with shiplap and rustic. The plans are in the hands of the owner and the work will be done by Day Labor.

San Francisco—Residence, 2 story and base, frame, \$3,000. Architect, L. M. Weisman & Son, Pacific Bldg., S. F. Owner, F. L. Weisman. The dwelling has been designed for a seven-room house with bath. The interior trim will be of pine with some oak floors. There will be open fire places with tile or brick mantels. The tile will be used in the bath room. The exterior of the dwelling will be covered with shiplap. The plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Residence, 3 story and base, frame, \$10,000. Architect, C. S. Kaiser, Mechanics' Inst. Bldg., S. F. Owner, Mrs. E. M. Roeding. The dwelling will contain in the neighborhood of twelve rooms and three baths. The interior finish will be of pine, hardwoods and white enamel. There will be furnace heat and open fire places. The mantels will be of brick and tile. There will be hardwood floors throughout. Tile will be used extensively. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the architect is taking figures on the work.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, \$6,500. Architect, Charles F. Whittlesey, Pacific Bldg., S. F. Owner, Dr. J. W. Thatcher. The dwelling has been designed for an eight-room house with all modern conveniences. The interior finish will be of pine and white enamel. There will be furnace heat and open fire places. The floors will be of hardwood. The mantels will be of brick and tile. The exterior of the dwelling will be covered with cement plaster on metal lath. The architect is taking figures on the work.

Oakland, Cal.—Residence, 2 story and base, frame, \$5,000. Architect, C. and B. Barton, 470 13th St., Oakland. Owner, Mr. and Mrs. Francis McAllister. The dwelling will contain seven rooms and baths. There will be furnace heat and open fire places. The mantels will be of brick. The interior trim will be of pine with hardwood floors. Terrazzo will also be used on some of the floors. Tile will be used in the bath. The exterior of the dwelling will be covered with cement

plaster on metal lath. The plans are complete and figures are being taken.

Oakland, Cal.—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, C. M. McGregor, 460 13th St., Oakland. The dwelling has been designed for a six-room house with bath. The interior trim will be of pine and redwood. There will be open fire places with tile or brick mantels. The exterior of the dwelling will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Bungalows, 1 story and base, frame, \$2,000. Architect, none. Owner, R. J. Nelson, 1512 Carlton St., Berkeley. The dwelling will contain five rooms and bath. There will be pine trim and some hardwood floors. There will be open fire places and tile or brick mantels. The exterior of the bungalow will be covered with shingles. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Bungalow, 1 story and base, frame, \$3,000. Architect, none. Owner, A. H. Faust, 515 Lincoln Ave., Alameda. The dwelling has been designed for a six-room house with bath. The interior finish will be of pine with some oak floors. There will be furnace heat and open fire places. The mantels will be of tile or brick. The tile will be used in the bath and kitchen. The exterior of the bungalow will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, \$3,000 and \$3,500. Architect, none. Owner, Miss L. Hall, 2618 College Ave., Berkeley. The dwellings will contain seven and eight rooms respectively. There will be pine and redwood finish. Both will have furnace heat and open fire places. The mantels will be of brick and tile. Some oak floors will be used. Tile will be used in the baths and kitchens. The exteriors of the dwellings will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Bungalow, 1½ story and base, frame, \$3,500. Architect, Olin S. Grove, 2911 Telegraph Ave., Berkeley. Owner, L. W. Cutler. The dwelling will contain seven rooms and bath. The interior finish will be of pine and white enamel. There will be oak floors in the principal rooms. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Oakland, Cal.—Residence 2 story and base, frame, \$3,500. Architect, none. Owner, R. W. Gilmore, Laguna Vista Apartments, Oakland. The dwelling will contain seven rooms and bath. There will be furnace heat and open fire places with brick or tile mantels. The interior finish will be largely of pine. Hardwood will be used in the floors of the principal rooms. Tile will be used in the bath and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are in the hands of the owner and figures are being taken.

Oakland, Cal.—Bungalow 1½ story and base, frame, \$2,000. Architect none. Owner E. Maasburg, 5301 Dover St., Oakland. The dwelling has been designed for a 7-room house with

bath. The interior trim will be of pine and redwood. The floors will be of oak in the principal rooms. Tile will be used in the bath. There will be open fire places with brick mantels. The exterior of the dwelling will be covered with rustic and brick veneer. The plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Bungalows, 2-1 story and base, frame, \$2,500 each. Architect A. J. Hassel, Y. M. C. A. Bldg., Berkeley. Owners, Patrick-Nelson Co., 2025 Addison St., Berkeley. The dwellings will each contain five rooms and bath. The interior finish will be of pine throughout. There will be open fire places with brick and tile mantels. The exteriors of the bungalows will be covered with shingles and cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Bungalow 1½ story and base, frame, \$3,000. Architect, M. L. Newsum, 81 Broadway, Oakland. Owner, Mr. Shaw. The dwelling will contain seven rooms and bath. The interior finish will be of pine and redwood. There will be open fire places and tile or brick mantels. There will be some oak floors. The exterior of the dwelling will be covered with rustic and shingles. The plans are complete and figures are being taken.

Oakland, Cal.—Residence 2 story and base, frame, \$3,500. Architect none. Owner James McGuinness, 1235 Broadway, Oakland. The dwelling will contain seven rooms and bath. The interior trim will be of pine and redwood. There will be some hardwood floors. There will be open fire places and tile or brick mantels. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Gilroy, Santa Clara Co., Cal.—Bungalow, 1 story and base, frame, \$2,500. Architect, E. W. Stillwell, Henne Bldg., L. A. Owner's name withheld. The dwelling will contain six rooms and bath. The interior finish will be of pine and white enamel. There will be some oak floors. There will be open fire places and brick mantels. The exterior of the bungalow will be covered with rustic. The plans are now being figured.

Woodside, San Mateo Co., Cal.—Residence, 2 story, attic and base, frame, \$26,000. Architects, Miller and Colman, Lick Bldg., S. F. Owner, E. R. Diamond. The dwelling has been designed for a handsome country residence. There will be in the neighborhood of 12 rooms and three baths. The interior finish will be of pine, hardwoods and white enamel. There will be hardwood floors. There will be furnace heat and open fire places with tile and brick mantels. The tile will be used extensively. The exterior of the residence will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Stockton, San Joaquin Co., Cal.—Residence, 2 story and base, frame, \$3,500. Architect, William B. Thomas, San Joaquin Bldg., Stockton. Owner, R. M. Dixon. The dwelling will contain seven rooms and bath. The interior trim will be of pine with some oak floors. There will be open fire places. The mantels will be of brick. The exterior of the dwelling will be covered with rustic. The architect is preparing the plans.

Lockeford, San Joaquin Co., Cal.—Residence, 1 story and base, reinforced concrete, \$3,500. Architect, William B. Thomas, San Joaquin Bldg., Stockton. Owner, W. M. McGary. The dwelling will contain about seven rooms and bath. The interior trim will be of pine hardwood floors. There will be open fire places and tile mantels. Tile will be used in the bath and kitchen. The exterior of the dwelling will be faced with cement plaster. The architect is preparing the plans.

Stockton, San Joaquin Co., Cal.—Residence, 2 story and base, frame, \$1,000. Architect, Walter King, Elks' Bldg., Stockton. Owner, Frank Capurro. The dwelling has been designed for an 8-room house with baths. The interior trim will be largely of pine. There will be some hardwood floors. The mantel will be of tile. There will be furnace heat and open fire places. The exterior of the dwelling will be covered with rustic. The plans are being prepared.

Stockton, San Joaquin Co., Cal.—Bungalow, 1 story and base, frame, \$3,500. Architect, Walter King, Elks' Bldg., Stockton. Owner, R. C. Graham. The bungalow has been arranged for seven rooms and baths. The interior finish will be of pine with hardwood floors in the principal rooms. There will be furnace heat and open fire places. The exterior of the bungalow will be covered with cement plaster on metal lath. The plans are being prepared.

Inglewood, Los Angeles Co., Cal.—Residence, 2 story and base, frame. Cost not stated. Architect, A. C. Smith, 307 South Broadway, L. A. Owner, W. M. Hicks. The dwelling will be 48x41, and will contain twelve rooms and baths. There will be mahogany and birch trim, hardwood floors, furnace heat and open fire places. The mantels will be of brick and stone. There will be a garage built in connection. The exterior of the dwelling will be covered with cement plaster and sand-lime brick. The architect is preparing plans.

SCHOOLS.

Riggs, Butte Co., Cal.—School, 2 story and base, brick, \$20,000. Architects, Parker & Kenyon, 24 Kearny St., S. F. Owners, Biggs School District. The following bids were received for the construction of this building. The contract has been awarded to Campbell & Turner, Sacramento. J. C. Evans, \$23,148; McElvany Construction Co., \$22,800; Brady & Fisher, \$22,695; Carl T. Palm, \$22,296; Roberts Bros. Construction Co., \$22,000; Bert T. Owsley, \$22,200; Peterson & Wilson, \$22,235; McLaughlin & Walsh, \$21,734; Campbell & Turner, \$20,990.

Berkley, Alameda Co., Cal.—School, 2 story and base, brick and steel \$54,000. State Architect Diggs, Capitol Bldg., Sacramento. Owners, State of California. This work was mentioned here before and a complete list of the bidders was published last week. The State Engineer now states that all bids were in excess of the appropriation and that plans will be revised and new figures called for shortly.

San Gabriel, Los Angeles Co., Cal.—School plumbing and heating. Cost not stated. Architect, Paul V. Tuttle Delta Bldg., L. A. Owners, San Gabriel School District. The architect reports that new figures will be taken on the

heating and ventilating up to March 16th. The contract for the general construction of the building has been awarded to Anderson & Murdock, Glendale.

Van Nuys, Los Angeles Co., Cal.—School, 2 story and base, brick, \$40,000. Architect, A. C. Smith, 307 South Broadway, L. A. Owners, Van Nuys School District. The building will be 88x127 feet, and will contain eight class rooms, teachers' rooms and offices. The building has been designed for a grammar school. There will be steam heat, conduit system of wiring and a vacuum cleaning system. The exterior will be faced with enameled brick. The bids for excavating the site are now being taken and a general contract will be awarded shortly.

SEWERS, STREET WORK AND WATER SYSTEMS.

San Francisco.—Structural steel for pumping plant, \$9,000. City Engineer Marsden Manson, 1404 David Hewes Bldg., S. F. Owners, City and County of San Francisco. Contractors, Judson Mfg. Co., Oakland. Contract price, \$9,145. For a complete list of the last City Bids see under City and County of San Francisco.

STORES & OFFICE BUILDINGS.

Oakland, Cal.—Stores and factory 3 story and base, frame, \$10,000. Architect, M. L. Newson, 906 Broadway, Oakland. Owners, Oakland Casket Co. This work was mentioned here when the plans were first being prepared. The building is intended for a general office building, sales rooms and factory for the owners. There will be elevator service. The exterior of the building will be covered with cement plaster. The plans are now out for figures.

Richmond, Contra Costa Co., Cal.—Stores and offices, 4 story and base, reinforced concrete. Cost not stated. Architect, James F. Nixbett, Richmond. Owners, S. A. Sellers and E. P. La Salle. The building will be arranged for stores on the first floor and modern offices on the upper three floors. There will be either a steam or hot water system of heating with oil burning furnace. The interior trim will be of pine. Elevators will probably be installed. The exterior of the building will be faced with pressed brick. The contract for the foundation work has been awarded and the architect is now receiving figures for the balance of the work.

The Dalles, Ore.—Stores and hall, 2 story and base, brick. Cost not stated. Architect, E. E. McClaran, Portland owner, Fred Lemke. The building will be 25x100 feet. The first floor will be arranged for a cafe and the upper floor will be given over to social halls. There will be steam heat. The exterior of the building will be faced with pressed brick. The plans for the building are now being prepared.

Los Angeles, Cal.—Stores and offices, 11 story and base. Class A construction, \$125,000. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owner, A. L. Cheney. The building will be 20x150 feet. The details of the construction cannot be given at this time as the architects have only completed preliminary sketches. The interior arrangement of the upper floors is still

unsettled and may be changed to lefts. Complete details will be given as the plans progress.

THEATRES.

San Francisco.—Theatre, 4 story and base. Class A construction, \$150,000. Architects, Cunningham and Politeo, Chronicle Bldg., S. F. Owners, Boston and San Francisco Amusement Co. (Sidney Graumann, Empress Theatre). The building will be especially designed for the production of light opera. The seating capacity will be in the neighborhood of 2,000 people. They will have a complete steel frame with exterior walls of reinforced concrete, faced with pressed brick. There will be a steam heating system and ventilating system. Vacuum cleaning will be installed. The excavation and steel work has been let. Plans for the balance of the work will be figured at once.

San Francisco.—Theatre and hotel, 4 story and base. Class A construction. Cost not stated. Architects, O'Brien and Werner, Foxcroft Bldg., S. F. Owners, Tivoli Theatre Co. This work has been mentioned here a number of times before. The architects state that the working drawings are now complete and that the excavation of the old frame buildings formerly occupied by the Police Department will hasten the actual construction. The work of demolishing the old Headquarters building has been stated and plans for the new theatre building will be put in the hands of the contractors within the next two weeks.

Santa Monica, Los Angeles Co., Cal.—Casino, 2 story and base, reinforced concrete, \$50,000. Architects, Krempel & Erkes, Hennes Bldg., L. A. Owners, Busch Casino Co. The building will be 125 feet square. The main dining room will be 110x80 feet. The exterior will be faced with pressed brick. There will be a tile and marble entrance and tile roof. Besides the main dining room there will be private dining rooms, grill room and a mezzanine floor. The plans are now complete and figures are being taken.

SEALED PROPOSALS.

FURNISHING COOKING APPARATUS. (Bids close March 15.)

C.—Sealed proposals plainly marked on the outside of the sealed envelope: "Proposals for Brick Dormitory, Albuquerque, New Mexico," and addressed to the Commissioner of Indian Affairs, Washington, D. C., will be received at the Indian Office until 2 o'clock p. m., March 19, 1912, for the erection of a brick dormitory building at the Albuquerque Indian School, New Mexico, in strict accordance with the plans, specifications and instructions to bidders, which may be examined at this office, the office of the Supervisor of Construction, Denver, Colo., the U. S. Indian warehouse, San Francisco, Cal., and at the school. For further information, apply to the Superintendent, Albuquerque Indian School, Albuquerque, New Mexico. C. F. HAUKE, Acting Commissioner.

PROPOSALS FOR BRIDGE WORK.

(Bids close March 5.)

NOTICE is hereby given that sealed bids will be received by the Clerk of the Board of Supervisors of San Joaquin County, California, at the office of said Board, in the city of Stockton, until 10 o'clock a. m. of Tuesday, March 5, 1912, for the construction of Lockeford Bridge No. 2, near Lockeford, according to plans and specifications prepared by County Surveyor Quail and adopted and filed by said Board February 5, 1912, and to which bidders are particularly referred.

All bids must be made on forms to be obtained at the office of the Board of Supervisors, and presented in sealed envelopes marked as directed in said specifications.

All proposals must be accompanied by United States currency or certified check made payable to the Chairman of the said Board of Supervisors in the

sum of 10 per cent of the amount of the bid, and a bond of 50 per cent of the contract price will be required of the successful bidder.

The Board reserves the right to reject any or all bids.

By order of said Board made February 5, 1912.

EUGENE D. GRAHAM, Clerk.

PROPOSALS FOR BUILDING.

(Bids close April 13.)

BUILDING, ETC.—Sealed proposals Indorsed "Proposals for Administration Building" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. April 13, 1912, and then and there publicly opened, for the construction of an administration building at the naval station, Pearl Harbor, Hawaii. Plans and specifications can be obtained on application to the bureau or to the commandant of the naval station, Honolulu, Hawaii. H. R. STANFORD, Chief of Bureau.

PROPOSALS FOR FOUNDATIONS.

(Bids close Feb. 28.)

OFFICE of the Board of Public Works of the City and County of San Francisco.—Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 28th day of February, 1912, for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit:

The excavation and foundation work of the Academic Building of the Polytechnic High School, located in the block bounded by Frederick, Carl and Willard streets and Arguello Boulevard.

CONSTRUCTING SEA WALL.

(Bids close Feb. 27.)

SEALED proposals will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at the office of the Director of Works, in the Exposition Building, Pine and Battery streets, San Francisco, Cal., at 10 a. m. on February 27th, 1912, for the following work: Constructing a seawall along Lewis street, between the center line of Scott street and a point one hundred and fifteen (115) feet easterly from Pierce street, San Francisco, California, in accordance with the specifications on file in the office of the Director or Works.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company in the sum of ten (10) per cent of the amount bid, or the same will not be considered. When the award of contract is made all checks will be returned to the respective bidders, except that filed with the accepted proposal or bid, which check will be returned upon the successful bidder signing the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of the contract; the sureties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made. The right is reserved to reject any and all bids and waive technical defects in the interest of the Exposition

Company.

By order of the Buildings and Grounds Committee.

WILLIAM H. CROCKER, Chairman.

PROPOSALS FOR CONSTRUCTING BUILDING.

(Bids close March 7.)

SEALED proposals will be received by the Board of School Trustees of the Nevada City School District, Nevada City, Nevada County, California, until March 7th, 1912, for the construction, complete, of a 1 story and basement reinforced concrete and frame school building in accordance with the plans and specifications for the same as furnished by Architects Parker & Kenyon, 244 Kearny street, San Francisco.

The said Board of School Trustees reserves the right to reject any or all bids.

PROPOSALS FOR STREET WORK.

(Bids close Feb. 28.)

OFFICE of the Board of Public Works of the City and County of San Francisco.—Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 28th day of February, 1912, for doing the following street work, including the furnishing of the necessary labor and materials therefor, to wit:

(1) That Twenty-first avenue, between California and Geary streets, be improved by constructing artificial stone sidewalks nine (9) feet in width, where artificial stone sidewalks at least six (6) feet in width are not already constructed.

(2) That Fifteenth avenue, between Geary and Clement streets, be improved by constructing granite curbs and an asphalt pavement, where not already constructed, and that the intersection of Tacoma street and Fifteenth avenue be improved by constructing granite curbs and artificial stone sidewalks on the angular corners and by paving the roadway thereof with an asphalt pavement.

C., until 10:30 a. m. March 1, 1912, at which time they will be opened in public, for furnishing the above-mentioned articles. Blank and general information relating to this Circular (No. 679) may be obtained from this office or the office of the assistant purchasing agent, 1086 North Point street, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash., Los Angeles, Cal. E. C. ROGGS, major, corps of engineers, U. S. army, general purchasing officer.

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

Apartment House—3 story and base, frame, \$15,000. San Francisco. Architects, C. M. and A. F. Rousseau. Monadnock Bldg., S. F. Owners, Rousseau Realty Co. The building will be erected on a corner and will cover an area of 52x26 feet. The building has been designed for twelve apartments of the three and four room variety. There will be steam heat and wall beds. The interior trim will be of Douglass Fir and some hardwood. There will be considerable tile and marble used. The exterior of the building will be covered with shiplap and brick veneer. The plans are complete and figures are being taken.

Apartment House—3 story and base, reinforced concrete, \$20,000. San Francisco. Architects, Ross & Burgin, 222 Kearny St., S. F. Owner's name withheld. The building will contain a number of two and three room apartments arranged with connecting baths. There will be steam heat and wall beds. The interior trim will be of pine and hardwood. The exterior of the building will be faced with cement plaster. Figures are now being taken on the work.

Apartment House—6 story and base, brick and steel, \$70,000. San Francisco. Architect, Edward G. Garden. Phelan Bldg., S. F. Owner's name withheld. The building will be erected on Mission street. There will be in the neighborhood of 120 rooms arranged in suites of from two to four rooms each with connecting baths. There will be steam heat and elevator service. The trim will be of pine. There will be stores on the first floor. The exterior of the building will be faced with pressed brick and terra cotta. The architect has started the working drawings and more complete details of the work will be given later.

Apartment House—5 story and base, brick and steel, \$45,000. San Francisco. Architect, J. Bernard Joseph. First National Bank Bldg., S. F. Owner, Ray Levin. The building will be erected on Franklin street near California. The apartments will be arranged in suites of two, three and four rooms each with baths. The interior will be handsomely finished. There will be steam heat and wall beds. The exterior of the building will be faced with pressed brick. The plans will be completed within a month.

Apartment House—1 story and base, reinforced concrete. Cost not stated. San Francisco. Architect, M. Mattanovich. Pacific Bldg., S. F. Owner's name withheld. The architect has completed plans for an apartment house building which is to contain 19 suites of two and three rooms each with baths. There will be steam heat, elevators and wall beds. The exterior of the building will be faced with cement plaster. The plans for the excavating are complete and figures are being taken. Plans for the balance of this work will be put out for figures shortly.

Apartment House Addition and Alterations—\$15,000. San Francisco.

Architect, Henry H. Meyers. Koh' Bldg., S. F. Owners, Goldberg-Bowen Co. The work will consist of a two-story frame addition to the present one-story building on Haight street. The apartments will be arranged in three and four room suites with baths. There will be a heating system. The exterior of the building will be covered with cement plaster. Plans are being prepared.

Sea Wall Rock Construction—Cost not stated. San Francisco. Engineer, Director of Works, Panama Pacific Exposition Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids for the construction of a sea wall and for one million feet of fill were opened today in the offices of the Exposition Co. Awards of contract will be given in the next issue of the Building and Industrial News.

Warehouse—1 story and base, brick, \$4,000. San Francisco. Architect, none. Owner, James E. Cone. Golden Gate Ave. and Leavenworth St., S. F. The building has been designed for a shop and warehouse combined. There will be some structural steel. The exterior will be faced with stock brick. The plans are in the hands of the owner and the work will be done by Day Labor.

Flats—3 story and base, frame, \$3,000. San Francisco. Architect, none. Owner, T. Tyndall, 31 Rausch St., S. F. The building has been designed for a three-flat building. Each flat will consist of five rooms and bath. There will be pine finish throughout. The exterior of the building will be covered with shiplap. The plans are complete and the work will be done by Day Labor.

Flats—2 story and base, frame, \$6,000. San Francisco. Architect, C. S. Rushmer. Whitwell Bldg., S. F. Owner's name withheld. The building will contain four modern flats of five and six rooms each and bath. The interior finish will be of pine with some hardwood floors. There will be open fire places and tile or brick mantels. The exterior of the building will be covered with shiplap and veneer artificial stone. The plans are complete and figures are being taken.

Flats—3 story and base, frame, \$6,000. San Francisco. Architect, C. Fantoni, 4 Columbus Ave., S. F. Owner's name withheld. The building will contain three flats of five and six rooms each with baths. The interior trim will be of pine throughout. There will be gas grates. Considerable marble will be used. The exterior of the building will be covered with shiplap and brick veneer. The plans are complete and the architect is taking figures.

Hotel—7 story and base, brick and steel, \$75,000. San Francisco. Architect, George William Kelham, Crocker Bldg., S. F. Owner, Dr. G. W. Morton. This work has been mentioned here before when the plans were first started. The building will be designed for stores on the first floor and a large number of single rooms on the upper floors. There will be steam heat and elevator service. There will be con-

siderable structural steel used. The exterior finish will be of pressed brick and terra cotta. The plans are now complete and the architect is taking figures.

Hotel—3 story and base, frame, \$15,000. San Francisco. Architect, David C. Coleman. Metropolis Bank Bldg., S. F. Owner, Charles Katz. The building will be 36x18 feet. The first floor will be arranged for stores and the upper two floors for a rooming house. The interior finish will be of pine throughout. There will be running water in all rooms. The exterior of the building will be covered with shiplap. The plans are complete and the work will be done by Day Labor.

Armory—1 story and base. Class A construction, \$500,000. San Francisco. Architect, State Architect Diggs, Sacramento. Owners, State of California. The new State Engineer, McClure, has notified the Mission Promotion League to the effect that the working drawings for this building are progressing rapidly and that figures will be taken by the end of March.

Residence—2 story and base, frame, \$8,000. San Francisco. Architect, Edward T. Foulkes. Crocker Bldg., S. F. Owner, Mrs. C. M. Flickert. The dwelling has been designed for an eight-room house with baths. There will be furnace heat and open fire places. The interior finish will be of pine and hardwood. The floor will be of oak in the principal rooms. The mantel will be of tile or brick. Tile will be used in the baths and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are now nearly complete. Figures will be taken by the architect.

Residences—4, 2 story and base, frame, \$4,000 each. San Francisco. Architect, none. Owner, S. A. Born, 626 Market St., S. F. The dwellings will be erected in the Marine View District. Each dwelling will contain eight rooms and bath. The interior trim will be of pine with hardwood floors in the principal rooms. There will be furnace heat and open fire places. The exterior of the dwellings will be covered with shingles, brick veneer and cement plaster. The plans will be completed shortly and the work will be done by Day Labor.

Residence—2 story and base, frame, \$3,000. San Francisco. Architect, none. Owner, C. A. Hall, 1318 5th Ave., S. F. The dwelling will contain seven rooms and bath. The interior trim will be of pine throughout. Hardwood floors will be used in the principal rooms. There will be open fire places with brick mantels. The exterior of the dwelling will be covered with shiplap and rustic. The plans are in the hands of the owner and the work will be done by Day Labor.

Residence—2 story and base, frame, \$3,000. San Francisco. Architects, L. M. Weisman & Son, Pacific Bldg., S. F. Owner, F. L. Weisman. The dwelling has been designed for a seven-room house with bath. The interior trim will be of pine and redwood with some oak floors. There will be open fire places with tile or brick mantels. Tile will be used in the bath room. The exterior of the dwelling will be covered with shiplap. The plans are complete and the work will be done by Day Labor.

Apartment House—3 story and base, brick and steel, \$100,000. San Fran-

isco. Architect, C. H. Barrett, 381 Bush St., S. F. Owner, J. H. Bollig. This work has been mentioned here before when the plans were first started. The building will contain about 240 rooms arranged in suites of from two to four rooms. All suites will have connecting baths. There will be steam heat, wall beds and elevator service. There will be a vacuum cleaning system. The exterior of the building will be faced with cement plaster. The plans are now complete and figures are now being taken.

Apartment House—3 story and base, frame, \$20,000. San Francisco. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner, S. M. Show. The building has been designed for twelve modern apartments arranged in suites of two, three and four rooms each with connecting baths. There will be steam heat and wall beds. The interior finish will be of pine. The exterior of the building will be covered with ship-lap and brick veneer. The plans are to be completed at once and the owner will do the work by Day Labor.

Theatre—4 story and base, Class A construction, \$150,000. San Francisco. Architects, Cunningham & Politte, Chronicle Bldg., S. F. Owners, Boston and San Francisco Amusement Co. (Sidney Graumann, Empress Theatre). The building will be especially designed for a production of light opera. The seating capacity will be in the neighborhood of 2,000 people. There will be a complete steel frame with exterior walls of reinforced concrete, faced with pressed brick. There will be a heating system and ventilating system. Vacuum cleaning will be installed. The excavation and steel work has been let. Plans for the balance of the work will be figured at once.

Theatre and Hotel—4 story and base, Class A construction. Cost not stated. San Francisco. Architects, O'Brien & Werner, Foxcroft Bldg., S. F. Owners, Tivoli Theatre Co. This work has been mentioned here a number of times before. The architects state that the working drawings are now complete and that the evacuation of the old frame building formerly occupied by the Police Department will hasten the actual construction. The work of demolishing the old Headquarters building has been started and plans for the new theatre building will be put in the hands of the contractors within the next two weeks.

Contracts Awarded.

Structural Steel for Pumping Plant—\$9,000. San Francisco. Engineer, Marsden Manson, 1404 David Hewes Bldg., S. F. Owners, City and County of San Francisco. Contractors, Judson Mfg. Co., Oakland. Contract price, \$9,145. For a complete list of the last city bids see under City and County of San Francisco.

OAKLAND AND ALAMEDA COUNTY.

Club House—1 story and base, frame. Cost not stated. Oakland, Cal. Architect, Charles W. McCall. Central Bank Bldg., Oakland. Owners, Lakeside Canoe Club. The building will be erected at Lake Side Park in Oakland. There will be storage space for the boats, meeting room and social hall. The interior finish will be of pine. The exterior of the building will be covered with shingles. The plans are complete and the architect is taking figures on the work.

Residence—3 story and base, frame, \$10,000. Berkeley, Alameda Co., Cal. Architect, C. S. Kaiser. Mechanics' Institute Bldg., S. F. Owner, Mrs. E. M. Roeding. The dwelling will contain in the neighborhood of twelve rooms and three baths. The interior finish will be of pine, hardwoods and white enamel. There will be furnace heat and open fire places. The mantels will be of brick and tile. There will be hardwood floors throughout. Tile will be used extensively. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the architect is taking figures on the work.

Residence—2 story and base, frame, \$5,500. Berkeley, Alameda Co., Cal. Architect, Charles F. Whittlesey. Pacific Bldg., S. F. Owner, Dr. J. W. Thatcher. The dwelling has been designed for an eight-room house with all modern conveniences. The interior finish will be of pine and white enamel. There will be furnace heat and open fire places. The floors will be of hardwood. The mantels will be of brick and tile. Tile will be used in the baths and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. The architect is taking figures on the work.

Residence—2 story and base, frame, \$5,000. Oakland, Cal. Architect, Claude B. Barton, 470 13th St., Oakland. Owners, Mr. and Mrs. Francis McAllister. The dwelling will contain seven rooms and baths. There will be furnace heat and open fire places. The mantels will be of brick. The interior trim will be of pine with hardwood floors. Terrazzo will also be used on some of the floors. Tile will be used in the bath. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Residence—2 story and base, frame, \$2,000. Oakland, Cal. Architect, none. Owner, C. M. McGregor, 460 13th St., Oakland. The dwelling has been designed for a six-room house with bath. The interior trim will be of pine and redwood. There will be open fire places with tile or brick mantels. The exterior of the dwelling will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Bungalow—1 story and base, frame, \$2,000. Berkeley, Alameda Co., Cal.

Architect, none. Owner, R.J. Nelson, 1812 Carlton St., Berkeley. The dwelling will contain five rooms and bath. There will be pine trim and some hardwood floors. There will be open fire places and tile or brick mantels. The exterior of the bungalow will be covered with shingles. The plans are complete and the work will be done by Day Labor.

Bungalow—1 story and base, frame, \$3,000. Oakland, Cal. Architect, none. Owner, A. H. Faust, 515 Lincoln Ave., Alameda. The dwelling has been designed for a six-room house with bath. The interior finish will be of pine with some oak floors. There will be furnace heat and open fire places. The mantels will be of tile or brick. Tile will be used in the bath and kitchen. The exterior of the bungalow will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Residence and Bungalow—1 1/2 story and 2 story and base, frame, \$3,000 and \$3,500. Berkeley, Alameda Co., Cal. Architect, none. Owner, Miss L. Hall, 2618 College Ave., Berkeley. The dwellings will contain seven and eight rooms respectively. There will be pine and redwood finish. Both will have furnace heat and open fire places. The mantels will be of brick and tile. Some oak floors will be used. Tile will be used in the baths and kitchens. The exteriors of the dwellings will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Bungalow—1 1/2 story and base, frame, \$2,500. Berkeley, Alameda Co., Cal. Architect, Olin S. Grove, 2911 Telegraph Ave., Berkeley. Owner, L. W. Cutler. The dwelling will contain seven rooms and bath. The interior finish will be of pine and white enamel. There will be oak floors in the principal rooms. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Residence—2 story and base, frame, \$3,500. Oakland, Cal. Architect, none. Owner, R. W. Gilmore, Laguna Vista Apartments, Oakland. The dwelling will contain seven rooms and bath. There will be furnace heat and open fire places with brick or tile mantels. The interior finish will be largely of pine. Hardwood will be used in the floors of the principal rooms. Tile will be used in the bath and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are in the hands of the owner and figures are being taken.

Bungalow—1 1/2 story and base, frame, \$2,000. Oakland, Cal. Architect, none. Owner, E. Maassburg, 5301 Dover St., Oakland. The dwelling has been designed for a seven-room house with bath. The interior trim will be of pine and redwood. The floors will be of oak in the principal rooms. Tile will be used in the bath. There will be open fire places with brick mantels. The exterior of the dwelling will be covered with rustic and brick veneer. The plans are complete and the work will be done by Day Labor.

Bungalows—3, 1 story and base, frame, \$2,500 each. Berkeley, Alameda Co., Cal. Architect, A. J. Hassell, Y. M. C. A. Bldg., Berkeley. Owners, Patrick-Nelson Co., 2025 Addison St., Berkeley. The dwellings will each contain 5 rooms and bath. The inte-

rior finish will be of pine throughout. There will be open fire places with brick and tile mantels. The exteriors of the bungalows will be covered with shakes and cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Bungalow—1½ story and base frame, \$3,000. Oakland, Cal. Architect, M. L. Newsum, 812 Broadway, Oakland, Owner, Mr. Shaw. The dwelling will contain seven rooms and bath. The interior finish will be of pine and redwood. There will be open fire places and tile or brick mantels. There will be some oak floors. The exterior of the dwelling will be covered with rustic and shingles. The plans are complete and figures are being taken.

Residence—2 story and base, frame, \$2,500. Oakland, Cal. Architect, none. Owner, James McQuinn, 1225 Broadway, Oakland. The dwelling will contain seven rooms and bath. The interior trim will be of pine and redwood. There will be some hardwood floors. There will be open fire places and tile or brick mantels. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Apartment House—2 story and base, cost not stated. Oakland, Cal. Architect, W. H. & Schaefer, Albany Bldg., Oakland. Owner, C. S. Nielson. The building has been designed for several stores on the first floor and living apartments on the upper floor. The interior will be finished in pine. There will be connecting baths. The exterior of the building will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

School—2 story and base, brick and steel, \$51,000. Berkeley, Alameda Co., Cal. Architect, Diggins, Capitol Bldg., Sacramento. Owners, State of California. This work was mentioned here before and a complete list of the bidders was published last week. The State Engineer now states that all bids were in excess of the appropriation and that plans will be revised and new figures called for shortly.

Stores and Factory—3 story and base, frame, \$10,000. Oakland, Cal. Architect, M. L. Newsum, 906 Broadway, Oakland. Owners, Oakland Casket Co. This work was mentioned here when the plans were first being prepared. The building is intended for general office building, sales rooms and factory for the owners. There will be elevator service. The exterior of the building will be covered with cement plaster. The plans are now out for figures.

MARIN, CONTRA COSTA AND SONOMA COUNTIES.

Dry Docks, Etc.—\$1,000,000. California City, Marin Co., Cal. Engineers, Department of Yards and Docks, Washington, D. C. Owners, U. S. Government. The official announcement has been made of the selection of California City as the site for the two proposed new dry docks, which are to be the largest in the world. This will mean the construction of a large number of other buildings. The plans for the work are now under way in Washington.

Stores and Offices—1 story and base, reinforced concrete. Cost not stated. Richmond. Contra Costa Co., Cal. Architect, James T. Nariett, Richmond. Owners, S. A. Sellers and E. P. La Salle. The building will be arranged for stores on the first floor and modern offices on the upper three floors. There will be either a steam or hot water system of heating with oil burning furnace. The interior trim will be of pine. Elevators will probably be installed. The exterior of the building will be faced with pressed brick. The contract for the foundation work has been awarded and the architect is now receiving figures for the balance of the work.

Building Contracts Awarded.

LOS ANGELES AND SOUTHERN CALIFORNIA.

Apartment House—3 story and brick. Cost not stated. Los Angeles. Architects, Hudson & M Stimson Bldg., L. A. Owner, Mrs. L. Regan. The building will be four and has been designed to contain four stores on the first floor, four rooms on the upper floors. The rents will be arranged in suites and three rooms each and baths, will be steam heat and wall held exterior of the building will be with pressed brick. The plans complete and figures are being turned out.
Hotel—10 story and base, reinforced concrete and steel, \$260,000. Los Angeles. Cal. Architects, Noonan & Wright and Callender. Bldg. Owner, Los Angeles Cemetery. The building will contain an area of 60x155 feet. There will be complete steel frame and concrete walls and floors of reinforced concrete. The first floor will contain three and the main lobby. There will

guest rooms with connecting baths on the upper floors. There will be steam heat, elevator service, vacuum cleaning system and mail chutes. There will be a large amount of marble, tile and scagliola work used. The exterior of the building will be faced with cement plaster. The building has been leased to Charles H. Sullivan. The plans are now being prepared.

Apartment House—3 story and base, brick and steel, \$69,000 to \$79,000. Los Angeles, Cal. Architect, Robert M. Taylor, Douglass Bldg., L. A. Owner, Marcos Landberg. The plans for this building have been called in and the owner has instructed the architect to revise the same, making the structure considerably larger than at first intended. New plans will be placed on the market as soon as the work of revision can be completed.

Pier—Reinforced concrete and wood, 1400 ft., Hermosa Beach, Los Angeles Co., Cal. Engineer, City Engineer Hermosa Beach. Owners, City of Hermosa Beach. A bond election is to be called at once for the construction of the new municipal pier. Preliminary estimates for the work have already been submitted by the Mercereau Bridge and construction Co.

Bridge—Reinforced concrete, \$200,000. Pasadena, Los Angeles Co., Cal. Engineers, Waddell & Harrington, L. A. Owners, City of Pasadena. The City Trustees have approved the plans for this work. The plans provide for a structure 1460 feet long with a bituminous roadway 28 feet wide and four-foot sidewalks. Bids will be taken for the work as a whole and a contract will be let on March 26th. Plans can be secured from the City Clerk.

Grain Elevators—Reinforced concrete, \$15,000. San Pedro, Los Angeles Co., Cal. Engineers, Richards-Neustadt Construction Co., Wright and Callender Bldg., L. A. Owners Globe Grain and Milling Co. The engineers are now preparing new plans for this work as the construction has been changed to reinforced concrete. The revised plans will be ready for figures shortly.

Garage—1 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architect, Frank M. Tyler, Union Trust Bldg., L. A. Owner, Robert Howland. The building will be 68x105 feet and has been designed for a commercial garage. There will be sales rooms as well as a machine shop. A cement floor will cover the entire area. The exterior of the building will be faced with cement plaster. The plans are complete and figures are being taken.

Hotel—5 story and base, reinforced concrete. Cost not stated. Pomona, Los Angeles Co., Cal. Architect, Jerome B. Legg, 764 North Garey Ave., Pomona. Owners, Avis Syndicate. The building will be 66x105 feet. The first floor will contain stores, main lobby and public dining room. The upper floors will be arranged for guest rooms en suite and single with baths. There will be steam heat and elevator service. The exterior will be faced with cement plaster trimmed with artificial stone. The plans are complete and figures are being taken.

Hotel—8 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architect, W. J. Saunders, Wright and Callender Bldg., L. A.

Owner, F. W. Braun. The owner states that new figures will be taken on this building at once. The Alhambra Construction Co. submitted the lowest figure on this work, but have refused to sign up a contract.

Hotel—5 story and base, reinforced concrete. Cost not stated. Long Beach, Los Angeles Co., Cal. Architect, A. J. Daniels, 1050 South Bunker Bros. St., L. A. Owner, Scott Alexander. The building will be 60x90 feet. The first floor has been arranged for stores and a number of single rooms on the upper floors. There will be steam heat and elevator service. The exterior of the building will be faced with pressed brick. The plans are in the hands of the owner and he is now taking figures on the work.

Ward Building—Brick and frame. Cost not stated. Los Angeles, Cal. Architect, Superintendent of County Buildings, George Low, L. A. Owners, Los Angeles County. The building has been designed for a ward building for the leper patients, and will be 18x108 feet. There will be four wards, kitchens, dining rooms and toilets. The exterior will be faced with cement plaster. The plans are being prepared.

Residence—2 story and base, frame. Cost not stated. Inglewood, Los Angeles Co., Cal. Architect, A. C. Smith, 397 South Broadway, L. A. Owner, W. M. Hicks. The dwelling will be 11x11, and will contain twelve rooms and baths. There will be mahogany and birch trim, hardwood floors, furnace heat and open fire places. The mantels will be of brick and stone. There will be a garage built in connection. The exterior of the dwelling will be covered with cement plaster and sandlime brick. The architect is preparing plans.

School Plumbing and Heating—Cost not stated. San Gabriel, Los Angeles Co., Cal. Architect, Paul V. Tuttle, Delta Bldg., L. A. Owners, San Gabriel School District. The architect reports that new figures will be taken on the heating and ventilating up to March 16th. The contract for the general construction has been awarded to Anderson and Murdock, Glendale.

School—2 story and base, brick, \$90,000. Van Nuys, Los Angeles Co., Cal. Architect, A. C. Smith 397 South Broadway, L. A. Owners, Van Nuys School District. The building will be 80x127 feet and will contain 8 class rooms, teachers' rooms and offices. The building has been designed for a grammar school. There will be steam heat, conduit system of wiring and a vacuum cleaning system. The exterior will be faced with enameled brick. The bids for excavating the site are now being taken and a general contract will be awarded shortly.

Stores and Offices—11 story and base, Class A construction, \$125,000. Los Angeles, Cal. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owner, A. L. Cheney. The building will be 30x150 feet. The details of the construction cannot be given at this time as the architects have only completed preliminary sketches. The interior arrangement of the upper floors is still unsettled and may be changed to lofts. Complete details will be given as the plans progress.

Casino—2 story and base, reinforced concrete, \$50,000. Santa Monica, Los Angeles Co., Cal. Architects, Krenpel & Erkes, Henne Bldg., L. A. Owners,

Burch Casino Co. The building will be 1.5 feet square. The main dining room will be 110x50 feet. The exterior will be faced with pressed brick. There will be a tile and marble entrance and the roof. Besides the main dining room there will be private dining rooms, billiard room and a mezzanine floor. The plans are now complete and figures are being taken.

PORTLAND AND OREGON.

Lodge Hall—2 story and base, brick. Cost not stated. St. Johns, Ore. Architect, Ernest Kroner, Portland. Owners, Laurel Lodge, No. 186 of the I. O. O. F. of St. Johns. The building will be arranged for two stores on the first floor and a meeting hall and offices above. The exterior will be faced with cement plaster and trimmed with artificial stone. The plans are complete and figures are being taken.

Stores and Hall—2 story and base, brick. Cost not stated. The Dalles, Ore. Architect, E. E. McClaren, Portland. Owner, Fred Lemke. The building will be 25x100 feet. The first floor will be arranged for a cafe and the upper floor will be given over to social halls. There will be steam heat. The exterior of the building will be faced with pressed brick. The plans for the building are now being prepared.

Contracts Awarded.

Bridge—Reinforced concrete, \$75,000. Portland, Ore. City Engineer Portland. Owners, City of Portland. Contractors, International Construction Co., Central Bldg., Seattle. Contract price, \$63,396. Note: This is the lowest figure submitted, and while the contract has not been awarded, it is generally accepted that the contract will be signed.

Church—Steel and brick, \$100,000. Portland, Ore. Architect, Ellis F. Lawrence, Portland. Owners, Westminster Presbyterian Church. The plans for this work are now being checked over by the Building Inspector. The contract for the masonry work has been awarded to Thomas Hargrove and the contract for the plumbing to the Foreman-Walker Co.

SEATTLE AND WASHINGTON.

Flour Mill—6 story and base, reinforced concrete, \$100,000. Harbor Island, Wash. Architects, Bell & McDonald, Denby Bldg. Seattle. Owners, Charles H. Lilly Co. The building will be 60x100 and is to be the first unit of a large plant. The next work to be undertaken by the company will be the construction of two two-story reinforced concrete warehouses. Plans for all of this work are now under way in the offices of the architects.

Temple of Justice—4 story and base, Class A construction, \$350,000. Olympia, Wash. Architects, Wilder & White, New York City. Owners, State of Washington. This work has been mentioned here several times before. The bids were opened on February 26th and a contract will be awarded shortly. A complete list of the figures will be published here next week.

Warehouse—1 story and base, steel and reinforced concrete, Seattle, Wash. Architect, none. Owner, J. M. Butt-nick, 1712 12th Ave., Seattle. The building will be 60x135 feet and will

The "S. G. V." A Real Automobile

FIRST—THE S.G.V. CAR being made of Chrome-Nickel Steel and aluminum, its weight is 1000 lbs. less than the average high-grade car, which sells at \$3000 to \$5000. This item alone decreases the operating expense fully 25%.

SECOND—THE LOW CENTER of gravity of the S.G.V. prevents the car from skidding, which wears and cuts tires.

THIRD—THE 42 MULTIPLE disk clutch, giving the car opportunity to start without jerk or skidding, saves wear and tear.

FOURTH—THE S.G.V. CO. OWNS its special patented starvation type carburetor, which is heated by water jacket, and its perfect action is not subject to change of altitude or climate, and requires no adjustment. This carburetor, also, being made on the most approved scientific principles, makes full use of all the gasoline passing through it. It has no coiled springs to adjust.

FIFTH—THE MOTOR TO WHICH this carburetor is attached is of European type and has 50% less parts than the average motor parts than the average motor, requiring at least one-third less energy to operate it, and being connected with a Bosch high tension magneto, comprises an equipment that far surpasses any

car heretofore put on the American market.

SIXTH—THE CAR HAS FOUR speeds forward, giving full use of the motor under all conditions, whether running on a lever or climbing hills; the motor is kept working to meet requirements without any undue strain.

THE MOTOR IS CAPABLE OF being turned over 2500 revolutions per minute, and for power displayed has astonished the best mechanics of America, developing 28 H.P. on block test.

THE OIL BEING UNDER COM- pensation control at all speeds by use of independent pump system, is consumed only in proportion to the speed of the motor, whereas under the old-fashioned splash system more oil is used at a speed of 5 to 10 miles per hour than at 50 miles per hour; hence the smoke nuisance from most cars traveling the streets. No smoke is perceptible from the S.G.V. until it reaches a speed of 25 miles per hour, showing that the oil is not used for fuel, but for lubrication only; hence the motor does not become carbonized after a few thousand miles run, it being well known that carbonizing robs the motor of its power and increases consumption of gasoline through premature explosions.

WE ARE IN A POSITION TO demonstrate and to prove, as we have already done, that the S.G.V. car is in everyday practical use, on the basis outlined above. Then it does not require any great mathematician to figure out that the S.G.V. car is cheaper at the expiration of three years than any \$1500 car on the market. The price is lower by \$1000 to \$1500 on the first cost, and more economical than any other car on the American market, rated as a high-grade car. If you will take the trouble to investigate the S.G.V. car you will find that no American product on the market approaches it in operation, the S.G.V. being an exact duplicate of the Lancia motor, which has made for itself a great history in the European countries, the only change of the original type being an improved carburetor. The cylinders of the S.G.V. motor are cast in Belgium, where the highest grade of castings are made; the body springs are made by Lemoine, the renowned spring manufacturer of France. FROM THESE BRIEF SPECIFICATIONS it can be readily appreciated that the owner can afford to discard his expensive operating car in order to get the S.G.V., an economical automobile.

E. STEWART & CO.

428 VAN NESS AVENUE

Tel Market 3074

San Francisco

be used as a warehouse. The construction will be fire proof. The plans are in the hands of the owner and he is letting all contracts.

Depot—2 story and base, brick and steel, \$60,000. Aberdeen, Wash. Architect, Holman, Union Depot, Seattle. Owners, Oregon-Washington Railroad and Navigation Co. The plans for this work, which has been mentioned here several times before, can now be had of the above named architect. Bids for the construction will be opened on March 10th.

Depot—2 story and base, concrete and brick, \$40,000. Hoquiam, Wash. Engineering Dept. Northern Pacific Co.,

2nd and Kings Sts., Seattle. Owners, Northern Pacific Co. The building will contain a ladies' and gentlemen's waiting room, offices for the agents and staff and toilets. There will be steam heat. The exterior of the building will be faced with pressed brick. The plans are complete and figures will be called for at once.

Contracts Awarded.

Apartment House—3 story and base, brick, \$25,000. Seattle, Wash. Architects, Quandt & Creutzer. Haight Bldg., Seattle. Owner, John L. Long, contractor, Philip Viehmann, 1221 4th Ave., West Seattle. Contract price, \$35,000.

Canal Construction—Cost not stated. Seattle Wash. Engineer, Major J. B. Cavanaugh, Burke Bldg., Seattle. Owners, U. S. Government. Contracts for the three sections of this work were awarded as follows: To Stillwell Bros., Henry Bldg. the contract for the third section of the Lake Washington Canal on their bid of \$140,000 and to the Puget Sound Bridge and Dredging Co., Central Bldg., the contract for section 1 at \$124,722. The contract for section 2 for which Hilt & Jeffrey, Hinckley Bldg. bid low at \$91,170, has not as yet been awarded as the matter of disposal of earth to the best advantage of the city has not

been decided. Section 1 involves 750,000 cubic yards, section 2, 420,000 cubic yards and section 3, 480,000 cubic yards and section 3, 480,000 cubic yards.

Church—2 story and base, brick, \$10,000. Seattle, Wash. Architect's name not given. Owners Emanuel Lutheran Church. Contractors Sylthussen and Sando, Arcade Bldg., Seattle. Contract price, \$10,000.

Court House—2 story and base brick and steel, \$150,000. Pasco, Wash. Architect's name not given. Owners, Pasco County. Contractors, Misho and Grant, Globe Bldg., Seattle. Note: The contractors are now taking sub-figures on the steel, ornamental iron, face brick, lumber, terra cotta and sheet metal work.

Hospital—3 story and base, brick, \$30,000. Seattle, Wash. Architect, J. S. Cole, Haight Bldg., Seattle. Owner, Dr. E. H. Reinger. Contractor, Gust Eklof, 625 East Lynn St., Seattle. Contract price, \$25,500, general construction. Heating and ventilating, Pacific Heater and Blower Co., \$6,110.

Railroad Extension—\$300,000. North Yakima, Wash. Engineering Dept. Yakima Valley Navigation Co., North Yakima. Owners, Yakima Valley Navigation Co. Contractor, W. L. Tibbille, Commercial Hotel, North Yakima. Note: This contract includes the construction of a steel and concrete bridge.

GOLD AND SILVER PRODUCTION IN CALIFORNIA IN 1911.

The condition of the mining industry in California in 1911, so far as gold and silver are concerned, differed little from that of 1910, according to Charles G. Yale, of the United States Geological Survey. The State annually produces between \$19,000,000 and \$21,000,000 in gold, the variation being almost entirely due to fluctuations in the "water season." When the snow supply in the Sierra is scant numerous quartz mills must shut down for a few months owing to lack of water for power, and there is little water for washing the auriferous gravels of the placers. In 1911 the mine owners had no cause for complaint in this matter. There are about 1100 producing mining properties in the State of California, a little over half of which are placers.

Of the placers, the most important producers are the gold dredgers, which yield about 85 per cent of the placer gold, or 40 per cent of the total gold output of the State from all sources. This percentage from dredging operations is slowly but gradually increasing. During the last ten years the dredges in California have produced nearly \$18,000,000 in gold and also some silver and platinum.

During 1911 one of the largest dredges was burned and others were sent to the scrap heap, but several large new dredges were built. The modern dredging machines, of the best type, are capable of handling 250,000 cubic yards of gravel monthly. In the more extensive fields, where numerous machines are at work, they are working ground of an average recovered value of 21 cents a cubic yard, at a working cost of 5.67 cents a yard; and ground averaging 9.64 cents a yard at a cost of 4.52 cents. The numerous dredges of high capacity at work in such fields account for the large total output. In the Yuba River

field, now the most important in the State, the year 1911 was a record one, as it was also in the Folsom field of Sacramento County. The Oroville field showed some falling off in yield, as was to be expected from the oldest dredging area in the State, where the best ground has been worked out.

From the deep mines of California nearly 2,500,000 tons of ore has been annually mined and treated, but in 1911 this quantity was reduced, owing to litigation concerning smelter fumes in the copper-mining industry, which caused some of the larger copper properties to be closed altogether and others to be worked on part time only. This factor is especially important in the State's yield of silver most of which is derived from copper-smelting operations, particularly in Shasta County. The silver output of the State will show a falling off in 1911 in consequence. The gold output was affected in smaller degree from the same cause. Most of the gold produced, however, is derived from siliceous ores, of which nearly 2,000,000 tons is annually treated in the State. The deep mines produce nearly 55 per cent of the gold mined in California each year. Of the total siliceous are nearly 1,200,000 tons is derived from quartz-mining operations in the five Mother Lode counties—Amador, Calaveras, Eldorado, Mariposa, and Tuolumne. Of these counties Amador has the largest tonnage and is also the most productive from deep mining. Yuba continues to be the largest producer of gold among the counties, owing to the extensive dredging operations carried on there.

According to preliminary figures compiled by the Director of the Mint the gold production in California in 1911 was valued at \$20,310,987, against \$20,441,400 in 1910; and the silver output was 2,727,336 fine ounces, valued at \$1,500,035, against 1,791,600 ounces valued at \$967,500 in 1910.

No More Smokey Fireplaces.

Smokey fireplaces can be quickly cured by installing the Smoknomore Draught Regulator.

If you install the Smoknomore Draught Regulator you can take off that ugly hood.

This is what your fireplace will look like when the Smoknomore Draught Regulator is used.

We install the Smoknomore Draught Regulator with the understanding that, if it does not stop the smoke trouble we will take it out and it will cost you nothing for the trial. The open fire place is the family altar. It should be made comfortable as well as beautiful. You cannot enjoy Beauty with your eyes full of smoke.

The damage to Hangings, Tinting and Furniture alone will more than pay for the Smoknomore Draught Regulator.

The Smoknomore is clean, adds to the beauty of the fire place, prevents the ashes from falling out on the hearth. It can be adjusted to any fire place, with or without Andrews. The Smoknomore was invented by W. E. Smith of the Smith Brick Mantel Co. It is and fills a long felt want. It is especially adapted to the Fire Place that has been built too large for the chimney to carry off the smoke. If you or any of your friends are interested, measure width and depth of fire box and call on, write or phone

SMITH BRICK MANTEL CO.,

Phone Franklin 5342 San Francisco

Mr. Thomas Hastings, the New York Architect on the advisory board is quoted as saying:

"Architecturally, the Panama-Pacific International Exposition should be superior to any exposition ever held in this country. The Columbian exposition at Chicago contributed largely to forming the architectural ideals of this country, and since that time there has been tremendous progress in architecture in this country. All of the architects in the east are interested in the exposition, and we may expect the best work and the co-operation of the leading American sculptors in the development of the plans."

Which statement is evidently well founded. The only limit to the production of an exposition at once beautiful and magnificent is the limit of money, and all things considered, that has been given with a largess that was never before equaled.

Never before was there an exposition that had so splendid a setting. Never before did architect and artist, sculptor and landscape gardener have such a field to display their ability and to realize their dreams. For here the rainy season is well defined. The greater part of the year is absolutely to be depended upon as to weather. There will be hill and mountain in the background, landscape and water-scape, perspective and groups that combine everything on sea or shore.

Never before was there an exposition held to commemorate the completion of so great a present event. And with the unrivaled harbor stretching out in front of the grounds the ships of the world will furnish an additional object of interest to the travelers who come to see its marvels.

The time is ripe for things to start. It is reported that plans are made. There is then no occasion for further delay. The time is all too short and from now on there should be no stop in the proceedings to build the exposition and have it ready at the proper time.

THE CORBIN UNIT LOCK-SET

comes with all parts attached just as it will appear on your door. It is as secure and smooth in action as a Safe Lock. IT is found on the finest Office Buildings and Residences in the City. Why not on yours?

Have you considered the Corbin Unit Lock in connection with your new Building or Residence? Look into it. It will pay you.

Editorial Comment.

Notwithstanding the fact that February was a short month and that business generally is inactive, the building totals in San Francisco footed a reasonable sum amounting in all to \$1,696,232. This was divided as follows: Brick and concrete, \$828,153; frame construction, \$746,569; and under the head of Additions and Alterations, \$121,510. This is a little better than the month of January, which amounted to \$1,692,806. And it is better than February 1911 by more than \$100,000 the total for the second month of 1911 footing up on" \$1,568,680.

Comparing figures for the past twelve months the record is as follows:

March, 1911.....	\$2,819,727
April, 1911.....	2,139,696
May, 1911.....	2,326,562
June, 1911.....	2,625,740
July 1911.....	2,126,720
August, 1911.....	1,656,518
September, 1911.....	2,100,653
October, 1911.....	1,928,826
November, 1911.....	2,647,318
December, 1911.....	1,218,022
January, 1912.....	1,692,810
February, 1912.....	1,696,232

It will thus be seen that last month exceeded both December and January and also exceeded February of last year by a considerable amount.

Comparative figures for the month of February for the past ten years are as follows:

February, 1903.....	\$1,277,672
" 1904.....	981,125
" 1905.....	1,200,580
" 1906.....	1,791,853
" 1907.....	4,355,513
" 1908.....	2,662,143
" 1909.....	2,871,495
" 1910.....	2,666,934
" 1911.....	1,568,680
" 1912.....	1,696,232

Considering the fact that throughout the country generally building is at a standstill and that as yet no money has been spent on public enterprises the past month has shown up very well in the list. Within a short time added impetus should be given the building business by the activity concerning the exposition and its allied enterprises.

The experiment of Dr. Alden, the surgeon of the French Hospital in this city, in operating upon himself for appendicitis has demonstrated in a marked degree the advance of surgery and medical science. Surgery in its present sense is a comparatively modern science. For ether was discovered in 1846 and until its use was known

the field of operation was comparatively limited.

Chief among the discoveries since that time is that of antiseptics. For this mankind is chiefly indebted to the late Joseph Lister. While the discovery of ether and chloroform made possible the time necessary for capital operations the result of such performances were usually succeeded by diseases now known to have been the result of infection. Lord Lister demonstrated that surgical operations could be performed without danger of infection. He also crystallized the knowledge of the germ theory of disease and promulgated the use of antiseptic treatment.

To such men we are indebted for the progress of the race. Upon this knowledge of disease germs is based not only the treatment of diseases and safe and antiseptic surgery but also the principles of healthful sanitation.

Small pox, yellow fever, malaria and kindred diseases that formerly were a plague upon the people are no longer a terror. The discovery that yellow fever and malaria are carried only by the mosquito has made possible its extermination in districts where it was formerly always prevalent. The world does move and in the field of science are erected the lasting monuments that add to the health and happiness of mankind. The discovery of Anesthesia was a landmark in the history of surgery. Antiseptic surgery is another monument on the road of human knowledge. And local anesthesia is now so perfected that a surgeon can even operate on himself, retaining all his faculties and holding the afflicted part of himself up as an impersonal entity putting himself in the dual capacity of surgeon and patient at one and the same time.

Reports say that Juarez has been taken by the rebels. It seems that there are about four parties striving for mastery in that ill starred land and with the population such as it is it is not likely that any form of government will be very stable.

There is certainly need of a strong hand in control for as it is the ignorant and shiftless population, more than half Indian, is ready and willing to take up with anything that furnishes excitement and a passing show.

What is needed is a strong government such as Diaz gave, with more justice in its administration and an opportunity for the people to hold and own the land. As it is the populace seems to be wholly irresponsible. If the present state of things continues lives and property of every one will be insecure and the time will soon come when a foreign government will take control.

Recent Developments In Paint Technology As Applied To Building Construction.

From a Paper on Paint, Read Before the Forty-Fifth Annual Convention of the American Institute of Architects by Henry A. Gardner, Assistant Director of the Institute of Industrial Research. Reprinted from "Construction."

Lumber and Its Relation to Paints.—

The proper choice and treatment of lumber is one of the most important problems which the builder as well as the painter has to face. When about to build a dwelling, barn or other structure made principally of wood, the question is sure to arise in regard to what variety to select so as to get the maximum service and money value. The locality in which the structure is to be built must often have a bearing on this question. While it is true that the painting of each type of wood demands the special consideration of the painter, it is also true that the study of paints for wood protection points toward the production of a paint that will give satisfactory results under all conditions and on all grades. It is the writer's opinion that a paint may be made that will be perfectly well suited for the preservation of every species of wood, provided the paint is properly treated in the hands of the skillful and intelligent painter, who can produce lasting results on almost every type, by varying the proportion of thinners and oil in the various coats. The painter who uses the same paint on soft pine and again on hard pine, without making a special study of how to reduce the priming coat for the hard pine, will be likely to get inferior results on the latter. In case of failure, the natural impulse is often to place the blame upon the paint, whereas the real responsibility may rest upon the painter's lack of knowledge.

Signs of Paint Failure.—Those who are responsible for the care and maintenance of property are familiar with the condition of surface presented by almost all wooden buildings or structures which have been improperly painted with inferior paints. "Chalking" or "flouring" are terms used to describe the condition of a paint surface which has deteriorated within the paint film. The formation of minute fissures, generally spoken of as "checking," as well as the effects best described as cracking, scaling, peeling and blistering, are other signs of failure which cause paint coatings to present an unsightly appearance, and which point inevitably either to the use of improperly made paints or to improper application. The cause of these conditions is not difficult to understand when even a brief study of the character of the materials entering into the composition of a paint has been made. It is, however, a fortunate circumstance that the proper admixture of different types of pigments enables us to correct the strong tendency exhibited by special pigments to rapidly deteriorate in an oil film. This point will be more fully discussed in a later paragraph.

Requisites of a Good Paint.—Progressive manufacturers are aiming to produce a paint which will show, under the widest range of conditions, good hiding power, adhesiveness, freedom from internal strains, permanency

of color, relatively highly imperviousness to moisture, sufficient elasticity to prevent scaling or cracking when subjected to expansion or contraction, and freedom from the chemical action which results in deep checking or excessive chalking. Such a product as this cannot be obtained, in the writer's opinion, by the use of any one pigment in linseed oil. In order to meet all the demands as stated above, there should be in an economical and durable paint a proper percentage of the various pigments which united will tend to correct each other's faults and thus produce a durable paint coating of maximum efficiency.

The Composition of Paints.—As is well known, a paint is a mixture of one or more pigments and a vehicle which acts the part of the spreading and binding medium. Up to the present time the vehicle portion of paints has generally been made of linseed oil, admixed with some volatile thinner, such as turpentine. The subject of oil and paint vehicles will be discussed more fully later on.

Physical Properties of Pigments.—The pigment portion of paint for use on barns and farm buildings may, if desired, be composed of properly selected iron oxides or other colored pigments, even containing in some cases a moderately high percentage of silica, clay, or other inert materials, and give perfect satisfactory results. For the preservation and decoration of dwellings, however, the pigment portion of paints is generally made as a whole or in part of the most expensive white pigments, such as white lead and zinc oxide. The relative values and properties of these white base pigments will now be taken up.

White Lead.—White lead, either of the corroded or sublimed type, is perhaps the most generally used of all the white pigments as a paint base. Corroded white lead is a basic carbonate of lead, while sublimed white lead is a basic sulphate of the same metal. Both of these types are white and admirably adapted as painting materials. They take relatively the same amount of oil and spread easily, producing paint films which are highly opaque and which, therefore, hide efficiently the surface upon which they are placed. Sublimed white lead is a relatively finer pigment than corroded white lead, and seems to show a tendency to chalk to a greater extent upon exposure to the weather. Corroded white lead is more alkaline, however, than sublimed white lead, and when used alone with linseed oil generally shows a tendency to chalk to a considerable extent in a short time and to show deep checking, thus permitting the admission of moisture. The alkaline nature of this pigment produces considerable action upon certain tinting colors and results in fading or darkening, when mixed with dilute greens or blues.

The use of white lead has been condemned in some parts of this country, as well as abroad, because of its

alleged poisonous properties. While it is true that lead poisoning may occasionally occur in some factories where the workman and his conditions are not properly safeguarded, it is, nevertheless, a fact that lead poisoning very seldom occurs among painters of experience and cleanly habits. Carelessness in mixing white lead is, fortunately, a practice almost obsolete among modern painters. The use of paints already ground in oil by means of machinery to a pasty condition, allowing easy working and reducing, obviates the danger of lead poisoning from any such cause as this, even though the percentage of lead in such paints is in preponderance.

Zinc Pigments.—Another pigment which has proved itself of great value to the painter is zinc oxide. The use of this pigment may be said to have almost revolutionized the paint industry of the world, and its increased consumption during the last ten years is sufficient evidence of its value as a painting material. Zinc oxide is produced by oxidation and sublimation of zinc ores and is not extremely fine, but of great whiteness. It has good hiding power, although not quite so great as that shown by the white leads. It tends to produce a glossy surface, making it especially valuable for use on interior work and in enamels. When used alone it has the effect of hardening the oil film in which it is enveloped, and upon long exposure causes cracking and scaling. However, when the sublimed or corroded white leads are properly combined with zinc oxide, a more durable surface is produced, the shortcomings of each pigment being overbalanced by the good properties of the other. The proper combining properties of zinc oxide with white lead may be said to vary between 20 to 55 per cent of zinc oxide for paints designed for exterior use. In the opinion of the authors, lead and zinc pigment in the above percentage, properly blended and ground, make paints of far better wearing value than can be produced with either white lead or zinc oxide used alone.

Zinc Lead.—Zinc Lead, a pigment sublimed from mixed lead and zinc ores, and containing about equal proportions of zinc oxide and lead sulphate intimately combined, as well as leaded zinc, a product similarly produced, but with zinc oxide running about 75 per cent, are white base pigments of value, which are used to a considerable extent. They are generally slightly off color, however, and are therefore used most largely in paints which are to be tinted in various colors.

Lithophone.—Lithophone, a pigment produced by precipitation, and consisting of zinc sulphide and barium sulphate, is of great value in the manufacture of interior paints. On account of its liability to darken and disintegrate, however, it is seldom used on exterior work, although recent tests have shown that when used

in combination with zinc oxide and whiting, it gives very promising results.

Crystalline Pigments and Their Use.

Barytes (barium sulphate), silica (silica) whiting (calcium carbonate), gypsum (calcium sulphate), asbestos (silicate of magnesium), and china clay (silicate of alumina) are white crystalline pigments which, when ground in oil become transparent. All of these pigments possess the property of strengthening a paint film made of white lead and zinc oxide, and often increase the durability of such paint. Barytes, silica, and china clay are especially valuable for this purpose. Asbestos because of its needle-like structure and low gravity, prevents settling and acts as a reinforcing of paint films. Whiting or calcium carbonate should be used when zinc oxide is in excess in a paint, so that the hardness of the paint may be overcome.

A white paint must be possessed of sufficient capacity to efficiently hide the surface upon which it is placed, when three coats are applied for new work and two coats for repainting work. Mixtures of the white leads and zinc oxide, with the latter pigment running not over 55 per cent, will easily produce such a result and wear well. It is generally deemed advisable, however, by most manufacturers to take advantage of the excessive capacity of such mixtures, which allows the introduction of moderate percentages of these inert pigments which give greater strength and other desirable features to a paint. The percentage of natural crystalline inert pigments to add to a white paint made of lead and zinc must, however, be moderate and insufficient to detract materially from the hiding power of the paint.

White Paint Formulas.—From these conclusions, which have come from wide experience in the testing of paints under actual service conditions, there can be recommended to the buyer of paints and to the manufacturer and master painter those machine-mixed paints in white, made by reputable manufacturers, the composition of which will show a mixture of white lead and zinc oxide, with the latter pigment within the limits of between 15 to 55 per cent, and especially the same mixture reinforced with the moderate percentage of crystalline inert pigments referred to above.

Tinted paints possess greater hiding power than white paints, and the above proportions should be somewhat changed for a tinted paint containing any percentage of coloring material. Tinted paints are, moreover, far more serviceable than white paints, as will be shown later.

Milk vs. Paddle.—The mixtures under consideration should be ground in linseed oil by the manufacturer, through stone or steel mills, to a very fine condition, as it is only through proper grinding that the pigments can be properly blended. The mixing of paint by hand is, fortunately, to a large extent, a thing of the past. The uneven lumping of hand mixed paints is often the cause of their failure. Such ancient and crude practice should be avoided by every painter, for it is more economical to obtain semi-paste paints, properly ground by machinery, to such a condition that they may be

easily broken up and tempered. Such paints may be reduced to the proper consistency with oil and volatile thinner for application to any kind of wood.

In the opinion of the writers, a majority of the paints sold by reputable dealers and made by reputable manufacturers in this country are not only made from the best linseed oil and highest grade pigments obtainable, but are put in a form ready for the painter to thin down with full oil or turpentine reductions, either for priming work or to be used without reductions for finishing coats. The large metropolitan painter who wishes to make his own tints and shades may, however, prefer to have his mixed pigment paint ground by the manufacturer in heavy paste form for certain purposes.

Results of Field Tests.—A careful analysis of the results of field tests which have been carried on in different parts of the country would be far too voluminous for insertion in this bulletin. The official findings of special committees of inspection have already been published in special reports. Whereas there may still remain ground for some difference of opinion in regard to the interpretation of the results obtained on the various test faces, there can be no doubt that considerable information of the highest value has been yielded both to the producers and consumers of paints. One of the principal results obtained from these tests has led to the opinion expressed above by the writers, that better results can be obtained by a proper mixture of selected pigments than by the use of any one pigment in linseed oil. This conclusion has also been reached by engineers of the United States Navy, and, as a result, the specifications of the Bureau of Ships and Buks for paints made of straight white lead and oil have recently been changed to call for white lead combined with upwards of 50 per cent of zinc oxide. Many engineers and master painters have interpreted the results of the tests in the same way, and the attention of the authors has been called to a number of opinions which show that the tendency of demand among those who are properly informed is for a high grade combination type of paint rather than for any single pigment paint.

Color.—The selection of the color for a dwelling or other structure is a matter that depends largely upon the good judgment and taste of the owner, combined with the advice of the painter. One point, however, should be impressed upon the mind of both, namely, that particularly all shades or tints made upon a good white paint base, through the use of permanent tinting colors, will better withstand exposure to the atmosphere than the white base used alone. Owing to the cheerful effect produced by the use of white paints on dwellings, a very large quantity of white will continue to be used. If these white paints are designed in line with the suggestions brought out above—that is to say, if the white lead bases are properly reinforced with zinc oxide and other supplementary materials—better results will undoubtedly be obtained, as far as appearance and durability is concerned, than if white lead had been used alone. The consumer should remember however that more durable results will be obtained by the use of tinted paints.

Reductions and Thinners.—Turpentine, with its sweet odor, high solvent action, and wonderful coloring value, has always taken a first place among the volatile liquids used for thinning paints. Wood turpentine, produced from the stam distribution of fine-cut fat pine-wood or from the destructive distillation of stumpage and sawdust, have been pointed in some cases by a combination of odor and toxic effects, to such purity that they are equally as good as the purest grades of gum turpentine, and their use is bound to increase in the paint industry.

The painter and manufacturer have come to understand that certain grades of asphaltum and paraffine distillate are equally as satisfactory as turpentine for use in paints for exterior purposes. Those volatile oils which are distilled from crude oil with either a paraffine or asphaltum base and possessed of boiling point, color, and evaporative value approximating similar constants of turpentine, are excellently suited to paint, and in some cases wholly replace turpentine in exterior paints. A little additional dryer added to paints thinned with these materials will cause oxidation to take place in the proper time.

Prominent master painters have shown that benzol, a product obtained from the distillation of coal tar, differing from benzine, a product obtained from the distillation of petroleum, is a valuable thinner to use in the reduction of paints for the priming of resins. Under such as cypress and yellow pine. The penetrating and solvent value of benzol is high, and it often furnishes a union between paint and wood that is a prime foundation to subsequent coatings, preventing the usual scaling and sap exudations, which often appear on a painted surface. Because of the great solvent action of benzol, however, this material should never be used in the second and third coatings. These facts will doubtless interest the southern painter, who has so much wood of a refractory nature to paint.

Oil.—The increasing cost of linseed oil has raised the interesting question as to whether or not it is a good practice to use an admixture of other oils in connection with it, in high-grade paint coatings. Strong differences of opinion will probably be found in regard to this question, and undoubtedly further investigation work is necessary in order to decide it. A number of different oils have been prepared for the purpose, of which, perhaps, soyabean is one which has been most prominently discussed. No definite formulas, however, should be recommended until the results of investigations which are now being carried on are in hand. A systematic series of test panels is now being erected in Washington, D. C., on the grounds of the Institute of Industrial Research, which are designed to gather data covering just this point.

The flux crop conditions have been most discouraging during the past two years, and the natural shortage of seed has caused a rise in the price of linseed oil, which has necessitated a rise in the price of paint. The aid and protection to be secured, however, through the frequent and increased use of paint far outweighs any increased cost which has been caused by the rise in price of the raw commodities entering into the composition of paint.

(Continued Next Week)

Firms desiring news on special classes of buildings such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

San Francisco—Apartment House, 3 story and base, frame, \$20,000. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner, M. S. Shaw. This building will be 27x126 feet and will contain twelve apartments of three and four rooms each and bath. There will be steam heat, wall beds and elevator service. The interior finish will be of pine with some hardwood floors. The exterior of the building will be covered with brick veneer and shiplap. The architect is also preparing plans for a similar structure which will be erected for the same owner on an adjoining piece of property. The plans for one of the buildings are complete and the work will be done by Day Labor.

San Francisco—Apartment house, 3 story and base, frame, \$10,000. Architect, none. Owners, C. J. and W. J. Keenan, 300 Webster St., S. F. The building has been designed to contain eighteen small apartments. The interior finish will be of pine throughout. There will be connecting baths and wall beds. The exterior of the building will be covered with brick veneer and shiplap. The plans are complete and the work will be done by Day Labor.

San Francisco—Apartment house, 3 story and base, frame, \$8,000. Architect, none. Owner, James Stambaugh, 1282 Stanyan St., S. F. The building will be 25x35 and have been arranged for six apartments of three and four rooms and connecting baths. The interior finish will be of pine throughout. There will be gas grates. The entrance will be finished in tile. The exterior of the building will be covered with shiplap. The plans are in the hands of the owner and the work will be done by Day Labor.

San Francisco—Apartment house, 4 story and base, brick and steel, \$15,000. Architect, August Nordin, Mills Bldg., S. F. Owners, Frankly Realty Co. The building will be erected on a corner lot and will contain forty apartments of the two and three room type. There will be steam heat, wall beds, elevator service and connecting baths. The interior finish will be of pine. The exterior of the building will be faced with pressed brick. The plans are in the hands of the owners and they will submit all parts of the work.

San Francisco—Apartment house, 2 story and base, frame, \$25,000. Architects, Welsh & Caray, Metropolitan Bank Bldg., S. F. Owners, Joseph Abrams et al. The building will contain 26 rooms arranged in suites of two and three rooms each and connecting baths. The interior finish will be of pine and hardwoods. There will be steam heat and probably elevator service. There will be wall beds. The exterior of the building will be covered with cement plaster. The plans are now being prepared.

Oakland, Cal.—Apartment house, 3 story and base, frame, \$11,500. Architect, John Carson, Bacon Bldg., Oakland. Owner, G. H. Ludington. The building will contain nine apartments

arranged in two and three room suites with private baths. There will be wall beds and a central heating system. The interior finish will be of pine throughout. The exterior of the building will be covered with cement plaster on metal lath. The plans are complete and the architect is taking figures.

Oakland, Cal.—Apartment house, 3 story and base, frame. Cost not stated. Architect, Clay N. Burrell, Central Bank Bldg., Oakland. Owners, First Federal Trust Co. The building will contain in the neighborhood of twenty-four rooms arranged in two-room suites with baths. The interior finish will be of pine. There will be a warm air heating system. The exterior of the house will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Oakland, Cal.—Apartment house and stores, 2 story and base, frame, \$8,000. Architect, Claude B. Barton, 460 13th St., Oakland. Owner, J. R. Tallman. The building has been designed for two stores on the first floor and a number of small apartments on the upper floor. There will be pine interior finish and open fire places. There will be several baths. The street fronts will be of plate glass. The exterior of the building will be covered with shiplap. The architect is preparing the plans.

Fresno, Fresno Co., Cal.—Apartment house, 3 story and base, brick and steel, \$50,000. Architect, Edward T. Poukes, Crocker Bldg., S. F. Owner, H. H. Brix. The building will contain 35 apartments each with connecting baths. There will be steam heat and elevator service. Wall beds will be used. There will be a vacuum cleaning system. The interior finish will be of pine and hardwood. The exterior of the building will be faced with pressed brick and terra cotta. The architect is now taking figures on the work.

Los Angeles, Cal.—Apartment house, 3 story and base, frame. Cost not stated. Architect, Lester S. Moore, Auditorium Bldg., L. A. Owner, Miss Lillie M. MacGowan. The building will be 51x116 feet. There will be thirty apartments of two and three rooms each with connecting baths. The interior trim will be of white enamel with hardwood floors. There will be steam heat, wall and disappearing beds, vacuum cleaning system and a trunk elevator. The exterior of the building will be covered with rustic. The plans are complete and figures are being taken.

Los Angeles, Cal.—Apartment house, 4 story and base, brick and steel. Cost not stated. Architect, F. X. Lourdou, Merchants' Trust Bldg., L. A. Owner, C. A. Vandenberg. The building will be arranged for 120 rooms divided into 48 apartments with connecting baths. There will be a general lobby, billiard room and ball room. There will be steam heat, elevator service and wall beds. The exterior of the building will be faced with pressed brick. The plans are complete and figures are being taken.

Venice, Los Angeles Co., Cal.—Apartment house, 3 story and base, frame. Cost not stated. Architect, Frank T. Klegley, Consolidated Realty Bldg., L. A. Owner, George H. Cam. The building will be 30x108 feet and will contain 20 two and three room apartments with connecting baths. There will be steam heat and wall beds. The exterior of the building will be covered with cement plaster. Figures are being taken.

Los Angeles, Cal.—Apartment house, 2 story and base, brick. Cost not stated. Architects, Train and Williams, Exchange Bldg., L. A. Owner, Jeremy Royse. The building will be 47x110 feet and will contain 44 rooms arranged in twenty suites of two rooms and baths. There will be wall beds and steam heat. The exterior of the building will be faced with pressed brick. The architects are preparing the plans.

Long Beach, Los Angeles Co., Cal.—Apartment house, 4 story and base, brick and steel, \$75,000. Architect, none. Owner, Scott W. Alexander, O. T. Johnson Bldg., L. A. The owner has plans for a building 50x150. There will be stores on the first floor and apartments above. There will be steam heat and elevator service. The exterior will be faced with pressed brick. The owner is now calling for figures on all parts of the work.

Redondo Beach, Los Angeles Co., Cal.—Apartment house, 2 story and base, frame, \$14,000. Architects, Croner and Croner, California Bldg., L. A. Owner, C. J. Beal. The building will be 42x126 feet. There will be twenty apartments of two and three rooms each with private baths. There will be wall beds. The exterior of the building will be covered with cement plaster on metal lath. The plans are being prepared.

Los Angeles, Cal.—Apartment house, 4 story and base, brick and steel. Cost not stated. Architect, Elmer C. Andras, Wright and Callender Bldg., L. A. Owner, Jesse Rains. The building will be arranged for 51 apartments of two and three rooms each. There will be steam heat, wall beds, private bath. The exterior of the building will be faced with pressed brick. The plans are complete and the architect is taking figures.

BRIDGES, DAMS AND HARBOR WORK.

Los Angeles, Cal.—Bridge concrete type. Cost not stated. Engineering Dept. Board of Public Works, L. A. Owners, City of Los Angeles. The Board of Public Works has been instructed to prepare plans for a bridge over the Arroyo Seco at Cypress Ave. Working drawings will be completed shortly.

San Diego, Cal.—Pier, reinforced concrete type. Cost not stated. Harbor Engineer E. M. Carps, San Diego. Owners, City of San Diego. The dock will be of reinforced concrete, and will extend 800 feet into the bay, being supported by 530 reinforced concrete piles. The surface will be of asphalt. The pier will be covered with a galvanized iron shed, supported on a steel framework, with 24 steel rolling doors on each side. The plans and specifications will be completed in about ten

days, and will then be submitted to the city council for approval.

Los Angeles, Cal.—Harbor work pier and etc. Cost not stated. City Engineer Homer Hamlin, L. A. Owners. City of Los Angeles. The engineer has submitted estimates on two types of reinforced concrete construction, one with and one without sheet piling. The estimate without sheet piling is \$120,732 and with sheet piling is \$118,883.

Chehalis, Wash.—Bridges. Concrete and steel. Cost not stated. Engineer, County Surveyor, Montesano. Owners, Chehalis County. All bids for the construction of two bridges have been rejected. The work will be done under the direction of A. L. Preston, County Supt. of Bridges.

Contracts Awarded.

Long Beach, Los Angeles Co., Cal.—Bulk head, stone and concrete. City Engineer, Long Beach. Owners, City of Long Beach. Contractor, Charles Stansbury, H. W. Hellman Bldg., L. A. Contract price \$73,000.

CHURCHES.

San Francisco.—Church, 1 story and base, frame, \$5,000. Architect, W. J. Wythe, Central Bank Bldg., Oakland. Owners, Potrero Methodist Church. The building will contain the main auditorium and Sunday school rooms. The exterior will be covered with shingles. The architect is ready to receive figures on the work.

Hanford, Kings Co., Cal.—Church, brick construction, \$20,000. Architect, J. Carl Thayer, Fresno. Owners, First Presbyterian Church of Hanford. The building will have a main auditorium with a seating capacity of 500, 5 Sunday School rooms, library and parlor. There will be a central heating system. The exterior of the building will be faced with pressed brick. The architect has just been commissioned to prepare the plans.

Anaheim, Orange Co., Cal.—Church additions, brick construction. Cost not stated. Architect, Albert C. Martin, Higgins Bldg., L. A. Owners, Roman Catholic Church of Anaheim. The present building will be practically rebuilt. The new portion will be 72x75 feet. There will be a new heating system installed. The exterior will be faced with blue pressed brick. There will be art glass windows. The plans are being prepared.

Fullerton, Orange Co., Cal.—Church, 2 story and base, brick and frame, \$20,000. Architect, Fred H. Eley, Harvey Finley Bldg., Santa Ana. Owners, Baptist Church of Fullerton. The building will be 70x95 and will have a seating capacity of 750. There will be 15 Sunday School rooms, study and parlors. The edifice will be heated by a warm air system. The exterior will be covered with cement plaster. The architect is preparing the working drawings. Work will be started in April.

Riverside, Riverside Co., Cal.—Church, 2 story and base, brick and concrete, \$75,000. Architect, Myron Hunt, Union Trust Bldg., L. A. Owners, First Congregational Church of Riverside. This work has been mentioned here before when the architect was first selected. The working drawings are now complete and figures are being taken. The building will be 160x88 feet. There will be a steam heating

stem. The exterior will be faced with pressed brick.

Contracts Awarded.

Alhambra, Tulare Co., Cal.—Church, 1½ story and base, frame, \$10,000. Architect, J. Carl Thayer, Fresno. Owners, First Presbyterian Church of Alhambra. Contractors' name not given. Contract price \$10,000.

Los Angeles, Cal.—Church, 2 story and base, brick and frame, \$40,000. Architect Elmar E. McQuarrie, Higgins Bldg., Los Angeles. Owners, Evangelical Lutheran Church of Los Angeles. Contractor, Herman Haase, 1821 New England Ave., L. A. Contract price \$38,950.

COURT HOUSES.

Olympia, Wash.—Temple of Justice, 2 story and base. Class A construction, \$250,000. Architects, Wilder & White, New York City. Owners, State of Washington. Contractor, Hans Pederson, Madison Bldg., Seattle. Contract price, \$219,650. The following is a complete list of the bids received for this work:

Hans Pederson, Madison Bldg., Seattle	\$219,650
Olson & Johnson, Missoula, Mont.	220,600
Butler Const. Co., Seattle	221,000
L. A. Hicks & Co., Tacoma	223,600
Jenkins & Jones, Seattle	231,025
Alex. Pearson, Seattle	241,851
Geo. C. Dietrich & Rounds, Huron, Seattle	247,000
McLellan-Hickey, Seattle	250,000
Luftelson & Gehring, Seattle	255,229
Klobart, Smith & Roundtree, Seattle	257,735
Puget Sound B. & D. Co., Seattle	257,765
Aldrich & Hunt, Seattle	258,199
Mearns Const. Co., Seattle	260,671
J. H. Wiese, Omaha	269,120
Sound Const. & Engr. Co., Seattle	284,649
Colonial Bldg. Co., Seattle	290,842

FACTORIES & WAREHOUSES.

San Francisco.—Laundry, 2 story and base, frame, \$3,000. Architects, Fabre & Bearwald, Metropolis Bank Bldg., S. F. Owner, C. Lemaistre. The work will be in the nature of the alteration to a two-story building and will consist of new plumbing, electric work and plastering. There will also be some exterior alteration. The plans are complete and figures are being taken.

San Diego, Cal.—Brewery, 2 story and base, brick and steel. Cost not stated. Architect, Richard Griesser, Chicago. Owners, Bay City Brewing Co., San Diego. The owners announce that the plans for this improvement have been completed and that figures are now being taken. The exterior will be faced with pressed brick. The plans for a large bottling plant are also being drawn.

Los Angeles, Cal.—Warehouse, 2 story and base, reinforced concrete. Cost not stated. Architect, Albert C. Martin, Higgins Bldg., L. A. Owner, C. C. Colquhoun. This work has been mentioned here before. The plans for the building are now complete and figures will be taken at once. The construction will be fireproof throughout. The exterior will be faced with cement plaster. The plans provide for five additional stories to be erected later.

Contracts Awarded.

Huntington Beach, Los Angeles Co., Cal.—Factory, 1 story and base, brick and steel \$20,000. Architect's name not given. Owners, Holly Sugar Factory. Contractor, Carl Leonard, H. W. Hellman Bldg., L. A. Contract price, \$20,000.

Seattle, Wash.—Factory additions, 2 story addition, brick and steel, \$30,000. Architects, Blackwell and Baker, Northern Bank and Trust Bldg., Seattle. Owners, Washington Shoe Mfg. Co. Contractors, Manhattan Const. Co., Central Bldg., Seattle. Contract price, \$30,000.

FLATS.

San Francisco.—Flats, 2 story and base, frame, \$7,000. Architect, H. C. Smith, Humboldt Bank Bldg., S. F. Owner's name withheld. The building will contain two large and modern flats of six rooms each and bath. The interior finish will be of pine and redwood. There will be some hardwood floors. Open fire places will be built in the living rooms. The exterior of the building will be covered with shiplap. The architect is now taking figures on the work.

San Francisco.—Flats, 3 story and base, frame, \$5,000. Architect, E. A. Neumarkel, 918 Market St., S. F. Owners, Mr. and Mrs. A. P. Kruse. The building will be 25x55 and will contain three flats of five and six rooms each. The interior finish will be of pine and redwood. There will be some hardwood floors. There will be gas grates. The exterior of the building will be covered with shiplap. The plans are complete and the work will be done by Day Labor.

San Francisco.—Flats, 2 story, base and attic, frame flats, \$6,000. Architect, Henry Sherman, Mills Bldg., S. F. Owner's name withheld. The building will be arranged for two flats and a garage. The interior finish will be pine throughout. There will be open fire places. The roof will be finished for a sun room. The exterior of the building will be covered with shiplap. The architect is preparing the plans.

San Francisco.—Flats, 3 story and base, frame, \$5,000. Architect, Henry Sherman, Mills Bldg., S. F. Owner, Carolina L. Hamshar. The building will be erected on a lot with a 17-foot frontage and a depth of 65 feet. There will be open fire places with tile mantels. The interior trim will be of pine with some hardwood floors. Tile and mosaic will be used. The exterior of the building will be covered with shiplap. The plans are complete and figures are being taken.

GARAGES.

Contracts Awarded.

Santa Monica, Los Angeles Co., Cal.—Garage, 1 story and base, brick, \$15,000. Architect none. Owner, C. W. Yarrant. Contractor, James T. Ferguson, 2651 Hill St., Santa Monica. Contract price \$15,000.

Beverly Hills, Los Angeles Co., Cal.—Garage, 2 story and base, concrete and frame, \$12,000. Architect, Elmar E. Grey, Wright and Calender Bldg., L. A. Owners, Robo Land and Water Co. Contractor, Charles A. Poulson, 1739

Magnolia Ave., L. A. Contract price, \$12,000.

GOVERNMENT WORK AND SUPPLIES.

ONE MILLION DOLLARS FOR NAVAL WIRELESS.

Considerable interest has manifested in the House naval committee concerning the recommendation of the Navy Department for the appropriation of \$1,000,000 for high-power wireless-telegraph stations for the Canal Zone and the Pacific. The recommendation has reached the committee in the form of a departmental communication, but the committee is not likely to take it up seriously until it is submitted in a formal way as an estimate through the secretary of the treasury, since it now comes as a "suggestion" from the Navy Department. It is doubtful whether the committee will incorporate the item in the naval appropriation bill, in any event, in view of the determination of the leaders of the House to keep down military-naval expenditures. The plan is to establish as soon as possible a wireless station on the Canal Zone. There will be another station on the California coast, one in the Hawaiian Islands, one in American Samoa, one on the island of Guam, and one in the Philippine Islands. For the California station it is proposed to locate it on the ocean beach of San Francisco, or on near the ground of the Panama-Pacific Exposition. The advantages of the site are, first, proximity to fortifications; second, proximity to the most important harbor on this coast; third, unequalled wireless conditions as regards outlook toward the Hawaiian Islands and ground connections; fourth, facility of supplying the power and other necessities. It is suggested that if the exposition management can be interested in this matter, they would probably furnish a suitable site without cost to the government and would assist in urging that this appropriation be made. Not only would such a powerful station be an attractive feature for the exposition, but one of the towers could be made of sufficient height to afford a view over the entire fair grounds and the city. This station would be designed to work directly by day and by night with a similar station on the Pearl Harbor naval reservation which should be erected at the same time as the California station.

The bureau of yards and docks of the Navy Department has prepared plans for the increase in the length of the dry dock which is under construction at the naval station at Pearl Harbor. The design of the dock as originally adopted called for a length of 800 feet, and it is proposed to add 200 feet. A dock of 1,000 feet at Pearl Harbor will require an additional expenditure of \$650,000. This 1,000-foot dock in the Pacific is in accordance with the recommendation of the secretary of the navy contained in his annual report for two such docks—one for the vessels in the Pacific and the other somewhere on the Atlantic coast. The site of the latter has not been determined upon by the naval authorities. Some suggestion in that direction is likely to be made by Secretary Meyer when he appears before the House naval committee this week. The location of the big dock on the Atlantic coast appears to rest between New

York and Norfolk, with the preference of the Navy Department for the latter place. In that event it will probably be necessary to acquire some more land.

The chief of the bureau of yards and docks, Navy Department, Washington, D. C., will receive bids on April 13 for the construction of an administration building at the naval station, Pearl Harbor, Hawaii. The building shall be two stories, with porches from south front of each floor. Floor slabs beams, girders, columns, and building walls shall be of reinforced concrete, partition of metal lath and stud. Roof shall be framed of wood with covering of corrugated sheet steel. The general dimensions of the building shall be as follows: 39 ft 4 ins by 106 ft 4 ins for building proper, and 49 ft 2 ins by 106 ft 4 ins including porches.

The new call for bids for the construction and completion of the public building at Pendleton, Oreg., will be issued in the early future. The drawings are now being checked over for final revision. The original bids opened on September 15, were rejected on account of insufficient funds.

HALLS AND SOCIETY BUILDINGS.

San Rafael, Marin Co., Cal.—Bathing pavilion, 2 story and base, concrete and frame, \$20,000. Architect, Thomas O'Connor, San Rafael. Owners, City of San Rafael. The architect has submitted a plan for a public bath house to the City Trustees which has met with favorable consideration. The plan provides for a building 190x211 feet. There will be in the neighborhood of 125 bath rooms, a large swimming tank and other modern features. The Trustees will probably include the cost of the construction on a bond issue which is about to be submitted to the voters.

Beresford, San Mateo Co., Cal.—Country Club, 2 story and base, reinforced concrete, \$75,000. Architects, G. Albert Lansburgh & Sylvain Schnaitacher, associated, Gunst Bldg., S. F. Owners, Beresford Country Club. An announcement has just been made of the selection of these architects to prepare plans for one of the most extensive clubs on the peninsula. The details of the construction cannot be given at this time as the architects have not started the working drawings. The owners will probably consider both the reinforced concrete and brick types of construction. Further details will be given as the drawings progress.

Sacramento, Sacramento Co., Cal.—Armory, 2 story and base, Class A construction, \$95,000. State Architect Diggs, Sacramento. Owners, State of California. This work has been mentioned here before when the plans were first out for figures and when the bids were opened. The revised plans are now complete and figures are being taken. Bids will be opened on March 15th.

San Bernardino, San Bernardino Co., Cal.—Association Bldg., 2 and 3 story and base, brick and steel, \$60,000. Architect, Elmore R. Jeffery, Citizens National Bank Bldg., L. A. Owners, San Bernardino Young Mens Christian Association. The building will cover an area of 74x125 feet. The main portion of the building will be three

stories in height and the gymnasium two stories. There will be steam heat. The exterior of the building will be faced with pressed brick and limestone. The plans are nearly completed.

Santa Monica, Los Angeles Co., Cal.—Club house, 1½ story and base, frame, \$13,600. Architect, H. C. Hollwedel, Majestic Theatre Bldg., Santa Monica. Owners, Santa Monica Bay Women's Club. The building will be in the bungalow style with the exterior covered with cobble stones. The interior finish will be of pine and redwood. There will be furnace heat and open fire places. The plans have been approved and figures will shortly be called.

HOSPITALS.

Baker City, Ore.—Hospital, 3 story and base, stone. Cost not stated. Architect, M. P. White, Baker City. Owners, St. Elizabeth's Hospital. The plans for this building, which have been mentioned here before, are complete and can be secured from the architect or from the Portland Builders' Exchange. There will be steam heat and elevator service. The exterior of the building will be faced with Pleasant Valley stone, a local product. Bids were opened on March 4th.

HOTELS.

San Francisco—Hotel, 4 story and base, brick and steel, \$10,000. Architect, R. J. Patch, Phelan Bldg., S. F. Owners, Zellerbach-Levison Co. The building will be erected on the "Waterfront." There will be stores on the first floor and a number of single rooms on the upper three floors. There will be steam heat and elevator service. The interior trim will be of pine. The exterior of the building will be faced with pressed brick. The plans are complete and the work is now being figured.

San Francisco—Hotel additions, 3 story and base, brick, \$40,000. Architects, George A. Strossley & Co., Balboa Bldg., S. F. Owner's name withheld. The work will consist of the addition of three stories to a present one-story brick building. The first floor will contain four stores and the upper floors in the neighborhood of 90 rooms. There will be a number of baths and toilets. There will be steam heat and elevator service. The interior trim will be of pine. The exterior of the building will be faced with cement plaster. The plans are being prepared.

Los Angeles, Cal.—Hotel and stores, 3 story and base, brick. Cost not stated. Architects, Train and Williams, Exchange Bldg., L. A. Owner, Mrs. Jennie White. The building will be 40x165 feet. The first floor will contain one large store besides the hotel entrance. There will be 44 rooms and 17 baths on the upper floors. There will be steam heat. The exterior of the building will be faced with glazed brick. The plans are complete and bids are being taken.

Balboa Island, Cal.—Hotel, 2 story and base, concrete and frame \$60,000. Architects, Dennis and Farwell, Pay Bldg., L. A. Owner, W. S. Collins. The building will be designed in the Spanish Renaissance style with a four story tower. There will be steam heat. The exterior of the building will be covered

with cement plaster on metal lath. The roof will be of red clay tile. The architects are preparing the working drawings.

Contracts Awarded.

Los Angeles, Cal.—Hotel, 8 story and base, reinforced concrete, \$100,000. Architect, W. J. Saunders, Wright and Callender Bldg., L. A. Owner, F. W. Braun, Contractors, Barber, Bradley Const. Co., 1824 East 15th St., L. A. Contract price, \$100,000.

Los Angeles, Cal.—Hotel, 3 story and base, brick, \$16,000. Architects, Noonan and Kysor, Wright and Callender Bldg., L. A. Owner, Mrs. H. W. Little, Contractor, J. F. Whelan Engineering Co., 1824 East 15th St., L. A. Contract price, \$16,000.

San Francisco—Hotel, 7 story and base, reinforced concrete, \$100,000. Architects, Richetti & Headman, Pheasant Bldg., S. F. Owners, George and Eva McCallie, Contractors, Mutual Construction Co., Mondach Bldg., S. F. Contract price not stated.

San Francisco—Hotel, 11 story and base, brick, \$700,000. Architects, Harrison Albright, Laughlin Bldg., L. A. Owner, E. P. Clark, Contractors, F. O. Engstrom Co., Fifth and Sealon Sts., L. A. Contract price, \$750,000. Note—The contract does not include elevators and electric fixtures.

Portland, Ore.—Hotel, 4 story and base, brick and steel, \$40,000. Architects Bennes and Hendricks, Portland. Owners, B. Hagedorn, Contractors, J. S. Winters and Co., Portland. Contract price, \$40,000.

LIBRARY.

Los Angeles, Cal.—Library, 1 story and base, brick, \$35,000. Architects, Hunt and Burns, Laughlin Bldg., L. A. Owners, City of Los Angeles. This work has been mentioned here before when the architects were first selected to prepare the plans. The drawings have been approved by the Carnegie Commission and bids will be called at once.

Contracts Awarded.

Forest Grove, Ore.—Library, 1 story and base, concrete and brick, \$20,000. Architects, Whidden and Lewis, Portland. Owners, Pacific University, Contractors, J. F. Whelan Engineering Co., Portland. Contract price, \$20,000.

POST OFFICES.

Pendleton, Ore.—Post office, 2 story and base, brick and stone. Cost not stated. Architect, James Knox Taylor, Washington, D. C. Owners, U. S. Government. This building was out for figures last September but all bids were rejected. Revised plans have been completed and new figures will be called for at once.

Contracts Awarded.

Walla Walla, Wash.—Postoffice, 2 story, attic and base, brick and steel, \$150,000. Architect, James Knox Taylor, Washington, D. C. Owners, U. S. Government. Contractors, Dieter-Wenzel Const. Co., Wichita, Kansas. Contract price, \$150,000.

RESIDENCES.

San Francisco—Residence, 2 story and base, frame, \$15,000. Architect, none. Owner, W. A. Savage, 1344 2nd Ave., S. F. The dwelling will contain seven rooms and bath. The interior finish will be of pine with some hard-

wood floors. There will be open fire places with tile or brick mantels. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

San Francisco—Residence, 2 story and base, frame, \$1,000. Architect, none. Owner, H. G. Goepff, 150 Broadway St., S. F. The dwelling has been designed for an eight-room house with bath. The interior finish will be of pine throughout. There will be some oak floors. There will be open fire places and brick or tile mantels. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

San Francisco—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, W. L. Hemings, 1555 Hayes St., S. F. The dwelling will contain seven rooms and bath. There will be pine trim throughout with oak floors in the principal rooms. There will be open fire places with tile mantels. The exterior of the house will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Bungalow, 1 story and base, frame, \$2,500. Architect, none. Owners, Anderson Bros., Oakland. The dwelling has been designed for a five-room house with bath. The interior trim will be entirely of pine. The floors of the living room and dining room will be finished in oak. There will be a large open fire place with brick or tile mantel. The exterior of the bungalow will be covered with cement plaster on metal lath. The work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Bungalow, 1 story and base, frame, \$2,000. Architect, none. Owner, C. J. A. Mattson, 1609 Grant St., Berkeley. The dwelling will contain six rooms and bath. There will be pine trim, oak floors and open fire places. The mantels will be of tile. The exterior of the bungalow will be covered with shingles. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Residence, 2 story and base, frame, \$3,000. Architect, George W. Kaiser, 3232 E. 19th St., Oakland. Owner, L. T. McNab. The dwelling has been designed for an eight-room house with baths. The interior finish will be of pine and redwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the baths and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Berkeley, Alameda Co., Cal.—Residence alterations, \$2,000. Architect, Leola Hall, 2618 College Ave., Berkeley. Owner, L. E. Snow. The work will consist of the alteration of a 23-room house. There will be new plumbing and electrical work. The exterior will also be altered. The plans are complete and the work is to be done by Day Labor.

Alameda, Alameda Co., Cal.—Bungalow, 1½ story and base, frame, \$3,000. Architect, George R. Knox, 240 Estudillo Ave., San Leandro. Owner, W. J. Locke. The bungalow has been designed for a seven-room house. The interior finish will be of pine and red-

wood. There will be some hardwood floors. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the kitchen and bath. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Berkeley, Alameda Co., Cal.—Bungalow, 1 story and base, frame, \$2,500. Architect, none. Owner, H. L. Cagins, 2618 College Ave., Berkeley. The dwelling has been designed for a five-room house with bath. The interior finish will be of pine. There will be some oak floors. There will be open fire places with brick or tile mantels. The exterior of the bungalow will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, \$5,000. Architect, none. Owner, C. L. McFarland, 2560 Prospect Ave., Berkeley. The dwelling has been designed for an eight-room house with bath. The interior finish will be of redwood and pine. There will be furnace heat and open fire places. The mantels will be of brick. There will be some hardwood floors. Tile will be used in the baths and kitchen. The exterior of the dwelling will be covered with shingles. The plans are in the hands of the owner and he is now taking figures on the work.

Oakland, Cal.—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, W. C. Bell, 678 Greenwich St., S. F. The dwelling will contain eight rooms and bath. The interior finish will be of pine and redwood with some oak floors. There will be furnace heat and open fire places. The mantels will be of tile or brick. Tile will be used in the bath and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Residence, 2 story and base, frame, \$7,000. Architect, none. Owner, Lester Reiff, Grand Ave. and Boulevard Ave., Oakland. The dwelling has been designed for a 10-room house and baths. The interior finish will be of pine and redwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick and tile. Tile will also be used in the baths and kitchen. The exterior of the residence will be covered with cement plaster on metal lath. The plans are in the hands of the owner and he is taking figures on the work.

Oakland, Cal.—Residences, 2, 2 story and base, frame, \$2,000 each. Architect, R. A. Hutchison, 470 13th St., Oakland. Owner's name withheld. The dwellings will contain seven rooms and bath each. There will be pine and redwood interior finish, open fire places and brick and tile mantels. There will be some hardwood floors. The exteriors of the dwellings will be covered with cement plaster on metal lath and with shingles. The plans are complete and figures are being taken.

Oakland, Cal.—Bungalow, 1 story and base, frame, \$2,500. Architect, R. A. Hutchison, 470 13th St., Oakland. Owner, T. S. Fitzpatrick. The dwelling has been designed for a five-room house with bath. The interior finish will be of pine with some hardwood floors.

There will be a large open fire place with tile or brick mantel in the living room. The exterior of the bungalow will be covered with shingles. The plans are complete and figures are being taken.

Los Gatos, Santa Clara Co., Cal.—Residence, 2 story and base, frame, \$4,000. Architect, F. T. Swain, Mutual Bank Bldg., S. F. Owner, W. H. Little. The dwelling will contain in the neighborhood of eight-rooms and bath. The interior finish will be of pine and redwood. There will be some hardwood floors. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the baths and kitchen. The exterior of the residence will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, \$3,200. Architect, R. A. Hutchinson, 40 13th St., Oakland. Owner's name not given. The dwelling will contain seven rooms and bath. The interior finish will be of pine with hardwood floors in the principal rooms. There will be open fire places with tile or brick mantels. The exterior of the dwelling will be covered with shingles. The architect is preparing the plans.

Freitasville, Alameda Co., Cal.—Bungalow, 1 story and base, frame, \$2,000. Architect, R. A. Hutchinson, 470 13th St., Oakland. Owner, Mrs. Green. The bungalow will contain six rooms and bath. The interior finish will be of pine and redwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick or tile. Tile will be used in the bath and kitchen. The exterior of the bungalow will be covered with shingles. The architect is preparing the plans.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, \$4,500. Architect, W. H. Ratcliff, First National Bank Bldg., Berkeley. Owner, Robert Von Bokkelen. The dwelling has been designed for an eight-room house with bath. The interior finish will be of pine and redwood. There will be furnace heat and open fire places. The mantels will be of tile or brick. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Richmond, Contra Costa Co., Cal.—Bungalow, 1 story and base, frame, \$2,000. Architect, J. G. Oxborn, Richmond. Owner, H. Anderson. The bungalow will contain six rooms and bath. The interior trim will be of pine throughout. There will be open fire places with tile mantels. The exterior of the bungalow will be covered with rustic. The plans are complete and figures are being taken.

Fowler, Fresno Co., Cal.—Residence, 2 story and base, frame, \$7,000. Architects, Starbuck and Clark, Fresno. Owner, M. L. Harris. The dwelling has been designed for an 8 room house with two baths. The interior finish will be of pine and redwood with some hardwood floors. Tile will be used in the baths and kitchen. There will be furnace heat and open fire places. The mantels will be of tile. The exterior of the dwelling will be covered with brick veneer and rustic. The plans are complete.

Hollywood, Los Angeles Co., Cal.—Residence, 2 story and base, frame. Cost not stated. Architect, Elmer Grey,

Wright and Callender Bldg., L. A. Owner, Mr. Joslyn. The dwelling will contain in the neighborhood of 12 rooms and three baths. The interior finish will be largely of hardwoods. There will be a built in pipe organ and other special features. The exterior of the dwelling will be covered with cement plaster on metal lath. The architect has just started the preliminary drawings.

SCHOOLS.

San Francisco—School group, 3 or 4 buildings, reinforced concrete or brick, \$500,000. Architect, W. C. Hayes, Foxcroft Bldg., S. F. Owners, Wilmersding School of Industrial Arts. The owners are having plans prepared for a three-story and basement brick or reinforced concrete building, which is to be the first of a group of modern buildings which are to replace the present structures. The type of construction is still unsettled. The first building to be erected will be 80x115 feet. There will be steam heat and all other modern conveniences. The construction will be undertaken this year. The owners plan to follow the construction of this building by one new structure each year until the entire group is complete. A general contract will be let.

San Francisco—School foundation work. Cost not stated. Architect, Alfred I. Coffey, 1204 David Hewes Bldg., S. F. Owners, City and County of San Francisco. Bids were opened at the last meeting for the excavation and foundation work for the Academic Building of the Polytechnic group. For a complete list of these bids see under San Francisco in this issue.

Anaheim, Orange Co., Cal.—School, 2 story and base, frame. Cost not stated. Architect, A. C. Martin, Higgins Bldg., L. A. Owners, Roman Catholic Church. The building will be 104x55 feet and will be designed for a convent. There will be six class rooms, music rooms and dormitories. There will be steam heat. The exterior of the building will be covered with cement plaster. The architect is preparing plans.

Ione, Wash.—School, 2 story and base, brick and concrete, \$25,000. Architect, K. C. Sweet, Spokane. Owners, City of Ione. The architect has just been selected to prepare plans for this work and other than the fact that the building will be of the brick type no details can be given. Working drawings are now being prepared and bids will be called for shortly.

Monmouth, Ore.—School dormitory, 2 story and base, brick, \$50,000. Architects, Doyle, Patterson and Beach, Portland. Owners, Oregon State Normal School. The architects have just been commissioned to prepare plans for a building to accommodate 70 students. The building will probably be faced with pressed brick. The complete details of the building will be published later. The architects have only started the preliminary studies.

Newport, Wash.—School, 3 story and base, brick and steel, \$60,000. Architects, C. Lewis Wilson and Co., Northern Bank Bldg., Seattle. Owners, City of Newport. The building has been designed for a high school. There will

be in the neighborhood of 8 class rooms and a large auditorium. There will be steam heat. The exterior of the building will be faced with pressed brick. The plans will be out for figures about March 15th.

Athens, Ore.—School, 2 story and base, brick. Cost not stated. Architect, E. E. McClarn, Portland. Owners, City of Athens. The building will be 75x120 feet. There will be 16 class rooms and an auditorium. The building will have steam heat and a modern system of ventilation. There will be special rooms in the basement for manual training and domestic science. The exterior of the building will be faced with pressed brick. The plans will be completed in the course of the next few weeks and figures will be called.

Los Angeles, Cal.—School, 2 story and base, brick, \$50,000. Architects, Hunt & Burns, Laughlin Bldg., L. A. Owners, City of Los Angeles. The building will contain ten class rooms and an auditorium seating 400. There will be a central heating plant. The exterior of the building will be faced with cement plaster. The plans are complete and figures will be opened by the Board of Education on March 14th.

Riverside, Riverside Co., Cal.—School, 2 story and base, concrete. Cost not stated. Architect, A. C. Martin, Higgins Bldg., L. A. Owners, Roman Catholic Church. The building will be 64x76 and will contain six class rooms and a large auditorium. There will be steam heat. The exterior will be faced with cement plaster. The building is the first of a group of four buildings which are to be erected at this site. The plans are now being prepared.

Contracts Awarded.

Salem, Ore.—Schools, 2 2-story and base, brick, \$40,000 each. Architect, Fred Legg, Salem. Owners, City of Salem. Contractor, W. D. Pugh, Salem. Contract price, \$38,834 each. This contract does not include the heating.

San Gabriel, Los Angeles Co., Cal.—School, 1 story and base, frame, \$12,000. Architect, Paul V. Tuttle, L. A. Owners, San Gabriel School District. Contractors, Anderson & Murdoch, Glendale, general construction. Contract price, \$10,710. Machinery and Electric Co., L. A., heating and ventilating, \$825.

SEWERS, STREET WORK AND WATER SYSTEMS.

Maricopa, Kern Co., Cal.—Sewer system, \$20,000. Engineer, C. P. Jensen, Fresno. Owners, City of Maricopa. The engineer has been commissioned to prepare plans for a complete sewerage system for the city. None of the details of the work are as yet obtainable.

Bakersfield, Kern Co., Cal.—Sewer system, \$60,000. Engineer, C. P. Jensen, Fresno. Owners, City of Bakersfield. The city authorities have instructed the engineer to complete plans for this work. The funds for the building of the sewers are now available and no time will be lost in calling for bids on the construction. Complete details of the work can be had from either the City Clerk or from the engineer.

Centralia, Wash.—Water system,

\$300,000. Engineer, Frank C. Kelsey, Centralia. Owners, City of Centralia. The report of the engineer has been approved by the Trustees and the matter is to be brought up before the voters for approval. The plans provide for fourteen miles of 16 and 18 inch pipe. There is a strong element in favor of a municipal water plant and the work will undoubtedly be started at once.

STORES & OFFICE BUILDINGS.

San Francisco—Office building, 10 story and base, Class A construction, \$500,000. Architect, Benj. G. McDougall, Sheldon Bldg., S. F. Owners, Standard Oil Co. This work has been mentioned here several times before. The excavating and foundation work has been let and is now underway. The architect states that the plans and specifications for the general contract are now complete and that figures will be taken this week. Bids will be asked for on the general construction and on separate parts of the work.

San Francisco—Stores and lofts, 3 story and base, brick, \$10,000. Architect, John A. Ettler, 604 Mission St., S. F. Owner, H. E. Bothin. The work will be in the nature of an addition to the present building. The first floor will contain stores and the upper two floors will be arranged for lofts. There will be a freight elevator. The exterior of the building will be faced with pressed brick. The plans are complete and the work will be done by Day Labor.

Long Beach, Los Angeles Co., Cal.—Stores and apartments, 2 story and base, brick, \$25,000. Architects, Austin & Sedgwick, 18 Locust Ave., Long Beach. Owner, W. L. Campbell. The building will be 75x90 feet. The first floor will be arranged for three retail stores. The upper floor will contain living apartments. The exterior of the building will be faced with pressed brick. The plans are being prepared.

San Fernando, Los Angeles Co., Cal.—Stores and rooms, 2 story and base, brick. Cost not stated. Architect, A. C. Martin, Higgins Bldg., L. A. Owner, Henry Flynn. The building will be 50x92 feet. There will be stores on the first floor and 15 rooms and 6 baths on the upper floor. There will be a freight elevator and steam heat. The exterior of the building will be faced with pressed brick. Bids are now being taken.

Fresno, Fresno Co., Cal.—Stores and rooms, 2, 2 story and base, brick. Cost not stated. Architects, Starbuck & Clark, Fresno. Owners, Dr. J. C. Cooper and W. A. Bean. The two buildings will be identical in design. Each will have a frontage of 50 feet and a depth of 150 feet. There will be stores on the first floor and rooms above. There will be steam heat. The exteriors will be faced with pressed brick. The plans are complete and figures are being taken.

Fresno, Fresno Co., Cal.—Stores and rooms, 2 story and base, brick, \$19,000. Architects, Starbuck & Clark, Fresno. Owner, L. L. Cory. The building will be 65x110. There will be three stores on the first floor and living apartments on the second floor. The exterior will be faced with glazed brick. The architects are completing the working drawings.

Porterville, Tulare Co., Cal.—Stores and rooms, 2 story and base, brick, \$35,000. Architect, J. L. Roberts, Porterville. Owner, Mr. Monache. The building will be 90x116 feet. There will be four stores on the first floor and 27 rooms and 7 baths on the second floor. There will be a vacuum cleaning system. The exterior will be faced with pressed brick. The plans are complete and figures are being taken.

Contracts Awarded.

Bakersfield, Kern Co., Cal.—Stores, 1 story and base, brick, \$13,000. Architect, O. L. Clark, Bakersfield. Owners, J. B. Berges & Co. Contractor, S. G. Smart, Bakersfield. Contract price, \$12,955.

Los Angeles, Cal.—Business college, 2 story and base, brick, \$15,000. Architects, Milwaukee Building Co., Wright and Callender Bldg., L. A. Owners, Holman Business College. Contractors, Milwaukee Building Co., Wright and Callender Bldg., L. A. Contract price, \$15,000.

Seattle, Wash.—Stores, 3 story and base, brick and frame, \$30,000. Architect, Seattle. Owners, Bonney-Watson Co. Contractors, McGrath Construction Co., Northern Bank Bldg., Seattle. Contract price, \$27,000.

San Francisco—Stores and lofts, 6 story and base, reinforced concrete, \$60,000. Architects, Frye & Shastey, Monadnock Bldg., S. F. Owners, Blinn Estate Co. Contractor, George H. Stoffels, Pacific Bldg., S. F. Contract price, \$60,000.

SEALED PROPOSALS.

FURNISHING STEEL FILING CASES.

(Bids close March 18.)

NOTICE is hereby given that sealed bids will be received by the Board of Supervisors of the County of Los Angeles, State of California, up to 3 o'clock p. m. of March 18, 1912, for furnishing and installing eleven steel document filing cases in the office of the County Clerk, in the County Court House, in the City of Los Angeles, in accordance with plans and specifications on file in the office of the Board of Supervisors and open to the inspection of bidders. Copies of said plans and specifications may be obtained at the office of said Board of Supervisors.

The Board reserves the right to reject any and all bids not deemed advantageous to the county.

H. J. LELANDE, County Clerk.

CONSTRUCTING BRIDGE.

(Bids close March 26.)

SEALED bids will be received until 10 a. m., March 26th, for the construction of a reinforced concrete arch bridge, 1460 feet in length, 28-foot roadway and two 5-foot sidewalks, located in Pasadena. Estimated cost \$183,000. Plans and specifications can be obtained from Wadwell & Harrington, Kansas City, or the City Engineer, Pasadena, upon a deposit of \$20.00. The city reserves the right to reject any and all bids. Each bid must be accompanied with a certified check, draft or cashier's check, equal to ten per cent of bid. Further particulars in regard to bids and bidding blanks must be obtained from HEMAN DYER, City Clerk.

PROPOSALS FOR CONSTRUCTION.

(Bids close March 6.)

OFFICE of the Board of Public Works of the City and County of San Francisco.—Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 6th day of March, 1912, for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit:

The construction of a photographer's gallery on the roof of the Hall of Justice, JOSEPH L. MCCORMICK, Secretary.

(Bids close April 13.)

BUILDING, ETC.—Sealed proposals indorsed "Proposals for Administration Building" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m., April 13, 1912, and then there publicly opened, for the construction of an administration building at the naval station, Pearl Harbor, Hawaii. Plans and specifications can be obtained on application to the bureau or to the commandant of the naval station, Honolulu, Hawaii. H. R. STANFORD, chief of bureau.

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

Apartment House—3 story and base, frame, \$29,000. San Francisco. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner, Mrs. M. S. Shaw. This building will be 27x126 feet and will contain 12 apartments of three and four rooms each and bath. There will be steam heat, wall beds and elevator service. The interior finish will be of pine with some hardwood floors. The exterior of the building will be covered with brick veneer and shiplap. The architect is also preparing plans for a similar structure which will be erected for the same owner on an adjoining piece of property. The plans for one of the buildings are complete and the work will be done by Day Labor.

Apartment House—3 story and base, frame, \$10,000. San Francisco. Architect, none. Owners, C. J. and W. J. Keenan, 300 Webster St., S. F. The building has been designed to contain eighteen small apartments. The interior finish will be of pine throughout. There will be connecting baths and wall beds. The exterior of the building will be covered with brick veneer and shiplap. The plans are complete and the work will be done by Day Labor.

Apartment House—3 story and base, frame, \$8,000. San Francisco. Architect, none. Owner, James Stambaugh, 1282 Stanyan St., S. F. The building will be 28x98 and has been arranged for six apartments of three and four rooms and connecting baths. The interior finish will be of pine throughout. There will be gas grates. The entrance will be finished in tile. The exterior of the building will be covered with shiplap. The plans are in the hands of the owner and the work will be done by Day Labor.

Apartment House—1 story and base, brick and steel, \$45,000. San Francisco. Architect, August Nordin, Mills Bldg., S. F. Owners, Franklin Realty Co. The building will be erected on a corner lot and will contain forty apartments of the two and three room type. There will be steam heat, wall beds, elevator service and connecting baths. The interior finish will be of pine. The exterior of the building will be faced with pressed brick. The plans are in the hands of the owners and they will submit all parts of the work.

Apartment House—3 story and base, frame, \$25,000. San Francisco. Architects, Welsh & Carey, Metropolis Bank Bldg., S. F. Owners, Joseph Abrams et al. The building will contain thirty-six rooms arranged in suites of two and three rooms each and connecting baths. The interior finish will be of pine and hardwoods. There will be steam heat and probably elevator service. There will be wall beds. The exterior of the building will be covered with cement plaster. The plans are now being prepared.

Residence—2 story and base, frame, \$4,500. San Francisco. Architect, none. Owner, W. A. Savage, 1311 2nd St., S. F. The dwelling will contain seven rooms and bath. The interior finish

will be of pine with some hardwood floors. There will be open fire places with tile or brick mantels. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$4,000. San Francisco. Architect, none. Owner, H. G. Goepff, 450 Broderick St., S. F. The dwelling has been designed for an eight-room house with bath. The interior finish will be of pine throughout. There will be some oak floors. There will be open fire places and brick or tile mantels. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$3,000. San Francisco. Architect, none. Owner, W. L. Hemings, 1556 Hayes St., S. F. The dwelling will contain seven rooms and bath. There will be pine trim throughout with oak floors in the principal rooms. There will be open fire places with tile mantels. Tile will be used in the bath. The exterior of the house will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Church—1 story and base, frame, \$5,000. San Francisco. Architect, W. J. Wythe, Central Bank Bldg., Oakland. Owners, Proteroe Methodist Church. The building will contain the main auditorium and Sunday school rooms. The exterior will be covered with shingles. The architect is ready to receive figures on the work.

Laundry—2 story and base, frame, \$5,000. San Francisco. Architects, Fabre & Bearwald, Metropolis Bank Bldg., S. F. Owner, C. Lamayson. The work will be in the nature of the alteration to a two-story building and will consist of new plumbing, electric work and plastering. There will also be some exterior alteration. The plans are complete and figures are being taken.

Flats—2 story and base, frame, \$7,000. San Francisco. Architect, H. C. Smith, Humboldt Bank Bldg., S. F. Owner's name withheld. The building will contain two large and modern flats of six rooms each and bath. The interior finish will be of pine and redwood. There will be some hardwood floors. Open fire places will be built in the living rooms. The exterior of the building will be covered with shiplap. The architect is now taking figures on the work.

Flats—3 story and base, frame, \$5,000. San Francisco. Architect, E. A. Neumarkel, 918 Market St., S. F. Owners, Mr. and Mrs. A. F. Kruse. The building will be 25x59 and will contain three flats of five and six rooms each. The interior finish will be of pine and redwood. There will be some hardwood floors. There will be gas grates. The exterior of the building will be covered with shiplap. The plans are complete and the work will be done by Day Labor.

Flats—2 story, base and attic, frame, \$6,000. San Francisco. Architect,

Henry Shermond, Mills Bldg., S. F. Owner's name withheld. The building will be arranged for two flats and a garage. The interior finish will be of pine throughout. There will be open fire places. The roof will be finished for a sun room. The exterior of the building will be covered with shiplap. The architect is preparing the plans.

Flats—3 story and base, frame, \$5,000. San Francisco. Architect, Henry Shermond, Mills Bldg., S. F. Owner, Caroling L. Hunsbar. The building will be erected on a lot with a 17-foot frontage and a depth of 65 feet. There will be three four-room flats with baths. There will be open fire places with the mantels. The interior trim will be of pine with some hardwood floors. Tile and mosaic will be used. The exterior of the building will be covered with shiplap. The plans are complete and figures are being taken.

Hotel—4 story and base, brick and steel, \$40,000. San Francisco. Architect, R. J. Patcha, Phelan Bldg., S. F. Owners, Zeilerbach-Levison Co. The building will be erected on the "Waterfront." There will be stores on the first floor and a number of single rooms on the upper three floors. There will be steam heat and elevator service. The interior trim will be of pine. The exterior of the building will be faced with pressed brick. The plans are complete and the work is now being figured.

Hotel Additions—3 story and base, brick, \$40,000. San Francisco. Architects, George A. Streshley & Co., Balboa Bldg., S. F. Owner's name withheld. The work will consist of the addition of three stories to a present one-story brick building. The first floor will contain four stores and the upper floors in the neighborhood of 90 rooms. There will be a number of baths and toilets. There will be steam heat and elevator service. The interior trim will be of pine. The exterior of the building will be faced with cement plaster. The plans are being prepared.

School Group—3 or 4 buildings, reinforced concrete or brick, \$500,000. San Francisco. Architect, W. C. Hays, Foxcroft Bldg., S. F. Owners, Wilmerding School of Industrial Arts. The owners are having plans prepared for a three-story and basement brick or reinforced concrete building, which is to be the first of a group of modern buildings which are to replace the present structures. The type of construction is still unsettled. The first building to be erected will be 80x115 feet. There will be steam heat and all other modern conveniences. The construction will be undertaken this year. The owners plan to follow the construction of this building by one new structure each year until the entire group is complete. A general contract will be let.

School Foundation Work—Cost not stated. San Francisco. Architect, Alfred I. Coffey, 1204 David Hewes Bldg., S. F. Owners, City and County of San Francisco. Bids were opened at the last meeting for the excavation and foundation work for the Academic Building of the Polytechnic group. For a complete list of these bids see under San Francisco in this issue.

Office Building—10 story and base Class A construction, \$500,000. San Francisco. Architect, Benj. G. McDougall, Sheldon Bldg., S. F. Owners, Standard Oil Co. This work has been

mentioned here several times before. The excavating and foundation work has been let and is now underway. The architect states that the plans and specifications for the general contract are now complete and that figures will be taken this week. Bids will be asked for on the general construction and on separate parts of the work.

Stores and Lofts—3 story and base, brick, \$100,000. San Francisco. Architect, John A. Ettler, 604 Mission St., S. F. Owner, H. E. Bothin. The work will be in the nature of an addition to the present building. The first floor will contain stores and the upper two floors will be arranged for lofts. There will be a freight elevator. The exterior of the building will be faced with pressed brick. The plans are complete and the work will be done by Day Labor.

Contracts Awarded.

Hotel—7 story and base, reinforced concrete, \$100,000. San Francisco. Architects, Righetti & Headman, Phelan Bldg., S. F. E. Owners, George and Eva Metcalfe. Contractors, Mutual Construction Co., Monadnock Bldg., S. F. Contract price not stated.

Stores and Lofts—6 story and base, reinforced concrete, \$60,000. San Francisco. Architects, Frye & Schastey, Monadnock Bldg., S. F. Owners, Billan Estate Co., Contractor, George H. Stoffels, Pacific Bldg., S. F. Contract price, \$60,000.

City Bids Opened.

BIDS OPENED FOR THE EXCAVATING AND FOUNDATION WORK AT THE POLYTECHNIC HIGH SCHOOL BUILDINGS.

Sixteen bids were received at Wednesday's meeting of the Board of Public Works for the excavating and foundation work on the Academic Building of the new Polytechnic School. The figures show a wide range, owing to the difference in opinion among the bidders as to the amount of material to be removed and the difficulties to be encountered. Besides the bids for the excavating and foundation work on the above building many figures were submitted for grading and paving of small contracts. The following is a complete list of the figures submitted on the school work:

Excavating and Foundation Work	
Academic Building, Polytechnic School.	
P. E. Lechner.....	\$36,500
Caldwell & Co.....	35,000
J. L. McLaughlin.....	34,400
Carl H. Peterson.....	34,400
McLean, Hoggans, Aden.....	40,449
Clinton Fireproofing Co.....	36,800
Rickon-Ehrhart Co.....	38,800
C. Rouse.....	32,879
Frank M. Garden & Co.....	38,600
Elmer Carlson.....	42,615
J. M. Carr.....	29,893
Wm. A. Newsom.....	41,000
O. C. Holt.....	39,794
Richard Keating & Son.....	42,230
W. H. Henning.....	39,933
Chas. Wright.....	55,365

BIDS FOR THE STRUCTURAL STEEL FOR PUMPING PLANT NO. 2 OPENED AND CONTRACT AWARDED.

The Board of Public Works opened

bids presented by five firms for the structural steel work of Pumping Plant No. 2, which is to be erected at Port Mason. The bid of the Judson Mfg. Company was found to be the lowest and a contract was awarded to that firm for the work. One set of paving bids and one set of sewer bids were also opened. The following is a list of the figures received:

Structural Steel, Pumping Plant No. 2.	
1 Judson Mfg. Co.....	\$9145
2 Dyer Bros.....	9190
3 Berkeley Steel Co.....	9350
4 Pacific Rolling Mills.....	8926
5 Raiston Iron Works.....	9650

OAKLAND AND ALAMEDA COUNTY.

Apartment House—3 story and base, frame, \$11,566. Oakland, Cal. Architect, John Carson, Baron Bldg., Oakland. Owner, G. H. Ludinhouse. The building will contain nine apartments arranged in two and three room suites with private baths. There will be wall beds and a central heating system. The interior finish will be of pine throughout. The exterior of the building will be covered with cement plaster on metal lath. The plans are complete and the architect is taking figures.

Apartment House—3 story and base, frame. Cost not stated. Oakland, Cal.

Architect, Clay N. Burrell, Central Bank Bldg., Oakland. Owners, First Federal Trust Co. The building will contain in the neighborhood of twenty-four rooms arranged in two-room suites. The interior finish will be of pine. There will be a warm air heating system. The exterior of the house will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Apartment House and Stores—2 story and base, frame, \$5,000. Oakland, Cal. Architect, Claude B. Barton, 460 13th St., Oakland. Owner, J. R. Tallman. The building has been designed for two stores on the first floor and a number of small apartments on the upper floor. There will be pine interior finish and open fire places. There will be several baths. The store fronts will be of plate glass. The exterior of the building will be covered with shiplap. The architect is preparing the plans.

Bungalow—1 story and base, frame, \$2,500. Oakland, Cal. Architect, none. Owners, Anderson Bros., Oakland. The dwelling has been designed for a five-room house with bath. The interior trim will be entirely of pine. The floors of the living room and dining room will be finished in oak. There will be a large open fire place with brick or tile mantel. The exterior of the bungalow will be covered with cement plaster on metal lath. The work will be done by Day Labor.

Bungalow—1 story and base, frame, \$2,000. Berkeley, Alameda Co., Cal. Owner, C. J. A. Mattson, 1609 Grant St., Berkeley. The dwelling will contain six rooms and bath. There will be pine trim, oak floors and open fire places. The mantels will be of tile. The exterior of the bungalow will be covered with shingles. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$2,560. Oakland, Cal. Architect, George W. Kaiser, 5322 E. 10th St., Oakland. Owner, L. T. McNab. The dwelling has been designed for an eight-room house with bath. The interior finish will be of pine and redwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the baths and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Residence Alterations—\$2,000. Berkeley, Alameda Co., Cal. Architect, Leola Hall, 2618 College Ave., Berkeley. Owner, L. E. Snow. The work will consist of the alteration of a twenty-three-room house. There will be new plumbing and electric work. The exterior will also be altered. The plans are complete and the work is to be done by Day Labor.

Bungalow—1½ story and base, frame, \$2,000. Alameda, Alameda Co., Cal. Architect, George R. Knox, 240 Estudillo Ave., San Leandro. Owner, W. J. Locke. The bungalow has been designed for a seven-room house. The interior finish will be of pine and redwood. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the kitchen and bath. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are

complete and figures are being taken.
Bungalow—1 story and base, frame, \$3,500. Berkeley, Alameda Co., Cal. Architect, none. Owner, H. L. Coggins, 2618 College Ave., Berkeley. The dwelling has been designed for a five-room house with bath. The interior finish will be of pine. There will be some oak floors. There will be open fire places with brick or tile mantels. The exterior of the bungalow will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$5,000. Berkeley, Alameda Co., Cal. Architect, none. Owner, C. L. McFarland, 2360 Prospect Ave., Berkeley. The dwelling has been designed for an eight-room house with bath. The interior finish will be of redwood and pine. There will be furnace heat and open fire places. The mantels will be of brick. There will be some hardwood floors. Tile will be used in the baths and kitchen. The exterior of the dwelling will be covered with shingles. The plans are in the hands of the owner and he is now taking figures on the work.

Residence—2 story and base, frame, \$5,000. Oakland, Cal. Architect, none. Owner, W. C. Bell, 658 Greenwich St., S. E. The dwelling will contain eight rooms and bath. The interior finish will be of pine and redwood with some oak floors. There will be furnace heat and open fire places. The mantels will be of tile or brick. Tile will be used in the bath and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$7,000. Oakland, Cal. Architect, none. Owner, Lester Reiff, Grand Ave. and Boulevard Ave., Oakland. The dwelling has been designed for a ten-room house and bath. The interior finish will be of pine and redwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick and tile. Tile will also be used in the baths and kitchen. The exterior of the residence will be covered with cement plaster on metal lath. The plans are in the hands of the owner and he is taking figures on the work.

Residence—2 story and base, frame, \$2,250. Berkeley, Alameda Co., Cal. Architect, R. A. Hutchison, 470 13th St., Oakland. Owner's name not given. The dwelling will contain seven rooms and bath. The interior finish will be of pine with hardwood floors in the principal rooms. There will be open fire places with tile or brick mantels. The exterior of the dwelling will be covered with shingles. The architect is preparing the plans.

Bungalow—1 story and base, frame, \$2,000. Fruitvale, Alameda Co., Cal. Architect, R. A. Hutchison, 470 13th St., Oakland. Owner, Mrs. Green. The bungalow will contain six rooms and bath. The interior finish will be of pine and redwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick or tile. Tile will be used in the bath and kitchen. The exterior of the bungalow will be covered with shingles. The architect is preparing the plans.

Residence—2 story and base, frame,

\$4,500. Berkeley, Alameda Co., Cal. Architect, W. H. Rutehoff, First National Bank Bldg., Berkeley. Owner, Robert Van Bokkelen. The dwelling has been designed for an eight-room house with bath. The interior finish will be of pine and redwood. There will be furnace heat and open fire places. The mantels will be of tile or brick. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Residences—2, 2 story and base, frame, \$3,000. Oakland, Cal. Architect, H. A. Hutchison, 470 13th St., Oakland. Owner's name withheld. The dwellings will contain seven rooms and bath each. There will be pine and redwood interior finish, open fire places and brick and the mantels. There will be some hardwood floors. The exteriors of the dwellings will be covered with cement plaster on metal lath and with shingles. The plans are complete and figures are being taken.

Hungtong—1 story and base, frame, \$2,500. Oakland, Cal. Architect, R. A. Hutchison, 470 13th St., Oakland. Owner, T. S. Fitzpatrick. The dwelling has been designed for a five-room house with bath. The interior finish will be of pine with some hardwood floors. There will be a large open fire place with tile or brick mantel in the living room. The exterior of the bungalow will be covered with shingles. The plans are complete and figures are being taken.

SAN JOSE AND THE SANTA CLARA VALLEY.

Residence—2 story and base, frame
 \$4,000. Los Gatos, Santa Clara Co., Cal.
 Architect, F. T. Swain, Mutual Bank
 Bldg., S. F. Owner, W. H. Little. The
 dwelling will contain in the neigh-
 borhood of eight rooms and bath. The
 interior finish will be of pine and red
 wood. There will be some hardwood
 floors. There will be furnace heat and
 open fire places. The mantels will be
 of brick. Tile will be used in the bath
 and kitchen. The exterior of the res-
 idence will be covered with cemen-
 plaster on metal lath. The plans are
 complete and figures are being taken

Country Club—2 story and base, re-
 inforced concrete, \$7,000. Beresford
 San Mateo Co., Cal. Architects, G. Al-
 bert Lansburgh and Sylvain Schnait-
 tacher, associated, Gunst Bldg. S. F.
 Owners, Beresford Country Club. An
 announcement has just been made of
 the selection of these architects to pre-
 pare plans for one of the most exten-
 sive clubs on the peninsula. The de-
 tails of the construction cannot be
 given at this time as the architect
 have not started the working draw-
 ings. The owners will probably con-
 sider both the reinforced concrete on
 brick types of construction. Further
 details will be given as the drawing
 progress.

MARIN, CONTRA COSTA AND SONOMA COUNTIES.

Bathing Pavilion—2 story and base, concrete and frame, \$29,000.

San Rafael, Marin Co., Cal. Architect, Thomas O'Connor, San Rafael. Owners, City of San Rafael.

The architect has submitted a plan for a public bath house to the City Trustees which has met with favorable consideration. The plan provides for a building 190x211 feet. There will be in the neighborhood of 125 bath rooms, a large swimming tank and other modern features. The trustees will probably include the cost of construction on a bond issue which is about to be submitted to the voters.

Bungalow—1 story and base, frame, \$2,000.

Richmond, Contra Costa Co., Cal. Architect, J. G. Oghorn, Richmond. Owner, H. Anderson. The bungalow will contain six rooms and bath. The interior trim will be of pine throughout. There will be open fire places with tile mantels. The exterior of the bungalow will be covered with rustic. The plans are complete and figures are being taken.

Apartment House—2 story and base, brick and steel, \$40,000.

Fresno, Fresno Co., Cal. Architect, Edward T. Poulkes, Crocker Bldg. S. F. Owner, H. H. Bris. The building will contain thirty-five apartments of two and three rooms each with connecting baths. There will be steam heat and elevator service. Wall beds will be used. There will be a vacuum cleaning system. The interior finish will be of pine and hardwood. The exterior of the building will be faced with pressed brick and terra cotta. The architect is now taking figures on the work.

Church—Brick construction, \$20,000.

Hanford, Kings Co., Cal. Architect, J. Carl Thayer, Fresno. Owners, First Presbyterian Church of Hanford. The building will have a main auditorium with a seating capacity of 500, eight Sunday school rooms, library and parlor. There will be a central heating system. The exterior of the building will be faced with pressed brick. The architect has just been commissioned to prepare the plans.

Residence—2 story and base, frame, \$7,000.

Fowler, Fresno Co., Cal. Architects, Starbuck & Clark, Fresno. Owner, M. L. Harris. The dwelling has been designed for an eight-room house with two baths. The interior finish will be of pine and redwood with some hardwood floors. Tile will be used in the baths and kitchen. There will be furnace heat and open fire places. The mantels will be of tile. The exterior of the dwelling will be covered with brick veneer and rustic. The plans are complete.

Sewer System—\$20,000.

Maricopa, Kern Co., Cal. Engineer, C. P. Jensen, Fresno. Owners, City of Maricopa. The engineer has been commissioned to prepare plans for a complete sewerage system for the city. None of the details of the work are as yet obtainable.

FRESNO, MODESTO, STANISLAUS AND CENTRAL ERN CALIFORNIA.

Apartment House—2 story and base, brick and steel, \$40,000.

Fresno, Fresno Co., Cal. Architect, Edward T. Poulkes, Crocker Bldg. S. F. Owner, H. H. Bris. The building will contain thirty-five apartments of two and three rooms each with connecting baths. There will be steam heat and elevator service. Wall beds will be used. There will be a vacuum cleaning system. The interior finish will be of pine and hardwood. The exterior of the building will be faced with pressed brick and terra cotta. The architect is now taking figures on the work.

The building will be 17x119 feet and will contain 41 rooms arranged in twenty suites of two rooms and bath. There will be wall beds and steam heat. The exterior of the building will be faced with pressed brick. The architects are preparing the plans.

Apartment House—4 story and base, brick and steel, \$75,000. Long Beach, Los Angeles Co., Cal. Architect, none. Owner, Scott W. Alexander, O. T. Johnson Bldg., L. A. The owner has plans for a building 56x150. There will be stores on the first floor and apartments above. There will be steam heat and elevator service. The exterior will be faced with pressed brick. The owner is now calling for figures on all parts of the work.

Apartment House—2 story and base, frame, \$14,000. Redondo Beach, Los Angeles Co., Cal. Architects, Croner & Croner, California Bldg., L. A. Owner, C. J. Beal. The building will be 42x126 feet. There will be twenty apartments of two and three rooms each with private baths. There will be wall beds. The exterior of the building will be covered with cement plaster on metal lath. The plans are being prepared.

Apartment House—1 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architect, Elmer C. Andrus, Wright & Callender Bldg., L. A. Owner, Jesse Raines. The building will be arranged for 51 apartments of two and three rooms each. There will be steam heat, wall beds, private bath rooms and vacuum cleaning system. The exterior of the building will be faced with pressed brick. The plans are complete and the architect is taking figures.

Bridge—Concrete type. Cost not stated. Los Angeles, Cal. Engineering Dept., Board of Public Works, L. A. Owners, City of Los Angeles. The Board of Public Works has been instructed to prepare plans for a bridge over the Arroyo Seco at Cypress Ave. Working drawings will be completed shortly.

Pier—Reinforced concrete type. Cost not stated. San Diego, Cal. Harbor Engineer E. M. Capps, San Diego. Owners, City of San Diego. The dock will be of reinforced concrete, and will extend 800 feet into the bay, being supported by 320 reinforced concrete piers. The surface will be of asphalt. The pier will be covered with a galvanized iron shed, supported by a steel frame work, with 24 steel rolling doors on each side. The plans and specifications will be completed in about ten days, and will then be submitted to the City council for approval.

Harbor Work, Pier, Etc.—Cost not stated. Los Angeles, Cal. City Engineer Homer Hamlin, L. A. Owners, City of Los Angeles. The engineer has submitted estimates on two types of reinforced concrete construction, one with and one without sheet piling. The estimate without sheet piling is \$120,732 and with sheet piling is \$118,882.

Church Additions—Brick construction. Cost not stated. Anaheim, Orange Co., Cal. Architect, Albert C. Martin, Higgins Bldg., L. A. Owners, Roman Catholic Church of Anaheim. The present building will be practically rebuilt. The new portion will be 72x55 feet. There will be a new heating system installed. The exterior will

be faced with blue pressed brick. There will be art glass windows. The plans are being prepared.

Church—2 story and base, brick and frame, \$20,000. Fullerton, Orange Co., Cal. Architect, Fred H. Eley, Harvey-Pinley Bldg., Santa Ana. Owners, Baptist Church of Fullerton. The building will be 70x85 and will have a seating capacity of 750. There will be fifteen Sunday school rooms, study and parlors. The edifice will be heated by a warm air system. The exterior will be covered with cement plaster. The architect is preparing the working drawings. Work will be started in April.

Church—2 story and base, brick and concrete, \$75,000. Riverside, Riverside Co., Cal. Architect, Myron Hunt, Union Trust Bldg., L. A. Owners, First Congregational Church of Riverside. This work has been mentioned here before when the architect was first selected. The working drawings are now complete and figures are being taken. The building will be 160x88 feet. There will be a steam heating system. The exterior will be faced with pressed brick.
